While I will agree that a lot of college stations do sound very rough ei. non-proffessional, I wouldn't call it the norm. Up here in Plymouth, NH (You are listening to 91.7 FM, WPCR, Plymouth Chrysler Dodge) or I should say PSC, we have been striving for more proffessionalism.

Currently we have a semester long training course that a lot of people have likened to pledging. Weekly meetings, Production Room training, On Air training and a crash course in alphabetization (hey it's very important).

I'm now just the Production Manager (I had three exec. board positions at one point. They gave News Dir. to a Non-trad, she's doing a great job, and we kinda killed the Sports Dir. Position). I spend about 8 hours a week on air. 10 in the Production room. And 4 hours doing both at the same time. (When this song ends hit this button, I'll be back in 4 minutes. What did you do to my Tascam?)

I think that we we have done a bang up job with the resources we have had at our disposal. (At one time the shoved us in the dusty basement of the all female dorm. Half our DJ's at the time found better things to do.) Everyone should try running a radio station on a budget of $25,000 a year. It's definately a trip.

College Radio is an experience in itself. Every show I try to get a little better in the hopes that I can possibly land a job somewhere after graduation. (Which was supposed to be in 96 but I'm currently looking at 97). Our Music Dir. did an internship this past summer in Hartford, CT. Another DJ went to a Boston station. And a WPCR alumn has worked at Triple X in Burlington, VT.

They have come back and have impressed upon us the importance of sounding good over the air. (Uhmmm...That was "Echobelly" with...what was the song...I can't remember...here's Bush.)
I've found that in the past two years we've managed to weed out the wannabe's from the true DJ's by requiring such an intense training regimen.

Of course this also means the Exec. Board Generally have little to no life outside the station.

Many of the things expressed in this debate (if you can call it that) are interesting to say the least. I'm a college broadcaster in Canada, I work for CFMU, MacMaster University's campus station. While we may have some odd characters siting in master we also have some exceptional talent. Many have worked in commercial radio, including myself, some even went to college to learn the trade. The one thing we all recognize is that we are a different entity, that we can NOT sound like a commercial station, becasue our listeners won't tolerate it, commercial radio won't tolerate it, and the government wo't tolerate it. That does not mean we can't adapt to the commercial relm. Then anain why would I want to after all I did get into this for a reason, to be on the air, not replaced by technology. One other note, I am a disabled person. So far the only mediumthat has looked past the glasses has been campus radio.Greg Skinner

## 2779. Crazy prices for FM stations

} jgallagh@interserv.com wrote;
}
} The recent announcement that Boston's WKLB is being
} sold for $ 35 million to Evergreen is truly shocking.
} You need to sell a lot of spots for $ 70-80 a pop to justify
} that kind of price-tag (which is what I hear :60 second
} spots can be had on the Boston country station lately).
}
} In talking with a few other people in the VC finance community
} recently, there is a consensus that the high priced days of
} FM properties is over as everyone is waiting to see what
} effect the new technologies will have.
}
} I read Stereo Review magazine each month, and in every
} issue someone takes a shot at FM radio with a comment
} like: "in a few years FM stations may disappear as
} satellite signals dominate home listening...".
}
} The relatively poor quality of the FM signal vs. the
} CD-quality of C-band and DBS satellite transmissions
} makes the playing field very uneven as consumers are
} quickly turning to the satellite technology.
}
} (A friend of mine who installed my c-band dish a few
} years ago tells me he is now booked three months
} in advance for installations of the both the 18" dish
} and 10' dish systems.)

Here is the angle nobody is mentioning with the recent move toward no-restrictions on signal purchases and the resulting, mind-boggling price tags.

When IBOC digital hits the airwaves in earnest, each of these FM stations will be capable of transmitting many different programs at the same time, plus narrow-band digital traffic such as pagers, stock quotes and stuff that now uses SCA subcarriers.

So, in effect, this move to total acquisition of major signals at ridiculous price tags is not as absurd as it seems. If a single FM signal cat transmit a half dozen different hi-fi stereo channels plus several narrow band data channels, that sky-high price tag will not seem so high. I mean even at the $35 million (which is reallllly high), if they get 6 stereo pairs on the signal, that is like buying 6 stations for that $35 mil. Add data paths and you got quite a sweet deal in the long run.

Now multiply that by owning several FM's in the market and you can see why these large communications firms don't blink an eye while laying down a king's ransom for what we now see as a single programming path.

Expect the same with television. Even AM stations can transmit several signals (though not as many) at the same time with digital.

It's like buying a the property of some hillbilly for three times the market value, but not mentioning the uranium or oil deposits underneath. Once the property is bought and developed, it will never be available again.

Our college station (WUTM 90.3 FM) is currently in need of several pieces of equipment. We don't have much of a budget so our spending is limited. If you have any of the following laying around, not in use; and would like to possibly donate them to a worthwhile cause... please e-mail me.

1) Recording cart machines.

2) Carts (preferably in good working condition).

3) Studio control board with slider pots (we are currently using control boards with knob pots; and would like to make the switch over to sliders...)

Once again, if you or your station have any of this equipment and would consider donating it to our station, please e-mail me. Thank you.

Here's an article I came across in an online publication. Does anyone know how FRB and Stephen Dunifer are doing?

---

Magazine: Reason

Title: Don't touch that dial

Free Radio Berkeley takes on the FCC - and official history

On January 20, 1995, for the first time in the history of the Federal Communications Commission, a federal judge refused to grant the agency an injunction to shut down an unlicensed radio station. The station is Free Radio Berkeley, a low-power FM operation started by broadcast engineer Stephen Dunifer in April 1993. Citing constitutional concerns, U.S. District Court Judge Claudia Wilkin has allowed Dunifer to continue broadcasting until she hears his administrative appeal in late September.

For 43-year-old Dunifer and his attorney, Louis Hiken, the heart of the matter is freedom of speech and democratic access to the airwaves. In a country dominated by media conglomerates, they argue, low-cost, low-power "micro radio" offers the little guy an opportunity to be heard - or would, if the FCC would legalize it. "America is made up of individuals, and they should have a right to speak," says Hiken. "And not just in their living rooms."

For the FCC, the case represents nothing less than a choice between order and chaos. The agency claims that Dunifer's pirate broadcasts have interfered with other stations' signals, and that a less-regulated system would only be an invitation to a complete breakdown of radio order. What Dunifer and other micro broadcasters are doing, says FCC attorney David Silberman, amounts to "anarchy of the airwaves."

The case reverberates far beyond the Bay area and the government's attempt to shut down a lone radio pirate. United States v. Stephen Paul Dunifer marks the crossroads where participatory technologies meet governmental controls that stifle the free expression they purport to facilitate. Rogue broadcasters such as Dunifer do more than challenge the FCC's current regulatory powers: They raise serious doubts about a state-sanctioned interpretation of history that views government control as the necessary response to all emergent forms of technology. Far from vindicating government involvement in broadcast licensing, the origins of commercial radio in the 1920s suggest that the state created the very chaos it seeks to enjoin.

In the two years since it was launched, Free Radio Berkeley has increased its airtime from three hours a week to 24 hours a day, attracting about 40

volunteers and a growing listenership in the process. Its music programming isn't all that different from that of a free-form college station, but its spoken-word broadcasts are close to unique. Besides community-oriented news and left-oriented commentary (including programs too controversial for KPFA, the local Pacifica outlet), Free Radio Berkeley offers its listeners frontline reports on other free-radio experiments around the world from Chiapas to Tokyo to Springfield, Illinois.

Dunifer considers his station part of a worldwide movement. He scorns not only corporate radio but also mainstream non-commercial broadcasting, dismissing it for its increasing political correctness and its reliance on government subsidy and corporate underwriting. "If grassroots radio is doing its job, it should be able to support itself," he declares.

Much of what Dunifer calls "grassroots radio" others would call "pirate radio." Pirate radio, of course, has existed for as long as there have been radio regulations to defy. The most famous ether pirates are the Jolly-Roger entrepreneurs behind Radio Caroline, Radio London, and the other offshore stations that challenged the BBC's staid programming in the 1960s with the latest rock sounds. Although the British government eventually drove them off the air, the BBC adopted its own pop programs in response to the competition. Today, within the subculture of shortwave hobbyists, there is a sub-subculture of illegal clandestine broadcasters whose programming ranges from counterculture comedy to neo-Nazi rants.

Micro radio - a blanket label for stations under 30 or so watts of power - is officially sanctioned in some nations, including Italy and Japan, where Sony and other companies sell relatively inexpensive "Community FM Sets" that include all the equipment necessary to start broadcasting. In other countries, such as Argentina, regulatory loopholes allow for a wide range of radio activity. Low-power micro radio, almost by definition, offers listeners material unavailable through other channels. As Radio World magazine characterized the Japanese micro broadcasters, "Unlike established radio stations that try to please all tastes, the low-wattage FM stations are doing all sorts of things the large stations would never dream of."

Whether fully legal, semi-legal, or explicitly forbidden, micro radio is often overtly political. In France, for instance, guerilla stations began broadcasting in 1977; future French President Francois Mitterand was involved in the Socialist Party's clandestine Radio Riposte. In the former East Bloc, samizdat radio and TV outlets such as East Germany's Kanal X evaded state censorship to present alternative news programming. In Argentina, over 2,000 small FM stations have sprung up in the country's shantytowns and poor rural areas over the last decade, offering community-oriented programming from almost every conceivable political point of view.

In the United States, micro radio remains strictly verboten, even though the technical cost of going on the air - now a couple hundred dollars plus the monthly power bill - has been within most Americans' reach since the mid-1980s. Because of the current regulatory framework, however, the legal cost outstrips the technical one: almost $3,000 for a license, plus $100,000

or more in startup costs. And except in Alaska, the FCC doesn't issue licenses to stations below 100 watts, which raises startup and power expenses still further.

The 100-watt rule went into effect in 1980. Although there were several reasons for the change, the most significant was pressure from the Corporation for Public Broadcasting. The CPB persuaded the FCC that eliminating 10-watt Class D non-commercial stations would clear the way for larger, more "professional" National Public Radio-style outfits.

The effect was not only to artificially restrict access to the airwaves, but to ensure that those who did get onto the air, having risked more money in the enterprise, were less likely to experiment or try anything new. The latter problem was compounded by FCC indecency regulations: Programming that raises few eyebrows in a bohemian college town might attract listener complaints in more conservative environs that previously couldn't receive the offending signal.

Anti-micro radio sentiments still run strong among public broadcasters. "I'd like to see some of these pirates get roasted," says Fred Krock, engineering supervisor at KQED, San Francisco's outlet for NPR. "Listeners to this station should have a right to interference-free listening."

Krock neatly summarizes the most powerful argument the FCC and other critics have raised against micro stations: that they interfere with other stations' signals.

But although KQED is one of the stations that the FCC claims has received interference from Free Radio Berkeley, the KQED legal department says the station itself made no complaint; it must have originated with a listener or, more likely, the FCC itself.

Whatever the source of the complaint, Krock's patience has been drained by past interference problems. Once, he recalls, a religious network's local translator was blocking KQED's signal. Rather than cooperate in fixing the problem, the offending station suggested they resolve the dispute through prayer. If Dunifer is standing in the way of KQED's - or anybody else's - broadcasts, Krock concludes, Free Radio Berkeley should be shut down.

But for Hiken, Dunifer's lawyer, interference is a red herring. "The whole idea of micro radio is to not interfere. It's to communicate with people. If you're a small broadcaster and you go on the same frequency as a major broadcaster, you don't interfere - you get drowned out. If you have bad filtering or bad harmonics, that might be a problem, but that can be fixed."

Beverly Baker, chief of the FCC's Compliance and Information Bureau - the agency's investigative arm - isn't convinced by Hiken's scenario. "If they're both on the same channel, there's also a chance that both won't be heard," she argues. Technologically speaking, she's right. A one-watt station might be drowned out; a 30-watt station can cause problems. And Dunifer hasn't been limiting himself to one watt.

Sorting out the interference debate is hard, because there are really two issues at stake. First is the concrete question of whether or not Free Radio Berkeley is regularly interfering with other stations' signals. Dunifer insists that he isn't. Nobody has complained to him about interference, he says. And if they do, he'll immediately shut his transmitter down long enough to fix the problem.

"The only people who've complained are the FCC themselves," claims Hiken. "They've driven up right next to the transmitters and reported that they're receiving unlicensed broadcasts on someone else's frequency."

Hiken's accusation is bolstered by the FCC's response to a Freedom of Information Act request by The Conspiracy, the newsletter of the San Francisco Bay Area chapter of the National Lawyers' Guild. In mid-1994, The Conspiracy requested the origins, dates, and details of stations' complaints against Dunifer's broadcasts.

In its October 1994 reply, the FCC explained that "several informal inquiries or complaints were received from local broadcast engineer and consultant sources who either saw articles in the local newspapers, heard the broadcasts themselves, saw one of Mr. Dunifer's flyers, had read Mr. Dunifer's internet postings, or had seen or heard about the Commission's May 1993 monetary forfeiture action issued against Mr. Dunifer." Furthermore, "these contacts were made by telephone or in person,... no written records of the inquiries were made, and...the individuals involved expressly requested confidentiality." In other words, as of October 1994, all the complaints related to the fact that Dunifer was making unlicensed broadcasts, and not to specific instances of interference.

Have there been problems since October? Baker and Silberman of the FCC both cite a recent complaint by KFOG, an "adult rock" station in San Francisco. A telephone conversation with KFOG's program director draws a blank; he suggests I speak with the legal department of the station's parent corporation, Susquehanna, in York, Pennsylvania. There, one lawyer passes me on to another lawyer, who directs me to yet another lawyer, who says he isn't the person I should be speaking with.

Eventually, the origin of the complaint emerges: a letter dated May 2, 1995, sent from Susquehanna Senior Vice President Charles T. Morgan to FCC General Counsel William E. Kennard. The letter - sent from York, not San Francisco - appears to have been prompted by FCC prodding. "The existence," writes Morgan, "of Free Radio Berkeley and other so called 'Pirate Radio' operators in the San Francisco Bay area was a point of discussion at an FCC panel at the recent [April 1995] NAB [National Association of Broadcasters] convention in Las Vegas. Ms. Beverly Baker...was a member of that panel and stated that to her knowledge 'the FCC had not received any complaints concerning these illegal operations.' After this panel discussion, I discussed this matter with members of the Commission's staff who suggested that I direct this letter to you...."

As with the earlier FCC response, the bulk of Morgan's complaints concern the legal status of Free Radio Berkeley, not interference. Most of his evidence involves Dunifer's provision of equipment and advice to other

illegal stations, via mail, Internet, and face-to-face workshops. As Morgan says, his primary intent is to document "the existence of these illegal operations and their total disregard for the FCC and its authority...the blatant attitude and complete disregard for federal laws that is apparent in the actions of Stephen Dunifer and his associates."

Nonetheless, Morgan does make some disturbing allegations - not so much his claims of interference (the letter lists just two listener complaints, only one of which involves KFOG), but the assertion that Dunifer simply isn't a micro broadcaster at all. Free Radio Berkeley's transmitting power, claims Morgan, is actually between 100 and 150 watts. Dunifer denies this. The question will no doubt be debated - and possibly resolved - at Dunifer's hearing.

Whether or not this particular pirate is guilty of stepping on other stations' corners of the spectrum, the second question remains: Are micro stations any more likely to block signals than larger outfits?

The answer is straightforward: no. Indeed, Dunifer argues that it's the high-watt operations that are the real problem. "The big stations like KQED can blast the front ends off other stations in the area," claims Dunifer.

KQED engineer Krock approaches the question from another point of view: "As I understand it, what the pirates would like to do is increase the number of broadcast channels in use. The problem with this is that the broadcast allocations in this country are based on allowing the use of inexpensive receivers by the general public. What appears to be a hole in the FM broadcast band may be there to accommodate the shortcomings of inexpensive receiver design. It would be possible to put more stations onto the broadcast band, but that would require the use of more expensive, more sophisticated radios by the public. And I haven't heard any of the pirates suggesting where this money should come from."

In other words, cheap radios may make reception problems more likely. "Most Walkman-type receivers have trouble separating existing FM stations," says Krock.

Hiken doesn't buy it. For one thing, he argues, he and Dunifer aren't necessarily asking for the creation of more spectrum space; they'd be happy for the FCC simply to allocate a certain portion of the spectrum for micro radio, much as it reserves part of the spectrum for educational stations such as KQED.

But if Krock wants to play the spectrum-scarcity game, so can Hiken: "If you're going to have a megabroadcaster like KQED, that might preclude not just one, but 25 stations from going on the air. In San Francisco, with its hills, you could have seven micro stations at once on one frequency without interfering with each other." In short, Hiken asks, if you're going to throw someone off the air, why go after Dunifer? KQED is a fatter target.

In fact, a major reallocation of broadcast space is hardly necessary to accommodate both Free Radio Berkeley and a KQED listener's Sony Walkman. In radio, supply can spur demand; consumers purchase new equipment when it

makes sense to buy it. When the Japanese government ended its broadcast monopoly in 1950, the market for radio and TV receivers boomed as the new stations produced material audiences wanted. Before, there hadn't been a good reason to spend more. And, of course, as production increased to meet the new demand, prices began to fall.

When the FCC talks about interference, it isn't just attacking one pirate who may or may not be cutting in on other stations' signals. It's raising the specter of chaos. "This opens up such a can of worms," government lawyer Silberman told Judge Wilken after she refused to grant the FCC its injunction. "You're giving carte blanche for this group of people to operate a radio station without a license."

This may seem a bit coy. Hiken and Dunifer are not demanding an end to broadcast licensing - they're trying to undo the 100-watt rule. Still, in interviews, Dunifer does ruminate freely about an FCC-free world. "Anything that comes with a license comes with other baggage," he told Spin magazine. "The real issue is that the micro community itself can be self-regulated. If there are disputes, why do we need intervention at the federal level? If someone is being really outrageous, you can resort to simple legal tort action."

Well then: What would the airwaves be like without licensing? Would we have Dunifer's self-regulated spectrum or the chaos described by government officials? The early 1920s, a period in which a substantial number of radio stations had gone on the air but before the Federal Radio Commission - the FCC's predecessor - was created by the Radio Act of 1927, provides some context.

Traditional histories of the period describe it as a time of radio gone ga-ga. The Department of Commerce handed out licenses without care for spectrum scarcity, the story goes, and the secretary of commerce (at the time, Herbert Hoover) was unable to hold the line against interference. Nineteen twenty-six ushered in what's been called the "Breakdown of the Law" period, during which the airwaves degenerated into complete chaos. Then Congress created the Federal Radio Commission, which undertook the long-overdue task of reducing the number of licenses to fit the available spectrum.

Recent scholarship has shown this history to be almost entirely incorrect. Since Ronald Coase's classic Journal of Law and Economics article of 1959, "The Federal Communications Commission," most economists have recognized that a more rational solution to the problems of the "Breakdown of the Law" period would have been to recognize property rights in the broadcast spectrum and treat interference, as Dunifer suggested to Spin, as a tort. Newer research - notably, UC-Davis economist (and REASON contributing editor) Thomas Hazlett's 1990 article, "The Rationality of U.S. Regulation of the Broadcast Spectrum," also published in the Journal of Law and Economics - has shown that such a property rights-based order had in fact arisen in the '20s, without federal direction.

As soon as the Department of Commerce started handing out licenses, a "priority in use" system of property fights spontaneously emerged, says Hazlett. Broadcasters homesteaded particular frequencies at particular times of the day (24-hour stations were rare then). Spectrum rights were freely tradeable, and freely traded. Some areas adopted, without government prodding, the institution of "silent night," in which local broadcasters would shut down for an evening to allow listeners to tune in to long-distance signals. As the demand for licenses began to exceed supply, problems developed - but they were being dealt with.

"Beginning in September 1921," writes Hazlett, "when the Commerce Department first recognized radio broadcasting as a distinct license category, the department initially allowed just a single frequency (360 meters, or 833.3 kHz) to be used for broadcasting, necessitating complicated time-sharing agreements. (What interference took place during this 1921-23 period was, in essence, an outcome of government control: over 500 broadcasters were 'responsibly' bunching up all at the same point on the spectrum to which they had been directed by the Commerce Department, and operations were not always perfectly synchronized.) When this single channel became scarce, Hoover denied new licenses. The Intercity decision [Hoover v. Intercity Radio Co.! in February 1923, growing out of just such a denial, determined that the secretary had no authority to withhold a license but did have the legal fight to set hours of operation and frequencies."

Meanwhile, established broadcasters, looking for protection against competition, wanted the government to limit the number of new licenses it would issue. They had a friend in Hoover. The groundwork for the "Breakdown of the Law" was laid after the secretary decided, in November 1925, to stop issuing new licenses, arguing that the spectrum was completely filled. He invited a court challenge, and one arrived in April 1926: United States v. Zenith Radio Corp. Like Intercity, Zenith denied Hoover the right to withhold a license. Unlike Intercity, however, it denied him discretion over time and wavelength assignment.

Hoover did not appeal the case. Instead, he asked Acting Attorney General William Donovan which District Court decision to follow. On July 8, Donovan came out for Zenith and asserted that the government had no authority to define spectrum rights. "Faced with open entry into a scarce resource pool, a classic 'tragedy of the commons' ensued," writes Hazlett. "Stations had to be licensed by the secretary of commerce; once licensed, they were free to roam the dial, select their own transmitting location, choose their desired amplification level, and set their own hours." Hoover had created a crisis, and Congress quickly created the Federal Radio Commission to deal with it.

At the same time, non-regulatory solutions were ignored. In November 1926, for instance, WGN had sued the Oak Leaves Radio Station, claiming that the latter had essentially committed trespass by interfering with its signal. The court ruled in WGN's favor, explicitly basing its decision on homesteaded property rights. But the commission had no use for this approach.

Nor did it have any use for expanding the spectrum to allow more stations to broadcast. This was technically feasible but politically unpalatable to the

big broadcasters, who preferred to make room by eliminating their smaller competitors. The industry defeated spectrum expansion by arguing it would require listeners to buy expensive new sets to hear the additional stations. That this might be preferable from a consumer's point of view to not being able to hear the other stations at all was not considered.

In August 1928, the commission announced General Order 40, its spectrum reallocation plan. The effect, as University of Wisconsin historian Robert McChesney argues in his 1993 book Telecommunications, Mass Media, and Democracy, was to eliminate most nonprofit stations (about a third of the 1920s radio market) and to nurture the networks. The commission favored "general public service" stations over "propaganda" stations, the latter defined, in McChesney's words, as broadcasters "more interested in spreading their particular viewpoint than in reaching the [broadest] possible audience with whatever programming was most attractive."

Inaugurating a line of thought to which the FCC still hews, the commission argued that there simply wasn't enough "room in the broadcast band for every school of thought, religious, political, social, and economic, each to have its separate broadcasting station, its mouthpiece in the ether." While this wasn't necessarily true, it nonetheless helped the commission fulfill the big broadcasters' agenda. The National Association of Broadcasters, the commercial stations' trade association, was effectively under the control of the two major networks (CBS and NBC), and a revolving-door relationship between the association and the commission was firmly in place. Many commissioners went on to lucrative positions at the networks or the NAB.

In short, the system of the early 1920s was not chaotic. When chaos did arrive, it was induced by government policy, not market failure. Alternatives to regulatory control were ignored. And from the very beginning, broadcast regulation did more to protect established interests and limit programming variety than it did to stave off disorder and protect consumers.

It's not clear whether Stephen Dunifer and Free Radio Berkeley will prevail against the FCC. At press time, his hearing, which has been delayed several times, is scheduled for September 22. Only this much is certain: If he wins, his victory will be a welcome sign for those who would like to see radio become a more open and participatory medium.

Another certainty: Despite the scorn of establishment stations such as KQED, Dunifer and Free Radio Berkeley have their supporters in the "legitimate" radio world. "I think they're great," says Rasta Black, a volunteer at KPOO-FM, an independent community station located on Dunifer's home tuff, the San Francisco Bay area.

"They can say a lot of stuff we're not allowed to say - things that we have to keep aware of, that we're not allowed to do," explains Black, who goes on to complain about the cost, in money, paperwork, and time, of meeting FCC regulations.

"They have a lot more freedom, and that's what we'd like to have," he concludes. "Power to the pirates."

iRock, the Pioneer of Internet Music Radio is now available via
VocalTec's new Internet Wave. IWave is the latest, but most promising new
entry in the Internet audio streaming arena. Using true TCP/IP and
excellent compression schemes, IWave makes iRock actually enjoyable
to listen too. Of course, you'll have to dig the progressive/eclectic
music mix and the offbeat style of G.J. the CyberDJ.

iRock is a professional effort and IWave should be taken seriously
as a means of world-wide audio distribution. As time goes on, iRock's
programming and pipe size will increase according to the demand.
Currently, iRock averages thousands of listeners a day and tens
of thousands of visits to the iRock WebSite.

You can listen to iRock, 24 hours a day -- 7 days a week. Each program gets
uploaded after it is produced and compressed. Currently, there
are about 3 new shows a week.

The IWave software can be downloaded from the iRock web page, but the audio
streaming comes from Israel. Don't worry, there's a link. Currently,
there is only a Microsoft Windows version of the IWave player.
A Mac version is in the works...

# 2788. Kiss 108/Boston

Newsgroup: rec.radio.broadcasting
Date: 1995-10-21 00:00:00 UTC
From: jgallagh@interserv.com
Message-ID: <46a3g6$9g5@vixen.cso.uiuc.edu>
Source record: 28885

For some strange reason, I have lately been listening
to Kiss 108 fm which is I guess is classified today
as CHR format, which in the old days we called top 40
with a lot of R & B.

Radio programmers used to call it "urban" but I think
that is a euphemism for "music aimed at minorities".

Much to my amazement, I have discovered that Kiss
is virtually all talk in the am/drive period.

Matty Siegal with several sidekicks commenting on
OJ, movies, sex, rock stars and other lifestyle
items.... but very very little music.

While some find Matty a bit on the obnoxious side, his
intelligence can not be disputed. Billy Costa also
does a good job with the entertainment news and
keeping the conversation moving.

It seems strange listening to a major Boston FM and
not hearing much music...and when a rare song comes on
it invariably is from a playlist that cannot be much larger
than 10-12 selections. Amazingly, I still hear Cheryl
Crowe's "This ain't no party, this ain't no disco" on a
daily basis. I thought that song was long relegated to
oldie status.

Anyway, this discussion began when a few of us were
talking on the net about the rumors of country station
WKLB's sale and imminent format change.

The Boston Globe has reported consideration of
an all-talk format for the former WVBF. This talk
format would not compete with AM WRKO on issues,
but would be "lifestyle" oriented, i.e., talk radio for
young people who don't care much about politics.

It will be interesting to see if Evergreen makes a raid
on some of the established Boston "personalities" who
could carry on an FM-talk format.

John Gallagher/Boston

# 2791. Re: "Local" radio from 1000 miles away

Newsgroup: rec.radio.broadcasting
Date: 1995-10-21 00:00:00 UTC
From: deejay@mm.com
Message-ID: <46a3g9$9gc@vixen.cso.uiuc.edu>
Source record: 28888

Michael Grogan (m_c_0007@frank.mtsu.edu) wrote:

: I am inquiring on the effects of what I call "local radio from 1000 miles
: away". What do you think the effects of the 24-hour syndicated music
: formats provided by companies such as Unistar to mostly medium/small market
: stations will be?

: While they are saving money by choosing the network's music and jocks
: over their own, I believe that stations that choose the network
: programming are only hurting themselves in the long run. With the advent
: of services like DMX (Digital Music Xpress on many cable systems) and
: similar pending broadcasting services similar to it, local stations will
: need localism in order to compete with the non-advertising music
: services.

I doubt if DMX will have a very big impact on small or medium market
listening, for the same reason that there aren't a zillion satellite TV
dishes around, too: why pay for something you can receive 'for free?'
How many large* market cable operators offer audio links? Most do. But
how many people actually pay the extra $5-$10 a month so that they can
receive both static-free local FM service and the various commercial-free
'jukeboxes'? Not many, at least here in the Twin Cities.

: If a station is already airing a nationally syndicated music
: format, they will lack the localism that will be necessary for survival.
: The only difference between a service like DMX and the station on
: syndication will be DMX's lack of commercials. Which do you think the
: average listener will choose?

I've worked on both ends of satellite radio programming. There are
plenty of opportunities within the programming perimeters to provide the
kind of information and discourse you term 'localism.' Listen to most FM
music stations that are not* satellite operations. Where is the weather
placed? The PSAs? What does the public really expect in the way of 'local'
content to begin with? How much other chitchat that is marked as 'local' is
really generic? A well-run satellite station can still have a 'local'
feel to it.

E.g. when I worked at KMGK-FM, Twin Cities, a Transtar (ne'
Unistar) affiliate, back in the 80's, I rotated dozens of localized
liners depending upon the month and/or season. It's October-- talk up
the United Way campaign, talk up hunting season, talk up raking leaves,
etc. Thankfully we received great service from Transtar whenever we
wanted new liners cut, with quick turnaround.

As for the board ops, make sure they connect one-to-one when reading something as simple as the weather forecast. How many non-satellite station announcers still read verbatim the NWS forecast that comes off the wire anyway, reading it without connecting to the listener's lifestyle?

I'm not a great believer in satellite radio, though. I harbor a great sadness at the growing lack of real* broadcast opportunities in an historically unstable business. My stints, one on the receiving end and another on the broadcast end, came in the middle of my career. I feel fortunate.

Greetings!

I just stumbled across this group, and hopefully someone here can answer a question for me.

When I was a kid, local radio stations would sometimes promote National Radio Week. They would do things like set up a broadcast booth in the window display area of a mall anchor store and do live newscasts from there. I always thought it was neat.

Is there any such thing as National Radio Week nowadays? If so, when is it? And who "sanctions" it?

Greetings All!

The Classified Records web site is up! We are the first label that supports Freestyle dance to have it's own site. Expect it to grow rapidly as I am also the webmaster, we didn't hire some consulting firm to come in and get paid by the hour while we stand back and go "huh? when is the sound gonna be there?"

Of course, Freestyle is not all we do here at Classified. We also have new House, Rap, and Alternative releases.

Check out the NEW releases from Jocelyn Enriquez, Heaven, Make Believe, and Energy Box. Others will be posted as I finish their feature pages.

p.s. Having a slight prob with the sound files. They work after downloaded, but don't play back automatically. I'll fix it by the end of the weekend.

I've only gotten good feedback so far, but please send any suggestions you may have...this must be the ultimate!

Thanks,

Glenn Gutierrez, VP Creative Services Classified Records

Yes.

Seriously, they have a can have a tremendous effect, depending on the frequency. A good flare can wipe out HF communications (3-30 MHz), as this range uses the ionosphere for propagation, which is affected by solar radiation. Lower (AM band) and higher (FM band) frequencies are less effected.

Solar flares are most common during the active portion of the Sun's 11 (or 22, depending on your view) cycle. As we're at the bottom of the cycle right now, there isn't much solar activity, so few solar flares.

The world is not all VHS. If the VCR Stan bought is _8mm_ (Video 8) format, it can indeed have digital audio, since that's an optional part of the standard (HiFi-type FM audio is available on _all_ 8mm VCRs -- in fact, there is no longitudal audio track in 8mm!).

8mm can record up to 6 hours on a 180, uses tapes that are as compact as cassettes (pocketable <g>!), and has less tracking-interchange problems at the LP speed (needed for 6 hours -- SP only gets 3 hours) than VHS does.

AIRWAVES AM Radio Search page (a web interface to the FCC AM database)
has been augmented to include the North Amereican FM Band as well.

YJust as with the AM database, you can search by frequency, City,
State, Province, or by region (several USA Metro areas are
pre-selected or you can enter your own lat/long).

Search shows calls, city, state/province, frequency, power, antenna
height and whether the FM station is directional or not.

To use this you must have a forms-capable browser. I suggest using
netscape 1.1N since much of the formatting is Netscape Enhanced
(tables, backgrounds, centering etc). Although functional, it doenst
look good on lynx at all. If anyone wishes to code an html page that
works better with lynx, please do.

Please let me know if you like the service, and please try to
keep traffic as low as possible during business hours (8AM - 5PM
central US time).

Over the past month or two, Top-40 WZJM has been shuffling around
their morning team. This would be since Johnny D left for WVKS in Toledo...

The one constant is Lee Anne Sommers, Johnny's erstwhile partner.
The male half of the team varies. More often than not it has been Jack
Kelley, and a lot of the time it has been newbies from god-knows-where.
The only name I recognized was Marc Nolan who used to be at WKDD in Akron.
Today I am not even sure of the name I heard.

I'm going to be digging a little deeper into this... I'm curious when
they're gonna find a new DJ :>

>Blaine,
> I seriously doubt anyone is leaving because of a power reduction,
>especially since it'll have very little effect on the Fort Wayne metro
>(or TSA) coverage.

In the DAYTIME where threre still 50K there's no change. But at night with a MAJOR power reduction, and a MUCH tighter DA that most likely WON'T push this power over Fort Wayne which is some 25 miles from the transmitter site. Even WOWO defacto made the admission of no city night coverage my moving the studio site SW toward the transmitter site.

>It's more likely they don't like the new ownership,
>management, toilet facilities, etc.
^^^^^^^^^^^^^^^^^^^^^^^^
At one time there was a station here in Columbia, SC that was so corporately structured that toilet paper had to be ordered through "corporate" unless you brought your own.

> Assuming they're taking home a decent paycheck, the last thing
>they'll worry about is the power.

If I worked nights at WOWO, I'd not only be worried, I'd find another job.

> The only thing that will ruin
>"Americana" is people who abandon ship. There are many markets where a
>low power AM is beating the daylights out of a badly programmed 50kw.
>Listeners don't care about power.

BZZT! If there's no signal to listen to? If there's gobs of selective fading and other stations in the background to make listenening a chore?

> They care about how the station please them.

But if you can't listen to it in the city of market or it's so noisy as to be a PAIN, then what do the listeners do. GO away. I think that's EXACLTY what is going to happen and there will be the excuse to turn it off.

There's a station here (WISW) that's 2500 watts at night DA. If you aren't (A) underneath the tower or EXACTLY in the DA pattern ( and it's not THAT tight of a pattern) there's so much skywave you can't listen. I am under 5 miles (more like 3) miles and it's often a pain to listen to.

Yes, I'm listening to KidStar. Have been for about 5 hours. Love it.
Hip, not the least bit condescending, current. Even the news is good.
It's a fast-moving DJ and feature format apparently put together by a
woman who once was an account exec for modern rocker KITS. Think of it
as a blend of Weird Al Yankovick, modern rock, and a puppet show. The
format has just been launched on KDFC(AM) 1220, the former classical AM.
(The FM is still classical.) KidStar also airs in Seattle.

I'm very impressed. I wish KidStar and long and happy life.

Under an inauspicious title (Annapolis to gain Peninsula) in the Washington Post Metro section (page 2) on Saturday (10/21) was news that the US Navy is planning to dismantle the VLF transmitting facility in at Annapolis harbor. Using the call sign NSS, this station will be no more.

These are the towers you can see from the Bay Bridge. By sometime next year, they will be torn down. They consist of:
1. Monopole 800 feet, Freq=51KHz, Radiated power = 20Kw
2. Hybrid trideco-triatic, 266m base insulated tower, eleven 183m grounded towers, Freq = 15.5 to 28 KHz, Radiated Power = 266Kw at 21.4KHz.

>there is a self-supporting tower sticking up out of the skyline. Whose
>tower was this ?

I am probably the oldest person in cyberspace so I'll give it a try:
Channel 2 WCBS was on the Chrysler Bldg.
Channel 4 WNBT was on the Empire State Bldg.
Channel 5 WABD (unknown, maybe the Dumont NJ facility)
Channel 7 WJZ was on the Empire State Bldg.
Channel 9 WOR was on a 900 foot tower near Palisades NJ just north of
the GW bridge.
Channel 11 WPIX was on the Daily News Bldg. and may be the free
standing tower you see in the photo.
Channel 13 WATV was on South Mountain in Orange NJ.

As I remember all of these stations were on about 1948 or 49. I think
WOR was the last to sign on. All of the above is from memory. I was
watching from Rockville Centre on the south side of Long Island in
those days. Channels 2, 4, 5, 7, and 9 put good signals into that
area. Channel 11 had a bad ghost due to reflection from the Empire
State Bldg. Channel 13 had a weak, snowy signal due to both the added
distance to Orange NJ and the lousy RF amplifier tubes used in TV
tuners of that time. But WATV had westerns every afternoon followed
at 5PM by Uncle Fred's cartoon show with old 1930's cartoons. Anyone

else remember Farmer Grey? I don't remember what they ran at 5:30
because I would flip to WNBT for Uncle Bob and Howdy Doody.

but the system said the HOST was unknown. So I am
putting it here in airwaves in hopes that the poster will
see it.
---
--

Rob

I have to answer "no" MD will not kill CD and DAT.

DAT was intended for the home consumer market, and I believe MD was also. Unfortunately the consumer market didn't accept the DAT format (and I think a large part of that is because DAT wasn't advertised to the general public very well). The same could also apply to MD's loss of success in the consumer market.

However, I don't think CD is going to kill DAT or MD either, because a lot of professional recording studios and radio/tv stations are at least expanding to DAT, and some are using MD's to replace tape cart machines.

As for the rumor... I have never heard it, and I'm not sure I want to believe it. Now if MD were doing far more successfully in the "consumer" market (which again it's not) then I might pay a little more attention to the rumor...

Hope this helps....

Rob

# 2817. The College Radio Experience Discussion

Newsgroup: rec.radio.broadcasting
Date: 1995-10-24 00:00:00 UTC
From: ART BEROTH <AB8599@conrad.appstate.edu>
Message-ID: <46hqjd$cj4@vixen.cso.uiuc.edu>
Source record: 28717

I believe the original article about college radio experience was relying too heavily on a stereotype. Recently I heard an insightful person say that stereotypes are a result of being lazy. While there COULD be SOME truth in a stereotype, we should look at the INDIVIDUAL before assigning any stereotype characteristics to them. This could apply to an individual radio station or an individual person working at a station.
I am currently a disc jockey/announcer at WASU 90.5 FM, the App. This is the campus radio station of Appalachian State University in Boone, North Carolina. I am obtaining a degree in Communication (Broadcast Journalism concentration) and feel that working at the station is an important asset to my education. I am learning a great deal but I also realize that my learning will continue once I enter "the real world".
My message to any readers of this is, let's remember that the world is madeup of individuals. For someone to work at a college radio station, on a volunteer basis in my experience, should mean the person has some, if not a lot of, interest in the medium.

Sincerely,

Art Beroth

>From: Harold Hallikainen <hhallika@slonet.org>
>Subject: EAS Answers EAS Petitions for Reconsideration

EAS is on again! The FCC has answered the petitions for
reconsideration on EAS. A news realease can be found at
gopher://fcc.gov. I also have pointers to relevant documents at
http://slonet.org/~hhallika/ .
In summary,

1. The FCC declined to include RBDS implementation into the EAS
rules. EAS is permitted, but not required. Further, implementation
standards for EAS are not included.

SHOULD READ "... implementation standards for RBDS are not included"

2. The FCC declined to modify the FM rules to accomodate RBDS.
Several petitioners had requested higher modulation limits for stations
running RBDS.
3. The FCC disagreed with the NAB petition that automatic
interruption of CATV programming by EAS violated the copyright laws
(which require carriage of a copyrighted broadcast program to be made
with no modification, such as interruption). The FCC will therefore not
require CATV system to install "selective override equipment".
4. The implementation deadline for broadcasters has been moved back
from July 1, 1996 to January 1, 1997. NAB had suggested a one year
delay, making it coincide with the CATV deadline. I had suggested a 1
year delay, since the petitions for recon had delayed us about a year.
They went for six months.

I hope to see the Memorandum Opinion and Order on this shortly.
When I find it, I'll put a pointer to it on the above mentioned web
page. Note also that this relatively speedy implementation of EAS (14
months from now) will likely mean it is not worthwile coming up with some
way to automate EBS and seek necessary (in my opinion) waivers to do

unattended operation. May as well just get the EAS equipment ASAP.
My next Insight on Rules article in Radio World details the EAS
petitions to deny. The one after that discusses the details of the new
unattended operation rules.

This sort of thing is becoming very common place. Especially with AM
stations that are automated (satellite) and located with a co-owned FM that
has a DJ that is more concerned about talking to 13 year old girls than
about the operation of the AM station.

I'm not sure of the years, but the early TV antennas were on the sides of the building slope below the dirigible moring. It was for the NBC station, of course. Later when NBC erected the tower over the moring, the CBS, (ch2), station transmitted from the sides until the second tower was constructed over the first one in the mid 60's. It was at that time the first FM master antenna was constructed over the area once occupied by the ch 2 antenna.

> Where did the NYC TV stations broadcast from before
> the Empire State Building?

Channel 2 was on the Chrysler building, Channel 5, (Dumont), was at 515 Madison Ave, (53rd St., the tower is still there and has been used for FM stations since). The original, commercial, channel 13 operated from downtown Newark, NJ. I believe that channel 9, (WOR) was on the WHNF tower, (WHN's short lived FM Station), in Palasades Park, the tower was originally built for a station the park owned that eventually was absorbed into WHN. The others I do not know.

> On the right side of the picture is the Chrysler Building, but its top

> tower was this ?

The Channin Building is directly caddy-corner from the Chrysler building, but is much shorter and could give the impression that it is further away when viewed from certain angles. It is likely that the tower on that building is what you are seeing in the picture. It was the home of most of New York's FM stations in the early days. Additional stations that went on came up on Empire on their own antennas, as did station paired with TV operations that moved to Empire when the TV operation did. The few stations that were left, (WQXR, WHOM-FM), moved to Empire when the Master FM was constructed.

> Finally, one more NYC tower question. In July, I was acting as "tour

I've been wondering about those two myself. Someone once told me which
station was on the air from there, but I can remember.

Q23. Is there a group for modern radio drama ("new-time radio")?
Q24. I have only email access to the Net. Can I still get the files at your FTP site?
Q25. Your Digest and WWW pages only deal with Old Time Radio. Where can I get similar information about early TV?
Q27. I have never heard "Old Time Radio". Can I get an audio sample via Internet?

---

Q1. What is "OTR"?

A1. OTR is an acronym for "Old Time Radio", a term loosely applied to radio programs broadcast from the dawn of broadcasting to the early 1950's. Alternate names are "radio nostalgia", "golden age radio", etc. Usually this applies to radio drama, mystery stories, comedy and adventures.

Q2. You haven't mentioned OTR music, why not?

A2. There was a good deal of "big band" and other music broadcast during this era. For some reason, there seems to be more current interest in the dramas rather than in the music. There is no restriction to discussing OTR music in the Internet OTR Newsletter, however you would find much more discussion about this topic in alt.music.big-band. There is also an Old Time Music on the Radio WWW page (apparently for Bluegrass music).

Q3. Where can I buy recordings of old radio shows?

A3. There are several individuals and companies willing to sell tapes of OTR programs. A partial list can be obtained from my OTR WWW site or FTP address listed later.

Q4. Which vendors have (lower prices) (higher quality) (faster response)?

A4. Prices, quality and service differ somewhat among all vendors. Check with other subscribers to the OTR newsletter to learn of their experiences, then check with potential vendors.

A comparitive price chart, listing many vendors, is available at my WWW site.

Audio quality is an important consideration when purchasing recorded tapes. As yet, there is no "standardized" description of

sound quality. Jim Widner and other OTR collectors have suggested various metrics to describe the quality of OTR recordings. Discussion of these standardized descriptors is summarized at the archive site, and my FTP / WWW sites.

Q5. Are OTR shows rebroadcast? If so, where and when?

A5. Yes, several AM and FM radio stations, satellite feeds and a shortwave station rebroadcast OTR. Check my OTR WWW page for current info, or download STATIONS.OTR from my FTP site. If you learn of other sources, leave a note!

Julian A. Smith (jsmith@blues.epas.utoronto.ca), Frank Passage (passage@pluto.dss.com) and Bill Pfeiffer left the following information:

For AM listening, try the brand-new National Radio Club's _AM Radio Log, 15th Edition: Complete Listing of U.S. and Canada AM Radio Stations_ (Mannsville, N.Y.: NRC, 1994). All AM stations carrying things like "Old Time Radio" are listed with the format code NOS (Nostalgia), and there are lots of other codes. [Order from NRC Publications, Box 164, Mannsville NY 13661-0164 USA. Price range: $20.00]

For FM listening, I'd suggest Bruce F. Elving's _FM Atlas_ (Esko, MN: FM Atlas Pub., 1993). Alongside lists, this has _maps_ of your area and its stations as well. [Order from Bruce Elving, PO Box 336, Esko MN 55733-0336. Price Range: $11.00 + approx $1.00 s/h]

The M Street Radio Directory, M Street at 800-248-4242 or +1 212 473 4668 voice, or +1 212 473 4626 fax. The address is M Street Corp., 304 Park Ave S Floor 7, New York, NY 10010 USA. costs $29.95 + p/h,

Q6. I remember a great show called (x). When was it aired?

A6. Check with subscribers to OTR newsletter, or look through the program databases (WWW or FTP). Also see answer A14 below.

Q7. Are there any books about OTR?

A7. Yes, there are several books related to OTR. See my WWW page or FTP site for a list of some of them.

Jim Widner and Everett L. Slosman left this address for a bookstore specializing in OTR books:

Rainy Day Books
P.O. Box 775, Rt 119
Fitzwilliam, NH 03447

(603)585-3448

Bob Crump reminded us that most good used book stores will do a nationwide search for a title, if given enough time. Henry Brugsch <henry@g0gku.demon.co.uk> related a good experience with the following on-line bookstore:

Acorn Books acornbks@netcom.com

Q8. Does anybody trade tapes of OTR shows?

A8. Yes. Check with subscribers to the OTR newsletter. My WWW page has a database of private traders as well. Leave a note in the OTR newsletter if you want to trade, or send email to me if you want your library to be listed in the on-line database.

Q9. What's this stuff about Copyright?

A9. The copyrights on most OTR shows have expired. Several copyrights have been renewed. Examples of the latter include The Shadow (Conde Nast) and some of Arch Oboler's productions. See my WWW site for the latest "common sense" and legal citations.

Q10. How can I get my local radio station to broadcast OTR programming?

A10. Call the station and tell them of the many people who like to listen to OTR. Suggest this programming will increase listenership and help buy things from their advertisers.

Shawn Fulper-Smith (shawnf@cc1.uca.edu), a managing director of a non-commercial station, tells us: "The days of radio being ruled by the artisians is over, and for some time now it has been in the hands of people who only look at the bottom line, so to reach them you must talk through public radio pledges, or through sponsors on commercial stations."

Q11. I have some old transcriptions and tapes, how can I make them sound better?

A11. You might try using a good equalizer and/or digital signal processing (DSP) unit between the playback and recording devices. Some people have mentioned that the Radio Shack DSP unit does a fair job. There are also other, more expensive DSP units available from Ham radio stores and audio stores. Some subscribers have attested to the efficacy of the Timewave brand of DSP units.

Randy Riddle (Rriddle@aol.com) left this information:

There's a firm that sells archival quality turntables and sound processing units that can dramatically improve old recordings. Their sound processing unit runs around $300.

Audio 78 Archival Supplies
PO Box 187
San Anselmo, CA 94979
415-457-7878

Henry Brugsch <henry@g0gku.demon.co.uk> left this information about Digital Audio Format (DAT):

The dat-heads mailing list maintain an archive of all their material at the following site: ftp.atd.ucar.edu. Log on with the usual anonymous then, your routine password. head on over to /pub/dat-heads/ You will find a wealth of info up there. All the digests to the current day, and mike faqs, as well as market postings on equipment. Highly recommendable for anyone to get their feet wet in this media. Happy taping.

Q12. Are there any OTR clubs near me?

A12. Check the club listings in my WWW page, and leave a note in the OTR Newsletter asking about local clubs for your area. Send me email if you want your club listed.

Q13. I have some OTR tapes of the same program, but their dates are different. Why?

A13. Sometimes broadcasts are dated according to their original broadcast date, and sometimes according to a date on which they have been rebroadcast. For instance, the Armed Forces Radio Service rebroadcast many Mutual Radio transcriptions at a later date. Your tape may be of one of these later dates. Alternately, somebody might have made a mis-typopgoof.

Finally, some shows -were- broadcast more than once, and sometimes on different programs! For instance, a few Suspense shows were re-scripted / re-cast for Escape. You might also find similarities between certain SF shows as done on X minus 1 and Dimension X.

Q14. Is there any place where I can get a complete listing of all the episodes in a particular program serial?

A14. Some of the OTR Newsletter subscribers have contributed Program Logs for several well-known series. The logs are available at my FTP/WWW site. While you are there, check the online libraries; some collectors have very complete collections of various serials, and they are listed by name or date in their listings. I am currently compiling a database of contributed catalogs and libraries, which will eventually contain most of the readily-available programs for popular OTR series. At present, the dbf file exceeds 6 MB. I am attempting to find a publicly available Internet site to archive the file.

The "logs and publications" entry in my WWW page gives names and addresses of several vendors of these items. It can be FTP'd as sou_pub.otr. (Thanks to RadioJoe5@aol.com (Joe Coleman)). There is also a Netscape table of logs and log sources at my WWW site.

Jay Hickerson maintains several logs and lists, as well as -Hello Again-, an OTR newsletter. Jay is the author of -The Ultimate History of Network Radio Programming and Guide to All Circulating Shows- (last supplemented in Oct 94). Jay's address is:

Jay Hickerson JayHick@aol.com
Box 4321
Hamden, CT 06514
(203) 248-2887 FAX (203) 281-1322

Q15. Is there any place where I can get a written synopsis of the themes of OTR programs?

A15. Again, some vendors include this information with their catalogs. If you would like to contribute your interpretations of the themes, send them to the OTR newsletter for inclusion in one of our databases.

Jim Widner has contributed some synopses / introductions to various programs. They are on file at his and my WWW/FTP sites.

Many of the local and national OTR clubs maintain informational libraries with this material.

Q16. Is there a World Wide Web page (URL) or FTP address that I can access for more information?

A16. Yes, there is a growing number of WWW sites, as well as FTP sites and a Gopher. Each site contains different information, so you might want to visit them all. The sites listed below are good places to start, since the major OTR WWW pages have links or pointers to each other. If you learn of any others, I'd appreciate your informing me via email!

(1) My site:

World Wide Web URL:
http://www.crl.com/~lgenco/otr.html

FTP:
Anonymous FTP to ftp.crl.com
directory: users/lg/lgenco

(2) AIRWAVES E-Publishing's Site (courtesy of Bill Pfeiffer):

FTP:
Anonymous FTP to radio.aiss.uiuc.edu,
directory: misc/rec.radio.b-cast/OTR.

GOPHER:
gopher radio.aiss.uiuc.edu 7070

(select "OTR")

World Wide Web URL:
http://radio.aiss.uiuc.edu/~rrb

Q17. How do I (un)subscribe to the OTR electronic newsletter?

A17. To subscribe, send email
To: old.time.radio-request@airwaves.com
Subject: SUBSCRIBE

To unsubscribe, send email
To: old.time.radio-request@airwaves.com
Subject: UNSUBSCRIBE

(The body of the message is ignored in both cases)

NOTE: Do NOT use this address to send articles to the Digest! Use
old.time.radio@airwaves.com instead.

Q18. Can I get archived copies of old issues of the OTR newsletter?

A18. Yes. The OTR Digests and Index are updated three times a week,
and are accessible through the first two WWW pages mentioned
above, from the AIRWAVES anonymous FTP site mentioned above, or
from the Gopher mentioned above.

Readers with a WWW browser can access a "smart" archive program.
This program can sort and display old OTR articles by author,
subject, thread or date submitted. Just the thing to use when you
want to catch up on a discussion thread, without plowing through a
lot of extraneous material. To access this service, point your
browser at: http://radio.aiss.uiuc.edu/~rrb/online.html

Q19. What is the best way to archive OTR programs?

A19. The most popular way seemed to be reel-reel tapes, using each of
the four tracks to record monophonically. Modern reel machines
are in the > $2000 range, and used reel machines are becoming
harder to find.

Cassettes are generally fine for portability / ease of use /
exchange, but they suffer from several problems when used as a
long-term storage medium. These problems include "overwinding" and
splitting of the tape at the leader. Because of their thinner
track width and slower speed (1 7/8 IPS), the density of the
information is greater than with wider and faster (3 3/4 IPS) reel
tapes. This may lead to a greater loss of signal (particularly
high-frequencies) over time.

The Hi-Fi VHS tape is gaining in popularity because of its
six-hour storage capability and relatively robust mechanical
construction. "Hi-Fi" decks need no video signal to synch the
systems, and can thus record audio without an accompanying video

signal. One T-120 Stereo Hi-Fi VHS cassette can easily hold 12 hours of OTR audio (recorded monophonically on the right and left channels independently). If the linear track can be accessed independently, this will add six more hours of recording time.

Some subscribers have mentioned Talking Book tape recorders as a possible archival method. These recorders operate at 15/16 ips (half the speed of a standard cassette recorder), and can operate in 4-track mode, thus giving up to 6 hours of play time on a standard 90 minute cassette. As yet, we have no info on long-term longevity of these recordings.

Don Coco (djc@crl.com) left the following information about sources for Talking Book type equipment:

The American Printing House For The Blind 1839 Frankfort Ave. Louisville, Kentucky 40206 Tel. (502) 895-2405 Sells Braille and recorded books, 4 track recorders which record at 15/16 IPS, and other products of interested to Visually Impaired persons. Price of 4 track recorder around $175

I.R.T.I.
1411 West El Camino Real
Mountainview, Ca. 94040
Tel. (415) 961-3161 or (800) 322-4784
Sells all including Radio's, TV's with SAP, Reading Machines, Computers ETC.

Conrad Trautmann (CONRADTRAUT@delphi.com) left this note in response to a query about finding used reel-reel machines:

You can also call Harris/Allied used equipment division at 1-800-622-0022 or call Radio World magazine at 703-998-7600 for subscription information. Radio World is an industry trade and has used equipment listings in the classifieds once a month.

(Jim Blackie [jblackie@aol.com] indicates that the Harris/Allied number has changed to: 1-800-300-0733.)

Richard Novak (rnovak@ix.netcom.com) wrote this informative note on using Hi-Fi VHS as an archival medium:

To clear up any misunderstandings concerning VHS HiFi machines and their ability to record audio, I offer the following..

It should be understood that what distinguishes a HiFi machine from a linear machine is that the audio track is recorded helically (diagonally) on the tape along with the video track. On linear machines the audio is recorded at the upper edge of the tape (and a control track at the lower edge, if anyone wonders what the extra head is for.)

On a HiFi VHS the audio is not recorded as an analog signal as would be the case with linear recording. Instead the analog audio signal frequency-modulates a carrier which is then recorded between the video tracks. A duplicate signal is also recorded linearly to maintain compatibilty with linear VCRs. The FM signal recorded on the HiFi track should not be confused with FM radio broadcasts. One of my customers thought the FM switch on his HiFi was for recording FM from the radio. Today's machines no longer use the label "FM", instead use "HiFi". Less confusing.

The sound recorded from FM radio broadcasts (or any other source) onto HiFi VCRs is virtually indistinguishable from the source. The material can be dubbed to cassette with no generation loss.

There is no difference in audio quality using either six hour or two hour mode.

It is true that at slower speeds the diagonal tracks are closer together. This does degrade the video signal as anyone knows who has compared six hour video with two hour video. But does not degrade the FM carrier with the audio track.

The tape writing speed of the audio track in HiFi mode is the same regardless of linear speed. This is because the head speed remains constant and is independent of the linear tape speed.

Worked it out once and it is around seven meters per second. Whatever it is, it's a whole bunch faster than 7 1/2 inches per second. If anyone really wants to know the writing speed, it is the circumference of the upper cylinder (or video head) multiplied by the rotational speed which is 30 revolutions per second, or 1800 revolutions per minute. (Two heads 180 degrees apart at thirty rps results in 60 frames per second.)

Who cares how it works.. The point is that VHS HiFi is the best and cheapest medium around for recording masters. But not for archiving. Most experts still agree that reel to reel is the best and most reliable method of archiving. (Sticky shed syndrome from the 70s notwithstanding.)

Q20. My old reels squeak. Why does this happen, and can I fix it?

A20. There are at least two causes for "squeaky reels" on a reel-reel tape recorder. (1) The tape edge may be rubbing against the rim of a distorted take-up reel, or (2) the oxide may be sticking to your erase (or other) heads. If the former, the least frustrating alternative is probably a new take-up reel. If the latter, Fred Korb left this note:

If you have any squeaky reels that you would like to recover, I will be glad to send you more information on how to do it. Just send me a stamped self addressed # 10 envelope and I will respond. Send your request to: Fred Korb, c/o Oldtime Radio Collectors and Traders Society, 725 Cardigan Court, Naperville, Illinois 60565-1202. I am willing to help you preserve the sounds of radio days gone by.

[Editor's note: Fred's method consists of a kit by which a lubricating film can be automatically applied to the tape as it is played. I tried it. Although temporary, it does indeed work! I'd recommend it for those squeaky tapes that you wish to re-record onto newer reels.]

Richard Fish <lodeston@bluemarble.net> also left this helpful info about an alternative method:

HYRDROLYZATION is the culprit. The tape material -- the backing, or the binder compound used to stick the magnetic particles to the plastic backing -- has absorbed water from the air. The water molecules actually make the tape expand a bit, so it doesn't fit the machined tape-guides properly anymore; and they can interfere with the lubrication impregnated into the tape; and it is theorized they can even interfere with the polished smoothness of the tape surface.

WHY SOME TAPES AND NOT OTHERS? It depends on the formulation of the plastic backing and binder. In the mid-70's, both 3M (Scotch) and Ampex, the two major tape manufacturers, started experimenting with their formulas. They thought they were introducing major improvements, but instead created a tape much more prone to hydrolization than anything had ever been. The problem did not show up for years, and the formulas did not get corrected until sometime in the mid-80's. Theoretically any tape could get hydrolyzed over a long period of time, especially if stored in a high-humidity situation, but in practice most squeaky tapes were made (roughly speaking) between 1975 and 1985.

WHAT'S THE FIX? Tom Lopez at ZBS (the most prolific and entreprenurially successful producer of radio drama in the US today) gave me his formula and I've done it many times now and it works:

Bake the tapes in a convection oven for 8 hours at 130 degrees Fahrenheit. It is entirely possible to bake a tape twice if the first time doesn't do the trick. You get about a three-week "window", sez Tom, before the tape starts to re-absorb water. So the best deal is to bake the tape and immediately make a copy. But if you forget

to do it and it re-hydrolyzes, you can bake it again.

Q21. Where can I find more information about antique radios?

A21. An excellent place for discussions about antique radios, phonographs and accessories is the rec.antiques.radio+phono newsgroup, created by Bill Robie. A pointer to his FAQ may also be found at my WWW site. Basically, r.a.r+p is:

- A *discussion* group, rather than a sales group (see r.a.m)
- Whose focus is on radios, phonos, and related materials made before the 60s
- It steers away from "ham" radio gear (the Boat Anchors group covers that)
- They have a -very- comprehensive FAQ that new folks should read

Several museum sites are available at my WWW page. The WWW site, "The Bellingham Antique Radio Museum" is also available directly via URL http://www.pacificrim.net:80/~radio/ This site contains info and GIFs on old radio hardware, as well as soundclips of OTR show intros.

The University of Maryland also has a WWW site entitled "Broadcast Pioneers' Library". This is an excellent resource for the serious / professional researcher. It can be accessed through my WWW site, or directly via the URL: http://www.itd.umd.edu/UMCP_Libraries/BPL/bpintro.html

Additional sites with pictures of old radios or other hardware resources may also be found at my WWW site.

Q22. What is the best radio / antenna to get distant OTR stations?

A22. Several readers have been acclaiming the GE SuperRadio III as an excellent choice for picking up distant AM stations that carry OTR programming. Although the tuning dial has notoriously poor calibration, the sensitivity and selectivity seem superior to other radios. A SuperRadio FAQ is available at my WWW / ftp site.

-Some- readers have had good success with the Select-A-Tenna antenna advertised in several magazines, and the Grove Catalog. The S-A-T seems to be rather directional, and may eliminate off-axis interference.

Ham Radio magazines sometimes carry information about small loop antennas for AM DX-ing. Dan Hughes <dhughes@prairienet.org> left this note:

Several years ago one of the electronic magazines ran plans with dimensions and number of turns, etc to build one of these antennas. I have built several and I'm no mechanic. If you (or anyone else reading this) would like a copy of the article and plans, drop me a stamped, self-addressed envelope: Dan Hughes, P.O. Box 933,

Urbana IL 61801.

If you are interested in AM Broadcast Band reception, and technical artlcles related thereto, send a SASE to the following address for their product catalog:

National Radio Club
Publications Center
PO Box 164
Mannsville, NY 13667-0164

Q23. Is there a group for modern radio drama ("new-time radio")?

A23. There are several USENET groups whose charters include modern drama. Check the lists on your local Internet provider to see which are available to you. Here is a list of some of the WWW pages for radio drama (more may be found at my WWW site):

Atlanta Radio Theatre Company: http://www.webamerica.com/artc
ZBS Media? http://www.zbs.org/zbs.html
LodesTone Productions?
http://www.bluemarble.net/~lodeston/lode.html
Midwest Radio Theatre Workshop?
http://www.thoughtport.com/tpa/non/mrtw

There is also a mailing list for folks interested in current radio drama:

Send email to: majordomo@world.std.com
Subject:[blank]
text: subscribe radiodrama

Q24. I have only email access to the Net. Can I still get the files at your FTP site?

A24. Maybe. There are several FTP-by-email servers. Contact one of them for instructions.

ftpmail@decwrl.dec.com
with no subject line,
and two-line body with line one help and line 2 quit

ftpmail@grasp.insa-lyon.fr
(body: help) Please, European users only.

bitftp@pucc.princeton.edu
(body: help or ftplist for a list of anonymous ftp sites)

BITFTP@DEARN or BITFTP@vm.gmd.de
(body: help or ftplist for a list of anonymous ftp sites)
(Europe only)

Since the OTR FAQ is an "official" FAQ, a copy of it is stored at MIT, and is available from the MIT mailserver. For more info on how to get files by email from MIT, send a message

TO: mail-server@rtfm.mit.edu
SUBJECT: [blank]
BODY:
help
end

Q25. Your Digest and WWW pages only deal with Old Time Radio. Where
can I get similar information about early TV?

A25. The OTR Digest and OTR WWW Pages are purposely self-constrained
to OTR topics. Folks interested in early TV shows might be
interested in this note from Kathy O'Connell
(oconnell@pobox.upenn.edu):

Let me announce a brand new TV list!!! A woman named Linda
has just started a list devoted to 50's-60's Television.
You can contact her at LEEKNIGHTS@delphi.com I signed on
immediately, and it's a wonderful place to meet other people
interested in this subject. Very much like the OTR list,
but for television!!!

Q27. I have never heard "Old Time Radio". Can I get an audio sample
via Internet?

A27. Yes, if you have a suitable WWW browser and sound card. Connect
to any of the WWW sites mentioned above, and follow the pointers
to their audio clips and / or soundbytes. Most of the soundbytes
can be downloaded, and played on your computer's sound card.

---

# 2824. Production Guys! & DCI

Newsgroup: rec.radio.broadcasting
Date: 1995-10-25 00:00:00 UTC
From: jimbo powers <jimboman@bga.com>
Message-ID: <46lo0q$gp@giga.bga.com>
Source record: 28724

Does anyone know a newsgroup for Production People?? I am the
Creative Services/Production Director of the LBJ Broadcasting Company
here in Austin. Has anyone else signed up with DCI network?? It's killer!

Just wanted to see who is out there!!

Thanks!!

Jimbo

## 2825. More Broadcast Blowups (continued)

Newsgroup: rec.radio.broadcasting
Date: 1995-10-28 00:00:00 UTC
From: jherman@hawaii.edu
Message-ID: <46spsf$fc1@vixen.cso.uiuc.edu>
Source record: 28725

Roberta, the chief engineer, continues her story to the Boatanchors gang:

Date: Mon, 23 Oct 1995 19:44:36 -1000
>From: "Roberta J. Barmore" <rbarmore@indy.net>

Hi!

Well, the fire's out, and I'm still short on sleep. It looks like the cause was a Sola regulating transformer, one of three that keep the 240VAC to the filament supplies within reasonable bounds. A non-PCB condenser boiled over and rained flaming corrosive fluid on the HV terminals of the 10kV/30A surge (10A cont.) plate transformer just below it, and the phenolic terminal board promptly burned. From the evidence (very little fusing of wires), the breakers tripped fast then, but the plate transformer's got a high-resistance short, so who knows. In the last week, we replaced the power supply and rebuilt all of the RF cavaties (much damaged by smoke) and did a lot of minor fixing and de-smoking. Generally ran six-person crews, with the General Manager and the president of the corporation doing most of the grunt work. (!!!)
At one point, the president wanted so very badly to help out, and there was nothing he could do (he's not a tech--a Waterman-pen-carrying, on-the-phone-always sort of serious business guy he is, and good at it, too), so...he cleaned out the bathroom, including scrubbing out the toilet which had a great deal of rust stain. Now *that's* committment. Makes me feel good about working for this outfit.
For that matter, I was ordering around department heads and the like in the manner of a drill instructor--and they took it! It's *my* transmitter site, and I know more about it than anyone else. For several days, we ran the A side with the doors off the power supply--7800 and 3500VDC, 10KV, 240 and 208VAC all right out there, exposed to the world. Scary stuff!
All in all, we went off at 8pm Monday last, and were back on at half power 4:30am Tuesday. 106 hours after the A-side PSU burned, we had a replacement used one refurbished, wired in, and were makin' pictures. After that, it was just a matter of finding the problems left and hunting bugs, along with cleaning up from the smoke. Both sides were up and combined by 8pm Saturday, though it turns out a few problems were still lurking.

Did my time sheet today, and I worked something like 116 hours last week; my boss told the department secretary there's 168 hours in a week and she might as well put me down for all of 'em, but I don't work that way--I didn't even charge 'em for the 2.5 hours I spent sleeping on-site between 10:00pm Saturday and 12:30am Sunday when everyone left about 8. I didn't trust the rig alone, and I was right--we had overloads on the

A-side every half-hour 'til I got sick of resetting them (and worried about the cause) and shut it down at 9:30. We put the A-side back on about 6:00 am (having signed off at 12:30am), and had only a few overload trips. Then...

We found the cause. Sunday morning during Meet The Press (or whatever it is--NBC news/interview thing), we'd *just* taken apart the RF cavity on the B-side aural PA when the A-side went POP! And when we reset it, the ceiling lights blinked. Seems the lads had not dressed a ground strap away from the windings of a filter choke in the 7800V supply for the visual PA, and it arced through. So...we stole the same part out of the burned power supply, and we're running on it still. Only lost a half-hour of airtime.

Just to make things fun, someone hadn't dried off an insulator when we did that last RF cavity (BTW, these critter are madly complex, and rebuilding them is a six to eight-hour job for one or two people. We were turning them out in two hours). Probably due to the excitement of losing the A side, there was a tiny dab of moisture (probably ammonia) left inside a polystrene (? Quartz-Q or similar) insulator in the plate contact/plate blocker assembly, and when we put the high voltage on, BANG! So another half-hour was spent redoing it with new parts, and we were on.

I went home at 11:30am Sunday, slept 'til seven or so, got up, ate dinner, and went right back to bed. Got into work at 11:00am today (Monday) and I am still here--just need to do a full set of transmitter readings (takes a half-hour, every meter on the thing) and review the transmitter logs for the last week or two, then I can go home. With any luck, I won't have to come back in until 11:00am Tuesday!

So, I'm back but I am going to be awhile catching up. I hope not to go through one of these again, ever. I may have another time of being pretty absent, though--we're shopping for a new transmitter, and the GM would like to have it in by December!

One quick PS--I forgot to add that the replacement power supply arrived in pieces, and was the 208V version. Both of ours had run from 480--so part of the job was having a fair amount of conduit, new wiring, and a large 480:208 V transformer installed. I also (finally!) got individual disconnects for the two transmitters--we'd had to clip out and tape up the 4-0 leads to the A-side at a junction box high over the A-side PSU before we could turn the breaker back on. (Darned PSU was still hot, too--I think my shoe soles got a little melted!) *Not* going to go through that sort of mess again; it's about like running them from a big cube tap, a rotten way to go.

And a couple of bonuses--frustrated at the (pretty decent, IMO) stock of tools at the site, the corporate Dir of Eng sent a fellow out to more-or-less clean out the tool departments at Sears and a couple of local electronics houses! You name it, I've got it, and what a difference it makes! A new fridge showed up to replace the 1957 Philco

today--the new microwave oven arrived last Wednesday. And they tell me Ican expect some new furniture, too. So it was a pretty rough experience, but it's produced some good things, I think. :)

Oh, well--we got what we needed from RCA Broadcast, now a very small part of Comark Communications. Good ol' Stu Cook, RCA's transmitter maven for *years,* really came through for us! (And you can quote me).

73,
--Bobbi

A couple of us were sitting around last night wondering what happened
to some of the guys and girls that passed thru Detroit Radio,
particularly WDRQ. Here are some of the name we were wondering about?
Bob Pittman
Brian White
Russ Gibb
Dave Abernathy
Dave Wahl
Cliff Winston
George Moore
Dave Scott
Carl Como
Mark Driscoll
Chuck Scott
Lynn Woodison
Eric Goldberg
Stu Schader
James Brian Siciliano
Don Riley
Doak Breen
Jim Harper
Mark London
Jerry St. James
Zach Burns/Tom Force
China Jones/Ted Ferguson
Jerry Clifton
Tom Morgan
Michael Stevens
Rockin' Ron Baptist
Bill Garcia
Skip Herman
Dirty Steve Rivers
Joey Ryan
Scott Regan
Paul Nicholas"The Gospel According to Paul"
Doug Banks
Kurt Kelly
Bill Bailey
Jim Hawk
Tom "Jive" Jeffries
Pat Evens
Steve Summers aka Steve LaBeau
Jim Ryan
And any other "DRQ" alumni you can think of. Where did they all go?

# 2828. CKSL-1410 London (Ont.) Pulls Plug on News-talk format

Newsgroup: rec.radio.broadcasting
Date: 1995-10-28 00:00:00 UTC
From: hannigan@julian.uwo.ca

Source record: 28728

CKSL-1410 LONDON DUMPS NEWS-TALK FOR 50s & 60s NOSTALGIA

Hello fans of 'Ol Blue Eyes,
Good-bye fans of Forest City chatter,

News and talk radio is dead at CKSL-1410 London (Ontario). General manager Braden Doerr announced Thursday that, effective Monday October 30, 1995, his station will be pulling the plug on its 26 month experiment with "news-talk for the 90s." The format may score a ratings bonanza for certain stations in the U.S., but, according to Doerr, it was not cost effective enough to justify owner Telemedia's substantial investment in it for the London market, especially when CKSL placed only sixth out of seven in the last ratings book.

In place of news-talk, CKSL will be trying 50s and 60s standards. That's good news for those of us hungering for the song stylings of Frank Sinatra, Tony Bennett, Nat King Cole, Dionne Warwick and Barbra Streisand. It's bad news for those of us bound to lose our appetites as soon as Perry Como sings "Temptation" once too often. Sports fans can continue to get their nightly 6-10 p.m. fix at the station with the airing of Toronto Blue Jays baseball and Detroit Red Wings hockey games.

Well known midday talk show host Jim Chapman, who begged to differ with Doerr's conclusions, called Thursday's news of no more "news" at his station "a heartbreak". Chapman, a political junkie and the sole local open line host on the air after CFPL canned Ann Hutchison's "Talkback", no doubt felt insult added to injury because he was terminated only four days before one of the biggest political events of his lifetime --- Monday's Referendum on the future of Quebec. Prior to being picked up by CKSL, his show aired on CJBK-1290.

Other personnel changes at 1410 include the departure of morning man Dan Landry and the return of afternoon news personality and interviewer Andy Oudmann to mornings at sister station Q-97.5. Four out of nine news reporters also will be let go, as well as three producers.

Ratings skewed at CKSL because of last year's prolonged major league baseball and NHL hockey strikes (the station simulcasted Toronto station "The FAN"'s evening sports coverage). In order to succeed at news and talk, 1410 AM also would have had to compete against mighty CBC Radio and Radio 98 (CFPL-AM), which has a strong news presence (and bills itself as "London's News Leader").

Back in 1993 when CKSL switched to news-talk from a Top 40 heavy- on-dance- music format, many London teenagers complained that local radio was abandoning them for an older Yuppie demographic that prefers information

over music. Now that news-talk has expired on 1410, Doerr is eyeing an even older, 45+ audience who, in this GM's opinion, prefer a "non-irritating" radio sound. He cited the success of standards station CKWW Windsor as evidence of the need for a non-rock broadcaster in a highly competitive radio market.

Will a 50s and 60s standards station survive in London? Not if it calls itself "The Music of Your Life" (That format sank when neighboring station CHLO St. Thomas, now "The Hawk", reinvented itself for the umpteenth time a few years ago). But then again this is 1995 when the paucity of non-rock on the airwaves has been even more noticeable since the recent demise of CFCA-FM 105.3 Kitchener (now Classic Rock KOOL-FM), which for many years blanketed Southwestern Ontario with Middle of the Road comfort. Of course, older listeners could still tune to CKOT-FM Tillsonburg, although, as a small town operation, "Stereo 101" is (how can I say it politely?) a bit of an embarrassment.

Stay tuned!

## 2829. Detroit Arbs

Newsgroup: rec.radio.broadcasting
Date: 1995-10-28 00:00:00 UTC
From: mfrat@gopher.chem.wayne.edu
Message-ID: <46spsi$fco@vixen.cso.uiuc.edu>
Source record: 28729

I was just going through the summer arbs for Detroit and I noticed that our two modern outlets here are doing dismally. WHYT dropped over 1 point and CIMX dropped also to a dismal 1.6....Does anyone out there especially in the Detroit market, think that this will prompt any format changes for these two stations? I think that WHYT which was previously a top 40/rhythm outlet might start swinging more top 40 within the next few weeks.

I am very impressed by the turn-around by WBBM-FM Chicago (top 40/rhythm). They seemed to be slipping in the past few ratings periods, but in the summer, they picked things up and moved up into third place behind WGCI (R&B) which was number one. Perhaps some of the tweeking during the summer actually helped.

Please feel free to respond to me via email.

# 2830. Re: MD to kill CD, DAT?

Newsgroup: rec.radio.broadcasting
Date: 1995-10-28 00:00:00 UTC
From: glenn gutierrez <glenn@crworld.com>
Message-ID: <46spsn$fde@vixen.cso.uiuc.edu>
Source record: 28730

Hello Bob,

As far as consumers go, MD may have a chance against CD. Many people don't care profusely about quality (the cassette), but the cost would probably have to drop dramatically. Also, the buzz is fading fast in the U.S.

I have recommended MD to our artists for use on the road while performing "track" shows. The media is more stable than DAT, plus it has the instant access of a CD. Radio may be interested in MD also, due to it's similarities to CD, but you can re-record over a stale disc.

In the studio, though, I can tell you that I would not use MD or DCC. The compression causes a loss of audio information. On the first generation, this is inaudible from what I can tell, but for dubbing or any next generations, you will lose more and more data. This is unacceptable.

DAT will always remain as a Pro format, unless another more convienient medium comes along that doesn't use a "lossy" compression.

Glenn Gutierrez, VP Creative Services Classified Records

# 2832. Rollye James, ex of KFMB and KOA

Newsgroup: rec.radio.broadcasting
Date: 1995-10-28 00:00:00 UTC
From: maffeo@ix.netcom.com
Message-ID: <46spsp$fdq@vixen.cso.uiuc.edu>
Source record: 28732

Has anyone heard what Rollye James is doing these days? Rollye used to be on KFMB in San Diego and KOA in Denver before that. You may also remember her as Rollye Bornstein, Radio editor of Billboard Magazine in the early 80s.

In my opinion, Rollye is a true broadcasting professional. As a college student in the 80s, I contacted Rollye and asked her opinion about careers in radio. Not only did she respond, she wrote me a six page letter! In addition to possessing an incredible knowledge of pop music, Rollye's claim to fame is that she's driven on every single Insterstate in the U.S. (she can even recite the freeway exits!)

Anyway, if anyone knows Rollye's whereabouts, I'd very much appreciate a response, either by e-mail or a post to this newsgroup.

Thanks!!

G'day from Australia.

I heard a very brief rumour that Wolfman Jack has died.

Can anyone elaborate on this please?

I hope it is untrue.

Thanks in advance.

Garry Beattie
gbeattie@ozemail.com.au

[Moderator's Sad Note: Quite true. In all my years of moderating this group, I must say that I have never seen as much outpouring of love for a radio personality as I saw when Wolfman died. He must have been a real prince of a man. Bill]

# 2835. WOWO and Clear channel radio

Newsgroup: rec.radio.broadcasting
Date: 1995-10-28 00:00:00 UTC
From: "Greg A. Geiger" <grgeiger@newnorth.net>
Message-ID: <46spss$fe9@vixen.cso.uiuc.edu>
Source record: 28735

Its really sad to see WOWO go in the comming months. I listen to WOWO just about every morning on my commute to work.

I would like to make a comment on the clear channel issue. I think that clear channel stations are no longer needed. They are a thing of the past. Just about every city with a population of over 5,000 has their own radio station.

With the execption of WOWO, I would say the AM band has literally died. At night most major market clear channeled stations air syndicated junk anyway. So it wouldn't make a difference to me if the plugs are pulled on them. Most clear channel stations may have been pioneers in the broadcast industry. They aren't now! Most of them are a tax deduction.

Greg Geiger

Reception report on new XETRA signal from wonderfuly wacky western
Walla Walla, Washington

I punched up 690am at about 8pm pacific time Monday night, which I've read was
the first night of XETRA using their new antenna array and 77kw signal.
Before this upgrade I could scarcely hear them underneath a Canadian station
on the same frequency. Monday night there was no trace of the Canadian
station and a rock solid XETRA signal. Finally a station with "On the Bench"
that I can hear!

Chris Gilbreth

# 2838. Buffalo/Toronto Radio Watch(10/27)

Newsgroup: rec.radio.broadcasting
Date: 1995-10-28 00:00:00 UTC
From: ag365@freenet.Buffalo.EDU
Message-ID: <46sps7$fb2@vixen.cso.uiuc.edu>
Source record: 28738

Reply-To: ag365@freenet.Buffalo.EDU (Carl K. Gorney)

*CIDC(103.5,Orangeville,dance-top 40;Hot 103.5)and CING(107.9,Burlington, dance-CHR;Energy 108)'s LMA has expired and the 2 stations are competiting again. Liz Janik,whose consulting company worked with both stations(and who consults CKEY(FM 101 The Planet)in Niagara Falls,Ont.),will now work exclusively with Hot 103.5 . What is unclear is whether some of the stations' staff-including Don Berns-will continue to work at both stations.

*WRTS(103.7,Erie,Pa.,hot AC;Star 104)has added some sports stars to its lineup. It's the new home of the Erie Panthers of the East Coast Hockey League, moving over from WLKK/1400. (FM stations for hockey aren't new-in the NHL alone,6 teams use FM for either the flagship station(Anaheim,the N.Y.Islanders, and Toronto),simulcasts(Pittsburgh)or conflicts(N.Y.Rangers). The rest of the minors do much the same thing-the AHL's Rochester Americans use WCMF-FM (96.5)as a shadow station if an event conflicts(the Amerks usually are on WCMF-AM/990(SportsRadio 990),but also air the Red Wings(AAA baseball)and the Knighthawks(MILL lacrosse)),for example.

*"Big Al" Chwojdak,the long-time co-host of WXRL's Polka Motion(heard on Sunday afternoons)died on Monday(10/23)at the age of 74 after a long illness,according to a message on Prodigy's Radio BB. Chwojdak worked for over 20 years in backing polka music and the Polish heritage in the western N.Y. area,and was honored for his efforts in August by being named "man of the year" by the Cheektowaga Polish-American Heritage Festival.

*WGRF(97 Rock)and trouble...they just seem to go together.

Tony Violanti's Wednesday report noted that Rob Liederman,a regular on Larry Norton's morning show,made a remark with what was termed "racist overtones",starting with talk about adult novelties(i.e.chocolate-covered birth control devices)and led to the remark. A 97 Rock spokerperson said the station regretted the remarks and Liederman apologized on the air the next day,noting later that "I knew it was wrong the moment I said it." 'GRF's owners,Mercury Broadcasting,issued a new set of guidelines,which 97 Rock is trying to meet.

*Speaking of Violanti,he reported that "Iron" Mike Bensson had resurfaced on "97.7 WHTZ FM" in St.Catharines,Ont.(Of course,it's CHTZ-to us true believers.) And only 1 month after I reported on it here,too! :> Plus, he also mentioned the new GMs at WBEN(NewsTalk 930)and WMJQ(Q 102)and the promotion of Terry Rodda to oversee all of River City's stations a mere 2 weeks after _I_ reported it here.

*Finally,I'd like to welcome aboard a couple of people who'll assist me in getting the Radio Watch out(specifcially in regards to Toronto & the area),

Sean Healy & Niel Wolfish. Each has given help to me in the past on a number
of matters-which I am grateful for. Here's where to contact them:

Sean Healy: shealy@uoguelph.ca
Niel Wolfish: lobo@io.org

TTYL...

# 2839. Southern California Radio Watcher 10.27.95

Newsgroup: rec.radio.broadcasting
Date: 1995-10-28 00:00:00 UTC
From: "cHRIS O. Carmichael" <102776.224@compuserve.com>
Message-ID: <46spsc$fbu@vixen.cso.uiuc.edu>
Source record: 28739

Here's the latest from Southern California:

Los Angeles <by ace-reporter, David Alpern

LA RADIO......The little guys:

Sure we hear lots about the big guys: the KIIS's, POWER 106's, and KBIG's, but with over 80 signals eminating from within a fifty mile radius of downtown, there are alot of smaller signals which almost no one has heard of or reports about. This week, let's site a few.

KIEV - 870 AM is a little guy trying to compete with the bigger talk radio stations. This station has experienced slow but steady growth. Today it can boast itself as the home of George Putnam, Dr. David Viscott, Ray Briem, and a Star Trek talk show. It is also the 25 year home of LA's only weekly Sunday Jewish radio program.

KPLS - 830 AM is the LA home of Radio AAHS. Children's programming on a monster daytime signal. If you notice the freeway driver next to you singing along with Kermit the Frog or listening to a story read by Robin Williams, they're tuned in here.

KMAX - 107.1 FM is trying to program SPORTSTALK on the FM dial. Interesting enough, the station has NO RATINGS, despite being the only LA home of the WORLD SERIES on radio. As of this coming Monday (10/30), the nationally syndicated PETE ROSE show begins doing some of its national radio talk shows from the KMAX studios in Arcadia.

KRLA - 1110 AM is one of the only locally programmed AM music stations left in the USA which does not simply simulcast its FM big brother. The classic KRLA calls have been part of the LA radio landscape for decades. Its sister station, KLSX can't even boast that it has stuck with one set of calls, or one format for even a single decade!

KEZY - 95.9 FM is one of the select handful of stations which has faithfully stuck with or near to the same contemporary hits musical concept for years and years, or as they like to say "For longer than the Interstate 5 (Santa Ana) Freeway has been under construction." In this business, anyone who can boast consistency (i.e., at least exceeding the time span of the current owner or program director) deserves recognition.

San Diego: <reported by Chris Carmichael

IS IT E-SKIP?:
El Cajon's lone FM station, KECR-FM, [93.3 3kw] was recently sold to Jacor Broadcasting, of Cincinnati, Ohio, for more nearly $14 million. This on the heels of KECR-AM/KECR-FM sold by San Francisco-based OIA to National Family Radio

Network for $12.5 million. NFR is headquarted in Oakland. Jacor now has an "LMA" with NFR for the FM station.

Wednesday, KECR-FM began simulcasting of cross-country WDUV, a Tampa, Fla., based easy-listening station. In a post e.mail to me, Jacor's chief engineer told me that the plans are to "have some fun" with the station. The AM station still carries Christian programming and is slated to move to the expanded AM band at 1660. The AM station is currently at 910, 5kw

Involved in OIA is John Douglas, chairman of Douglas Broadcasting, that owns the trio of stations known as K-MAX -- Sports to the Max in the Los Angeles/North County San Diego area. [KMAX, Arcadia; KAXX, Ventura; and KBAX, Fallbrook all 107.1 3kw] [some obtained information: San Diego Tribune, 10.27.95]

CLARIFICATION on my previous post this week on the sale of KCBQ to Par Broadcasting. A news released faxed to me, and in the local papers [probably the same release!] both said that the sale involved the transfer of the 102.1 frequency to Compass with no facilities [such as studios, etc., etc.] Indication is now that the building in Oceanside, that was once the home of KIOZ may be included in the deal. The San Diego Tribune had a short paragraph indicated that the station was a legend in the "boss-jock" era in the 50s/60s.

I'm told that Compass does plan on using the 102.1 frequency. [As opposed to my posting that the station "could be silent."][Also coming: a new station in Temecula at 103.3, format unknown.]

[I work directly behind Par Broadcasting, and met some of the staff at a local deli this week. The mood is "upbeat" that KIOZ Rock 102, will be moving to 105.3.] Par is presently: KKLQ-FM, KOGO, San Diego; KIOZ, KKLQ-AM, Oceanside. [Only the Escondido Times-Advocate reported the proposed transfer of KKLQ-AM to Palamor Community College. The college currently has a "cable" station avail in North County via the DMX system.]

MORE CHANGES AHEAD: I'm told by several different stations that the ownership of some San Diego stations will change prior to the end of the year. John Douglas [first story] is on record to be buying more [but didn't say which market].

TALKSHOW 101: Last week, KFMB's Ted Leitner was on vacation, giving the opportunity for Larry Himmell to try his talk show aspirations out. Like an out of tune car warming up, Larry sputtered for the first ten minutes, got out during the break, kicked the tires, and then jumped in the drivers seat and took off. He filled in last Wednesday to Friday in the 3 - 5 p.m.., slot on KFMB [760 5kw/50kw DA].

What is probably unknown to most AM-only listeners is that Larry hosts a very popular jazz show on KiFM [98.1] on Sunday mornings. He did speak of this on the air saying that the sales staff "enjoyed his talking about another station in the market."

Escondido TA radio columnist, Ken Leighton, is now published in the Oceanside Blade-Citizen. The combined entertainment section appears in both papers on Friday. The TA paper, bought by the BC, will combine

soon. [Little by little, the old TA disappears.]

Has anyone noticed that: Art Bell, Don Imus, and Rush Limbaugh shows
are turning into three-hour info-mercials??

Updated: The Southern California Radio Log is updated! Contributions from Orange

Betcha that DJ would pay more attention to the AM and less
to the "13 year old girls" if HE WAS GETTING PAID TO DO BOTH
JOBS!!!

Hi folks. I'm Alex Calder, and I'm looking for people who knew, worked with, or were friends with my dad, Bill Calder. He was a radio tak show host (and for a while, a TV show host) in several markets, including Miami (WIOD), New York (WHN), St. Louis (KMOX), Los Angeles (KHJ), and others. If you have a funny Bill Calder story, or even better, if by rare chance you actually have air-checks of him on tape, I'd love to hear from you.

Item First: More headlines on the Summer '95 Arbitron's, as reported by the Washington Post's "On the Dial" (Radio) column for Tuesday, October 24th, 1995:

- In the 25-54 category, "Mix 107.3"'s (WRQX-FM, Hot AC) "Diamond in the Morning" extended its run at the top of morning drive, posting a 7.0 share, moving up a full point from the Spring Survey. Following close behind is Donnie Simpson over at
Urban Contemp WPGC-FM (95.5) with a 6.9 share, up nine tenths from Spring where he posted a third place finish. Tied in third was Howard Stern's synidcated New York show (heard on talk/jazz WJFK FM [106.7]), and the Gary Murphy/Jessica Cash morning show over at country WMZQ-AM/FM (1390/98.7), both posting a 5.9.
In Stern's case, he's down from the 6.2 posted in the Spring.

- The summer book also looked good for WHUR-FM (96.3). The Howard University-owned "urban adult" station nearly doubled its Spring showing of 3.1, finishing with a 6.0 share in summer. The key: getting the ABC-syndicated "Tom Joyner Show" away from WKYS-FM just before the survey. Morning drive has always been a tough nut for WHUR, but they seem to have overcome that hurdle.

Item Second: Two recently displaced radio sports talkers have found a new home. The Washington Post reports that Ken Beatrice, recently let go by WMAL-AM (630), has joined up with Middleburg Broadcasting Network, formed by former Redskins Hall of Famer (and now 'Skins color commentator on WJFK-FM), Sam Huff. Huff is reportedly talking to WJFK and WTEM-AM (570, sports-talk) about airing shows produced by Middleburg, featuring Beatrice. Also signed by Middleburg, former WTEM afternoon drive personality Rich "the Coach" Gilgallon. The Post says Beatrice will likely do a three-hour sports-talk show following Redskins broadcasts;
Gilgallon may be teamed with "USA Today" sports columnist Rudy Martzke.
A prototype "Martzke and the Coach" program has been given a test-drive on WAGE-AM (1200) in Leesburg, Va. Ken Beatrice got the boot from ABC O&O WMAL on Oct. 2nd after 19 years when 'MAL decided the market for sports talk in the capital was shrinking; Gilgallon was cut from "the Team" back in December when Colfax Communications began cutting back on talent as the ratings sank below the horizon.

Item Third: The Post reports that the capital city's "newest" AC station "Bright 99.5"
(WGAY-FM, formerly AC "Star 99.5", formerly AC "Easy 99.5", formerly... <grin>) will do a "Salute to the Armed Services" this Friday morning, as David burd and Beverly Fox broadcast their morning show live from the main concourse of the Pentagon. Co-hosting the event will be the USO of Metro Washington.

Til 'next week!

## 2843. Ferell on the Bench?

Newsgroup: rec.radio.broadcasting
Date: 1995-10-28 00:00:00 UTC
From: matt reed <mreed@cousteau.uwaterloo.ca>
Message-ID: <46spsj$fcs@vixen.cso.uiuc.edu>
Source record: 28743

Who is this Scott Ferell guy? I've listened to WFAN and WMVP for some time and this guy came out of nowhere. Is it just the fact that he has just broke large markets, our does Westwood 1 have the clout to put him on all these large maket stations at once? It also seems that he has taken over from "The Freak".

# 2844. SF Mayor & Mark & Brian Political Intrigue

Newsgroup: rec.radio.broadcasting
Date: 1995-10-28 00:00:00 UTC
From: dk@crl.com
Message-ID: <46spso$fdo@vixen.cso.uiuc.edu>
Source record: 28744

San Francisco Mayor "Ballpark" Frank Jordan, made news today (Friday) as recipient of a Mark and Brian prank. They brought their nationally syndicated show to SF, went to Jordan's house "trick or treating", then asked to take a shower with him. He complied and the program aired the shower, including Jordan's singing. Meanwhile, a group of KRQR listeners went to his house to cheer him on. This was all good clean fun and all that; lots of smiles all around.

== HOWEVER== why did Mark and Brian choose to do this in the last 2 weeks before the mayoral election, especially when it looks like Jordan may lose the election? What connection was made between the Jordan campaign and the Mark and Brian show? Does CBS (KRQR owner) have some connection to the Jordan Campaign? Does CBS owe Clint Reilly (Jordan's handler) a favor for some other election, say some campaign he's advising in New York or LA?

Any other time I'd shrug and say fine, no problem. But two weeks before the SF mayoral election when it's clear that Jordan is in danger of losing the elction -- this affair smells very bad.

Source record: 28746

* Summer '95 Arbitrons for Boston -- now ranked #10 market(down from #9):

Top 10 in the 12+ :

Su '95 Spr'95 5 years ago Format
(Su '90)
1. WBZ AM 1030 7.3 7.9 5.1-a Full Service-News/Talk/Bruins
2. WRKO AM 680 6.6 7.2 7.0 All-Talk/Rush/Celtics
3. WXKS 107.9FM 6.1 5.8 7.0 CHR - "KISS 108"
4. WJMN 94.5FM 5.9 5.1 6.9-b CHurban/Dance -- 'Jam'n 94-5'
5. WBCN 104.1FM 5.7 4.5 5.8 Full Service-Rock/Stern/Patriots
6. WODS 103.3FM 4.7 4.1 4.8 All-Oldies - 'Oldies 103'
7. WMJX 106.7FM 4.5 3.9 5.2 AC -'Magic 106.7'
8. WEEI AM 850 4.4 4.2 3.7-c All-Sports/Red Sox/CBS Sports
9. WZLX 100.7FM 4.3 4.1 4.9 CR -'Boston's Classic Rock'
10.WCRB 102.5FM 4.2 3.7 2.1 Classical

a-WBZ had AC format during the day and Talk at night...
b-Was WZOU and played straight CHR...Z94.5 or Zoo94.5
c-Was WHDH(Talk/Red Sox/Patriots)

Quick Overview : Big shocker of the summer is a big tumble taken
by Hot AC WBMX 98.5FM -- it fell from 4.8(#5 in 12+) in the spring to
3.8(#11). 'BMX also took a hit in all-important 25-54 demo as it
was knocked out from first place by AP WBCN 104.1FM which had huge
gains all around...Speaking of 'BCN, Howard Stern continues to do well
at night. He placed second in the 25-54 group behind all-sports
WEEI AM 850 which won night-time race with help from the red-hot
Red Sox. Stern's main competition at night, David Brudnoy on WBZ AM 1030,
came in 4th...WBMX's sister-station All-70's WEGQ 93.7FM also
didnt fare well. After registering a record-high 3.3 in the spring book, it
slid down to 2.7...

* Country race winding down....

With last week's announcement of WKLB's sale to Evergreen Media, it's
safe to say that it's now only a matter of weeks/months
before WKLB and WBCS will finally stop feuding...Summer Arbitrons have
WKLB tied for 17th place with 2.2 share and WBCS in 19th with 2.1 in
the 12+ group....What these numbers show is that a single country
station here could easily place in Top 10 with a comfortable
mid 4's share...That's what Greater Media's WBCS is now patiently
waiting for...:-)

Here's a look back at WKLB-WBCS bloody ratings race over the past
2 1/2 years...:

WKLB 105.7 WBCS 96.9

Summer '95 2.2 2.1
Spring '95 2.4 1.9
Winter '95 2.3 2.3
Fall '94 1.6 1.8
Summer '94 2.3 1.9
Winer '94 2.5 1.5
Fall '93 2.1 2.6
Summer '93 3.3 1.6
Spring '93 2.4 2.5

[WKLB 105.7FM switched to country music format on February 12,1993;
WBCS 96.9FM joined the game on May 6,1993]

* Captain Ken is back!!!

After a 4-month job search 'Captain' Ken Shelton returns to Boston's
morning radio on Wed. November 1. This is time it's going to be
on Granum's AAA WBOS 92.9FM. Shelton, 22-year Boston radio vet, was
let go by Infinity's CR WZLX 100.7FM on June 22nd after both parties were
unable to reach a new deal.[Shelton was seeking mid 6-figure
salary; WZLX pretty much wanted to keep the old deal -- low 6-figures]

David O'Leary who took over mornings last year when Bill Smith(now
production director at 'RKO) was sent to the beach, slides back
to his old afternoon slot(3-7pm). Liz Solar keeps middays(10a-3p)...
Evening shift(7pm-12a) has about 3-4 part-time jocks rotating each week...

WBOS which now tags itself as 'A Different Kind of Rock Station'
plays a blend of mostly '80s and '90s rock. In the last few weeks, it's
clearly has been tinkering with its playlist -- less of
softer, borderline AC crossover stuff; added to the mix
more of '70s+'80s popular AOR hits with strong backbeats and
good amount guitar riffs...No doubt they're trying to make
Ken Shelton feel at home when he arrives....:-)

* Other News :

- Billboard Magazine named AP WBCN's Music Director Carter Alan
as the Best MD in the country...Alan came to the [New] Rock
in 1979...

- WBCN named weekend jock/asst MD Steven Strick as asst program
director. Strick who's been with 'BCN on and off since 1978
is now PD Oedipus' right-hand man. He's also responsible
for a lot of stuff at WBCN's Webpage located at http://www.wbcn.com

- Bill Silver left his 12-3pm gig at AC WMJX 106.7FM to pursue
other business interests. Former 'MJX morning man and current
production director at WMJX and sister-station WBCS, John Kosian
is filling in...

- Struggling all-sports WBPS AM 890 has decided to wait till
next spring with its launch of a local PM-drive show...'BPS'

format is almost all satellite-delivered(courtesy of Texas-based
Prime Sports Radio). It has a local weekday morning block(6am-10a)
with Ricco Petrocelli and Mike Evans....

- Last week All-70s WEGQ 93.7FM("The New Eagle 93-7") auditioned former
WJMN morning jock J.R. Edwards for its open AM-drive slot. After
a dispute(over programming) with the new owners(Pyramid), Edwards
who did his morning show on WJMN for five years left for Dallas,TX
a year ago.

WEGQ management sent its previous morning man Scott MacKay to the
beach at the end of August by not renewing his contract. Former
WMJX-FM and WVJV-TV66 personality Bill Stephens has been filling
in regularly since then. He's also a candidate for the AM-drive
job...

- Worcerster's rocker WAAF 107.3FM added night-time(7p-12a)
personality who goes by the name of Rocko...

- Hollywood actress Terri Garr is plugging AC WMJX 106.7FM in
station's newest TV spots. She claims she's listening to
'Magic 106.7' all the time. I am not so sure about that one...
Red Sox skipper Kevin Kennedy is doing the same for all-sports
WEEI AM 850's TV spots. Hey at least, 'EEI and Fenway Park are
in the same area code...:-)

- Churban WJMN 94.5FM is now playing old Prince(or that's what they
used to call him back then:-) and Madonna stuff at least once
an hour...Is the current CHR/Urban music scene really that bad?

- WBZ's new Bruins radio voice Bob Neumier is getting harsh reviews
from Boston's daily print. And rightly so. Although, Neumier is
a very knowledgeable and enthusiastic sports broadcaster,
he calls every play like it's a horserace. Hockey is not horseracing.
It's 60 minutes long. No need to get so excited all the time, Bob...:-)

-Mark

Boston..." -- WBCN promo

# 2847. Minneapolis-St. Paul news

Newsgroup: rec.radio.broadcasting
Date: 1995-10-30 00:00:00 UTC
From: MHz@bitstream.mpls.mn.us
Message-ID: <4722a3$5lo@vixen.cso.uiuc.edu>
Source record: 28747

Reply-To: MHz@bitstream.mpls.mn.us

>From Mpls-St. Paul, rated #16 by people who count...

By November 1, KJJO-AM 950 will split its simulcast from Smooth Jazz KMJZ 104.1, becoming an affiliate of ABC's Urban Gold format. 950 will carry ABC's Tom Joyner Morning Show for AM drive. A call change is planned.

A mysterious ad that attacks Rev 105 (KREV 105.1/WREV-FM 105.3) has appeared two weeks in a row in the alternative weekly paper City Pages. The grapevine is buzzing that the ad is the work of alt-rock competitor KEGE 93.7 or an individual at KEGE. The half-page ad's first placement came a week after Rev held a semi-serious radiothon to raise "support" for the underdog modern rocker. Listeners were asked to call and "pledge their support" as the station took pledge calls like a traditional on-air fundraiser, phones a-ringing in the background. In the Summer Arbs, the Edge lead Rev by a huge margin, 5.7 to 1.5 (such is the history since the two hit the air within months of each other in early '94) though KEGE dived from a Spring 6.9 (and Rev fell from its best-ever 2.1). The 100k Edge is a modern rock top-40, while the dual-signal & (relative to Edge) signal-impaired Rev takes a fresher free-form approach with a wider range of music and dry wit imaging. But I digress.
The text-only ad attempts to admonish Rev for its "begging" (<my term) by pointing out that the Revs are owned by James R. Cargill, the son of James P. Cargill of the Cargill conglomerate. The ad claims, by quoting Forbes, that the elder Cargill is worth "One Billion 200 Million Dollars," and concludes with "Cargill Inc. is the world's largest privately held corporation. Some extremely wealthy and powerful men bring you KREV/WREV. Share this with a friend." "Paid Advertisement" appears in a corner. I guess the anonymous advertiser sees a business connection between family members where one does not obviously exist.
Did I mention that KEGE is an ABC/Cap Cities station?

Lastly, top-40 KDWB 101.3 ran one of the oldest PR gags in the book last week when morning anchor Dave Ryan was "suspended" for uttering a no-no over an unnoticed open mic. Thing is, you couldn't find anyone who heard it. The station "reinstated" him the following day (Friday) and he returned on-air Monday, so he got his two days off. They sure got what they wanted; everyone was talking about it and all local TV news shows covered it (thanks to UPN9 for putting my mug in their story). This was the motherlode of response that KEGE wishes its City Pages ad had generated.

Alan Freed (the live one in Mpls)

## 2848. Detroits MOJO and the Million Man March

Also, I neglected to mention that Jim Harper is also still a PD (as he was at DRQ) at our sister station WNIC.

Kevin O'Neill, who does PM Drive for us at Q95, did mornings at DRQ when he first came to Detroit in '79.

Steve Summers/Steve LaBeau, who worked many years out in L.A. at KFI, is in Cleveland, I think...

Last I heard about Jim Hawk was that he was doing news in D.C...it's been some time...

Joe Krause, who did music research at WDRQ in the mid-70s is PD now at KOOL 107 in Ann Arbor and still running his video-taping business...

There's a few more...

[text deleted]

Have I missed something here? From what I have read about the IBOC proposals, they are working to provide 'near CD-quality' digital quality sound for one FM broadcasting service. They will also provide some data capacity. (In the case of AM-IBOC, it is 'improved-quality' sound.) Nowhere have I seen IBOC being promoted as making possible 'a half-dozen different hi-fi stereo channels'. Indeed, everything I have read has talked about the provision of ONE high-quality, stereo digital service, using the same AM or FM frequency as the present analog signal.

It is true that the Eureka-147 digital radio system transmits five or more CD-quality, stereo signals per transmitter, with auxiliary data capacity for enhanced services. But this is in a new-band; it is not the In-Band, On-Channel (IBOC) system which is referred to above. If IBOC has announced plans for multiple digital high-quality audio services on a single transmitter, I am not aware of them, and would like to hear more.

Still, the fact the FM IBOC has better quality sound than AM IBOC could be one factor in the selling prices obtained for FM stations in the USA.

Ted Ledingham
Moderator, RADIO-L
(a list discussing Digital Audio Broadcasting)

[Moderator's Note: Yes, several people wrote in alerting me to my error. I was, indeed mistaken and was confusing the European system with the IBOC in the USA. Sorry for the error. Bill]

>The FCC does not license networks or cable channels.

A for-profit subsidiary of Pat Robertson's CBN is currently the
licensee of KXTX(TV) Ch 39 here in Dallas-Ft. Worth. So Pat Robertson is
still an FCC licensee. However, Pat Robertson's major focus is clearly
in cable. KXTX is the last remaining television station out of a once
fairly extensive group that CBN owned, which included stations in
the Norfolk, Atlanta, and Boston ADIs, in addition to Dallas.
As for the merits of the cases against Contemporary Media, I think I'll
stay as far away from that potential flame war as I possibly can...

I too have an interest in radio and TV on the net. I recently
downloaded the Xingtech receiver and made it work. I tried
to enter some new entries into it's database but I'm not sure
it will accept web address.

Do you have a list of radio and TV stations that broadcast
on the web, and do you also have their numerical IP addresses.

I wanted to expand the Xingtech Streamworks receiver and enter
some more stations and also get the Live Streams to work too.

I really appreciate your post in the Rec.radio.broadcasting

So many are...but there are notable exceptions (WJR/Detroit,
WCCO/Mpls./St. Paul, for example). But, yes, Golden Age II (roman
numerals) appears to be near an end.

How incredibly distressing. I wonder if this means that CBU is about
to go all-FM? Judging by the FCC database (wish I had the CRTC
equivalent of same), the CKO-4 (96.1) allocation in Vancouver is still
vacant... (As appear to be CKO-5 (103.1) Calgary, CKO-8 (94.5)
Regina, CKO-7 (99.1) Winnipeg, and CKO-2 (99.1) in Toronto, all in
cities with major CBC mono AM outlets. However, the FCC doesn't keep
up with all the changes in Canadian stations, only ones which have to
be notified to the US according to international agreement.)

When visiting my parents in Reno, Nevada, CBU was one of only two
listenable CBC signals (the other being CBR), and neither was as good
as what I can get here from CB[ALME] most nights (which station
depending on the conditions).

>Before this upgrade I could scarcely hear them underneath a Canadian station
>on the same frequency.

A Canadian station to which you are about ten times closer. Ah, well,
chalk one more up for the Noble family...

Hi!

Jim Grey (jimgrey@iquest.net) wrote:

: Jeffrey Herman relayed a story:
: >Here's another entertaining story from the Boatanchors email list by
: >one of our subscribers; she's the chief engineer at an unnamed station...

Correction! I'm Chief Operator (for all the good it does). Harold
Thompson is Chief Engineer, Al Grossniklaus is Director Of Engineering.
*They're* on the front line for budgets and managing the department; me,
I just review the logs, take care of FCC compliance and shoot trouble at
the transmitter, which is where my office is. Kind of a non-commissioned
officer.

: This might explain why Channel 13, and co-owned Channel 27, were both off
: the air the other night.....

But not for very long--the W27AR rig timed itself up and came back up
in fairish shape when we got the power back on; 13 was back on at half
power at 4:30am Tuesday, in time for the first newscast of the day.
(With tape of Yours Truely, look for the tired gal holding a
trouble light and muttering "oh dear, oh dear" over and over while
peering into the mass of soot that was once a power supply.
106 hours after the fire, we had rebuilt a used power supply, yanked
out the old one, and were looking at pictures from that half of the
transmitter. With a few bugs left to kill, it really wasn't until 8pm or
so Saturday night that we had them combined and were making full power.
Two more glitches got us, one late Saturday and not too bad, plus a bad
one Sunday morning when we had the side that hadn't burned taken apart to
clean out the smoke. That one took us down for a half-hour. But we've
been at full power ever since, knock wood.

It's a long story. Jeff Herman tells me he will forward my wrap-up
posted to the "boatanchors" e-mail list over here, so you folks will see it.

...And if anyone needs the RF cavities of an RCA TT17/25/35/50FH
highband VHF rebuilt, see me! I've had a lot of practice recently....

73,

>Radio programmers used to call it "urban" but I think
>that is a euphemism for "music aimed at minorities".

I actually thought R&B (or Soul, or Black) was the old name for Urban CHR, and the new name came about because the format was supposed to represent the multi-ethnic listenership of large metropolitan cities. (Also, as you have noted, it includes a fair amount of what was once called Top 40.)

I'm not sure I'd call Kiss 108 an Urban CHR station; WJMN 94.5 seems to fit that description better.

>there is a self-supporting tower sticking up out of the skyline. Whose
>tower was this ?

I am probably the oldest person in cyberspace so I'll give it a try:
Channel 2 WCBS was on the Chrysler Bldg.
Channel 4 WNBT was on the Empire State Bldg.
Channel 5 WABD (unknown, maybe the Dumont NJ facility)
Channel 7 WJZ was on the Empire State Bldg.
Channel 9 WOR was on a 900 foot tower near Palisades NJ just north of
the GW bridge.
Channel 11 WPIX was on the Daily News Bldg. and may be the free
standing tower you see in the photo.
Channel 13 WATV was on South Mountain in Orange NJ.

As I remember all of these stations were on about 1948 or 49. I think
WOR was the last to sign on. All of the above is from memory. I was
watching from Rockville Centre on the south side of Long Island in
those days. Channels 2, 4, 5, 7, and 9 put good signals into that
area. Channel 11 had a bad ghost due to reflection from the Empire
State Bldg. Channel 13 had a weak, snowy signal due to both the added
distance to Orange NJ and the lousy RF amplifier tubes used in TV
tuners of that time. But WATV had westerns every afternoon followed
at 5PM by Uncle Fred's cartoon show with old 1930's cartoons. Anyone

else remember Farmer Grey? I don't remember what they ran at 5:30
because I would flip to WNBT for Uncle Bob and Howdy Doody.

I am Chief Engineer of WCVF AM/FM at the State University of New York at Fredonia. Our news/production console, a UREI 1693 recently became in need of some parts, specifically the monitor amp and the cue/headphone amp cards. When I called the tech support, I was told that these parts are obsolete and no longer available and that I would have to fix them at the component level. I do not have any tech manuals on this console and don't know where to begin. If someone can offer me any assistance as to where I can find parts lists, shematics, or the whole card, please drop me some E-Mail or fax the info to WCVF at (716)673-3427.
Thanks in advance!

## 2864. Streamworks compared to Real Audio

Newsgroup: rec.radio.broadcasting
Date: 1995-10-30 00:00:00 UTC
From: Connor Herridge <Cheridge@onramp.net>
Message-ID: <4722bc$5nf@vixen.cso.uiuc.edu>
Source record: 28764

The problem that I see with Real Audio is that it has to be installed which is a complex matter. Then there's that 'permission to listen' from the people that broadcast over real audio, a real bummer. It seems that ABC has a long questionaire that you have to fill in before they allow you to listen to their broadcast, and frankly, I felt like I was being put through the third degree in some pulp paperback of the 1940's. Maybe Real Audio with all of their forms, permission, questionaires, etc, is not the way to go. maybe there's a newer, easier way to access audio on the net.

I downloaded, and tried out the Streamworks receiver which was a joy to use. I didn't need to set up applications, or fill out forms, or even get anyones permission, I just called it up and punched the buttons, and selected what I wanted to hear.

And now for the clincher. It not only transmits real time audio, but TV pictures as well. The pictures were a little slow, refreshihg themselves once every 4 seconds (at 28.8 baud) and they were not really all that clear, but the amazing thing is that they were transmitted at all, and they all contained audio as well.

The deregulation of the local phone companies, and a general increase in competition from other phone providers, will provide all of us with better, cheaper, high speed phone lines so that we could receive Television, Radio, Video Shopping, and (what else?), in the future.

Cheap ISDN, T1 and T3 lines, will usher in the 'Internet' age at warp speed, I think, and companies, like Xingtech, who seem to understand the technology of the future will be there leading the way.

I would suggest to all broadcasters, to put their programing online and to consider the using the Xingtech, MPEG-2 technology because of its ease of use, and compatability with video.

Just my opinion.
Connor Herridge
Texas Cinema

[Moderator's Note: This new stream technology is great. But I wonder what will happen if everyone starts using it? I mean how long will it take for the large Inet providers to restrict this stuff once the

bandwidth gets overwhelmed? Also, since Spring and Mci are major Inet providers, AND major telecom providers, how long will they sit still while people use cheap Inet accounts to accomplish international long-distance? Just some thoughts.. Bill]

Your observations regarding the signals of both KNRQ in Eugene and KNRK in Portland are correct in that they are short-spaced against stations in each others markets...

As far as KNRQ is concerned, we do get a good signal over most of Lane County, but like KNRK, our coverage is confined for the most part to our metro...which...by the way...is where the bulk of our revenue will come from...

For our part, we're confident that the station will not only survive, but SUCCEED, both in its own right and its strategic partnership with KZEL...

# 2867. Kansas City Radio Watch (30-Oct-1995)

Newsgroup: rec.radio.broadcasting
Date: 1995-10-30 00:00:00 UTC
From: transvox@crl.com
Message-ID: <47229u$5lj@vixen.cso.uiuc.edu>
Source record: 28767

Kansas City's four top-rated stations retained their rankings in
the summer 1995 Arbitrons, with "smoooth jazz" KCIY(FM) continuing its
rapid climb from the spring survey to place fifth this time.
The 12+ numbers, as published in _Billboard_, and quoted here under
the moderation rules of rec.radio.broadcasting (see disclaimer*), indicate
more trouble ahead for WDAF(AM).
While 25-54 summer survey numbers were not available, it can be
noted that WDAF took a severe hit in the spring book in that key
demographic group. With summer 12+ numbers declining from 7.3 in the spring
to 6.8, one can expect a comparable decline in the 25-54 age group.
Even more frightening for the "Flatlands Godzilla" is to contemplate
its summer 1994 12+ share: 10.0, good for number one a year ago.
Occasional coverage of the O.J. Simpson trial helped boost KCMO(AM)
from a 2.3 spring 12+ performance to 3.6 in the summer. Royals baseball
did not help its duopoly partner, KMBZ(AM): the news/talker declined to 4.9
from 5.5 in the spring. Before WDAF snagged the Royals in 1992, baseball
play-by-play always meant at least a 1.5 boost in summer shares for KMBZ.
A disappointing performance came from modern-rocker KISF(FM), down to a
2.3 in the summer from 3.1 in the spring. "Kiss FM's" morning show has since
been revamped to incorporate a more personality-intensive approach, and
the station finally seems to have succeeded in shedding vestiges of its
previous hit-radio image.
A far tougher challenge awaits KYYS(FM): the album-rocker continued its
downward slide, dipping below a 4.0 share for the first time in at least
six years. The station has since gone through its annual ritual of
program-director replacement, with more modern-rock crossovers showing
up on the playlist as a result.
The numbers, subject to disclaimer*, are:

Summer Spring Winter 1994
1995 1995 1995 Average
KFKF FM 8.4 8.2 7.5 8.2 Country (also see item later on)
KPRS FM 7.6 8.1 8.9 7.8 Urban-contemporary
WDAF AM 6.8 7.3 9.8 9.9 Full-service country (stereo)
KCFX FM 6.3 6.2 6.5 5.3 70s classic rock, Chiefs flagship
KCIY FM 6.2 4.3 1.3 1.8 Smooth jazz since 3/95
KBEQ FM 5.8 5.8 5.9 5.9 Young country
KCMO FM 5.4 6.2 4.9 4.8 Oldies
KQRC FM 5.2 5.3 3.9 5.0 Current-oriented album rock
KMBZ AM 4.9 5.5 5.2 5.0 News/talk/sports, Royals baseball
KUDL FM 4.8 3.9 5.2 4.8 Adult contemporary
KLTH FM 4.6 5.5 5.4 5.7 Soft adult contemporary
KMXV FM 4.3 4.5 4.0 4.0 Contemporary-hit since 3/94
KYYS FM 3.9 4.4 4.5 4.8 Heritage album-rock

KCMO AM 3.6 2.3 3.6 3.3 Talk
KXTR FM 3.2 2.9 3.5 3.2 Classical
KFEZ AM 2.4 2.3 2.9 1.8 Middle-of-the-road (stereo)
KISF FM 2.3 3.1 2.6 3.2 Modern rock since 1/95 (rimshot)
KPRT AM 1.4 1.7 1.4 1.8 African-American gospel
KCCV AM 1.2 0.7 1.3 Hateful American gospel
WHB AM 1.0 1.0 0.8 Farm, traditional country //KMZU(FM)

Missing In Action:
KBEQ AM 0.7 1.0 0.8 Talk (People's Radio Network) since 3/94
KCCV FM 1.0 0.7 Gospel adult contemporary
KNHN AM 1.1 1.0 Local talk/CNN news

* DISCLAIMER: By subscribing to this Usenet newsgroup, to this mailing list, or by accessing this "World Wide Web" page or "Web" pages linked to it, you give your assent to the assumption that Usenet, this mailing list (AIRWAVES Radio Journal), and/or "World Wide Web" pages associated with the Mid-America Radio Page qualify as a journalistic news medium for the purposes of this report. Other comments and observations are solely those of the author, based on his background in the Kansas City market.

OK, enough of *that*. Now for some other news....
*****
As reported by other Radio Watchers, the Par Broadcasting purchase of Compass Media does indeed include Compass' two stations in St. Louis: sports-talk KFNS(AM) (formerly WRTH) and soft adult-contemporary KEZK(FM). (For any soft adults who might be out there listening.) You may be interested to know that the station at 102.5 became KEZK in 1973 after community radio pioneer Lorenzo Milam sold the legendary KDNA(FM) to provide seed money to launch other community-access stations.
****
Judging by entries in this week's _M Street Journal_, the Lutheran Church-Missouri Synod has given up on plans to buy St. Louis City school district station KSLH(FM). The application to transfer ownership of the station has been dismissed, and a new application has been filed by KSLH, indicating a sale to someone else. KSLH continues to be programmed by Webster University.
****
A correction for another item appearing in _M Street_: In a brief item about EZ Communications' sale of $150 million in bonds to refinance debt and finance the acquisition of KFKF(FM), the station was reported as being in Tulsa. It is in Kansas City. EZ is buying KFKF for $28 million on the heels of its purchase of KBEQ-AM/FM for $7.65 million earlier this year, forming a country-music format duopoly in Kansas City, and giving WDAF even more to worry about.
****
The most famous resident of Lawrence, Kansas -- Beat poet William S. Burroughs -- will get some Halloween airtime on the local modern-rocker, KLZR(FM). "The Lazer" will feature Burroughs' reading of Edgar Allan Poe's "The Masquerade of the Red Death" at 1 pm, 8 pm, and midnight on Oct. 31.

****
Also in Lawrence, the one-of-a-kind ambient/techno "Nocturnal
Transmission" program is continuing on Sunday nights while host
Ray Velazquez continues his recovery from a brain aneurysm. DJ "Sam I Am"
from Kansas University station KJHK(FM) is filling in with a somewhat
more energetic program.
****
"Radio Free Westport" exiles Stan Henry and Joel Hornbostel have found
a new home at KISF. The duo now hosts "The Living Room" for two hours on
Sunday nights. The show appears to be more adventurous than their previous
Sunday-night effort at KYYS, suggesting that KY-102 was afraid to let them
liberate listeners from the station's heritage album-rock format.

Chuck wrote two letters today -- one to Mr Rice and a second to the Editor of
the Star for the Letters to the Editor section. The contents of the latter,
which should be considered an open letter, follows...

October 24, 1995

Editor
Kansas City Star
1729 Grand Avenue
Kansas City, MO 64108

Dear Editor,

I read with great interest Tanika White's article on the Kansas City Association of Black Journalists fourth annual Media Awards ceremony, a copy of which was forwarded to me by a loyal listener in Kansas City. I would like to lay a couple of issues on the table for your reader's consideration.

First, I find Mr. Rice's criticism of talk radio interesting, particularly in the light of the decision of ABC Radio, a co-owned company of the Kansas City Star and his employer, to drop talk show host Jim Hightower and his populist views.

Second, regarding Mr. Rice's statements about KBEQ-AM, which broadcasts almost entirely programming from the People's Radio Network with the exception of African-American Conservative host Ken Hamblin from 6-9am, we must take strong exception to his characterizations. We welcome a direct confrontation on the issues that Mr. Rice raised. His statement that a program "talked about their dislike for government, the president, Mexican-Americans, the Japanese and Spanish-speaking people" is untrue and places us in a derogatory light. We ask Mr. Rice to please identify for us the exact program, what specifically offended him, and what is his point of view on the issue. We welcome an open and honest discussion of issues, but we believe that it is more reasonable to discuss and respond to the issues, rather than resorting to character assassination. When anyone does that, everyone loses.

As a journalist, we would welcome the opportunity for Mr. Rice to come on our program and express his concerns, after all, that's what we are all about.

I eagerly await his response.

All The Best,
Chuck Harder

# 2869. Kansas City Assn of Black Journalists slam on PRN

Newsgroup: rec.radio.broadcasting
Date: 1995-10-30 00:00:00 UTC
From: afn09595@freenet3.freenet.ufl.edu
Message-ID: <4722a0$5ll@vixen.cso.uiuc.edu>
Source record: 28769

Reply-To: afn09595@afn.org

Bill, my apologies if this has been shipped out, but it
hasn't been seen here if it was...

Mark Roberts' posting on the Kansas City Association of Black
Journalists slam on the People's Radio Network and KBEQ-AM in Kansas
City has not gone unaddressed by PRN founder Chuck Harder, who wrote a
personal note to association president Glenn Rice and the following
Letter to the Editor of the Kansas City Star...

---

October 24, 1995

Editor
Kansas City Star
1729 Grand Avenue
Kansas City, MO 64108

Dear Editor,

I read with great interest Tanika White's article on the Kansas
City Association of Black Journalists fourth annual Media Awards
ceremony, a copy of which was forwarded to me by a loyal listener
in Kansas City. I would like to lay a couple of issues on the
table for your reader's consideration.

First, I find Mr. Rice's criticism of talk radio interesting,
particularly in the light of the decision of ABC Radio, a co-owned
company of the Kansas City Star and his employer, to drop talk
show host Jim Hightower and his populist views.

Second, regarding Mr. Rice's statements about KBEQ-AM, which
broadcasts almost entirely programming from the People's Radio
Network with the exception of African-American Conservative host
Ken Hamblin from 6-9am, we must take strong exception to his
characterizations. We welcome a direct confrontation on the
issues that Mr. Rice raised. His statement that a program "talked
about their dislike for government, the president, Mexican-
Americans, the Japanese and Spanish-speaking people" is untrue and
places us in a derogatory light. We ask Mr. Rice to please
identify for us the exact program, what specifically offended him,
and what is his point of view on the issue.

We welcome an open and honest discussion of issues, but we believe
that it is more reasonable to discuss and respond to the issues,

rather than resorting to character assassination. When anyone does that, everyone loses.

As a journalist, we would welcome the opportunity for Mr. Rice to come on our program and express his concerns, after all, that's what we are all about.

I eagerly await his response.

All The Best,

Chuck Harder
People's Radio Network

---

What makes this shot by the KCABJ even more interesting is that within the last month the Congressional Black Caucus guested on Chuck's program! The RNC, DNC, Libertarian Party, even Betsy Myers herself have guested. That's hateful talk????

# 2870. KTAR FIRES SCOTT

Newsgroup: rec.radio.broadcasting
Date: 1995-10-30 00:00:00 UTC
From: Michael Hagerty <Michael_Hagerty@azfamily.com>
Message-ID: <4722a1$5lm@vixen.cso.uiuc.edu>
Source record: 28770

Pulitzer News/Talk KTAR(620) fired longtime news director Jeff Scott late last week. Scott, a 12 year veteran of the station says he and GM Mark McCoy had philosophical differences, and he will be looking for work at other Phoenix radio and television stations.

A side note: The Arizona Republic/Phoenix Gazette recently consolidated news staffs, with Julie Newburg's Monday radio column and Barbara Holsopple's radio and tv coverage evaporating.

Tuesday(10/24's)editions of the paper reported on KTAR's dismissal of Jeff Scott with a story
written by Valley(okay, world)radio legend Charlie Van Dyke, whom the bylined identified only as "correspondent".

Opinion: More! And next time, give the guy a better title... something that tells the average reader the level of expertise Charlie(KFRC,WRKO,KHJ,KOY,KKFR,KTAR,KPSN,KFYI) brings to what he's writing.

## 2871. Urban CHR

Newsgroup: rec.radio.broadcasting
Date: 1995-11-01 00:00:00 UTC
From: Darius Filon <ST92J2GL%DUVM.BITNET@pucc.PRINCETON.EDU>
Message-ID: <477ksg$cvf@vixen.cso.uiuc.edu>
Source record: 28771

Someone posted recently about WJMN 94.5 and how they're playing Prince and Madonna every hour, and is the music for urban CHR really going down-hill?

It must be. I spotted Hootie & The Blowfish on last week's B-96 WBBM playlist.

Interesting!

Source record: 28772

In article <46sps8$fb8@vixen.cso.uiuc.edu>,
Tom Desmond <wsu@mimi.itg.ti.com> wrote:
: One notable no-show in the above ratings is "Hot Tejano Hits" KICK-FM,
:which is a multicast on 99.1 and 1440 in Denton, 107.9 in Corsicana, and
:106.7 in Granbury...

They don't show because Arbitron is counting each of the three FM transmitters
separately (the AM didn't even show up in the book).

KCKK (106.7 Granbury).....0.1
KHCK (99.1 Denton).....0.8
KICA (107.9 Corsicana).....0.9
Total: 1.8

Not bad... enough to put them in 22nd place.

# 2873. Bill Manders fired

Newsgroup: rec.radio.broadcasting
Date: 1995-11-01 00:00:00 UTC
From: KUZZ1@aol.com
Message-ID: <477ksd$cvc@vixen.cso.uiuc.edu>
Source record: 28773

Controversial Bakersfield talk-show host Bill Manders was fired Thursday night by KERN (AM 1410). The Bakersfield Californian quotes KERN vice-president Rogers Brandon as saying "we canceled the show because of ratings and direction...we felt as if we had run the course with the show and it was just time for something new." Brandon also expressed concerns over some of Manders' content, including anti-Semitic rhetoric and discussions of homosexuality. Manders' show was Bakersfield's most-listened-to local talk show and ranked sixth in its time period in the summer Arbitron ratings with a 5.7 share (12+). But his audience was predominantly male, which Brandon said was another of his concerns.

Manders has been replaced in the 4-6 PM slot by another conservative, Julienne Smith, who has been a fill-in host at the station.

|: I'd like to write and produce funny radio commercials ( ala Stan
Freberg ). I
|: currently write for Jay Leno, so I have comedic talent. I'd just like to
|: channel it to radio. I want to bring back the fun that funny radio
commercials
|: used to bring to me as a kid, and bring them up to the 90's.
|: Could you tell me the best way to go about getting in the business. I have
|: digital computer software and need to know the basics. Thanks.

Ignore the computer software and spend some time in a radio production
room or agency-oriented recording studio. Learn some session skills and
how to deal with production elements and talent. There are certain
assumptions your clients will make -- like, you know how to mix for
broadcast, you can work with sfx, and you're familiar with talent payments
-- and you don't want to be caught emptyhanded.

Best way is to have your friend Jay write you a letter of reference, and
take it around to the stations or local ad studios and say "I'll write for
you in exchange for you teaching me the techniques". If it's a really
glowing letter, go to the big comedy services or the ad-humor boutiques.

Then, when you've learned the skills on somebody else's nickel, you can
take your computer software _and_your_reel_ and start your own business.

Joe Frank v4.2
Frequently Asked Questions 11/95

------------------------------------------------------------------------------

Welcome to the Joe Frank FAQ, posted sporadically to alt.radio.networks.npr,
rec.radio.broadcasting, rec.radio.noncomm, rec.answers and news.answers.
It was created by Richard Looney with assistance from many Joe Frank fans
who are net.citizens.

Additional information is welcome - please send to rlooney@csc.com.

------------------------------------------------------------------------------

Contents:

1. Who is Joe Frank? -> Biography

2. What has he done? -> Chronological Listing of Radio Programs

3. How about video and writing? -> Listing of his non-radio work

4. Is he still on the radio?

5. Are tapes of the radio programs available?

------------------------------------------------------------------------------

1. Who is Joe Frank?

Joe Frank is *not* the host of a long-running New York talk show, and a
different Joe Frank (Carollo) was responsible for those top-40 hits from
the early 1970s. Joe Frank is best known for the weekly radio show
called "Work In Progress" he created in the studios of KCRW, Santa Monica
between 1986 and 1992. Starting in 1993, Joe changed the title to "In The
Dark". His program was picked up by some of the more progressive public
radio stations, since KCRW made it available 'on the satellite'. In early
1995 it was announced that Joe Frank would be 'taking a break' from "In
The Dark", and it was removed from their schedule. "He made the decision
after considering a number of opportunities in film and cable."

The following biography from KCRW was dated April 1990:
```

Joe Frank was born in Strasbourg, France of a Viennese mother and a Polish father. His family immigrated to New York City where Frank was raised and educated. Frank, who received a B.A. from Hofstra University, attended the Iowa Writers Workshop and subsequently taught at the Dalton School in Manhattan.

In the mid 70's Frank joined WBAI, the New York Pacifica station, as a volunteer. By 1977 he was the host of "In The Dark," a late night entertainment program that featured Frank's monologues, improvised sketches, and live music. In 1978 Frank moved to Washington D.C., to anchor the weekend edition of "All Things Considered" on National Public Radio (NPR). From 1979 to 1985 he wrote, performed in, and produced 18 dramas for NPR Playhouse, garnering many broadcasting honors, including the 1982 Broadcast Media Award, the 1983 Radio Program Award from the Corporation For Public Broadcasting, two consecutive Gold Awards at the International Radio Festival of New York (1983 & 1984), the American Nomination to the 1984 Prix Italia and a Special Commendation from the Berlin Prix Futura (1985).

In 1986, at the invitation of Ruth Hirschman, general manager of KCRW, Frank moved to Los Angeles where he created his own weekly one-hour program, "Joe Frank: Work In Progress" at the Santa Monica-based NPR station. In 1988 Frank won both the prestigious Major Armstrong Award and the Corporation For Public Broadcasting Program Award for his three-part series "Rent A Family."

In February 1989 "Rent A Family" was adapted and directed by Paul Verdier at Stages Trilingual Theater. In March of 1989 Frank gave his first one-man show ("Joe Frank: In Performance") at the Museum Of Contemporary Art's Ahmanson Theater.

Frank has published two plays, "The Decline Of Spengler" (New Directions 48, New York) and "A Tour Of The City" (Tanim Press, New York). A volume of fiction, "The Queen Of Puerto Rico And Other Stories" will be published by William Morrow (New York) next winter.

Montreal's Theater Anima will present Frank's award-winning "A Tour Of The City" at Hangar Number 9 of the Old Port of Montreal in June 1990. This drama, featuring a cast including performers from Cirque du Soleil, will be under the direction of Jordan Dietcher.

Michael Mann, creator of the television series "Miami Vice" and "Crime Story," has purchased the rights to Frank's radio monologue, "Night" and plans to adapt it for a feature film.

2. What has he done? Chronological List of Joe Frank's radio programs

This listing began as the Work In Progress Program List received from KCRW in 1987. That list was then augmented by the author of this FAQ as new shows were broadcast. The productions were originally listed by KCRW as either monologues (M), dramas (D), or both (MD). This FAQ continues that tradition, but simplifies it such that programs with a single vocalist are listed as monologues (performed by Joe Frank unless noted otherwise) and programs featuring multiple performers are marked as dramas.

Additional information augments this listing:

(cast members of the dramas are enclosed in parentheses)
... based upon the credits announced at the conclusion of each
program - note that there may be misspellings! The following key
identifies those performers who appear more than twice:

AH Avery Hart AJ Annalee Jeffries
AM Arthur Miller BD Beth Dixon
BM Bernie Mantell BS Barbara Sommers
DR David Rapkin DSJ David St. James
ES Eric Sears FMA F. Murray Abraham
FZ Farley Ziegler GZ Grace Zabriskie
HP Harvey Per HW Helen Wilson
IW Irene Wagner JP Joseph Palmieri
LB Larry Block LE Laura Esterman
LM Larry Massett LN Lester Navscer
MH Mark Hammer NA Nick Aulette
PM Paul Mantell RC Ryan Cutrona
RF Rosemary Foley TJ Tim Jerome

[ musical artist and title is noted between square brackets ]
Some sources of background music used in selected programs are identified.

{ Comments are enclosed in curly brackets }
The author of this FAQ has annotated the listing with a few comments.

>>> various NPR Productions <<<

1978
-----

The 80 Yard Run
monologue - one hour
{ KCRW's program list had this show in the middle of the 1979 entries,
but a KCRW announcer's introduction to this program claimed this to
be Joe Frank's very first show, initially broadcast in 1978 }

1979
-----

A Call in the Night
drama - one hour
(BD, ES, AM, BM, IW & Joe)

Arena
drama - one hour
(AJ, AM, BM, RF, ES, Joe & TJ)

The Death of Trotsky
monologue - one hour
[ Miles Davis, "Solea", from "Sketches of Spain" ]

'Til You're Gone
drama - one hour

(AM, Robin Bartlette, TJ, BM, IW, ES, RF, DSJ, Marcel Rosenblatt & Joe)

Summer Notes
drama - one hour
(TJ, BD, AM, LN, RF, BM, Fran Dorn, DSJ & Joe)

-----

The Rare Recording
drama - half hour
(BM, ES, AM, IW, FMA, Christina Moore & Joe)

Joe Frank in Concert
monologue - half hour
{ recorded live at Bushido, a gallery in NYC }

1982
-----

The Decline of Spengler
drama - one hour
(Joe, BS, JP, LN, IW, TJ, Leslie Katz (or Cass), DR, RF, Charles Potter,
AM & Brother Theodore)
[ Steve Reich, from "Music for Eighteen Musicians" ]

Lies
drama - one hour
(Joe, MH, FMA, BS, Christina Moore, TJ, AM & Jane Hunt)
[ Mother Mallard's Portable Masterpiece Company, "Ceres Motion" ]
[ Philip Glass, "Part One" from "Music In Twelve Parts" ]
[ Steve Reich, from "Music for Eighteen Musicians" ]
{ contains "The Night Watchman", which was used to conclude
All Things Considered on Halloween, 1979 }

1983
-----

The End
drama - half hour

Pilot
drama - half hour
(BS, Clark Gordon, PM, LB, IW, Joe, AM & TJ)
[ Pat Metheny, "As Falls Wichita, So Falls Witchita Falls" ]

The Queen of Puerto Rico
monologue - half hour

Sales
monologue - half hour
[ Steve Tibbetts, "Walking" from "Northern Song" ]

Warheads
drama - half hour
(LN, PM, AM, MH, IW & Joe)

Questions
drama - half hour
(TJ, MH, AM, PM, ES, IW & Joe)

1984
-----

A Tour of the City
drama - part 1 one hour, part 2 half hour
(Alan Hunter, Marilyn Casky, BS, AM, Richard Bower, TJ, MH, JP, LB & Joe)
[ Steve Reich, from "Six Marimbas" ]
[ Harold Budd, "Flowered Knife Shadows" from "Lovely Thunder" ]
[ Brian Eno, from "On Land" ]
[ Tangerine Dream, "Remote Viewing", from "Exit" ]
[ Popol Vuh, "Brothers of Darkness - Sons of Light" from the soundtrack
of Herzog's "Nosferatu" ]

Across the River
drama - half hour
(AM, PM, LN, AH & Joe)

1985
-----

Dreams of the River
monologue - one hour

Dear Annie
monologue - one hour

A Pact With God
monologue - one hour

Pretender
monologue - one hour

When She's Asleep, She Looks Like an Angel
monologue - one hour

>>> Work In Progress <<<

1986
-----

Photography
drama - one hour
(TJ, NA, Sandy Fazin, DR, LN, AM & Joe)

Rain
drama - one hour
(Angel, Shawn, Dinah, Chantell, LN, LM, Scott Carrier & Joe)

Talking About Love
drama - one hour
(Dennis, Doug, Danny, Bobby & Craig)

Another Country (parts 1, 2, and 3)
monologue - three hours
[ Philip Glass, "Facades", from "Glassworks" ]
[ Eno/Byrne, "Qu'ran" from "My Life in the Bush of Ghosts" ]

A Landing Strip in the Jungle
monologue - one hour

No Show
monologue - one hour

Let Me Not Dream
monologue - one hour
[ Brian Eno, from "Thursday Afternoon" ]

Case Studies
drama - one hour
(AM, NA, TJ & Joe)

Cocktails Before Dinner
monologue - one hour
[ Jon Hassell, "Power Spot" and "Wing Melodies" from "Power Spot" ]

Dreamland
monologue - one hour

An American Flower
monologue - one hour
[ Ry Cooder, from the soundtrack of "Paris, Texas" ]
{ also broadcast as: Rose }

Why I Don't Love You Anymore
monologue - one hour

Tell Me What To Do
monologue - one hour

Highways West
monologue - one hour
[ Fred Simon, "Time and the River" from "Usually/Always" ]
[ Brian Eno, "Always Returning", from "Apollo" ]

Night Ride
drama - one hour
(TJ, MH, JP, Alan Hunter, LN, AJ, FMA, AM & Joe)
[ Steve Reich, from "Six Marimbas" ]
[ Gavin Bryars, from the original "Sinking of the Titanic" ]
[ Harold Budd, "Flowered Knife Shadows" from "Lovely Thunder" ]
{ continuation of A Tour of the City }

1987
-----

Rent A Family (parts 1, 2, and 3)
drama - three hours
(BS, MH, AM, TJ, NA, Carolyn Swift, LB, Lynn, Sarah, Carmen, Thomas, Timo, Sharon, & Christa)
[ Harold Budd, "Gypsy Violin", from "Lovely Thunder" ]

In the Middle of Nowhere (parts 1, 2, and 3)
drama - three hours
(TJ, LB, AM, LE & RC)
[ Andreas Vollenwieder, "The Stone" from "White Winds" ]

The Policemans' Ball
drama - one hour
(TJ, AM, NA, LB, BS, Steve Friedman, Denny Partridge & Joe)
[ Rossini's "William Tell Overture" performed by the Portsmouth Sinfonia ]

He Hesitated
monologue - one hour
[ Frank Sinatra, "All My Tomorrows", from the soundtrack of "A Hole in the Head" ]

At The Border
monologue - one hour

Thank You, You're Beautiful
drama - one hour
(LE & Joe)
[ Harvey Sachs, "What the World Needs Now" ]
[ Popol Vuh, "Brothers of Darkness - Sons of Light" from the soundtrack of Herzog's "Nosferatu" ]

To The Bar Life
monologue - one hour

1988
-----

The Emergency Room
drama - one hour
(AM, TJ, LB, PM, LN & Joe)

Stories For Nothing
monologue - one hour

Building A Church
drama - one hour
(TJ, Tess, AM, Richard Eisner & Joe)
[ Bill Nelson, "West Deep" and "The Spirit Cannot Fail" from "Chance Encounters in the Garden of Lights" ]

The Street
drama - one hour
{ vocalists unidentified }

Lines
monologue - one hour

Words
monologue - one hour

Five Part Dissonance
drama - one hour
(ES, AM, AH, PM, FMA, AJ & Joe)

Emerald Isle
drama - one hour
(Fionualla Flannigan, LB & Joe)

Home
monologue by GZ - one hour

Islands
monologue - one hour

Sleep
monologue - one hour

1989
-----

Performer
drama - one hour
(LN, Julie Renick & Joe)
[ Enya, "Watermark" and "River", from "Watermark" ]

The More I Know You
drama - one hour
(A. Lorey, Antony Becker & GZ)

Road To Hell
monologue - one hour

Nausea
monologue - one hour
[ Yello, "The Race" from "Flag" ]

Bad
drama - one hour
(TJ, Tess Steincolk, AM, LB, PM & Joe)
{ essentially the same as Building A Church }

Great Lives
drama - one hour
(AM, RC, TJ, Julie Renick & Joe)

Night (parts 1 and 2)
monologue - two hours
[ Meredith Monk, "Turtle Dreams (Waltz)", from "Turtle Dreams" ]

1990
-----

The Truth About Women (parts 1 and 2)
drama - two hours

I'm Not Crazy
monologue - one hour
[ Andreas Vollenwieder, "Flight Feet & Root Hands" from "White Winds" ]

Iceland (parts 1, 2, and 3)
monologue - three hours
[ Eno, Moebius & Roedelius, "Tzima N'arki" from "After The Heat" ]

1991
-----

The Dictator (parts 1, 2, and 3)
monologue - three hours
[ Enigma, "Principle of Lust", from "MCMXC" ]
[ David Van Tieghem, "They Drive By Night", from "Strange Cargo" ]

On The Edge
monologue - one hour

1992
-----

Redneck Rounder
monologue by J. B. Allison - one hour

El Cholo (The Beginning)
monologue - one hour
{ vocalist unidentifed }

The Best
monologue - one hour

In The Dark (parts 1 and 2)
monologue - two hours
{ with Theo Mondel & Debbie Devine }
[ Thomas Newman, from the soundtrack of "The Player" ]
[ Kurt Neumann, from the soundtrack of "The Bonfire of the Vanities" ]

Two Babes

monologue - half hour
{ excerpts from Iceland }

3. How about video and writing? Listing of his non-radio work

Joe Frank on screen:
---
A short video was presented at the Santa Monica Public Library in 1988. It showed Joe speaking in the KCRW studio, a woman driving up to a pay phone and making the calls heard in "Thank You, You're Beautiful", and material from "Pretender", including the scene of Joe with the pillows stuffed up his shirt.

Jerry Summers, one of Joe Frank's cohorts in the studio, says that "... Joe did a short for CBS for a late-night summer-replacement show called 'The Midnight Hour'. The piece was 'Memories', a re-working of a WIP story. It aired (as I recall) late August or early September 1990, on the final night of 'Midnight Hour'."

A short film has been aired as filler on the Los Angeles PBS station, KCET, showing a montage of urban images (among which is Joe at the microphone) accompanying the first segment from "Islands".

Three shorts are available on Playboy's "Inside Out" anthology series, released on videotape in 1992:

Volume 2 contains "The Hitchhiker"
(which dramatizes the first segment of "Nausea")

Volume 3 contains "The Perfect Woman"
(which is similar to part of "Sleep", and also dramatizes part of "The End")

Volume 4 contains "Jilted Lover"

Joe Frank stars in these features.

... and the 1995 Zima commercial

Joe Frank in print:
---
An article about Joe called "Radio Noir", by Jamie Diamond, can be found in the Los Angeles Times Magazine of Sunday, November 22, 1987. The Wall Street Journal profiled him in an article in their March 15, 1988 edition. Another article, by Dick Lochte, called "Frankly, Joe's Branching Out", appeared in the March 1989 issue of Los Angeles Magazine. Much more verbiage (generally quite favorable) appeared in the wake of the release of

his book of short stories, _The Queen of Puerto Rico_, which was published in 1993 by William Morrow and Company of New York.

Contents of _The Queen of Puerto Rico_ :

Tell Me What To Do
Fat Man
Night
Green Cadillac
Date
The Queen of Puerto Rico
Winter
The Decline of Spengler

{ Fat Man contains material from "Dreams of the River", and Winter has similarities to "When She's Asleep, She Looks like an Angel" }

Joe Frank on disk - commercial recordings:
---
"Strange Cargo Hinterland" is a William Orbit production released in 1995. The track "Montok Point" contains some brief monologues by Joe Frank.

4. Is he still on the radio?

The following stations play repeats of Work In Progress or In The Dark:

KDVS 90.3 Davis, California
Saturdays at 11PM, and Mondays at 11PM
[Monday slot may move to Wednesday, soon]

KPFA 94.1 Berkeley, California
Thursdays at 11PM

KUOW 94.9 Seattle, Washington http://www.kuow.washington.edu/kuow.html
Weeknights at 10:30PM

WFMU 91.1 East Orange, New Jersey http://wfmu.org
Mondays at 6PM

5. Are tapes of the radio programs available?

Episodes of Work In Progress and In The Dark are probably still available on tape from KCRW. Write to them for more information at:

KCRW 1900 Pico Blvd, Santa Monica, CA 90405
---

This is a living document. If you have any corrections or updates, especially concerning the schedule on your local station, please email rlooney@csc.com.

# 2876. CFRA Ottawa live on 'net

Newsgroup: rec.radio.broadcasting
Date: 1995-11-03 00:00:00 UTC
From: jmrubin@ix.netcom.com
Message-ID: <47chh9$r3a@vixen.cso.uiuc.edu>
Source record: 28776
Cross-posted to: can.general,rec.radio.broadcasting

There is now a live feed of CFRA from Ottawa on the net using the Xingtech Streamworks player. I don't think this was there the last time I looked so it may be new.

There are also a number of other feeds, including ICRT, Taiwan and KPIG, a sort of eclectic "underground" country station from Santa Cruz, CA, based on the old KFAT near San Jose'. KPIG carries the populist Jim Hightower commentaries at 7:30 A.M. Pacific.

While you can probably get reasonable results from CFRA, a talk station, with a 14.4 modem, you may need 28.8 or even ISDN with some of the feeds. (there is at least one video feed)

There is a competing technology RealAudio. (http://www.realaudio.com) (There may be a few more.)

To download the Streamworks player for Windows (I'm not sure about the Mac) go to web page http://www.xingtech.com. You can run the player on top of a Winsock TCP/IP stack. You can also configure your web browser to automatically spawn the player when it hits certain links. (The installation program tried to use a 16-bit Netscape .ini file instead of a 32-bit Netscape registry installation.)

## 2877. KDKA - 75th

Newsgroup: rec.radio.broadcasting
Date: 1995-11-03 00:00:00 UTC
From: honzman@usaor.net
Message-ID: <47chgo$r2f@vixen.cso.uiuc.edu>
Source record: 28777

I have no intention of starting a war over this --- BUT
today is November 2. The 75th anniversary of the Pioneer
Broadcast station of the world --- KDKA in Pittsburgh, PA.

I know others lay claim to this title --- but the record
shows that KDKA was the first station to receive a license
AND the Museum of Television and radio in New York
recognizes this fact as well as the Museum of Broadcasting
in Chicago which just honored KDKA this past weekend on a
nationaly broadcast ceremony.

WHATEVER --- today is the day it all began --- for all of
us!

[Moderator's Note: I second Fred's desire to avoid a flame war, so if
anyone disputes this claim (as some always will) deal with Fred
directly and don't post here. It is one of those pointless arguments
that gets us nowhere. Bill]

# 2878. Where is Kid Kelly?

Reply-To: ivoboude@knoware.nl

Resubmit:

WHERE HAS KID KELLY GONE......
I know he left Z 100 NY in '94, the last I heard from him at that station was the overnight shift. Then heard him on WBHT Hot 97 Scranton. About half a year ago heard rumours about him accepting PD job at KC 101 Connecticut.
But can anyone tell me where he's now? And even better - if he's still doing shifts - can anyone get new recordings of him?

Greetings Ivo! Email: ivoboude@knoware.nl

Resend w/Proper Formatting - Sorry for the duplicate

iRock[TM] Blazes a New Audio Trail on the Info-SuperHighway.

-- FOR IMMEDIATE RELEASE

CYBERSPACE, November 1, 1995 - iRock.Communications, Inc., a communications company focused on the broadcast of "audio on demand" music radio programming over the Internet, announced today that it has become the first and only "Netcaster" to have received licensing to transmit music via the Internet by both ASCAP (The American Society of Composers, Authors and Publishers) and BMI (Broadcast Music, Inc.). These licenses were granted to iRock.Communications, Inc., of Camarillo, California, for use with their pioneering Internet radio station, iRock (http://www.iRock.Com/).

iRock was created in October 1994, by G. J. Goldwyn, a former commercial radio broadcaster. It debuted on the Internet's World Wide Web as a wacky web site and shortly thereafter added audio to support its comedy. After experimenting with various beta methods of audio data streaming over the 'Net, iRock chose Internet Wave as its server of choice. IWave, a product from VocalTec, Inc., is a true TCP/IP Client/Server application that gives iRock the power it needs to Netcast to the millions of potential listeners in Cyberspace.

"How is iRock different from any other on-air, broadcast radio station and why would anyone want to listen to radio via their computer?," are the two questions most often asked. "The answer's easy," replies G. J. Goldwyn, head muckity-muck and CyberDJ at iRock, "we play the good music that traditional radio is afraid to play... and I'm really funny. Plus, it's really cool to listen to radio over the Internet. Anyone can listen to an AM/FM radio in their house or car, but try listening to iRock via your laptop on the beach with a cellular modem. You'll be an instant geek-babe magnet!"

The music mix is eclectic and progressive. iRock takes the AAA radio format one step farther, by adding great progressive rock -- an intricate type of rock combining classical music elements and changing time signatures. "It's hard to describe the iRock sound," says G. J., "all I know that if it sounds good to me, it must be good so I play it. Then when I'm done, I roll over, smoke a cigarette and go to sleep." iRock now plans to increase its programming and make commercial space

available to select sponsors. Because iRock is a combination
of audio and visual information on the World Wide Web, an
iRock sponsor gets dual media advertising. For rate information,
contact the iRock sales staff at (805) 494-6230.

To listen to iRock, one only needs a computer connected to the
Internet via a 28.8K or greater TCP/IP connection. Currently
IWave runs under Microsoft Windows on a 486 or Pentium, with
sound capability. An Apple Macintosh version is due out soon.
Besides IWave, VocalTec, Inc., also offers the very popular
Internet Phone (IPhone) program. iRock will soon have an
IPhone request line available.

iRock can be seen and heard now at http://www.iRock.Com/
There's a link there to pick up a free copy of IWave with
a free demo of IPhone.

For additional information, please contact:
iRock.Communications, Inc.
G. J. Goldwyn, President
E-Mail:gj@iRock.Com
Phone: 805.494.6230

Now Playing On iRock:

| Artist | Album/CD | Track |
| --- | --- | --- |
| Eagles | Hotel California | Pretty Maids |
| Cold Sweat | Master Of Life | Second Time |
| Thomas Dolby | The Flat Earth | Hyperactive! |

I respectfully dissent! When I have a drive of more than 200 miles,
I usually try to "head-out" in the wee hours of the morning, after the
drunks are home or in jail.

A recent drive took me through Arkansas from 3A to daylight ... the
clear-channel choices I've had for decades are G-O-N-E! I can
either do a "scan" on the FM radio every half hour, as I move out of
range of whatever Class A that I'd been listening to ... or try to find
the one or two Clears that are close enough to still be protected, e.g.,
WBAP-820, WWL-870. Forget Chicago, even KMOX was fading
in and out. WSM-650, was equally difficult to get.

And for what. So more "drop-ins" can run Satellite Music and provide
a local jukebox for the small audience they'll garner with no local news
or involvement?

Sorry. I'm old enough to remember when a "Clear" was just that ...
when WABC had a decades-long legal battle with KOB Albuquerque
over the nighttime rights to 770KHz., and claimed discrimination 'cause
NBC and CBS had a "full Clear" in New York, and they didn't.

I'd like to see the 80-90 Genie put back in the bottle. And thrown into
an elevator shaft at the FCC to lurk for another couple generations before
being unleashed on an unsuspecting industry.

From: Max Cacas <76476.2472@compuserve.com>
Message-ID: <47chga$r1o@vixen.cso.uiuc.edu>
Source record: 28786

A week to remember where we've been, and how far we've come in the 75 years since KDKA first aired the election results in the Harding-Cox election.

Item One: The Washington Post's "On the Dial" (radio) column for Tuesday, Oct. 31st reports that WAMU-FM (88.5, Talk/News/NPR/Bluegrass) marks the 75th anniversary of the start of commercial broadcasting with a one-hour roundtable discussion on "The Big Broadcast". Host Ed Walker (formerly half of the "Joy Boys", with Willard Scott on the old NBC O&O WRC-AM/980) is taping the first hour of his show, which will include the roundtable, at George Washington University. Included in the discussion about the early days of D.C. radio will be WMAL morning man Frank Harden; Fred Fiske (WAMU-FM, and before that, WWDC-AM morning man and late nite talk host); Bill Mayhugh, the former veteran all-night man at WMAL-AM... and Carroll James, the former WWDC-AM afternoon drive announcer who, the Post says, is "credited with introducing the Beatles to America in late 1963." (NOTE: James will likely recount the story of how a BOAC (predecessor to British Airways) stewardess brought him the first Beatles single from London, straight to the studios of WWDC, where it is believed the song got its first airing on a U.S radio station. At least that's the way Carroll tells it!) The rest of the "Big Broadcast", which begins on WAMU at 7pm Eastern, constitutes rebroadcasts of vintage radio programs.

Item Second: Speaking of D.C. radio vets, the Post also reports that Eddie Gallagher, morning man at WWDC-AM (1260, MOR/Standards) receives the "Lifetime Achievement Award" at the Achievement in Radio awards ceremony here in Washington this Thursday (the 2nd). Eddie's had a long, and storied career in this market. He began his career at KTUL in Tulsa, Oklahoma in 1934. He joined WTOP-AM (1500) in 1946, and two years later, replaced no less than Arthur Godfrey on the station's "Sundial" morning show. He remained at WTOP until 1969, when the station flipped to all-news, and Eddie anchored morning drive at Metromedia's AC WASH-FM (97.1) til the disasterous format change to urban/dance in 1983.
He's been at WWDC since, the only live voice on the station. He was also the play-by play voice of the Washington Redskins on both WTOP Radio and TV (now WUSA-TV) from the mid-50s through the mid-60s. His signature show signoff, then, as now, continues to be "It's so nice to know so many nice people."
(Author's note: As I've noted before, I had the pleasure to work with Eddie Gallagher at WASH-FM when I was a newsroom assistant in the mornings during my Senior year in college. The man taught me a lot about class and style...and how to really *sell* a restaurant ad on the air til you had your listeners mouths watering! <g>

Item Third: For those who asked about the 12+ ratings for the Washington area's two public radio stations, here they are. The Radio Research Consortium (RRC) of Olney, Md., which digests the Arbitron data on behalf of public stations across the country, reports classical/news formatted WETA-FM (90.9) and its

Hagerstown, Md. repeater, WETH-FM (89/1) showed a 2.5 share in the summer book...down from the 3.0 in the Spring. WAMU-FM slipped to a 2.6 share summer, down from a 3.0 in the Spring. RRC also reports that the Washington market has the single highest penetration of the metro area population listening to public radio among the top ten markets in the country...17.7% of the 12+ audience in D.C. as measured by Arbitron is listening to public radio. Other cities:
Boston, 14.5; San Francisco (11.5);
Philadelphia (10.8); Los Angeles (10.5).

Item Fourth: Several weeks ago, the Post reported that large numbers of D.C. area children had entered a contest sponsored by the Silver Spring, Md.-based "Radio Zone" (heard on WKDL-AM/1050 Silver Spring; WKDV-AM/1460 Manassas, Va.; and
WKDB-AM/1570 Baltimore). This week, the Post reports the station, which programs children-oriented programs, received more than 300,000 entries for the contest! Winning schools/students will have the "Radio Zone" do a live broadcast of their "All American Alarm Clock" from their school...and there were 11 winners!
The remotes began this past Monday,and will continue for the next two weeks.

Item Fifth: Sometimes you really find out why we do what we do in radio...and it goes far beyond making a buck, or jumping through the ratings hoop. In coming weeks, stations in D.C., and throughout the country, will begin collecting for charities and the needy during the upcoming holidays. Here in D.C., there's a "Coats for Kids" program, to try to get a coat or jacket for kids who need them. The Post reports that Carol Munse, the midday host for country WMZQ AM/FM (1390/98.7) was collecting coats in Waldorf, Md. last year when a youngster walked up to her, and said, "Do you think there might be a little boy about my size who'd like to have a coat?" Carol said yes...and the youngster replied "Well, maybe he'd like to have this one", peeling off his own coat, and handing it to her. The Post used this terrific story to note that Carol and her station will be in Waldorf, Md. again, beginning this weekend, for a live broadcast to encourage folks to particpate in this program.

More next week!

Greetings:

I'm looking to share ideas and applications with fellow commercial radio salespeople. Getting into the business 15 years ago, a big "list" was everybodies' dream. Now, our stations offer commercial time, event marketing, database opportunities, home page sponsorship on the www, etc.

Anyone out there doing interesting stuff and willing to talk about it?

Thanks!

# 2888. Repost: San Diego Radio Changes

Newsgroup: rec.radio.broadcasting
Date: 1995-11-03 00:00:00 UTC
From: DAVID TANNY <davidtan@beta.delphi.com>
Message-ID: <47chh8$r38@vixen.cso.uiuc.edu>
Source record: 28788

Hi there:

This is a repost, but slightly updated.

In article <46spsb$fbn@vixen.cso.uiuc.edu>, you say...

I said last week that the San Diego Union-Tribune reported that Par
Broadcasting traded their KIOZ-FM 102.1 for Compass's KCBQ-AM 1170 and
KCBQ-FM 105.3. They have since also donated KKLQ-1320 AM to Palomar
College accorfing to Chris Carmichael.

I have some thoughts on this swap. I suggest the 1170 retain the
KCBQ calls and rename the 106.5 FM channel KCBQ-FM, while the 105.3
frequency would take on either the KIOZ or the KKLQ call letters, or even
the KOGO call letters on that FM channel, perhaps KMET-FM? KPRI?.
Third, on the AM side of 1170, it could still air sports programs
like its 600 sister AMer does on occasion and air some of the talk shows
that KOGO bumps over for its sports programs.

any thoughts?

Mr. News sez:

>Keep 1170 as KCBQ for God sakes DON'T let them kill those calls.

>Turn 106.5 *BACK* to KPRI...play on the nostalga factor...I worked at
>KPRI back when Bree Walker was a jock and Jesse Bullet was a ledgend for
>the "Disco Sucks" explosion with Steve Dahl in Chicago. KOGO and KPRI
>were a combo and the Shadducks (SBI) owned it...remember KOGO NEWSRADIO?

>I cried when the KOGO AM calls died back in the mid '80's and I grew up
>on KCBQ AM and "Progressive Rock" KPRI...Geeze I can remember when KPRI
>was in Sorrento Valley and then moved to Balboa and Genesee.

>Speaking of KPRI.......
>Remember what we all used to do to those bumper stickers????

>Is KOGO still next to Montgomery field???

>Long live "The Rock"!

>Mr.News
>(Now in No.Ca....Doing Television)

I have also posted a similar message in the Compuserve Broadcast Pros
forum.

hello:

Sheesh! So much happened this past week.

As for Rock 102.1, expect the format to shift over to 105.3, whose staff would have to find new jobs, and either retain the KCBQ-FM call letters, transfer its KIOZ (which means nothing except the IOZ part looks like "102"), or adapt new calls (perhaps the old KPRI or even KMET-FM). Q106, with Jef and Jer, would simulcast on KCBQ-AM 1170 (whose call letters I wish they keep for historical reasons). Par Broadcasting, whose KCBQ and KOGO airs some sports properties such as Sockers, Aztecs, and Oakland Raiders, intends to be a major player in radio sportscasting. Perhaps 1170 could also air KOGO's talk shows when they're preempted by KOGO's sports programs intended for airing on a bigger signal reaching more listeners.
Q106 could take on the KCBQ-FM calls, dumping the KKLQ-FM (KKLQ-AM 1320 would also change calls) while the 105.3 decides on what to call itself. 1170-AM should IMHO adopt a format somewhere in between KYXY's and Q106's, not too sappy, and not too hip, mostly 70s (The Beach) thru 90s (Star 100.7) adult variety pop, rock, and R&B music, having news and information on the hour, simulcast Jef and Jer there, and find some radio talk shows of interest at night, along with sports and whatever fits.
As for 102.1 FM, it would lose its Rock format and switch to something else.
In another move unrelated, KECR-FM 93.3 was purchased and its format changed to what is now adult instrumentals. The paper states its temporary and will decide on a format and new calls soon.
So, we will have two stations, 93.3, and 102.1, seeking new formats. Let's consider some formats and let me be the judge.
KYXY is popular, so they could go A/C with the angle I outlined for 1170 above (ala KBIG 104.3 LA). Please. If one station gets this format, the other station has to do something else.
Classic Rock and Roll? Forget it. We still have KGB, we had KLZZ, KGMG, KCLX, KCBQ. We have the new KMKX. We have KUPR playing NEW classic rock. We had enough already.
New Age? Iffy. It bombed locally.
Modern rock? With XHRM, 91X, and KUPR doing it, and sometimes Star and Q106, who needs another?
Top 40? ala KIIS-FM with Rick Dees? I doubt it will work here.
Country? KSON could use some competition down in El Cajon. KOW's signal just don't reach down to TJ.
Spanish? In the North County, what station serves this area? Not any of the TJ stations.
Dance/Disco? Was tried by KITT 105.3 in 79-80, lasted shorter than the OJ Trial. With a bigger library in 1995 from the 70s-90s, may work if programmed right.
Novelty? Could last shorter than Kato Kaelin's stardom.
Real Radio (ala KLSX 97.1)? Hasn't been tried yet here.
Children's Radio? Long overdue. Radio Aahs 830 in Orange's signal doesn't do justice down here.
Traditional Jazz/Swing/Bop/Blues? The audience is there. In significant numbers? I can't tell.
Rap? No way!

Adult R&B? Not sure if the audience is big enough to support it.
Sports? Action in stereo sounds good. KMAX could have put its signal
on KECR.

any more thoughts on this and what formats they should choose. If you
live in San Diego County, let them know by calling the programmers or
writing them.

or, you can post here as well and let the rest of us share the process.

sincerely

d.t.

## 2889. Sparta info needed

## 2890. WDFN Detroit (Sports)

Newsgroup: rec.radio.broadcasting
Date: 1995-11-03 00:00:00 UTC
From: mfrat@gopher.chem.wayne.edu
Message-ID: <47chhd$r3o@vixen.cso.uiuc.edu>
Source record: 28790

I was just wondering if anyone out there in the Detroit market could let me know whether I'm nuts or not:) Is it me or doesn't WDFN run any commercials anymore? I was listening to them on Sunday morning and I think I heard one commercial in the two hours straight that I listened to them. Of course, they had their very amateur promos, but only one or two commercials. In fact, one of the commercials for Cin-a-burst/Mint-a-burst, I believe, was taped off of the TV spot. The reason I think this is because the sound quality was low and very rarely do the radio spots and TV spots for gum sound exactly alike.

Let me know what your views are on this sinking ship called WDFN (it didn't even crack the top 20 in the arbs).

>There is only one real Talk Radio Station in the UK, it's called Talk Radio UK
>funny enough.

Not quite; BBC Southern Counties Radio is a talk-only station, and most of
the BBC local stations operate a "more talk than music" policy with phone ins,
quizzes, news, features, documentaries, etc etc. The music is bascially there
to break up the chat.

Talk Radio UK is a national AM station with an audience of roughly 2 million;
it hasn't been on air that long (less than a year, I think). It started out
with the aim of being a "shock jock" station, but after numerous listener
complaints followed by Radio Authority fines, it's mellowing out into a more
tightly and professionally controlled station. Having said that, it's
probably more bland now.

I don't think they have been making an awful lot of money, though they are now
starting to get some good sponsorship deals (eg Kleenex tissues are paying a
lot for sponsoring Simon Bates' "Our Tune" feature. This is tales of everyday
woe sent in by listeners concerning how their girl/boyfriend has dumped them,
they've lost their job, both their arms have been broken and all their family
just died. Believe it or not, this feature is terribly popular!).

"Shock jocks" are out though; the Radio Authority and the majority of the UK
population won't have it. There are a small and vocal number of supporters,
most of whom seem to inhabit alt.radio.uk, who regularly bemoan the loss of
the original Talk Radio UK presenters.

I doubt an unknown presenter could get a job with them - most of the original
staff were new and they were the ones that got carried away and received all
the fines. Talk Radio are now employing big name (in the UK) 'stars' to
present.

Hope this helps

Cheers,
Dave

It's only 400 watts but you may be able to hear CBC British Columbia out west on 6160 in the 49 meter shortwave band. There's a slightly stronger one (I think 1 kw) in Newfoundland. The 49 meter signal is good overnight in San Francisco after Radio Netherlands drops off the adjacent 6165.

## 2895. old IMUS airchecks

# 2896. REASEARCH QUESTIONS FOR THE FUTURE OF RADIO

Newsgroup: rec.radio.broadcasting
Date: 1995-11-05 00:00:00 UTC
From: Rich DePaoli <Rich.DePaoli@internetMCI.com>
Message-ID: <47hv0h$odl@vixen.cso.uiuc.edu>
Source record: 28650

As a researcher, I've asked a lot of questions targeted to radio audiences. Questions spark answers which can drive a radio station to solid success.

We've all tried to answer the question, "WHAT IS THE FUTURE OF RADIO?"
I say FORGET DAB...DUOPOLY...CONSOLIDATION & EXPANSION.
.....The future of radio is NOW!! It is PEOPLE, MARKETING, & TECHNOLOGY combined which deliver quality information & entertainment to a discriminating audience. Ratings become automatic when resources are properly dedicated to all three of these areas.

Some people might say that the right people & marketing plans may be enough... but especially in this day & age, we cannot rule-out the growing number of technological forms of entertainment & information-gathering which currently compete with radio's usefulness.

Please BBS your ideas on the future of radio & some examples of maybe how you as a radio programmer / entertainer/ broadcaster are working to enhance radio's usefulness.

If privacy is an issue...please e-MAIL me.

Rich.DePaoli@internetMCI.COM

Thanks.

Kid Kelly is actually in Wilkes-Barre, not Scranton. It's top 40 outlet WBHT, slogan Hot 97 - today's Hottest music. His station is a R&R reporter, which makes it available for periodic monitoring for Kid Kelly fans! (at least playlist monitoring.)

Carroll.

This would be KWMT at Fort Dodge, Iowa which at 540 with 5KW in the daytime has to have one of the the biggest coverage areas of any station in the AM band. Anothr ag-type station you might try for in Kansas City is WNAX from Yankton, South Dakota---and, as in the case of KWMT, daytime is the only time when it'll work. But it will work. Heck, try us--5000 daytime non-directional at 640...not as good as the other two I've mentioned, but you should be able to hear us...it's only a 200 mile shot.

} richwood@commspec.com (Rich Wood)
}
} PD>Dr.Laura fans! WTIC AM 1080 is bringing Dr. Laura to Connecticut.
}
} impressive. It's also interesting to see this newsgroup used for
} advertising.

Rich:

I teetered on the line about whether or not to post the Laura thing. However, Rich, despite your esteemed position with WOR Networks, and the fact that I, for one, usually am very happy to see what you post here, I take exception with the use of the term 'advertising'. I was not paid for the mention, so in my opinion that was not advertising. At least not any that *I* profited from.

I posted the mention because of my policy of 'minimal moderation' on this newsgroup. It may have been over the line, but it was not that far over the line as to be censored by me.

I am sorry you feel differently, but then, again, just because a story is run in rrb, doesn't mean we all have to read it (except for me, that is, I get to read it all.... :->).

So while Dr Laura may be competition to your Dr Joy Brown, there is no reason, IMHO, to attack the post, or to attack me by innuendo, for not censoring the post. It was radio-related, and WTIC has been a good poster of information in the past. I stand by my decision to run the piece, even though I agree that it could have been a little less blatant and I ask that any future announcements be couched in more conversational and less promotional framework.

Sincerely

> Washington, DC.

Gee...Last *I* heard he was doing a talk-show (radio) for 'Major Radio Network'.
Originating out of Chicago(?)...carried on mostly small stations.

He made reference to ending that radio show...'cuz a big TV deal was coming up...and he was real excited about this 'TV opportunity' because this time the show 'would be done right'.

Funny...I haven't heard anything about it since that time!

I'm just beginning to learn about audio on the internet and frankly haven't had much experience with audio with computers! I'm trying glean as much info as I can about real time audio on the net. At this point we don't even own an audio card and that's my first decision. ...what to buy. What kind? 16 bit or 32 bit? Can I use the internet to do "remote broadcasts" in real time when CD quality is not an issue. I'd be happy with approximately 7khz quality. I've assumed that if stations such as CFRA and many others that actually "broadcast" on the net, then why couldn't it be used for "remote" broadcasts from virtually anywhere in the world?

On another audio subject, I assume I can use the net to transfer "audio files" such as spots between sister stations in different cities?

--

Thanks for the info Scott.

BTW, when is SPECTRUM going to start taking advantage of it's "international"
shortwave position? That is, the show has become one where US broadcasting
(amatuer or AM) has dominated the topic list? It would seem it should have
a broader audiance than a target US amatuer and AM DX one. One Kulpsville,
PA. SWL fest broadcast seems like all that is done.

It reminds me of the reported meeting of Bob Dylan and the Beatles. He
told the Beatles that with so many listening to their music, they should
use the opportunity to really say something with their music. As a result,
their music changed and for the better.

10>miss him here at WLS AM 890.

Jay,
I'll second that! The good thing is that Tom's reputation in the industry is so good that he'll surface somewhere else very soon. I always had the impression that he and Drew Hayes worked very closely and very well together.

With the recent changes in the FM and the impending Disney involvement he probably saw lots of corporate interference and thought it was time to move to the next challenge. I wish him the best of luck. He's a good guy.

> WMCA was owned by the McAlpine Hotel.

AFAIK, WMCA's first studio was in the McAlpin [no "e"].
However, its owners were the House of Straus [a branch of the
Macy*s Straus clan]. For some reason, scion R. Peter (or maybe
his estate) sold WMCA.

Moving on to San Diego, KOGO-AM600 has promoted newsman Jack
Merker <sp?> to PD. Peter "Don't Call Me 'Pete'" Weissbach will
concentrate on his career as a talker. Starting Monday (6 Nov 95),
Peter's show will be carried on TRN:TalkRadioNetwork. If you can
catch him in your area, you're in for a treat. He's sharp, funny,
and takes no prisoners. His show airs 3-6 PM (Pacific) but might
be tape-delayed in your area.

RE>Also: last I checked, there are a FEW more people in NYC, and not many
RE>stations catering to minorities in the way WLIB does, so I dare say, they
RE>ARE satisfying a need.

Todd,
Yes, there are a few MILLION more people. And ... WLIB is arguably
the most important Black formatted station in the New York metro. It's
the only one that deals with community issues. If there's a problem in
the community, it'll be discussed on WLIB. It runs Black Talk shows and
programs that target specific minorities within the Black community.
I'd guess that the smallest minority in New York is larger than the
entire population of Fort Wayne.

With the exception of WWRL, which runs revival-type religious
programming, WLIB is the only Black station not running a music format.

It's easy to feel that New York is getting preferential treatment,
but the fact remains that WLIB's new signal will serve far more people
than WOWO ever could hope to serve. It's my understanding that that's
what radio is all about.

Rich

> some people in NYC could have bought any number of 50k stations with
> nighttime signals that have been for sale over the years,
> this could have all been avoided.

(AHEM), yes...after all, radio stations _are_ in business to make a profit. A 50kW transmitter as a hobby can get quite expensive.

However, if WOWO doesn't move its towers (which are west of Ft. Wayne), kiss a decent signal goodbye in their own city of license, as they'll have to protect NYC, which, as the crow flies, is straight on the other side of Ft. Wayne. (OK, a number of miles away, I know...)

BTW: as a jock, I obviously hope to see ANYTHING but syndicated and/or automated junk. But how much revenue does WOWO pull in from sources OTHER than Ft. Wayne?? They HAVE to make enough $$ to keep it going; you simply _have_ to come up with better ideas than satisfying DXers. Not much money to be made there, in terms of paying for a 50kW radio station.

Also: last I checked, there are a FEW more people in NYC, and not many stations catering to minorities in the way WLIB does, so I dare say, they ARE satisfying a need.

Source record: 28796

If you are posting articles to rec.radio.broadcasting and wonder why, perhaps, you have not seen responses to your posts, here is the reason.

Your posts are not getting off of AOL.

AOL is not forwarding your news to the net, but instead are placing them on their news spool, and not to the moderator OR to the open net.

I have attempted to contact AOL about this, but have received nothing in return from them and the problem continues.

I urge ALL aol users of this forum to contact the news admins at AOL and tell them that they must get this fixed. Let them know that you pay (lots of) good money for AOL access and that your posts are not being sent to the moderator, and thus to the rest of the internet.

I don't know how long this has been going on, but you should have full newsgroup, access with your AOL account.

Sincerely

Movin on.....

Tom Tradup, President and General Manager of talker WLS-AM and FM, announced his resignation from the station. Tommy cited the need for new challenges as the driving force behind his departure.

Replacing Tom at the station will be Zemira Jones who was most recently the General Sales Manager at WMAL-AM in Washington D.C. One of the first chores for Zemira will be a decision regarding the format for the FM signal. A format change is expected shortly. A country format continues to be the most likely choice for the FM side which curr ently simulcasts the AM signal.

Gina Tadesco, former reporter at all news WMAQ-AM, has landed a job as a news anchor at KRLD-AM in Dallas.

Ever wonder what happens to old WCKG jocks??

Paul Morgan, formerly of WCKG-FM now handles the PM drive on progressive suburban rocker WCBR-FM (92.7). Paul will also have the title of assistant production director.

Bob Barnes-Watts, another CKG alum has resurfaced at rocker WRCX-FM as a fill in/weekend jock.

Departures.....

Morning man A.J. Parker, who holds court at hip-hop WEJM-FM/AM is temporarily off the air pending a new contract.

Ric Tower has resigned as Assistant Program Director at toop 40 WBBM-FM. Ric will concentrate on his consulting business.

Finally, long time Chicago radio personality Fred Winston has signed on with soft rock WPNT-FM (100.3) to do weekend and fill in work. There are rumors that Fred is in line to take over the morning duties if current morning man Steve Cochrane departs the station.

Message-ID: <47hv0f$odj@vixen.cso.uiuc.edu>
Source record: 28799

JL>Most of you have heard the little audio tone beeps that some networks
JL>such as CBS and Mutual pass down the line during news casts to provide
JL>messages to the stations. I have also noticed that, when a station records
JL>spot from the network for use in other parts of the day, they usually leave
JL>the beeps in at the end of the commercial. Does anybody know, is this
JL>required for some reason or just a coincidence?

My guess is that it's simply bad production. The purpose of the beeps
is to trigger the station's automation system to advance to the next
event. When the spot is run locally, there's no need for the beep. The
EOM tone is on the cart.

The use of audio cueing on the program channel is antiquated. The
better networks cue on a separate cue or data channel and don't mess up
the program.

Rich

# 2922. Frequencies on MF-band

Dboucher aka Dave in Boston wrote that he heard that Mort was ending his stint with the Major Radio Network out of Chicago... well the truth is.. they ended it for him.. he thought he was going back into TV.. but that deal went south when backers for him bailed out at the last second... he is still I beleive in Chicago though I have heard the rumor that he was moving to LA... his last real job before Major Radio Network was in Dallas when his "Blue Collar" network moved from Washington DC to set up operations at KGBS... that lasted about 10 months before that love affair went sour

Since then... he has been on only small market stations and they dropped him like a bad habit.. Mort's former crew .. Neil Augustine (producer) moved back to the Baltimore area after moving to Dallas with the show.. and Rob Chickering (former engeineer) stayed in the Dallas/Ft. Worth area.. and has since landed a job with Talk Radio 570 KLIF...

Former GM of KGBS Don Walker moved to California and was picked up by Metro-Traffic.. but has since left that position.. and former PD of KGBS Tom Scott is in San Deigo still looking for work.. at present though he is with Sky Watch Traffic.. providing news for the network...

And KGBS has recently been purchaased by Salem Broadcasting out of California.. but at present the deal has not been approved by the FCC...

From: powell@scsn.net
Message-ID: <47ublp$ke2@vixen.cso.uiuc.edu>
Source record: 28604

I got to see the transmitter site and EX office of WGAC. There wasn't much left of the old office and transmitter site as a fire set most likely by kids who frequent the area....a couple of years ago. They still have problems with vandalism. The concrete block transmitter building was all painted over with spray paint a few days ago. Inside a late model GATES SX-5 and there are 4 towers sort of a square. The station is currently considering moving the site elsewehere.

Message-ID: <47ublq$kea@vixen.cso.uiuc.edu>
Source record: 28605

While I was in Atlanta I listened to WGKA. They are already planning to get some upgrading done when WOWO is murdered. I asked them to get get 10,000 watts directional EAST my way! Their 10,000 watts day and 2500 critical hours is rather disappointing. The signal is somewhat noisy at 20 miles. I was out 30 miles when I left town and at 3:30 the skywave had already been objectionable if you were listening in stereo. When they cut to 2500 it basically became unlistenable. Well, who wants to hear talking underneath the classical music you are trying to hear. The offending station was WHYS Bluefield VA, which is a waste, simulcasting WHIS 1440, Bluefield W VA. Then underneath that was some station doing a Carolina Panthers game. THEY signed off by just dropping carrier. I expect 2500 watts will cover 10 miles at night, maybe.

WGKA has been on the air 40 years, and does promote their AM Stereo on EVERY break.

>
>Rich

No, Rich deliberately killing a radio station is NOT what radio is all about. As it's been said before over and over and over here, WLIB could have had substantial night time power and NOT interfered with WOWO. But now most of the 800,000 people in the Fort Wayne *METRO* area won't even hear WOWO anymore. I guess WIBC then has the claim to Indiana's most powerful radio station (reception of WIBC is a joke in Indianapolis at night as well, but I hear it in SC with 5 others garbling up the frequency). I think it's greed....I am going to have it ALL and the FCC caved in and gave them exactly what they wanted on a golden platter. Be durned if I had the money I'd buy the AM daytimer in Johnston SC (doing not a damned bit of good simulcasting their FM pretending to be an Aiken SC station 20 miles away ) and change the calls to WOWU or WUWO!

Message-ID: <47u9q7$h62@vixen.cso.uiuc.edu>
Source record: 28673

} Connor Herridge <Cheridge@onramp.net> Speculated:
}
} Just a prediction. I think the role of radio will change in
} the near future, as will the role of television. After hearing
} some of the radio and TV stations broadcasting on the internet'
} I can see the use of the net to broaden a customer base to
} include the world. This might develop into a kind of world
} market for anyone to participate in marketing their products.
}
} Corporations might use this kind of radio-internet service
} to advertise their products on a Web page and the use of
} TV on the net will enhance radio's ability to sell their
} product.
}
} I was amazed that I could pick up a live TV broadcst from
} Hong Kong or Finland right here in Houston, Texas on my
} computer.
}
} Just a prediction but I think the use of the internet as a
} radio and TV broadcaster will grow.

It will change faster than your underwear, Connor.

The Internet as we know it is not a bottomless pit of bandwidth, even though it may seem that way to the average user who is used to a 14.4k or 28.8k modem connection. The Internet has certain limits, over which more infrastructure would have to be dedicated to the task.

How long do you think the likes of MCI and Sprint (two major suppliers of Inet backbone and branch service) will sit still as people start using their $ 20.00 a month net accounts as a private (and very cheap) cable-TV, radio and telephone service?

While I like the new streaming technologies as much as anyone, make no mistake that these will soon be charged for, once their numbers begin to reach a certain 'critical mass'. I-PHONE, for example, allows two-way, real-time voice communications *world-wide* over standard dial-up lines. Not quite as good as regular telephone, but considering the near-free cost of it....

So, while I applaud the new real-time audio (and, yes, video) technologies, they are bandwidth hogs and sadly they will probably be the single biggest force in changing the Internet from a global "unlimited callpak" sort of service (you can connect to any site in the world for the same rate as you can the site down the street) into a 'time and distance' billing system, much like the current phone

system.

Realize this, we are connected to an Internet that was never designed to be commercial in nature. It is an open architecture. As we move from research tool to commercial carrier, the net has added security along the way. But it is an add-on. I am sure that the likes of MCI and Sprint would love to see an Internet that is built from the ground up as a secure, billable structure more like the phone network.

So, while we are getting all excited about how we can talk overseas for next-to-nothing, watch motion pictures, listen to odd-ball radio feeds over our $20 a month Inet account, remember that the bigger that market becomes, and the better the quality becomes, the more of a 'salable commodity' it becomes. And we all know how altruistic the phone companies are :-).

Just a cautionary statement: these are *not* radio limiters. They're great pieces for production or for preprocessing before a real peak limiter, but they are not fast enough to catch peaks and control modulation within FCC specs, and you're risking overmodulation (or having to pull your average modulation way down) by using them as the last step in your processing chain.

Do any of you New York City radio watchers know the status of the Sonny Bloch trials? I thought the original trial was to be held in August.

Is he still in the Manhattan lock up pending a trial or has he been released on bail?

1. First of all, allow me to thank everyone on the list for contributing lot's of information and entertainment through this medium. I enjoy it!

2. For several years I have been trying to locate a song that was played as the ending theme for a telephone talk program entitled, "Controversy" that aired late evenings on WIL-AM in St. Louis during the late 1960's. It was a jazz piece with a name similar to, "A Song for Jenny" or perhaps, "Jenny's Song." While back in the U.S. during furloughs, I have checked in music store catalogues, etc., but to no avail. Since this list goes out to some VERY knowledgeable people (like yourself!) is there anyone who might assist me in locating a copy of this?

Thanks much in advance.

# 2941. Mid-America Radio Watch (5-Nov-1995)

Newsgroup: rec.radio.broadcasting
Date: 1995-11-10 00:00:00 UTC
From: "Mark S. Roberts" <transvox@crl.com>
Message-ID: <47ubl3$kch@vixen.cso.uiuc.edu>
Source record: 28684

Yet another trip this weekend to mid-Missouri where the possibility of snow caused KOMU-TV, the local NBC affiliate, to lead with the weather forecast on its Saturday night 10 pm newscast, bumping the Rabin assassination to second in the lineup. People here take their weather *very* seriously....

****

Better late than never...the _Columbia Daily Tribune_ finally reported on the FCC's call for a hearing on revoking KFMZ(FM)'s license in its October 31 issue. The FCC show-cause order was reported in AIRWAVES on Oct. 14.

All the stations and construction permits owned by Contemporary Media, Inc. or its subsidiaries are under challenge after the felony conviction of principal owner Michael Rice on charges of sodomy and sexual deviate assault.

To its credit, the _Tribune_ did advance the story: the hearing before an administrative law judge at the FCC is scheduled for March 19, 1996. A pre-hearing conference will be scheduled next week.

Rice's Washington attorney, Gerold Jacobs, when asked whether KFMZ or other stations would be sold, told the _Tribune_, "That is certainly an option, and all options are being considered."

The _Tribune_ account also repeated the earlier mention in AIRWAVES of a possible distress sale to a minority-controlled broadcaster as a way of resolving the FCC action.

Under the FCC order, Rice must show that he no longer has effective control of KFMZ and his other stations. But if he can show that, the FCC order then asks him to prove that he did not engage in an unauthorized transfer of control of the stations.

Contemporary Media or subsidiaries own KFMZ, KBMX(FM) in Eldon, Missouri, and WBOW(AM)/WZZQ(AM)/WZZQ-FM in Terre Haute, Indiana, as well as construction permits in two small Missouri towns.

****

Sports on FM, music on AM? That's what KTTN in Trenton, Missouri chose to do on Saturday morning. The stations, which normally simulcast, split operations to carry a high-school football playoff broadcast...on KTTN-FM. KTTN(AM) continued with the station's regular diet of country music and local information.

****

Saturday morning also seems to be the time for "traditional" country music programming on the AM dial in this part of the globe. Such programming was observed on Kansas City's WDAF, WNAX from Yankton, South Dakota, and KWMT from Fort Dodge, Iowa.

The WDAF program seems especially rich in listener interaction, with a steady flow of requests coming in for the tunes normally pushed aside by the homogenized "young country" sound that prevails on country formats these days.

# 2942. Phoenix Radiowatchers 11/7

Newsgroup: rec.radio.broadcasting
Date: 1995-11-10 00:00:00 UTC
From: Michael Hagerty <Michael_Hagerty@azfamily.com>
Message-ID: <47ubl4$kci@vixen.cso.uiuc.edu>
Source record: 28685

KELLY PLEADS: Former Country KNIX(102.5) night jock Shotgun Kelly(real name: John Gutting)pleaded not guilty Monday(11/6) in Maricopa County Superior Court to four
felony counts involving the alleged sexual abuse of a 16 year old boy. Gutting was arrested last month, just hours after the Summer Arbitron numbers showed him a strong #3 in his 7-Midnight time period. He has since resigned from the station.

NEW PD AT KZON: Chris Ebbott joined Alternative KZON(101.5) as PD last week. Chris had been in charge of programming for the Entertainment Radio Networks(Hitline USA, Countryline USA, Hitlist, others)in Malibu, California.

RUMORS(Part One): Joel Denver's All Access Net News
(Opinion: A must-read if you're reading rrb/Airwaves...
address is www.allaccess.com)is spreading the word that Hot AC KVRY(104.7) may be about to reclaim the legendary
KZZP calls that it abandoned five and a half years ago and flip to Top 40 with WPXY, Rochester PD(and frequent
rrb/Airwaves participant)Clarke Ingram a top choice to program. Clarke was APD at 'ZZP in the 1980's. KVRY went 3.1-2.3 12+ in the summer book. Charlie Van Dyke's Arizona Republic Radio Notes Column of 10/28 characterized the station as appearing to have been "in ratings quicksand" of late. KZZP was the dominant Top 40 in Phoenix for most of the 80's....with Guy Zapolean as PD and Ingram as his #2.

RUMORS(Part Two):Speaking of Van Dyke's column(Opinion: another must-read), on 11/4, Charlie
ended his column with a teaser:" What local personality is about to sign a contract extension for sports-figure dollars? Jealous minds want to know." So do we, Charlie.
Salaries are way down in this market, where 6 or 7 years ago at least three morning personalities were drawing
$250,000 a year or better and $80,000 for top-drawer afternoon talent was not unheard of. These days, morning
shots are being filled for 50 or 55K...afternoons for 40 and under. Somebody who can get big bucks in this climate is a power indeed.

MORE ON JOEL DENVER: I mentioned Joel Denver' All Access above...if you haven't found it yet, do. Picture a daily
electronic news source similar in form and content to Radio & Records(Joel spent years at R&R...and his "Net News" page of All Access reads like Street Talk did when Joel wrote it. Great stuff...freshened daily...and it's free!

Again: www.allaccess.com(No, Joel didn't ask for this...in fact, I
don't know Joel and didn't ask about writing this...
but anybody who is interested in radio should be reading it. And
since Joel sells advertising, which requires readership, I'm sure he
won't mind the plug)

## 2943. Peter Weissbach kicks off syndication show

Newsgroup: rec.radio.broadcasting
Date: 1995-11-10 00:00:00 UTC
From: "cHRIS O. Carmichael" <102776.224@compuserve.com>
Message-ID: <47ubl5$kcj@vixen.cso.uiuc.edu>
Source record: 28686

On Monday, Nov. 6, at 3 p.m. Pacific, veteran talk show host Peter Weisbach kicked
off his national syndicated show from the "flagship" station of KOGO, San Diego.

Fed through "TRN," or the Talk Radio Network, Weissbach brings another view of national
issues to the airwaves. [In the Libertarian newsletter for San Diego county, his show
is listed as "Libertarian" in nature.]

Besides KOGO in San Diego, it seems a majority of affiliates were from the Pacific north
west, with calls from the Portland, Ore., and Washington-state area.

Those who would like to sample his fare, can do it this Friday-night/Saturday-morning when
Weissbach fills in for Art Bell during Coast to Coast AM. Bell is taking some time off this
week.

## 2944. AM radio in Atlanta

Newsgroup: rec.radio.broadcasting
Date: 1995-11-10 00:00:00 UTC
From: powell@scsn.net
Message-ID: <47ubl5$kck@vixen.cso.uiuc.edu>
Source record: 28687

I got a tiny chance to listen to AM radio in Atlanta. My SuperRadio III had a fit and there was so much interference (sounded like computer or something electronic) that I could hear WSB OK, and WCNN 680 fair and WGST 640 barely. WAOK on 1380 wasn't listenable IN the city on the car radio. WAVO was. I could hear skywave on every signal. There was even something under WSB and I was not 10 miles from the transmitter site. I did not try the FM as I could see the transmitting towers for some of the 100K stations and the whole front end overloaded. The religious station on 860 was distorted on both power levels. I didn't have a lot of time to listen as I was not in town to listen to radio.....

# 2946. Re: : Boston Glober TV/radio

Newsgroup: rec.radio.broadcasting
Date: 1995-11-10 00:00:00 UTC
From: fybush@world.std.com
Message-ID: <47ubl8$kcs@vixen.cso.uiuc.edu>
Source record: 28689

Now seems like an opportune time to mention a web site which
covers EVERY radio station in Boston and vicinity....even a few
that have been dark for years :-)

The Boston Radio Archives can be found at:

ftp://radio.lcs.mit.edu/radio/bostonradio.html

or as a link from our Moderator's excellent AIRWAVES web site.
We're non-commercial, so we have links to everything radio-
or TV-related, without regard to whether or not they're
advertisers.

I don't trust the Globe's radio listings in print (these are the
folks, after all, who regularly give us typos like WEQQ-FM for WEGQ,
WMBX-FM for WBMX, and worse), and I sure don't trust 'em on-line either.
Now if the _Herald_ ever started a web site...that would be
another story.

[There's even worse radio info floating around out there, such as the
latest - 1995 - edition of the ACCESS/Boston travel book. It lists
outdated stations such as WEEI-590 and WHDH-850, neither of which
has existed since August 1994, and flat-out errors like "WROR 93.5,"
which was actually 98.5 and which has been WBMX since 1991. I used
to think the ACCESS guides were pretty good, but now I have my
doubts.]

Disclaimer: Yes, I'm a co-maintainer of the Boston Radio
Archives, and pretty darn proud of it, at that.

-=Scott Fybush - fybush@world.std.com=-

# 2948. Dallas-Ft Worth Radio Watch--KGBS Ownership Change

Newsgroup: rec.radio.broadcasting
Date: 1995-11-10 00:00:00 UTC
From: Tom Desmond <wsu@mimi.itg.ti.com>
Message-ID: <47ubl9$kd2@vixen.cso.uiuc.edu>
Source record: 28691

Sunday's Dallas Morning News reports the following program schedule planned for KGBS (1190) by new owners Salem Broadcasting:
6 AM to 1 PM will be dedicated to half hour "Religious teaching" programs. From 1 PM to 3 PM will be "Duffy & Company", a Christian talk show. 4 PM to 5 PM will feature Kerby Anderson, chief executive officer of Probe Ministries, a locally based Christian think tank and research organization. Oliver North will air from 9 PM to Midnight.
The remainder of the schedule is apparently not determined, and the article also reports that new call letters are in the works.
Also mentioned in the article is that Salem will be dumping G. Gordon Liddy. Taking advantage of this is WBAP, which bought advertising during Liddy's show to promote Mark Davis' show on WBAP, obviously hoping to pick up part of his audience... G. Gordon Liddy will continue to air overnights (the article reports 3 AM to 5 AM) on KLIF (570).

By the way, I don't know if I missed the post of my own article, but since I didn't see it, I'll repeat this to be safe:
KAAM (620) in Plano, TX signed on the air at 1:31 PM Tuesday, October 31, barely making their promise to be broadcasting by the end of October. I was able to receive a good night time signal on the station just south of Highland Park, which is about 30 miles south of the station's New Hope transmitter location. I didn't drive any further south, but believe that the station should be receivable, even at night, well south of downtown. They should also be able to blow Nostalgia/Big Band competitor KDMM (1150) out of the water with a much superior signal and local programming.

Tom Desmond

# 2949. Re: Instrumental Easy Listening Recordings

Newsgroup: rec.radio.broadcasting

> I am looking for recordings of instrumental music, that once populated
> North America's radio dials. If there are any broadcasters that have
> dormant collections of this genre of music in the library that they are
> willing to part with, or perhaps make some dubs of, please let me know.
> Thanks!

There is a good deal of this music in print, and fairly easy to find.
The "exotica" or "space age bachelor pad" music boom is causing a good
deal of this material to be reissued on CD. Of the top of my head, I
can think of currently available CDs by Martin Denny, Arthur Lyman,
Juan Esquivel, Nelson Riddle, and many other individual artists. There
are also several excellent compilaitons out there, including two 3-disc
sets on RCA that cover a wide array of interesting instrumental music, and
two different available-on-TV double discs that cover the more popular
hits of the late 50s and early 60s.

I live in Northern NJ near the NY city ariea radio market but was
wondering for those of you with External FM antennas how much better
reception do you get?
Rich in the USA! NHL is here!

# 2951. Re: REASEARCH QUESTIONS FOR THE FUTURE OF RADIO

Newsgroup: rec.radio.broadcasting
Date: 1995-11-10 00:00:00 UTC
From: William Pfeiffer <rrb@clm.aiss.uiuc.edu>
Message-ID: <47ublc$kd7@vixen.cso.uiuc.edu>
Source record: 28694

} Connor Herridge <Cheridge@onramp.net> Speculated:
}
} Just a prediction. I think the role of radio will change in
} the near future, as will the role of television. After hearing
} some of the radio and TV stations broadcasting on the internet'
} I can see the use of the net to broaden a customer base to
} include the world. This might develop into a kind of world
} market for anyone to participate in marketing their products.
}
} Corporations might use this kind of radio-internet service
} to advertise their products on a Web page and the use of
} TV on the net will enhance radio's ability to sell their
} product.
}
} I was amazed that I could pick up a live TV broadcst from
} Hong Kong or Finland right here in Houston, Texas on my
} computer.
}
} Just a prediction but I think the use of the internet as a
} radio and TV broadcaster will grow.

It will change faster than your underwear, Connor.

The Internet as we know it is not a bottomless pit of bandwidth, even though it may seem that way to the average user who is used to a 14.4k or 28.8k modem connection. The Internet has certain limits, over which more infrastructure would have to be dedicated to the task.

How long do you think the likes of MCI and Sprint (two major suppliers of Inet backbone and branch service) will sit still as people start using their $ 20.00 a month net accounts as a private (and very cheap) cable-TV, radio and telephone service?

While I like the new streaming technologies as much as anyone, make no mistake that these will soon be charged for, once their numbers begin to reach a certain 'critical mass'. I-PHONE, for example, allows two-way, real-time voice communications *world-wide* over standard dial-up lines. Not quite as good as regular telephone, but considering the near-free cost of it....

So, while I applaud the new real-time audio (and, yes, video) technologies, they are bandwidth hogs and sadly they will probably be the single biggest force in changing the Internet from a global "unlimited callpak" sort of service (you can connect to any site in the world for the same rate as you can the site down the street) into a 'time and distance' billing system, much like the current phone

system.

Realize this, we are connected to an Internet that was never designed to be commercial in nature. It is an open architecture. As we move from research tool to commercial carrier, the net has added security along the way. But it is an add-on. I am sure that the likes of MCI and Sprint would love to see an Internet that is built from the ground up as a secure, billable structure more like the phone network.

So, while we are getting all excited about how we can talk overseas for next-to-nothing, watch motion pictures, listen to odd-ball radio feeds over our $20 a month Inet account, remember that the bigger that market becomes, and the better the quality becomes, the more of a 'salable commodity' it becomes. And we all know how altruistic the phone companies are :-).

## 2952. Radio History...anyone?

Newsgroup: rec.radio.broadcasting
Date: 1995-11-10 00:00:00 UTC
From: ChrIdent@cris.com
Message-ID: <47ubld$kd8@vixen.cso.uiuc.edu>
Source record: 28695

Howdy gang,

Okay, this is for you radio history buffs (one of which I myself am becoming...I love OTR, and am enjoying the beginnings of my search for the history of my own station).......Ron Schoedel here, P.D. for 730 WJYM in Toledo (Bowling Green) Ohio. Next year will be the 20th anniversary of WJYM (as WJYM), and in commemoration, I am looking to do an historical documentary of the station.

I am wanting to piece together a broadcast that goes not only back to the beginning of our days as WJYM, but before that even, 21 years, to our start as a little 250 watt Bowling Green daytimer, WWBG.

So what I am asking is if anyone has any photos, airchecks, advertisements, ANY kind of radio history for any of the following stations/calls (all on 730 kHz, licensed to Bowling Green, Ohio):

WWBG (1955 on air), WHRW, WTLG, WMGS (late sixties to 1976). In its time, WMGS was one of the more popular country stations in Ohio, and I believe it was as WTLG that the station utilised carrier pigeons to get news and the like between their Bowling Green and Toledo studios.

Any historical info you may have about the seemingly rich past of the 730 kHz station here would be most welcome and most appreciated!!!! Thank you!

Ronald C. Schoedel, III
Program Director
730 WJYM Toledo

# 2954. Job Opening, Denver Colorado

Newsgroup: rec.radio.broadcasting
Date: 1995-11-10 00:00:00 UTC
From: schecter@primenet.com
Message-ID: <47ublf$kde@vixen.cso.uiuc.edu>
Source record: 28697

Chief Engineer for KXKL/KZDG

Two Class C's and one directional AM seek motivated self starter to take the stations to the next level of technical excellence. Must have experience in high power RF, and be able to maintain all broadcast systems to insure delivery of the highest quality product to our listeners. Experience with computers and networks are necessary. SBE Certification highly desirable.

Deadline: Open
Salary: Open
Application: Resume to:
Mr. Bob Zuroweste, General Manager,
KXKL/KZDG, 1560 Broadway, #1100
Denver, CO. 80202-5144.

## 2955. Radio Marti on 1710 kHz?

Newsgroup: rec.radio.broadcasting
Date: 1995-11-10 00:00:00 UTC
From: d.westfall@nashville.com
Message-ID: <47ublg$kdh@vixen.cso.uiuc.edu>
Source record: 28698

I'm picking up a signal for Radio Marti on 1710 kHz this evening. I live in Tennessee. I know they transmit at 1180 kHz from Florida, but where is this signal coming from that I'm picking up? Is it a harmonic? Or are they transmitting on the high-end AM band now? I can hear a faint jamming signal underneath it.

Please respond via email, since I don't check here regularly.

# 2956. Melatonin for the pipes...(this is not an ad)

Newsgroup: rec.radio.broadcasting
Date: 1995-11-10 00:00:00 UTC
From: abraxas1@mindspring.com
Message-ID: <47ublg$kdi@vixen.cso.uiuc.edu>
Source record: 28699

I know there has been a great deal of press lately about Melatonin and its possible benefits, everything from helping you sleep to slowing the aging process, and although I can't testify to the eficacy of any of these claims, I can tell you something I have found about Melatonin that you might be interested in: A few months ago I was having a little trouble sleeping, so I decided I would give Melatonin a try. It didn't notice any improvement. But I did notice that my voice was stronger and much smoother sounding.
I know that the causitive factor is Melatonin, because when I don't take it there is a marked difference in the way I sound.

Most of the more conservative physicians out there are warning people that very little is known about the long term effects of Melatonin, and that caution should be used. I couldn't agree more!! If you want to try this I suggest that you take only about one milligram ( 1mg.) a day. Less, if possible.

I buy Melatonin in tablets of five milligrams (5mg.), and break the tablets in quarters, so I'm getting slightly more than one milligram per dose. Unfortunately I haven't found this product in single doses of less than three milligrams, so I have to take what I can get.

If you decide to try this, I would be interested in hearing about the results. Mostly out of curiosity. You can email me at:
abraxas1@mindspring.com

## 2957. Train sound effects?

Newsgroup: rec.radio.broadcasting
Date: 1995-11-11 00:00:00 UTC
From: mdo1@cornell.edu
Message-ID: <483662$9vg@vixen.cso.uiuc.edu>
Source record: 28607
Cross-posted to: rec.arts.theatre.stagecraft,rec.arts.movies.production,rec.radio.broadcasting

I need to get a recording of diesel and/or electric train and/or subway sound effects. The standard sound-effects records of trains are mostly for rail enthusiasts, and feature primarily steam trains at speed from outside. I need a passenger train or subway pulling into the station, doors opening, doors closing, pulling out of station, en route, etc. both from inside and outside if possible. I am writing to these newsgroups because I hope that this is the sort of thing that movie, stage, or radio (as in radio-drama) people would know where to get. I need to know how to get the material via mail-order; going down to NYC isn't an option in the timeframe I need it.

Thank you for any suggestions you may have.

The Dade County (Florida) Public Schools operate a Radio Broadcasting instructional program. I've just started a web page on the program. While it gives lots of information on the school, it also gives information on creating resume's, air-checks and demo tapes, writing cover letters and how best to contact PDs for jobs.

Please stop by. Feedback on the site sent to me privately will be greatly appreciated. The site is Netscape Navigator intensive. It should work with other browsers, but using Netscape would be best.

Help!

Does anyone out there know of any good software, that will run on a Novell 3.12 network that can be used for snow closings?

We got a foot of snow dumped on us today and we could really use something designed specifically for the job.

If you do, please email us at newcity@emi.com

Thanks.

Conrad Trautmann
Chief Engineer, WSYR/WYYY/WBBS

# 2962. Re: Is Talk Radio In Trouble?

Newsgroup: rec.radio.broadcasting
Date: 1995-11-11 00:00:00 UTC
From: TrioNews@aol.com
Message-ID: <48365v$9ve@vixen.cso.uiuc.edu>
Source record: 28612

Talk is only in trouble as talk is no longer talk. It is listen. That is the only problem. Personalities presenting the programs have become bigger than the program and it is the program of talk that drew in the listeners as they could talk now all they can do is listen. Listen is passive. Passive is not indicative to anything other than background. It's the exact same problem the rest of radio finds in all formats. Taking the perspective of the marketer instead of the market. Talk show hosts with an opinion are fine but talk show hosts who use their show to highlight that opinion eliminate all those who disagree and that is no longer talk it is listen. A talk show host is only a host because the listeners permit it. It is not because the sales department was able to sell it. BUT try telling that to a GM of any station. Their perspective is radio. The listener couldn't care less about radio it's the product they are interested in. As a talk show host.. conduct your program on the basis of MC with opinion. Show your opinion but play devil's advocate and you will spawn additional talk topics as well as get up the motivation of fringe callers to call your show to comment on what the caller said and make it based on what you said. Not only on what you said. Limbaugh, Liddy, North, etc... all base things on what they say. It's radio become radio for radio and forgetting that radio is only radio as the listeners permit it. Radio then looks at falling target demos and wonders. Gee wizz... Aren't we doing everything right? For a radio station yes. For a point of concern to a listener NO. Talk radio has become a source not a companion. You can not just listen to a companion you must be able to direct the conversation as well. If a listener dioes not feel a part of a radio station regardless of the format. The listener will move on.

# 2966. Re: WOWO and Clear channel radio

Newsgroup: rec.radio.broadcasting
Date: 1995-11-11 00:00:00 UTC
From: richwood@commspec.com
Message-ID: <483668$9vp@vixen.cso.uiuc.edu>
Source record: 28616

PO>No, Rich deliberately killing a radio station is NOT what radio is all
PO>about.

Powell,
The jury is still out on whether or not it'll be killed. At this
point, it's nothing more than a "sky is falling" argument. There are
many stations surviving very nicely in the 10kw power range. Good
management and good programming under the new owners could make it a
viable property.

PO>hear it in SC with 5 others garbling up the frequency). I think it's
PO>greed....I am going to have it ALL and the FCC caved in and gave them
PO>exactly what they wanted on a golden platter.

I'd hardly call the desire to serve a large population greed.
While you claim that 800,000 people in Fort Wayne will lose a service,
I'd claim that 12,000,000 people in New York will gain one. The minute
WLIB fires up its transmitter at night it'll have more listeners than
WOWO does in its prime time.

Actually, the lowering of WOWO's power might also give Boston
another nighttime service. Add a potential 4,000,000 people to WKOX (if
it moved back to 1190) and the net gain is 15,200,000 potential
listeners.

I don't have the nighttime Arbitron figures for WOWO's current
50kw programming. I'd like to see how many of those 800,000 people
actually listen to the station at night.

Most of this argument is emotional. It's the horror of seeing yet
another tradition bite the dust. I enjoy DXing a lot. I find it
exciting to hear how other markets operate, but I don't mistake the
DX'ability of a station as any kind of service to any but a handful of
people with no connection to the station's market.

Rich

# 2967. Boston Radio Watch 11-10-95

Newsgroup: rec.radio.broadcasting
Date: 1995-11-11 00:00:00 UTC
From: Mark Shneyder 2-4219 <nhmas@gauss.med.harvard.edu>
Message-ID: <483657$9tv@vixen.cso.uiuc.edu>
Source record: 28617

* Shelton returns; WBOS makes more personnel moves;

At around 5:41am, on Wed. Nov.1 Ken Shelton made his
return to Boston airwaves(this time it was courtesy of WBOS 92.9FM :-)
from an extended summer vacation...
Shelton, 22+ year Boston radio vet, brings instant
identity and personality to the middle-of-the-pack AAA(adult
album alternative) station...It's very clear that 'BOS
wants to become a more serious player in the personality-driven
morning drive...Shelton has also rejoined the morning baby-boomer
jock club. His latest resurrection at 92.9 is very indicative of
the morning-drive radio scene in Boston, with a couple of
exceptions[related breaking story about a nasty feud between the
older and the younger follows] -- "a seasoned radio vet,
usually male, between 40-50 years old" is now the standard AM-drive
profile.

In another WBOS move, midday jock Liz Solar was
sent to the beach a day after Shelton arrived. Inside sources
say it was more of a mutual parting. Solar was at 92.9 for 4.5 years
after coming from CR WZLX 100.7FM....Maria Morgan,
from Granum's Orlando AAA station, arrives on Monday, November 13.
She'll be followed by very capable David O'Leary(3-7p); Geoff
Allen moved from part-time status to full-time nights(7p-12a)
and Julie Deveroaux handles overnights(12a-5:30a)...

* "Now Turn Your Cheek...so I can KISS it":

15-year CHR 'KISS 108' WXKS 107.9FM morning man Matt Siegal is having
a rough year in the Boston radioland, to say the least. The latest
chapter is still in the process of being written, but it doesnt get
any uglier than this.

Recently, Siegal has been having a hard time dealing with almost
instant success of a rising young newcomer 'Baltazar' Ilbanez on
sister-station WJMN 'Jamn94-5' 94.5FM. A 28-year old Modesto,Calif.
native Ilbanez joined 'JMN on February 1st. Before coming to Jamn 94-5,
he was with WRKS-FM(Kiss) in NYC where he hosted a very popular
night-time show for 2 years. Before that, Baltazar had gigs at KIIS-FM
in LA and WBBM-FM in Chicago.

According to the latest Arbitrons, Baltazar's show on 94.5 is
now in second place, right behind Siegal's on 107.9 in the most
important demo for both stations -- 18-34 females. Since the release
of Summer Arbitrons about 3 weeks ago, Siegal has been mildly dissing
Baltazar on the air and calling him a 'punk'. However, things got a

bit out of control this past Wed.(10/8) morning. Afer reading a very positive Boston Globe behind-the-scenes-look article on Baltazar, Siegal threw a major on-the-air attack on his counterpart which apparently included derogatory ethnic references. [I'll be up-front : I missed Wed's morning show so I dont have Siegal's exact comments but according to both local dailes they contained a lot of racial undertones directed at Baltazar's Latin descent]. And, this really got out of hand when Baltazar replayed Siegal's comments(without WXKS' permission) on his show Thursday morning.[I missed that one,too -:[ I *did* catch Siegal's on-air apology during yesterday's show. A bilingual local TV reporter was brought in to provide Spanish translation's of Siegal's speech.

It doesnt seem like a publicity, ratings generating stunt for a simple reason that both stations are part of a duopoly situation(not under the same roof yet -- JMN is still in Waltham; 'XKS in Medford) and *rule* CHR/Dance/R+B audience around here. Under the duopoly, sister stations are meant to complement each other in the day-to-day business side of things. The issue here is definitely very personal -- Siegal's not-so-small ego was undoubtedly damaged this summer when his bosses(Pyramid) pulled out of a poorly conceived syndication deal only after a 4-month run; Siegal's well-documented 'battle of the sexes' with female sidekicks didnt earn him any brownie points, either. Now, here comes a fresh new kid(Baltazar) with a different, more 'cool' approach and who's starting to step on Siegal's toes a little bit(at least according to the ratings :-). I do think that Siegal was trying to joke around at first but his frustration was probably at an all-time high and his ever present ego got the better of him. He simply exploded(very unprofessionally) on the air...

* From eX-files
- If you happened to set your dial to WBNW AM 590 on Monday, October 30 between 7p and 9:06pm like I did, you were in for a treat, or a trick for that matter :-)...A switching error at all-business stations resulted in picking up the wrong feed : Boston's #1 'public enemy' Tom Leykis was heard for over *2* hours before station's personnel realized that it wasnt more milder Bruce Williams...[No confirmation of a rumor that two Boston Herald gossip columnists were seen driving out of WBNW's reception range...:-]

* From aX-files :

The word out of Chicago, has former WAAF 107.3FM afternoon drive personality Liz Wilde getting an ax from her night-time gig at Evergreen's 'young talk' WLUP-FM. Wilde only lasted 7 months at 'LUP...It's probably too early to speculate, but could Liz be heading back to Beantown as part of 'company transfer' to become a part of a possible new all-talk format at Evergreen recent acquisition -- WKLB-105.7FM? Hmmmm...

*Programming Notes :

- It's taking American Radio's all-70's WEGQ 93.7FM a very long time to find a new morning personality. Since sending Scott MacKay packing at the end of August, they still have 4 or 5 candidates on their list...

-
-Mark

# 2969. D.C. Radio Watch

Newsgroup: rec.radio.broadcasting
Date: 1995-11-11 00:00:00 UTC
From: Max Cacas <76476.2472@compuserve.com>
Message-ID: <483658$9u2@vixen.cso.uiuc.edu>
Source record: 28619

Item First: The Washington Post's "On the Dial" (Radio) column reports that last Friday, Greater Media's erstwhile talker WWRC-AM (980) fired midday host Joel A. Spivak for the second time in three years. GM Robert Longwell refused to comment on why Spivak was fired, except to say he would receive full severance. Spivak refused to comment on the dismissal. In 1993, despite turning in the highest ratings on the station, Spivak was fired by WWRC, reportedly in an effort to save his six-figure salary. A new regime, seeing sagging ratings, re-hired him approximately a year later. Apparently it mattered to the listeners...they reportedly jammed the phone lines to protest the dismissal of one of the few remaining talents and genuine draws at the station.

Item Second: Also at Greater Media's Big Brown Radio Tower of Power on Georgia Avenue in Silver Spring: Find someone to peel the WGAY calls off the World Building. The "new" Bright 99.5 (AC, formerly "Star 99.5" AC, formerly "Easy 99.5" AC, formerly...) changed its calls last week to WEBR-FM. The calls of WGAY had been on the frequency for more than 40 years, and had also been on 1050am before Greater Media sold that frequency (now WKDL-AM, the kid-formatted "Radio Zone") when it acquired WRC-AM from NBC.

Item Third: The Post also reports that Ken Beatrice, recently sacked by ABC O&O NewsTalker WMAL-AM (630) after 19 years, has begun a syndicated sports-talk program heard in the D.C. area on WJFK-FM (106.7) between 10pm and 1am. Beatrice is working for Middleburg Broadcasting, owned by former Redskin Sam Huff. (WJFK is also the flagship station for the Redskins radio network.)

Item Fourth: Big winners in the 9th annual AIR (Achievement In Radio) awards, a D.C. area awards banquet to benefit the March of Dimes: Best Morning Show: Dennis Owens, classical formatted WGMS-FM (103.5); Best Newscaster: Bob Madigan WASH-FM (97.1); Best Midday host: Carol Munse at country formatted WMZQ AM-FM (1390/98.7); Best Afternoon Drive host: Loo Katz at "hot AC" WRQX-FM (107.3); Best Overnight/evening show: Jeff "Goldie" Gold, oldies WBIG-FM (100.3); Best talk show host: Tony Kornheiser, mid-mornings, sports-talk WTEM-AM (570). Other honors at the AIR awards (judged by radio pros from other markets) include a grand total of five awards for "the Radio Zone" (WKDL-AM, and its stations in Northern Virginia and Baltimore).

Item Fourth: Things we wish we could say on the radio: Two Sundays ago, as the Washington Redskins lost yet another game, this time to the Kansas City Chiefs, color man Sam Huff read to faithful listeners the standard disclaimer, warning that any rebroadcast of the game would be in violation of NFL rules. His play-by-play man, Frank Herzog, thought for a long moment, and then quipped: "Who would be sick enough to rebroadcast *this*?" Frank, Frank, Frank... <g>

Item Fifth: Finally... one morning this past week, Jack Diamond, the morning man at WRQX-FM ("Mix 107.3") interviewed Loni Anderson, now in D.C. to plug her new book. They got to reminiscing about "WKRP in Cinncinatti", and how he

(Jack) and his partner, Bert Weiss, had run into an analogue of nearly every character in the show in their real-life careers working in radio! Interesting thing they said I had never heard is that WKRP was based for the most part on a real radio station. Does anyone know for certain the station that was the inspiration for this show?

And so it goes... til next week!

WBLS Rehires Ken 'Spider' Webb. Webb is new PD Frankie Crocker's first hire--he used to do AM Drive for him at 'BLS before leaving to go to KISS-FM. Current AM Driver Michele Wright has been asked to stay with the station in an undetermined capacity. Webb, currently teamed with Jeff Foxx at KISS-FM, is among the top 5 in AM Drive. Crocker is looking for reverse the ratings slide for WBLS which was blown away in the KISS-FM ratings jump earlier this year.

An interesting note from the NY Daily News - WJDM GM John Quinn is quoted as saying the testing continues on 1660AM, and they will be broadcasting an oldies format like 1560AM in the near future and they are looking into studios/offices in Manhattan. I thought the expanded band was to be used in place of the existing signal?

Battle of the network stars -Imus on C-Span Friday AM, Stern all over the dial promoting his book 'Miss America' in bookstores now.

Here's the latest in Southern California radio waves:

Los Angeles <reported by David Alpern

Larry Stewart of the LA Times reports in today's editions that XETRA SPORTS 690 increased its power to 77,500 watts on Thursday (11/9. With this improved signal, LA's sportsradio wars are now set to intensify with four competitors competing for this limited market:

XETRA (690 AM) - Southern California's Sports Leader, which averages about a 0.8 share in the LA market. Its new signal reaches daytime listeners in far away markets such as Oregon and Washington state.

KMAX (107.1) - with a relatively weak signal. KMAX continues to prove that sportstalk is a proven loser in LA. However, if KMAX which formerly had a 0.0 share with its prior brokered/ethnic format can attain the ratings of KMPC when they were averaging 0.6 in the format, KMAX should be content.

KWNK (670 AM) - with a very weak signal, limited to the valley is mostly a non-entity, as it imports a satellite delivered Chicago based 24-hour sportstalk network.

KIIS-AM (1150 AM) - now comes word that KIIS is thinking of joining the fray. According to Roy Laughlin, GM at KIIS, the station would take a low-budget approach to the format.

AND.....
on another note, this LA Radio Watcher would like to publicly express my sincerest thanks to KCRW-FM and NPR for their comprehensive coverage of the tragic Rabin assassination story. KCRW and NPR delivered extensive programming for several days subsequent to the murder, along with numerous experts providing detailed analysis of every relevant angle to the story. Accordingly, KFWB-AM was superb in their use of CNN in covering this story.

The LA and national media in general provided coverage which could only be exceeded if it had been an American President who had been killed.

San Diego and San Diego North County <-- reported by Chris Carmichael

Who needs syndication when all you need is a computer, modem and access to the internet?

Roger Hedgecock has gone global! Last Monday, November 6, Hedgecock and crew began broadcasting via the net in real time

audio and video using a program called CU-SeeMe. The show is heard locally in San Diego on KSDO [1130, 10kw/10kw DAII]

A free copy of CU-SeeMe can be downloaded from the KSDO Radio home page: http://www.ksdoradio.com.

Once you have obtained a copy of the software, make a connection to reflector.connectnet.com. The reflector might be busy so keep trying. Internet users using modems slower than 28.8K might find the connection to be poor.

The XTRA connection: The buzz in sportsland is XETRA's 77.5kw DA pattern to San Diego and LA. The difference for me in North County is the station is audible in underpasses. Xtra Sports 690 is now the most powerful medium-wave station that is geared to English listeners. [noted statons in Mexico City, D.F., that are boomers but in espanol.]

Rumor making rounds: a major station was sold this week in San Diego. It's said that there will NOT be a format change, but only a $$$ change. I'll have more details . . .

KHTS has dropped the WDUV coast-to-coast simulcast and is expanding to top 40 or CHR. KHTS was the former KECR-FM at 93.3.

Rooty Tooty Fresh and Fruity: Those IHOP commercials featuring Cliff, the spokesman . . . Some may have found them campy, and stale. But, KKLQ's morning team of Jeff & Jer brought a lifetime of memories to the character actor who plays Cliff. An estimated crowd of over 5,000 San Diegans ventured out to the hamlet of Santee and waited in the parking lot for Cliff to show up. Of course, in Jeff & Jer style, was the mayor of Santee, the local high school football hereo [who presented an autographed game ball], fire jugglers, and a special some by Mike Clark of KGTV. It was noted in the build up that when "Cliff" opens new resturants, no one seems to ask him for an autograph. He got the chance on Wednesday to pass out 5,000 signed photos. [And who says the power or local radio is DEAD??] Jeff and Jer on KKLQ-AM [Oceanside 1320], KKLQ-FM [San Diego 106.5]

Rumors again surface that Imus is heading into the LA market. Again, I'm told: KIIS - AM. Hmmmmm.

>They have also been reluctant to take me out on calls with them.
>
Sounds all too familiar. Everyone's concerned with their own bottom line.
There should be a manager in your organization though who's bottom line is
the station's bottom line, and hence, your bottom line! If not, they're not
doing their job.

I'd say, keep pluggin' away, and search for other ways to develop yourself
professionally. Get to the library and check out every book on advertising
and sales you can find. Pour through Ad Week, Radio Only and anything else
you can find. Meet and mingle with salespeople from other stations and other
media. Ultimately, you are responsible for your development. Likewise,
you're its only limit.

As far as working for another station goes, they'll probably want a sales
person with a track record. Gotta build that up first. Look at it from
their point of view: if you can't sell station #3, how you gonna sell station
#13? Sounds cold, but it's business.

And when it comes to rejections...the yes's will never even come close to
equaling the no's. That's a given in any kind of marketing. Don't let the
no's pile up on you. Celebrate that yes, and turn it into amunition for
changing one of the no's into a maybe...and then into another yes!

## 2973. Anniversary Weekend

Newsgroup: rec.radio.broadcasting
Date: 1995-11-11 00:00:00 UTC
From: transvox@crl.com
Message-ID: <48365d$9ub@vixen.cso.uiuc.edu>
Source record: 28623

Sixty-seven years ago this weekend, almost every radio station
in the United States changed frequency.
It was the final in a series of moves by the Federal Radio Commission
to regulate radio. Before the FRC's formation in 1927, there was very
little regulation. The result was ever-higher levels of interference
and complaints from listeners that they couldn't hear stations they
used to be able to get.
(Sound familiar?)
The importance of radio in 1928 can be judged by what a North American
Newspaper Alliance columnist, Martin Codel, wrote: "Interest in the
allocation project--the most important step toward improving radio
reception conditions ever taken by the federal radio commission--has
been dwarfed by the national election. The project was purposely
delayed until after the elections in order not to disturb the role
radio was destined to play in the campaign and in reporting the
results."
Likewise, The Kansas City _Journal-Post's_ lead sentence was,
"Radio broadcasts will return this week to their regular schedules,
after a hectic week of political events.
"One change of great importance is that starting today with
the issuance of the reallocation order of the Federal Radio
commission, KMBC and WHB will go on the air with a new frequency
of 950 kilcycles. The result is that listeners on the 950 channel
will hear the programs of KMBC and WHB over the transmitting
equipment of the Midland Broadcast Central."
KMBC had tested its new frequency a week earlier, as the
_Journal-Post_ noted on November 2, "In celebration of its new
frequency, KMBC, the Midland Broadcast Central, will offer a
special program Sunday morning, presented by exclusive KMBC
artists. This rendition of superjazz entertainment will be
on the air from 1 until 2 o'clock on the new wave length."
On the day of the switch, the _Journal-Post_ reported that
"if telegrams and letters are any indication, the program was
a 'howling' success. More than 1,000 such responses were
received from all parts of the country, including Canada and
Mexico."
The Kansas City _Star_ wasn't quite so lucky with its
station, WDAF, which was to move from 810 to 610 on the dial.
A front-page story in the _Star_ on November 9 had these
headlines, in the infamous "stacked heads" format typical of
the _Star's_ layout well into the 1960s:

WDAF TO ITS NEW WAVE

---

THE STATION SILENT TOMORROW
TO PERMIT THE CHANGES.

----------

By Turning Receiving Set to
Around 87 or 88, Beginning Sun-
day, One Can Tune in The Star
at 610 Kilocycles.

Among other things, WDAF had to lengthen the antenna strung between two towers atop the newspaper building from 45 to 120 feet. (Evidently KMBC took care of its necessary changes sooner.)
On Saturday, November 10, the _Star_ published a column by the Federal Radio Commission's chief engineer, J.H. Dellinger, regarding justification for the changes:
"In some places the stations have been in the past so badly crowded together on the dial that listeners have received only jumbled noise instead of programs. Now the whole array of stations of the entire country has been redistributed over the dial in accordance with a logical plan and the known results of tests."
There were subsequent adjustments to the plan: both WHB and another Kansas City station, WOQ, were shuffled around a couple of more times in 1929, and KLDS, which also shared time with KMBC, disappeared into KMBC. Even though WOQ had the city's first (non-amateur) broadcast license in 1922, it was deleted in 1934 after the Federal Radio Commission ruled that Kansas City had too many stations for a city its size and ordered WOQ, the only remaining share-time operation, off the air.
But the basic plan remained in effect for 12 years, until the Havana agreement of 1941 that resulted in the distribution of the stations on the AM dial that seems relatively familiar to us today.

WAVZ in New Haven switched to nostalgia this week. The station recently aired syndicated talk and had the Z-Rock format for a few years before that. WAVES had 4's and 5's with nostalgia during the 80's and early 90's. The legendary 60's-70's Top 40 station went Music of Your Life in 1980 after the owners moved the Top 40 to KC101-FM.

In short, demand. If the demand is there (measured in requests, sales and testing) radio will play it. However, I don't think dance music ever left the radio. I see no lack of dance music on the radio in my market, or most others. (Or on the contemporary charts, for that matter.) Sure, it's not all dance, but that's not what I listen to the radio for anyway.

>sh_ _...and only out of town whiz bangs could do good radio.....
>We've continued down this road with conglomeration and bean counters
>instead of broadcasters providing programming....
>Homoginization is the result....hard to find real "local" radio...everyone
>playing same music, talking the same stuff...
>D/C helped us end the golden age of radio..

I've gotta disagree. What drove us to this point are shortsighted non-radio people who run the stations and keep looking for cheap, cookie-cutter methods to turn a profit. They brought in D/C, consultants, syndication, satellites, whatever, but never looked any further to find out why these things were successful in the first place. As a result, their own success was/is short lived at best.

Maybe we're more to blame by not being more business-like and allowing the suits-vs-jeans mentality to put jocks in the 'talented but dumb' catagory. I still believe that if you're truly good at what you do and are smart enough to adapt to the changing landscape, these things won't put you out of work.

# 2981. The Expanded Band 60 Years Earlier (fwd)

Newsgroup: rec.radio.broadcasting
Date: 1995-11-11 00:00:00 UTC
From: "Mark S. Roberts" <transvox@crl.com>
Message-ID: <48365k$9up@vixen.cso.uiuc.edu>
Source record: 28631

X-Mailer: SPRY Mail Version: 04.00.06.17

In the mid-1930s, the FCC authorized four stations to broadcast in the then empty band between 1500 and 1600 KHz as experimental "high-fidelity" stations with a protected bandwidth of 20 KHz. W9XBY at 1530 KHz in Kansas City came on the air December 31, 1934.

The Kansas City _Journal-Post_ (now defunct) reported on the station two weeks later:

Walter Lochman, a pioneer in radio broadcasting, has joined the staff of Kansas City's newest station, W9XBY, atop the Kansas City Power and Light building, as program director. Lochman for a time handled the Tydoil account for Columbia. At present he also is a featured announcer on W9XBY.

Everett Dillard, also a pioneer in radio, who developed WLBF here, also has joined the station staff as continuity director. Dillard brings to the station a background of technical and program experience and is assisting in lining up remote controls [sic] which are to be featured by W9XBY.

The opening broadcast of the station New Year's eve brought surprising response, according to Sid Noel, president of the company. More than 2,200 letters already have been received from listeners in all parts of the United States and Canada.

****

W9XBY program listings did not appear in the _Journal-Post_ until January 20, 1935. However, there were ads for the station in both the _Journal-Post_ and the _Star_ as early as December 23, 1934.

Everett Dillard, of course, went on to be the founder of pioneer FM stations KOZY(FM) [off the air in 1950] in Kansas City and WASH(FM) in Washington, DC. W9XBY later became KXBY, KITE, and finally KXKX. It moved to 1590 KHz in the massive reallocation of frequencies on March 29, 1941. It left the air October 1, 1942.

WLBF later became KCKN and is now KNHN.

# 2983. Re: Instrumental Easy Listening Recordings

Newsgroup: rec.radio.broadcasting
Date: 1995-11-11 00:00:00 UTC
From: billh@radix.net
Message-ID: <48365n$9ut@vixen.cso.uiuc.edu>
Source record: 28633

>There is a good deal of this music in print, and fairly easy to find.
>The "exotica" or "space age bachelor pad" music boom is causing a good
>deal of this material to be reissued on CD. Of the top of my head, I
>can think of currently available CDs by Martin Denny, Arthur Lyman,
>Juan Esquivel, Nelson Riddle, and many other individual artists. There
>are also several excellent compilaitons out there, including two 3-disc
>sets on RCA that cover a wide array of interesting instrumental music, and
>two different available-on-TV double discs that cover the more popular
>hits of the late 50s and early 60s.

There is a lot of "your mileage may vary" here depending on what is being sought. Those seeking the mood music recordings of the 50's and 60's can find some gems in the catalogs by Good Music and also Collector's Choice Music; Henry Mancini, Percy Faith, George Shearing, Billy May, and many others. This is exactly the kind of music I am looking for myself.

More difficult to find is the "after rock overtook easy listening" custom material recorded for the syndicators in the 70's and 80's, e.g., Bonneville, and some held by Greater Media that was "orchestrated" (sorry) by the late Bob Chandler of WGAY in Washington, DC many years ago when he began to panic at the dearth of material available commercially, and the only alternative was go to to Europe and pay to get the music recorded for "easy listening" stations.

A lot of this is eeking its way into CD release, there are a few items available through Surrey House that had origins in the Bonneville vaults. If there is interest, I'll pass along the word if a catalog becomes available.

It was a pleasure and honor for me to work on THE PERCY FAITH TREASURY for Good Music, and Joseph Lanza has released several excellent CD's on Time-Life that contain some real collector's cuts by Riddle, Kostelantetz, Ray Conniff, and have real liner notes and photos of original cover art to boot! There is even a 20-selection David Rose CD but I fear it's not the earlier work we might hope for, but perhaps one day soon.

If anyone is indeed interested in the realm of "popular music for orchestra" the ROBERT FARNON SOCIETY in London is a large organization of folks who enjoy this music (and the British have a lot more variety of mood music than we ever did). I'll be contributing a column in each issue with news of some American CD reissues, and news of the "intact" re-recordings of arrangements by Percy Faith by Nick Perito, a series of four CD's for JVC (and distributed by Ranwood in the states). If anyone is interested I'll try to have the Secretary of

the Farnon Society send you a sample copy of his publication JOURNAL
INTO MELODY, leave me Email.

Radio Marti is *not* using 1710khz. Radio Marti evening frequencies include 6030khz, 7315khz (via WHRI), 7365khz, 9815khz as well as 1180khz medium wave. We looked into 1610 for awhile, and made a serious effort for 530 as well. Neither were approved.

# 2987. looking for names and/or recordings of various syndicated shows

Newsgroup: rec.radio.broadcasting
Date: 1995-11-11 00:00:00 UTC
From: Greg Skinner <gds@best.com>
Message-ID: <48365r$9v4@vixen.cso.uiuc.edu>
Source record: 28637

I'm looking for recordings (cassette, vinyl, or CD) of the following
syndicated shows:

Countdown USA
Countdown America (with John Leader)

I'm also looking for the name of a show that aired during 1979 and
perhaps into 1980. It was very similar to Westwood One's "American
Dance Traxx," except it featured (mostly) disco music. It aired on
WXKS-FM (Kiss 108) on Sunday nights, I think. If anyone remembers
what the name of the show was and who hosted it, I'd appreciate it if
they'd let me know. (Recordings are appreciated too!!) I'm willing
to pay for the recordings.

# 2989. Need % of radio listening in autos

Newsgroup: rec.radio.broadcasting
Date: 1995-11-14 00:00:00 UTC
From: yt50@panix.com
Message-ID: <489mo3$4j1@vixen.cso.uiuc.edu>
Source record: 28639

This is a sort of interdisciplinary post.

People who have studied the transition from bus/trolley commuting to auto commuting often attribute the decline of newspapers and the ascent of TV to the lack of reading while commuting by car vs. by bus or rail.

But in fact, the medium which benefitted most from this transition may have been radio, not TV, because auto commuting made radio the medium of choice during commuting.

In another angle, looking at the transition from radio to TV, you could hypothesize that auto commuting kept radio alive when it was challenged by TV.

All of this is probably oversimplified. But maybe some people in this newsgroup know some approximate, simple answers to these questions.

What % of radio listening occurs in autos?

How does this vary by time of day?

Do broadcasters perceive that their market is symbiotic with the auto industry's?

How has the % of radio listening in cars changed over the years?

How is the radio market affected in cities where a majority of travel is still by bus and rail, like NYC, London, Paris, Hong Kong, etc.?

Have radio broadcasters ever targeted walkman listeners in buses and outdoor trains?

Do any broadcasters ever target only automobile occupants with their programming?

Anything else about this which may be interesting?, or are their any articles or books on this topic?

Thanks!

>as Frazier Park, which is in the mountains that separate the
>California Central Valley from Southern California.

OK, I should have said "listenable_in the valley_only north of Bakersfield."
If you have a line-of-sight shot to the antenna, KBOS will carry that far,
but if you're in a populated area on the valley floor reception is very poor
south
of about Lerdo Highway (10 miles north of Bakersfield). While KBOS can be
_heard_ in Bakersfield, fading and multipath from building shadow make for
very unpleasant _listening_, unless you're one of those who puts up a rooftop
Yagi to listen at home.

In article <486mo4$bhm@vixen.cso.uiuc.edu>, rhh@research.att.com (Ron Hardin <rhh@research.att.com> 0112110) wrote:

No-school announcements. One of my hot buttons.

Not because, as the previous poster says, they shouldn't be done, but because they are often so _inefficiently_ done.

Here's how one station in my market -- WBZ 1030 AM Boston -- does it.

First, they sort the list as follows:

1. Public schools:
Boston, then all the other cities and towns (including several in southern New Hampshire), in alphabetical order by town.

2. Private day care, kindergarten, elementary and secondary schools, in alphabetical order by name.

3. Colleges and universities, in alphabetical order by name.

4. Everything else.

Contrary to what you might think, if the snow is particularly (and evenly) bad throughout eastern New England, the inevitably long list is actually pretty easy to zip through, because nearly every facility is closed for the day.

However -- and here's where much time is wasted -- if it's a more typical New England type overnight storm which leaves heavy snow around Worcester and the Interstate 495 ring road (about 35-50 miles outside Boston), with lesser amounts closer in and a thin slush in Boston, the list gets really, really tiresome to both read and listen to.

Why?

Because nearly each and every school is a separate case. The snow's frequently not bad enough to call off school everywhere, but still bad enough to delay it by an hour or two. Or it might make officials nervous enough (read: afraid of accidents and/or the resultant liability suits) to keep school open but cancel bus transit.

Some schools are closed for the day.

Some are open, but with a one-hour delay.

Some are open, but with a two-hour delay.

Some are open, but with no morning kindergarten.

Some are open, but with no transportation.

So each separate case takes many more words to say, and the list takes forever to wade through.

My humble proposal:

Further sort the lists.

Break up the "Public School" list into a collection of several lists:

1. Public Schools that are closed for the day.
2. Public Schools that are open but with a one-hour delay.
3. Public Schools that are open but with a two-hour delay.
4. Public Schools that are open but with no kindergarten.
5. Public Schools that have no transporation.
etc.

And do the same thing for each of the other main categories.

Every 10-15 names or so the announcer could reiterate that "these are the schools that are open but with a two-hour delay", or whatever the category of the moment was, but even with that the time savings would be ENORMOUS over current practice.

I think Talk radio still hasn't come to grips with what it is and what all it can do. There are too many stations out there that think the only ticket to winning is to load up on the Rush wannabes. Even Rush is having a hard time being Rush these days, why would anyone want to do a radio show that goes on and parrots him in "me too" fashion?

There are people out there who are pitching new, and different kinds of Talk radio programming, but the programmers by and large aren't listening...which is a shame. There seems to be a war brewing between the old guard who want news and talk to stay just the way it is, and those who want to actually talk about something OTHER than politics and issues that affect no one's life.

Hmmm...unless you can think of a good movie available on video with scenes
you could lift audio from, the standard rule is "make your own."
A van's sliding door might be a good alternative sound; otherwise, how
many of those sounds would actually be audible to passengers?
Why not make dialog spell it out? "Well, here we are...after you," etc.
Also: If your listeners don't regularly ride a NYC train, THEY don't know
exactly what the sounds are, either; you're free to use any mechanical
sounds at hand to stand in for whatever the real thing might be.

We've already heard from other sources here on Airwaves that the station is likely to go to a Spanish language format of some sort. What I want to know, Steve, strictly for my own edification, is why you say a "Top40/Dance station is desperately needed..."? By what definition is a station with this format "needed" in the NY market? Please tell me how the fans of dance music are not being served by stations which already integrate dance music into their formats in the NYC market...

Aside from wishful thinking...another station playing "dance" music in NY would seem to be a waste of the frequency.

As for my own speculation of what we may hear from WPAT-FM before the end of the year...how about a Spanish/English language format featuring Tejano music? Its the hot format in some parts of the country...and with the huge Hispanic audience in NY...well, why not? <g> Make it slick, get some excellent talent, and watch something like this go... :)

AF>...that tells you something if they're placing sold programming ahead of
AF>a live clearance of their flagship program! Anyone wanna guess on the
AF>future life of this program?

Wyatt,
I'll take a stab at it. My bet is that the show will air on KGBS
as long as it and the station are owned by Salem. It actually makes
sense, since the station's daytime signal is much more valuable for
paid religion than the nighttime signal is. The North show won't
generate revenue or numbers for the station, but the Dallas clearance
will help the network clear a larger percentage of the country.

I heard this "discussion" was taking place and have just read all the prior entries. Well, I sure hope US and World History are written more accurately and based on much less speculation by spectators rather than participants.

Maybe I should write the book people have been needling me to do for years. Phil Yarborough (Bill Drake) and I first competed in Fresno in 1962; he programmed KYNO (owned by former radio actor Gene Chenault) and I did the same for KMAK, part of three station group started in Honolulu in 1959. "The Battle of Fresno" was memorable--you had to be there. Many good radio men who survived that competition went on to much bigger things.

The Drake-Chenault consultancy was formed in 1964, when the late Willet Brown took them on to boost KGB's ratings at San Diego. Without Mr. Brown, there would have been no "Drake format," "Boss Radio," and the many things that spun off of them. Mr. Brown recommended D-C to Tom O'Neal, owner of RKO General, to come in to help KHJ, LA in early 1965. They hired me as program director. I ran the show for the first four years. Bill Drake and I talked on the phone dozens of times a week for the first year or so.

The legendary "Drake format," for the most part, was drawn up on cocktail napkins at the erstwhile Nickodell's restaurant on Melrose Boulevard next to KHJ.

We spent April and May of '65 planning our air sound, music structure and promotional approach. (The format was forced to debut earlier than expected. The circumstances of all this, and the relationship between the Browns [which included Willet's son Mike], Drake, Chenault, RKO and yours truly, were written about in an article entitled "The Birth of The Boss," which I wrote for the recent 75th Anniversary of Radio issue of Radio Ink. Those are the FACTS.

The myths that have been perpetuated over the past 30 years, some of which I just finished reading, are laughable to those of us who were there. As someone once said, "Genius is 1% inspiration and 99% perspiration." We had the best signal, the biggest budget and the Boss Jocks. Kicking everyone's ass in LA radio--we're talking 20+ shares--was great fun, but certainly no mystery.

Dozens came of PD's came to town, monitored KHJ and returned home to clone what they had heard, with no idea of WHY we were doing what we were doing.

For the record, the "Drake format" was the result of a collaboration of some talented and inspired radio people: Les Turpin, Gary McDowell, Betty

Brenneman, Don Berrigan, Bernie Torres, Bill Mouzis, Clancy Ismusland and the ORIGINAL Boss Jocks: Robt. W. Morgan, Roger Christian, Gary Mack, Don Steele, Dave Diamond, Sam Riddle, Johnny Williams and Frank Terry. Plus Art Kevin's bigtime News Department and the incomparable jinglemeister, Johnny Mann.

(Anyone NOT on that list is a Boss Jock Come Lately.)

Forget about format clocks, when to plug what, how to say the time, and all the details that to us were a given. What radio is lacking in 1995, with some wonderful exceptions, is killer programmers with imagination and balls, supported by owner/operators who are not afraid to try something NEW.

(I'll trade all the 93/KHJ Hot Clocks you want for 1948-1972 Los Angeles Rams football cards.)

Anytime you copy a formula without finding out why it worked where it worked, you're setting yourself up for failure. The secret is not in any one facet of the formula - music, personalities, whatever. Their sum is more than their parts. If any area is wrong, the whole thing fails.

As more users start running large bandwidth applications (compared
to text, such as email or simple web pages, I think someone is going to
start charging. Each "node" in the network could charge everyone connected
to it based on the number of terabits per month, or something like that.
This would then approximate the telephone company "settlements" procedures
where each company figures out who owes who what, since most calls involve
more than one company.
This model (each node charging each user) could be carried out to
every level. Individual users, for a $15 per month fee, would be able to
send and receive some huge amount of email and news. They would be allowed
to send and receive a proportionately less amount of graphics, sound, and
video, based on the number of bits. After the %15 minimum, there would be
per bit charge with a quantity discount (more bits for less per bit).
As each ISP connects into "the net", they just appear to be rather
large users who generate and receive a lot of bits, and pay proportionately.
It seems that total cost recovery is possible here.
There needs to also be an allowance for variable demand and having
price vary with it. Interactive stuff, which requires immediate delivery,
during busy hours, would cost more than email, which can be stuffed in there
whenever.

I don't really think there's a danger of this, due to limited net
capacity. MCI and SPRINT won't see much of their business go away. It
might just shift from circuit switched to packet switched. Packet switched
is probably not the best way to handle voice, though I guess ATM is a sort of
fast packet switched network for voice.

>} >considering the near-free cost of it....

I've enjoyed listening to NPR programs that are not otherwise
available here. Although RealAudio is supposed to be AM quality, I think
it's a low quality AM with skywave. But... it's certainly better than
nothing, and it WILL get better.
Another consideration here is efficiency. Although I like to listen
to NPR's Science Friday, if a half dozen people here in SLO also listen,
we've set up several datastreams from the server to us. This is less
efficient than sending it once (perhaps to a radio station or a CATV
system), then broadcasting it to everyone. As such, I'd expect it to cost
more, and I think some day it will. Once it does, are consumers willing to
pay more for audio on demand? We currently have a similar "audio on demand"
system... 900 and 976 numbers. They have very limited utility. Radio has a
much larger audience. Video on demand has not been able to compete with the
corner video store. Pay Per View has also had limited success. Phone
companies offer voice mail, but it's cheaper for most people to just get an
answering machine. There are all sorts of possible gee whiz technologies
that just do not offer enough of an advantage over the existing technology
to justify the cost. It seems that too many technologies are trying to get
more dollars out of the consumer by offering some gee whiz capabilities
instead of offering the same or more capabilities for less cost, gaining
market share (and profits) that way.
A final comment... It would be interesting to see a graph of long
distance circuit usage. At any given moment, how many percent of the
circuits are in use, and how many are sitting idle. LD companies otta sell
"preemptable" time on these circuits at a lower cost to packet network
providers (such as internet service providers). When there are not a lot of
long distance calls being made, a bunch of 64 kbps circuits between here and
there become availble. As people start placing voice calls, the number of
circuits available to the ISP drops, as they get preemtped. Email and news
get held back allowing web text, telnet, and other basic interactive
services to use whatever bandwidth remains.

Message-ID: <48f7kt$gci@vixen.cso.uiuc.edu>
Source record: 28557

I believe this same Gary Dee had a very brief and stormy stay in Washington DC in the mid-80s at WPKX, Kix 106. In those days, it was a country station. He may have replaced Jim London when Jim went to WMZQ. He caused quite a stir for the short time he was here. Not long after, the station changed format to classic rock and became WCXR. Now it's WJZW, Washington's "smooth jazz."

# 3008. Jason W. Jennings?

To the person who asked about a jock from the 60~s named Jim Harriott...
who was on WMCA in early 60`s...
He might be the same as a former VOA Newsman now with USIA Television. He would be about the right age, and has worked at nearly all major markets during his long broadcast career. The Jim Harriott I know is now with USIA (government television) and before spent a couple of years as a VOA Newsman( I worked with him)Prior to that, he spent about a year as a co-anchor person with WJLA-TV Channel 7. As I understand it, he came to us from a television station in Seattle Washington. He is now in his 60`s and a good newswman. He has a very distinctive delivery somewhat like Paul Harvey. I only know him from my working with him in Washington, But if he sounds like your man..he is alive and well..and working with USIA Television (government) here in DC.

# 3011. Why did Johnny Walker stop on BBC Radio-1

Newsgroup: rec.radio.broadcasting

Reply-To: juergenb@comm.mot.com

End of October Johnny Walker had his last show on BBC Radio-1.
He said at the end that this was be his very last show altogether.
I wonder why he stopped, was he forced by the Radio-1 management
or was he just tired of doing shows?
I liked his show very much, he had a variety of new, interesting
music and interviewed artists that made listening a pleasure.

He left a void on Saturday afternoons!

Wolfman was on XERB/1090, and as his alter-ego Bob Smith was station
manager. X[E]TRA was elevator music if I remember correctly.

When XERB folded Wolfman spent a year or two doing evenings on KDAY. At
that time it was pure album rock - the Black influence came later.

Source record: 28565

the time I started enjoying radio until moving away. Listening post
>was Pasadena.

I've lived in LA all my life, and started being aware of these stations in 1970. Here's a few comments . . .

>KLAC/570: pop standards. I don't think "adult contemporary" had been
>coined yet.
It was country/western all the time I've heard it (until 1993, when the went back to pop standards). This was actually the first radio station I was ever aware of, and was just about all I listened to until 1976 or so.

>KFI/640: very homey, directed towards an older audience, seemed to have no
>interest in ratings at all. Lotsa Lawrence Welk etc, but a great old
>radio/big band history show on Sat night, full of air checks from the 30s,
>also had an hour live from the Coconut Grove nightclub at the Ambassador
>Hotel, a cool place at the time. KFI also had Dodgers baseball, NBC news
>and some other net feeds.
I started listening to KFI in 1977. It did Top-40 music, with comedy and radio drama by Al Lohman and Roger Barkley in the morning, and some call-in talk with Hilly Rose at night. KFI eventually went all-talk in 1988.

>X[E]TRA/690: rock with a poor signal, _but_ Wolfman Jack was there, so you
>tried to get it when next to a good radio.
I had no problem picking this up. It played instrumental background music until around 1981, when it switched to a rock format. It went through several formats (oldies in 1984, talk in 1988, and finally, sports in 1992)

>KMPC/710: Angels baseball, pop standards, a real personality to the station.
Always had. Gary Owens, Robert W. Morgan, Dick Whittinghill, Dave Hull, Jim Healy (from KLAC) . . .Tried a short stint with talk in 1980, but went back to pop standards until 1992, then went sports. In 1994, became talk.

>KBIG/740 (Avalon) beautiful music daytime.
Slowly "got religion" over the years, switching to religious music during the mid 70's and religious talk in the 80's

>KABC/790: ABC news, some sports, some talk (incl. acerbic, with some guy
>whose never-ending advice to callers-in was "Go gargle with razor
>blades.").
Joe Pyne! (He was way before my time, though). The natural progenitor of all these loudmouth, confrontational talk show hosts we have today. And how appropriate, since KABC essentially invented "talk radio" as we know it.

>KIEV/870 (Glendale): pop music, some religious.
Mostly paid programming now. George Putnam still holds down the fort with his noonday talk show, and there is still polka music on Sundays.

>KGRB/900: astonishingly friendly little station, 250w from somewhere
>around Commerce. Pop standards really well done.
It's "big band" now.

>KHJ/930: Mutual network (a real entity at the time) news and features, pop
>music. General tiredness to its personality. Signal somehow not very good
>for 5kw.
Maybe back then, but in the mid-70's, this station was every teenager's
dream. "Boss Jocks", Top-40, promotions and prizes, etc.

KHJ went "Urban Cowboy" in 1981-1984, then did a stint as "Car Radio", with
CHR tunes. Finally went Spanish (as KKHJ Radio Alegria) sometime around 1989

>KFWB/980: top 40, and very good at it. Casey Casem (sp?)'s first
>big-market job, or close to it. B. Mitchell Reed was the absolute coolest
>DJ on the face of the earth. Every high-schooler's favorite station.
Was all news by the time I came along . . . still is.

>KGBS/1020: pop music with a light Latin flavor. Well done.
I remember, when I was very young, listening to KGBS and hearing the "N-B-C"
tones. KGBS became KTNQ in the mid-70's, and was another Top 40/Disco
favorite. Became all-Spanish in 1979.

>KNX: then as now, a solid station. More quirks and variety all over the
>dial; here, for example, Dear Abby had a daily half-hour on CBS at the
>time.
See my entry under KFWB.

>KRLA: also-ran to KFWB. 'WB had a cool, laid-back personality, while KRLA
>was bubbly. Better signal, though. It was widely rumored that if you heard
>a song you liked on 'WB, tune in KRLA and you'd hear it a few minutes
>later. Or if 'WB was playing something you didn't like, you punched this
>one and stayed until the current song ended.
Another favorite of mine while commuting between LA and Pasadena. Still
true to its roots, now playes oldies.

>KRKD/1150: eccentric, eclectic mix. Some religious. Sounded like it was
>owned by one person who was also program director and who didn't need the
>money. Sort of like KFI.
The frequency is now used by KIIS-AM (mostly simulcasting KIIS-FM). The
towers, one with a "KRKD Radio" sign, are still atop a building on Broadway in
Downtown Los Angeles.

>KGFJ/1230: I remember it was there, but no memory of its programming.
As far as I can remember, always had some form of "soul" music (of course
disco in the late 70's). Now a gospel-music station.

>KPPC/1240: from the basement of the Pasadena Presbyterian Church (thus the
>call), a few hundred watts, on the air three days a week - and around
>1966-68 (I listened on visits home) became one of the country's first
>underground stations figuratively as well as literally. Alternative,
>community, committed, wonderful. Didn't last.
I had heard about this station in anecdotes, etc. but never heard it directly until
1990, when I was working in Pasadena. This station currently plays a few

hours of Spanish gospel music each weeknight, and some local church services on Sunday. (It does not provide 24-hour service). It is also impossible to receive this station more than a few miles from Pasadena.

>KWKW/1300: Spanish. Strong signal interfered with KFAC.
>KFAC/1330: classical simulcast with FM (as KHJ, KNX, KRKD). Well done if
>very traditional format. So Cal Gas Company sponsored a commercial-free
>studio program every weeknight, and had for 30 years or so. You had to
>respect it.
In 1988, KFAC terminated AM operations, KWKW moved from 1300 to 1330, and a new station, KAZN ("Asian Radio") started up on 1300. (A few months after that, KFAC-FM would close, and its frequency used by a new urban-contemporary station)

>KTYM/1430: eclectic, ethnic mix. A cultural treasure of sorts, but poor signal.
Pretty much the same as KIEV now, but with more foreign and ethnic content.
Now on 1460.

>KPOL/1540: Soporifically beautiful music simulcast with FM.
As the 70's ended, KPOL played more and more songs with vocals, and uptempo songs.
Became all-Spanish sometime in the 80's. KPOL-FM became Country/Western (KZLA)

>KDAY/1580: 50kw daytimer: rock with as African American a flavor as you
>could get in those days.
KDAY got some limited nighttime power (it was sharply directional, to protect a Mexican station in Sonora. When I moved from LA to a suburb about 40 miles east, and tried to pick KDAY up at night, I got the Sonora station).

But it always stuck with the soul/disco formats, and was playing hip-hop rap up until around late 1991. Then, after a failed attempt at a financial format, it became all-Korean (KBLA)

You asked about Bob Crane's radio show. He use to be on mornings on KNX 1070 and it was the first radio show I can recall listening too. I had to be five maybe? He used a ton of drops which were played off disc in those days and anyone who was anyone on the L.A. scene would come on his show. He had a very absurd kind of humor and he was simply great.

Message-ID: <48f7l7$gdb@vixen.cso.uiuc.edu>
Source record: 28567

Bob Crane(yep, the "Hogan's Heroes" guy), did mornings on KNX, which at the time was personality MOR and the
only real threat(at least until Lohman and Barkley's arrival at KFI in '68)to KMPC. Dick Whittinghill arrived at KMPC for mornings about the same time Gene Autry bought the station from Marathon Petroleum Company(MPC)...1952.
Crane hit town in 1956 and for the 9 years until Crane bailed for full-time acting in 1965, it was a real battle for audience.
It proved to be a friendly one, though...as soon as Crane was full-time in TV, Whittinghill tapped him as his permanent fill-in host for vacations...an arrangement that continued for many years. In fact, when Hogan's Heroes
went off the air and Crane's next TV show bombed, many folks thought his next move would be to replace Whittinghill at retirement. As it turned out, Crane was not to live that long...murdered in a hotel room in Scottsdale, Arizona in 1978. Robert W. Morgan(who came to town about when Crane hit radio and had become the hands-down hottest morning act in town at KHJ)became Whittinghill's replacement at KMPC.

Message-ID: <48f7la$gdg@vixen.cso.uiuc.edu>
Source record: 28569

Hey there.

I am interested in some info on the growth aspects of NAC as a
format. I know WNUA in Chicago has maintained a great showing, and the
K.C. signal that went from a flop as a third country station in K.C. to
kicking some serious money-demo butt up there in about 6 months.

Also the re is a new NAC on the air in Milwaukee (WFMI) at 106.9.

I want to know where the format is dominant and where it has failed
or underachieved. I just want to get better acquainted with the guts
of the format.

If there are any NAC gurus out there who are willing to chat
with me about the format I am very interested.

Please email me personally.

Thanks.

Bill

As I remember the story, Hugh Wilson (the creator of WKRP in Cinn.) worked as an ad salesman at WQXI Atlanta at the same time as "Skinny" Bobby Harper was the morning man. Thus the inspiration for "Dr. Johny Fever" played by Howard Hessman (himself a former part time d.j. in the SF area, KSAN I think,under the name of Don Sturdy).

Gordon Jump, the actor who played Arthur Carlson, got his job due to his amazing resemblence to Jerry Blum, the GM of WQXI at the time. Several incidents depicted on the tv show actually happened on the air at 'Quxie (anyone remember the great turkey drop?).

Source record: 28573

Nassau/Suffolk is counted as a separate market, but it is also "imbedded" (included) in the New York Metro. Arbitron does this in a couple of markets. San Jose, for example, is a market in and of itself, but is also included in the San Francisco metro.

To be honest, I've never understood this. Parts of the Arbitron-defined San Francisco metro are over 50 miles from town. That's why the big 50K AMs always dominate there. They're the only signals that can cover all of that real estate. The FMs there (and there are some real good ones) can't crack a 5 share, due to their inability to cover the large area. There are also brutal terrain problems that cause FM signal problems there.

If you enlarged the Philadelpha market, and made it geographically the same size as San Fran, Philly would be #4, which is how Nielson ranks it for Television. Arbitron puts out a map of the country that color-codes the markets from coast-to-coast. It's very interesting... some of the market definitions are downright goofy.

Message-ID: <48f7lv$geq@vixen.cso.uiuc.edu>
Source record: 28575

For what it's worth, WWRC was the station I chose to listen to when I arrived in Washigton in 1989. I did the usual dial scans to find a radio home, and liked what I heard at 980AM. Joel A. Spivak was a major reason, along with Joe Madison and Mark somebody (the afternoon guy - his name escapes me at the moment) The station was, IMO, credible, informative and entertaining.

None of the programs I enjoyed remain. And neither do I as a listener. I signed off of WWRC several years ago. I drop by now and then to see what they are trying to do. I was pleased to see Spivak back. Unfortunately, I was unable to listen due to a different work schedule. Now he is apparently gone again.

For the life of me, I don't understand what they are trying to accomplish, unless the phrase "tax write off" has some relevance here.

Also FWIW, since departing WWRC, I am now one of those added to the growing list of listeners to WAMU-FM (American University). Derek McGinty's "DC Politics Hour" Fridays at noon is the highlight of my radio week.

As for WWRC, a sad farewell.

>from WGMP on 1210.

According the the FCC AM Engineering database, Fairbanks has applied
for the following facilities for WKOX:

Daytime: 50 kW ND from 143 Rumford Ave., Newton (WNTN site)
Nighttime: 50 kW DA from 100 Mt. Wayte Ave. (current WKOX site)

The night application would add a third tower to the existing
two-tower array.

# 3028. Dance CHR needed in NYC

Newsgroup: rec.radio.broadcasting
Date: 1995-11-16 00:00:00 UTC
From: Greg Skinner <gds@best.com>
Message-ID: <48f7ls$gel@vixen.cso.uiuc.edu>
Source record: 28578

In article <48cgg0$ak@vixen.cso.uiuc.edu> Max Cacas writes:
>We've already heard from other sources here on Airwaves that the
>station is likely to go to a Spanish language format of some sort.

Romantic Music, so I've heard. There is something like this in the
San Jose area, on KBRG Fremont (104.9).

>What I want to know, Steve, strictly for my own edification, is why
>you say a "Top40/Dance station is desperately needed..."? By what
>definition is a station with this format "needed" in the NY market?
>Please tell me how the fans of dance music are not being served by
>stations which already integrate dance music into their formats in
>the NYC market...

Perhaps it would help if some people in NYC would post playlists of
Hot 97 WQHT (or just mail them to me), and we could compare them with
other Dance CHR or Urban CHR offerings in other cities. For example,
here in the SF bay area, KMEL and KYLD (Wild 107) are considered Urban
CHR (or Rhythmic CHR) stations, but they also play some house and
dance music. Some examples are the latest La Bouche track ("Be My
Lover"), a track called "A Mover La Colita" (can't remember the artist
offhand), and something called "Everybody Wants To Be Somebody."
However, their primary focus is on hip-hop and rap. You would tend to
hear LL Cool J's "Hey Lover", The Pharcyde's "Runnin'", E-40's
"Hurricane", and other contemporary rap and hip-hop on both
stations. (KMEL also plays Urban AC types of songs like Deborah Cox's
"Sentimental" and Terry Ellis' "Where Ever You Are".)

If WQHT is doing something like KMEL or KYLD, one could argue that
there is some dance music (though obviously not as much as before they
flipped to urban). On the other hand, if they've really become a 100%
rap/hip-hop station, I can see why the dance fans would be unhappy.
>From what I've heard, you don't get any dance music on any of the
other stations like Z-100 or WPLJ, because of their respective format
changes.

>As for my own speculation of what we may hear from WPAT-FM before the
>end of the year...how about a Spanish/English language format
>featuring Tejano music? Its the hot format in some parts of the
>country...and with the huge Hispanic audience in NY...well, why not?
><g> Make it slick, get some excellent talent, and watch something
>like this go... :)

There has been some discussion on this topic in alt.music.dance and
rec.music.afro-latin, for anyone who's interested.

Incidentally, a lot of people are still hoping Hot 97.7 (KHQT Los Altos/San Jose) will resurface somewhere in the south bay. They featured a lot of dance music, particularly Latin freestyle.

Source record: 28579

SC> According to previous edition if Airwaves, the New York Daily News
SC>newspaper reported that WPAT may be sold. A change in ownership almost
SC>always means a change in format. A Top 40/Dance station is desperately
SC>needed in New York City.

Steve,
You'll have to wait a little longer. WPAT-FM has been sold to SBS Broadcasting for around $83.5 million. SBS is a Spanish broadcaster and the format will, most likely, be Spanish. WPAT-AM may be sold to Heftel Broadcasting, another Spanish formatted company.

SC> by the way: is the WPAT transmitter on World Trade/Empire State or neither

World Trade, I believe.

# 3031. Answer to 2 Questions

Newsgroup: rec.radio.broadcasting
Date: 1995-11-16 00:00:00 UTC
From: "Bruce Slutsky, Van Houten Library, 201-596-8498"
Message-ID: <48f7lb$gdi@vixen.cso.uiuc.edu>
Source record: 28581

I believe that Jim Harriet who did evenings on WMCA in the early 1960s is now a newscaster in Seattle, Washington. I am not 100% sure.

There is no TV Guide type of publication in the New York Metropolitan area for radio. I vaguely remember there was such a publication in the late 1970s but it folded. I would love to see that type of magazine, but it would not be profitable since people listen to stations not to specific programs. The New York Times, Daily News, New York Post and Long Island Newsday list selected programs. The non-profits such as WFUV, WBAI, and WNYC issue monthly or quarterly program guides.

Reply-To: pyx@globalone.net

Any Rock DJ's care to share their experiences with the request line.
I'm looking for:
1. The types of wackos you've got calling,
2. What not to say to callers (even when you really want to)
3. Any transcribed conversations you'd like to submit (paraphrasing O.K.)

I'm sure this'll be a thread we can all relate to

--
Actually, even if you own it, you could be breaking copyright laws.
Someone previously suggested some Sound Effects Libraries, one of which was the one produced by the BBC in London.
I've seen these and other libraries that you can buy in your favorite music store and if you read the packaging carefully, they state "Not For Broadcast or Public Performance". Not only do you have to purchase the discs themselves, but if you want to use them for production of anything that is going to get airplay, you must pay a royalty fee. This can be a "per use" basis, but of the production is going to get a lot of airplay, this can be costly as royalty and performance fees are expensive.
Other ways to pay are available, like per year or per month. Then, when you have finished the performance contract, you have to ERASE what you made, and it cannot air again (of course, this does not mean you can't keep it for your own portfolio/archive) unless you pay again.

I suggest contacting VALENTINO Records in New York. They have a train effects like those described in the original post.
Plus, when you purchase the discs, you're also getting a lifetime license to use them for public performance, no royalties to pay.
Of course, these are the same sound effects that they have been issuing on albums ("MAJOR" label) they produced since 1960-something, but they're clear and work well. The only train effect they do not have is a railroad crossing, with the signal sounding - either alone or with a train passing - and this, it seems to me, is a more oft than not used effect for things involving trains. The disc contains all kinds of train effects from steam to diesel to subway.

Message-ID: <48f7ld$gdl@vixen.cso.uiuc.edu>
Source record: 28587

<<<<No-school announcements. One of my hot buttons.

Not because, as the previous poster says, they shouldn't be done, but
because they are often so _inefficiently_ done.

---stuff deleted---

Because nearly each and every school is a separate case. The snow's
frequently not bad enough to call off school everywhere, but still bad
enough to delay it by an hour or two. Or it might make officials nervous
enough (read: afraid of accidents and/or the resultant liability suits) to
keep school open but cancel bus transit.

Some schools are closed for the day.

Some are open, but with a one-hour delay.

Some are open, but with a two-hour delay.

Some are open, but with no morning kindergarten.
Some are open, but with no transportation.

So each separate case takes many more words to say, and the list takes
forever to wade through.

My humble proposal:

Further sort the lists.

---stuff deleted---

Every 10-15 names or so the announcer could reiterate that "these are the
schools that are open but with a two-hour delay", or whatever the category
of the moment was, but even with that the time savings would be ENORMOUS
over current practice.

John>>>>

John--

People only hear what they want to hear--by sorting the list, people miss the
header 'schools with one hour delays'. In the case you mentioned, people
listen for their school name, then tune in on the information.
As long as there's extra people in to service the phones, you just have to
grin & bear it.

Having dealt with them for a number of years, my attitude is you can't read
them enough--it's what's happening and what people want. After all, we're
here to serve the listeners, right???

# 3038. Re: Is Talk Radio In Trouble?

>ticket to winning is to load up on the Rush wannabes. Even Rush is having
>a hard time being Rush these days, why would anyone want to do a radio
>show that goes on and parrots him in "me too" fashion?

My vote (and I confess up-front to still believing in the Fairness Doctrine)
for Best New Talk Show goes to Al Wisk, WBAP-AM, Dallas-Ft. Worth,
820 clear-channel, which puts him into most of the USofA 8p-12M, CST,
Monday through Friday.

I learn from listening; Al's extremely well-versed, prepared, he's also a
practicing attorney, but I've never heard him mention it. He treats all
guests and callers with respect, after all, they're his guests. At one time
Al did play-by-play for the Dallas Cowboys, LA Rams, California Angels,
Kansas City Chiefs, etc. He's more of a "Charlie Rose" type ... and is a
great asset for those of us who couldn't care less about the sex of Roseanne's
new baby, or who'll get laid on Melrose Place.

Hopefully, there's enough of us who still think radio should challenge and
inform ... to keep him on the air.

TR>Talk is only in trouble as talk is no longer talk. It is listen. That
TR>is the only problem. Personalities presenting the programs have become
TR>bigger than the program and it is the program of talk that drew in the
TR>listeners as they could talk now all they can do is listen.

If Talk is in trouble, it's the kind of trouble I love to be in. It's gradually overtaking Country as the industry's #1 format. What you're seeing is political talk beginning to burn because of it's one-note nature. If a station carries the "usual suspects" they'll have hour after hour of conservative "angry white male" radio. After the sixth or seventh hour of it, it gets very old.

# 3041. New England Radio Watcher: The Dial Gets Crowded

Newsgroup: rec.radio.broadcasting
Date: 1995-11-16 00:00:00 UTC
From: fybush@world.std.com
Message-ID: <48f7kj$gc3@vixen.cso.uiuc.edu>
Source record: 28591

*As discussed in this space earlier, WKOX in Framingham MA has now formally filed with the FCC for a power upgrade and daytime site change. As expected, WKOX is proposing to use the WNTN (1550, 10kw ND-D) tower on Rumford Ave. in Newton (Broadcasting and Cable mistakenly called it "River Street") for its daytime operation, with 50kw ND. Newton is about halfway between Framingham and downtown Boston -- about ten miles to each. 50kw will give WKOX a nice strong signal over all of metro Boston from there. For night operation, WKOX would add a third tower at its Mt. Wayte Ave. site in Framingham, and increase from 1kw to 50kw, VERY directional to null WOAI, CFGO, etc. Rumor has it that WKOX will soon be sold by Fairbanks Broadcasting to Salem Communications (WEZE 1260 in Boston), which would replace WKOX's new news-talk format with religion. Just what I always wanted -- 50kw of religion blasting at me from about a mile away all day...

*Broadcasting and Cable made another error as well: New Hampshire Public Radio is indeed applying for a new station in Nashua NH, but not on "89.3". A check of the FCC records shows the application as being for 88.3, 5000w h/v @ 21 m AAT, with a directional antenna nulling to the south (towards adjacent-channel WMBR 88.1 in Cambridge). The last 88.3 CP in Nashua expired earlier this year...it had been for a religious operation. As noted last month, NHPR's plan is to make the existing station, WEVO 89.1 Concord, news and talk, and move the classical music to the new outlet.

*More applications in Nashua....the infamous Calvary Church of Twin Falls Idaho thinks someone in Nashua wants to hear a translator of KAWZ-FM. Actually, from the dozens of translator applications KAWZ files each month, it appears they think _everyone_ in America wants to hear KAWZ. Anyway, they've applied for a few watts on 91.9 in Nashua. Wonder how the folks at WNHQ in nearby Peterborough NH on 92.1 feel about that? (And yes, WNHQ markets to the Nashua area...)

*A new CP in Boston: modern-rocker WFNX 101.7 Lynn has been granted its application for a 3-watt translator on Boston's John Hancock Tower. The 101.3 translator will be called W267AI, and should fill in some of WFNX's signal problems in the parts of Boston where their target audience of college students live. No word on when it will make it to the airwaves.

*A long-dark AM could make it back to the air soon. WCMX in Leominster MA, a little daytimer on 1000, has been off

the air for several years now. It was recently sold to a church group (not the KAWZ guys, thankfully!), and its old tower has now been removed so that a new tower and ground system can be installed. WCMX's return will mean two of the three AM stations in the Fitchburg/Leominster area will have gone religious (the other being WFGL 960 in Fitchburg, and the lone secular holdout being WEIM 1280 in Fitchburg.)

*Speaking of Fitchburg, WEIM's afternoon news anchor, Larry Wolpe, has left the station for a new job producing at WBNG-TV 12 in Binghamton NY. It's an even trade; another WBNG producer, Chuck Tanowitz, recently came to Boston to become a writer at WHDH-TV 7. Oops...off-topic again...

*And some late-breaking news from Southern New England: Liberty Broadcasting has been sold to Robert F.X. Sillerman's SFX Broadcasting, which is in turn spinning off Liberty's New England operations to Multi-Market Broadcasting (isn't that Cousin Brucie's company?) The stations involved are WHJJ (920; news-talk), WHJY (94.1; AOR), and WSNE (93.3; ac) in the Providence market and WPOP (1410; news-talk), WMRQ (104.1; modern rock), and WHCN (105.9; AOR) in the Hartford market, along with WTRY/WPYX/WGNA AM-FM in the Albany market and a station in Richmond VA. SFX keeps Liberty's stations in the Washington DC area (WHFS, WXTR/WXVR, WQSI) and on Long Island (WBAB/WHFM, WGBB, WBLI).

>> night [In Weather Terms] How farr can a 50,000 watt AM station travel?

Well, down here in New Zealand, I listen to 50kW US stations on a nightly basis. They are generally a pain in the arse, as they usually swamp out the lower power Latin American stations that I'm after :^)

As far as distance the signal can travel, my furthest reception was in 1986 (or thereabouts) when I heard Radio Albania 1215kHz 250kW LONGPATH at 3.15pm local NZ time. Over half way around the world. Not bad for mediumwave!

Get yourself a loop and a decent receiver, and you'll be able to pick up plenty more stations and thus not be restricted to the programming of your locals!
Cheers,

Andy

# 3044. Re: The Drake Format

Newsgroup: rec.radio.broadcasting
Date: 1995-11-16 00:00:00 UTC
From: talk1370@aol.com
Message-ID: <48f7kp$gcb@vixen.cso.uiuc.edu>
Source record: 28594

"the wonder and excitement of the top 40 wars..."
IMHO, the Drake influence on top 40 may not have given it life, but hastened the format's decline. Not because the idea of tightening up on self-indulgent personalities and picking up the tempo of a station's overall sound was a bad idea...but because a lot of the Drake-consulted stations took a good idea too far, in some cases because of laziness, in many more cases because doing it right means hiring more expensive personalities and music programmers with more skill, at higher pay.
A lot of good top 40 stations managed to borrow/steal the best of the Drake concept, but left their personalities and music directors enough room to improvise and experiment (WLS and WKBW come to mind in the 60s, 70s and into the 80s). But eventually even their management got the idea that taking research to the extreme, and making the "personalities" essentially interchangeable liner-readers while playing the music their consultants and computers thought we wanted to hear, would hold the audience and save them money at the same time.
So gradually, market by market, they took the Drake concept to the max, and killed top 40/CHR on both AM and FM in the process. It needs both pacing and personality to work properly. These days a typical CHR station (where you can still find one that hasn't turned into a hot AC) has frenetic pacing, but no heart and soul, and predictable music mixes that any monkey pointing randomly at the back page of Radio & Records can dupplicate. There are no new Dan Ingrams or Larry Lujacks or Joey Reynoldses emerging from CHR. The personality action these days, and the formats attracting the best people, are formats like talk, AOR and modern country. It's no accident that these formats are all doing better than CHR these days...

Bob Smith, middays WXXI-AM 1370 Rochester NY

## 3045. 1280kHz in Spanish?

>> As a result, it may be more accurate to say the Royals have helped the station during games but there may not be as much (if any) carryover to other parts of the day.<<

Interesting observation since during the 1970's someone in Kansas City was a strong proponent of the "Theorem of Recycled Listeners." (i.e.: listeners going to sleep after a night game ended would be more likely to turn the radio on at the same dial location increasing morning drive time share.) Perhaps the theory isn't backed by reality.

## 3049. Liberty Broadcasting Sale

Newsgroup: rec.radio.broadcasting
Date: 1995-11-18 00:00:00 UTC
From: rayj@li.net
Message-ID: <48kabc$794@vixen.cso.uiuc.edu>
Source record: 28500

I don't read up too much on the business aspect of all this, but my current employer, WBLI, as well as WBAB on Long Island, have been sold along with other Liberty stations to SFX Broadcasting. I don't have all the details in front of me at this time, but I understand some of Liberty's stations will go to SFX, others to Multi Meadia Broadcasting. All this won't be finalized until June at the earliest, so I've been told.

# 3050. Is The Media Responsible For Crime Growth?

Newsgroup: rec.radio.broadcasting
Date: 1995-11-18 00:00:00 UTC
From: robert573@dallas.email.net
Message-ID: <48kabd$795@vixen.cso.uiuc.edu>
Source record: 28501

More and more it seems that the wave of crime washes over
this great land of ours. It is sickening to those of us
who love this country, to see foolish acts of crime.

Today I could have lost my father and many parents could have
lost their children because of arson caused by a juvenile.
Basically my father was driving his usual bus route from a high
school to his various stops to drop off students. Well today,
one of those students, set fire to his bus.

As of this writing, there are no serious injury
reports, except for the totaled bus. I wonder how
the taxpayers feel about that.

I also wonder what the parents would say when they found out it
was their teenage child who set the fire. I wonder
if they care? I also wonder if they are at fault
for not giving their child the attention and basic values
needed as a child.

Most off all, I wonder if it is fair to say that the media could
be held semi-accountable for the rapid growth of crime? Does
reporting of such cases in the news fuel further acts?

Furthermore, is there anything that we as broadcasters
need to do or at least consider doing, to help put and
end to sensless acts of crime and vandelism?

What is your station in your hometown doing to help reduce
the rate of crime in your city? Do you host talk shows
for the purpose of allowing the community to call in and
offer ideas on ceasing this massive crime wave? If so,
is the show making a positive difference to your city
and community?

This great country of ours is becoming a slave to the
acts of crime. Why are we allowing this to happen? We the
good guys/gals need to get more involved in reclaiming what once
was the most beautiful country on Earth.

I look forward to any and all responses and comments to this
post.

Rob Bass

>

How about set up a station internet page with the info on it.
Anyone who knows two cents worth of HTML can write the names of all the
schools in the district one time and from day to day copy the appropriate
three or four words next to the schools names. No muss, no fuss.

While your at it, put your stations audio on your web page too. (Duh!)

Just a thought.

I don't know why we even use the term CLER CHANNEL
anymore...it is non-existant. The FCC now only protects
stations for a 750 mile radius WHY? So more stations can
serve their LOCAl communities. Yes, it's sad that so many

stations run satellite or network programming...but the big 50k stations are no longer meant to serve half the country. KDKA is the first clear channel and we DO NOT program for anyone other than western PA. I like many others love to pick up stations from all over...but that's a LUXURY not a priviledge.

"The sound of radios tuning away from 980..." Were there any
left tuned to 980 to begin with?
Seriously, Walt Sabo has helped a lot of stations, but that
Kato Kaelin experiment has turned totally sour, and Kaelin is
reported on his way out after 4 months on the air. Oh well, you
can't win 'em all...
Also, moving a gossip-hound into 'RC's late morning, which
used to be the turf of issue-mongers like Mark Davis, doesn't
seem to be in synch with the market---we're talking about the
most government-centered, issue-driven market in the entire
country. I've worked that shift myself as a fill-in; my impression
is that the callers you get (and the listeners you're likely to
reach) are upscale bureaucrats and professional types who
seem a lot more interested in things like minimum wage laws
and fiscal policy than they do in Madonna's latest toy boy. This
sounds like the kind of schedule that would work best in LA...
not DC.

"...political talk (is) beginning to burn because of its one-note nature...hour after hour of conservative 'angry white male' radio. After the sixth or seventh hour of it, it gets very old."
Rich is definitely on to something here. There are two ways to get around it. One, is to throw a lot of non-political talk into the mix, on financial and how-to topics, entertainment, relationships, etc. Rich's employer WOR has had some success with that approach, so has WWDB in Philadelphia. Another, is to mix up the political slant on the station schedule, featuring hosts who reflect a broad range of viewpoints. KGO in San Francisco has been #1 12+ since God was young, and its Los Angeles sister KABC has been the most lucrative and profitable single station in America for 30 years, by going the balanced route.
There's a lesson in this. If you want to prosper long term, don't become Radio Newt. Stations that went this way did OK for a while (though they always billed less advertising than their ratings would normally generate, because advertisers didn't want to get stuck with a partisan label). Now comes the reckoning...

Hoeffel wrote the quoted material below:

" To be honest, I've never understood this. Parts of the Arbitron-defined
" San Francisco metro are over 50 miles from town. That's why the big 50K
" AMs always dominate there. They're the only signals that can cover all of
" that real estate.

I think your answer is right there. The big 50kw stations are (for the
most part owned by big owners. In the SF Bay Area, KNBR is owned by
Susquehanna, KCBS by CBS, KGO by ABC, etc. Same with the powerhouse FMs.
These guys buy *lots* of ratings books. Meanwhile, the small mom-n-pop
radio stations in Livermore, Petaluma, and San Francisco may not even
be able to afford to buy the Arbs at all.

From: talk1370@aol.com
Message-ID: <48kabn$79i@vixen.cso.uiuc.edu>
Source record: 28512

Hi Bernie...and all interested...
If the Spanish programming you're hearing on 1280 in Toronto
is largely talk, that has to be WADO out of New York City, which
serves the large Puerto Rican and Central American communities
in the NYC area. It's been running 5,000 watts day and night, but
has a CP to boost to 50,000 with a more sharply directional pat-
tern. I don't know if the 50 KW transmitter is on line yet.
There are other stations on 1280 closer to Toronto, but all
of them (to my knowledge) are English-language, and most of them
(including one in Rochester) are sharply directional with patterns
that would make nighttime reception in Toronto VERY unlikely.
Hope that helps...

>> 1190 in Atlanta? (WGKA?)

Yes, it's 10K D with 2500 critical hours. Being in an area where there is virtually NO ground conductivity, with the 2500 watts the signal becomes a mess after 10 miles. Now you can hear it for a longer distance than that, however if you are listening to the classical music, especially in AM stereo, just forget it other than that. 1000 watts night might afford them a FEW miles lets say 5 before you hear skywave and the other stuff. With 10K day the signal was getting noisy at 20 miles.

>It would also not surprise me if KEX Portland, the other clear-channel
>partner on 1190, applied to open up its nighttime pattern, especially if
>WOWO is pulling its signal towards them in even more.

One more bullet or coffin nail to 1190....1190 is going to end up sounding like 1150, or down here in the south unuseable at night 1070. When WHYZ in Greenville got 1000 watts at night DA (50 K D DA) you could actually hear it for about 5 miles and GEE the transmitter site was about 10 from downtown.

# 3065. New England Radio Watcher: Westinghouse/CBS

Newsgroup: rec.radio.broadcasting
Date: 1995-11-18 00:00:00 UTC
From: fybush@world.std.com
Message-ID: <48kaat$78e@vixen.cso.uiuc.edu>
Source record: 28516

*As expected, the CBS shareholders voted overwhelmingly (99.5% yes) to approve the $5+ billion purchase by Westinghouse. The only remaining hurdle is FCC approval of the transfer of the CBS broadcast licenses...and THAT will have to wait for the FCC to reopen. The New England implications come here in Boston, where Westinghouse will add CBS's WODS-FM ("Oldies 103") to its WBZ(AM) and WBZ-TV. Additionally, Westinghouse will get CBS's newly-purchased WPRI-TV Providence RI, and I believe a minor waiver will be needed because of the overlap between WBZ-TV and WPRI-TV. The most immediate consequence of the transaction will be the disappearance of the "Group W" name after four decades. The entire group of 39 radio stations and more than a dozen TVs will be known as CBS. This is going to take some getting used to... (inevitable disclaimer -- I work for Group W, I mean, CBS, but I do not speak for them).

*A minor correction: The low-power TV in Providence is not officially WRIW(LP), at least not yet. The FCC database still lists it as W23AS. However, the Providence translator of WLNE-TV 6 New Bedford MA is now known as WLNE(LP), from W48AE.

*Misdirected: A few months ago, I mentioned KF2XBF, the low-power FM station on 88.5 at Logan Airport in Boston. I've listened to it a few times, but it took the Boston Globe to alert me to the incorrect directions being given on the travel-information loop that runs continuously. The tape tells drivers to take the "Callahan Tunnel" into Boston - but the Callahan is one-way the other way. The Sumner Tunnel would be correct. KF2XBF is part of the "Avis Traveler's Network," which allegedly runs similar operations in Chicago, New York, Atlanta, and Washington. Does anyone in any of those cities know anything about the frequencies/calls of the stations there?

*Congratulations to all the winners of this year's "Achievement in Radio" awards, handed out this week. WBZ's David Brudnoy won the A.I.R. Lifetime Achievement Award. Other winners included Kiss 108's Matty Siegel as best morning drive personality, Lady D of Jam'n 94.5 (WJMN) for afternoon drive, and WBMX's Joe Cortese for middays.

*A bit less local programming these days on Boston's business station, WBNW 590 (simulcast on WPNW 550 Pawtucket RI), as Jeannine Graf has departed her 1-3 pm "New England

Business" program. Graf says she simply chose not to renew her contract. The program has been replaced by the Dolans from the WOR Network. Also, WBNW's web site at http://www.wbnw.com has been missing.

*And finally, a non-New England question: Why is it that just about every clear-channel AM station in the US claims coverage of "38 states"? Never 39, never 37...always 38 (and sometimes "Canada as well.") Does anyone know where that number first came from, and why we all keep using it? (and which exactly are the 12 states we're not reaching!)

Serving 38 states and Canada...

-=Scott Fybush - fybush@world.std.com=-

# 3067. Ruling the Airwaves

Newsgroup: rec.radio.broadcasting
Date: 1995-11-18 00:00:00 UTC
From: SBK1230@aol.com
Message-ID: <48kaav$78g@vixen.cso.uiuc.edu>
Source record: 28518

Over the past few "Airwaves Journals we have been honored with a few postings from Ron Jacobs of "Boss Radio" fame, a legendary programmer.

All of us who either Enjoy Radio for a living or as a hobby at one time or another have verbally blasted a consultant or management on programming decisions that we thought "Have they lost there marbles or that person couldn't program a FM wireless microphone".

What if you were given a combo or duopoly in a market, How would you program it and why ?

So many of us radio enthusiasts, Mark Roberts, Scott Flybush and Chris Carmichael know there markets better than most GM's or PD's do (Well at least we think so) and how could we believe we could make our radio markets better.

And who knows we might plant a seed and make a difference.

I will start with the recent sale of Alliance stations in the San Francisco Market (KFRC 610AM/99.7FM and KYCY 93.3) Here is a golden opportunity to make a few changes and bring some badly need excitement to the City by the Bay.

The biggest obstacle Infinity will face is KYCY 93.3 if the FCC allows them to keep it, Something special will be necessary to energize it. First drop the Young Country format on 93.3 this is served very well by KSAN 94.9 and KNEW 910 move KFRC-FM from 99.7 to 93.3 and copy the high energy approach to oldies as K-Earth 101 in LA (another Infinity station) and returning KFRC AM-FM to the Drake format with personalities that were popular and successful for many years. The AM could continue the sports programming (Oakland A's Baseball- San Jose Sharks Hockey). At 99.7 suggestions includes Hot A/C KYUU or CHR/Modern Rock "Z100" with Infinity's deep pockets and winning attitude KFRC, Z100 and KOME could rule the Bay !

Lets have some fun, dream and who knows it could happen .

Bud Kress

Why don't you see if the news director can put in a word for you? Also speak to whoever is in charge of cutting checks and explain that the invoice you submit is like a time card. You expect to get paid in two weeks, just as they get a paycheck for their hours. After all, you have your own bills to pay. I had a similar conversation with a client a couple of months ago, and it worked.

Hope that helps!

Julie Barret

## 3070. We want to build a future file...

Kalamazoo & Battle Creek's Own Country, WIN 98.5, is seeking to build a "future file" of tapes and resumes to refer to if and when we have openings for air talent. Please send your tapes and resumes to:

WNWN-FM Radio
Attention: P.J. Lacey
P.O. Box 1600
Coldwater, MI 49036

Once again, we do not have any openings at this time (no phone calls, please), but we would be interested in hearing what's out there. WIN 98.5, part of the Midwest Radio Group, is an equal opportunity employer.

I don't pretend to know anything about the origins of the Drake format, as I was mostly watching on the sidelines at the time, from what were then called "middle-of-the-road" stations where I worked during its heyday.

But I do know that if you want to hear an original Drake jock who still has the magic, check out the Real Don Steele on KRTH, Los Angeles. Those who really want to understand what it was all about should listen carefully and analyze what he does. He's amazing to this day. Every time I go to Los Angeles I end my day with the car radio blasting his show until I lose the signal in the mountains on the way home. The last time I was down there, I heard him do a phone bit with a $1000 contest winner that was the most wonderful 30 seconds of radio I'd heard in 20 years. Not many people can do a promo that literally gives you goosebumps. Who says it's all in the music?

Source record: 28527

Reply-To: trionews@aol.com (TrioNews)

ly just arrived a radio
stations. Why would I say that when music has been scheduled with the
suckers for years?

I have sent a rather small collection of email messages to radio station
owners and program directors in a multi name email that included by resume
seeking if positions were open and
applying for same.

It appears that many of the people on the list have been discussing
amongst themselves (since they have a nice list to do it with) about how
stupid it is for me to apply via email, how silly it is, whether it's even
legal EEO to accept a resume by email and making snide and unusual
comments only true egotistical programmers are capable of.

I am amazed at how far behind radio is. The rest of business is busy
conducting everything from job searches to funding on the internet and
radio is wondering what's happnin.......

I will continue my search for employment in EVERY possible avenue. I can
only imagine what these nay sayers are going to do when mail starts being
delivered on line as a normal everyday thing? Actually if they were in the
scientific community they would already know that.

Oh well.....

FY>Rumor has it that WKOX will soon be sold by Fairbanks Broadcasting
FY>to Salem Communications (WEZE 1260 in Boston), which would replace
FY>WKOX's new news-talk format with religion.

Scott,
I hadn't heard this one. The rumor here is that American Radio
Systems wants to buy it and keep it Talk. That seemed to be the reason
for adding Gene Burns to the schedule. Gene is an expensive (but great)
show that a suburban station couldn't afford unless it had grander
plans.

As a former employee of WKOX (AM & FM), I'd hate to see it go
canned religion.

Rich

>3. Any transcribed conversations you'd like to submit (paraphrasing O.K.)
>
>I'm sure this'll be a thread we can all relate to

Now, I have no proffesional jon in radio or anything. Howver, one day I would like to get into tohe Biz. But, about a month ago me and a friend of mine won a contest to be a guest DJ at WVKS, here in Toledo. During the hour (from 11-Midnight) we got to answer the request line and take requests among other things. Most of the calls were from kids who wanted to hear "Gangsta's Paradise", by Coolio and some other calls were kid who told us High School football scores. Most of the time me and my friend would take the calls off the air and then make fun of the people who called (Even the DJ running the board would join in).

The best call of the night went like this:

Me: Kiss-Fm Hello!!

Girl: You have hung up on me 3 times!

Me: Can you count to 4? ::DIAL TONE::

In reply to Joel Marshall's post:

As a late-night jock, I get a large number of request calls. Some are fun, and some are not so fun - usually from obnoxious drunks that DEMAND that I play their request - and IMMEDIATELY! I'm not a big fan of requests, in that I'm not a jukebox, and will not be until I grow a coin slot on my torso. Plus, my theory is that the listener doesn't really want to hear the song anyway - it's an ego gratification thing: Influence over the disc jockey!

But enough of the whining. Some of the calls I enjoy, and they even make interesting on-air bits. Some are entertaining for the caller's lack of knowledge regarding our format (show me a Classic Rock/AOR station that plays Janet Jackson!!!).

I submitted some material to Joe Mama's "PrepWeb" a week or two ago, concerning things you could say or wish you could say to callers-from-hell. Here are a few replies to the ruder ones (use them at your discretion):

1. Hey, do I call and harass you at McDonald's when you're working?
2. By the way, your (wife, girlfriend) was late picking up the trash this morning!
3. If I wanted any s*** from you, I'd squeeze your head!
4. Just insert a quarter in the slot in the back of your radio, and you'll hear your request up next (barring any electrical shock suffered!)

All kidding aside, obnoxious calls are a pain, but you like them anyway, an indication that somebody is actually out there, listening.

What kinds of people call? They include: little kids, lonely women, drunks, very strange people, and others with way too much time on their hands. Not to put anyone down, but this is what I've noticed. I guess it serves me right - I was one that used to harass the overnight guy at W-Lite in Minneapolis when I was younger, pestering him to play some harder stuff! What comes around goes around... 8-)

Bryan (better than W-Lite) Fitzpatrick
Classic Rock 93KXLP
Mankato, MN

P.S.: On the in-studio TV set, I'm watching Robert DeNiro in "Taxi Driver" on TNT - the epitome of wacko-ness. This while I'm answering some very unusual calls. Coincidence?

# 3081. RE: Gary Dee

I would like to obtain a list of stations that carry Bruce Williams (and their addresses & Program Managers if possible)

I called my local affiliate, and they had no idea.
I called Westwood 1, and they said they wouldn't give me the information. I said, "So you mean I have to go to another city and call around to figure out where/when to catch him?". They said grudgingly, "OK, we'll give you 1 city", then they told me to call a phone number that was disconnected.

What's going on here?

More importantly, can anyone help me?

You can do one of two things:

1. Raise your rate by 30% and then give them a 30% discount if they pay on a timely basis (document this on your invoices).

2. Put the slow-pay stations on your slow-work list. Tell the news people that you'd like to cover something for them, but gee-whiz, you haven't been paid in months....

You can't put up with not getting paid. Radio is well-known for not paying.

Is it possible you made a couple of mistakes?

1) Radio applications usually include a demo tape. Maybe by just sending
e-mail, you're indicating you don't know that much about the business.

But far more importantly,

2) _Nobody_ likes to be treated like a number. And sending the same
letter to a bunch of pds -- with a multi-name address, no less -- clearly
says "I don't care which one of you I work for".

|: I am amazed at how far behind radio is. The rest of business is busy
|: conducting everything from job searches to funding on the internet and
^^^^^^^^
|: radio is wondering what's happnin.......

This wasn't a job search by an employer, it was a random
gee-I-don't-really-care solicitation by an prospective employee.

Any guidance counselor or resume service will tell you to research the
company, and write a personalized cover letter, with each application.

Radio isn't behind. You just don't know how to apply for a job.

From: 107 KIK FM <kikfm@nucleus.com>
Message-ID: <48mrf4$b8b@vixen.cso.uiuc.edu>
Source record: 28541

I am looking for a pai of braodcast limiters for our station here,and
am willing to pay top dollar for the right ones.
the model we are looking for where manufactured by Urei/Teletronix and
came in a variety of models. LA-2,LA-3a,LA-4,1176LN or 1178 LN.
If you can have a look around your radio station or ask your engineer
you may just have a old pair around the place.
Please get back with us if you have any information about the above.

Thanks for your time.

My recollection is that they were a Top 40 station. The "93 KHJ" jingle
even survived its later transition to country format.

Today's report brought to you by "The Farm"...a cruiser...and the letter Z....

****

Historic Kansas City station WHB(AM), which has been languishing in a simulcast arrangement with a rural FM station, has begun to reassert its identity.

WHB had been simulcasting KMZU(FM) from Carrollton, Missouri, except for IDs, weather forecasts, and Saturday-night Spanish-language programming on WHB's regional-coverage signal (10,000 watts days and 5,000 nights at 710 KHz). The stations were known as "Missouri's Farm Voice."

Beginning this week, WHB is running its own programming during morning and afternoon drive times, including traffic and weather information for the Kansas City metropolitan area. WHB is also running its own commercials. Even during the remaining simulcasts with KMZU, WHB and KMZU carry separate commercials.

The separate WHB programming is traditional country music with local announcers, similar to the KMZU format.

WHB has not resumed stereo broadcasting, which was discontinued after Kanza, Inc. bought the station in August, 1993. WHB was Kansas City's Top-40 pioneer, and was one of the stations on which Todd Storz developed his version of the format.

Kanza, Inc. recently dumped another signal in the "Missouri's Farm Voice" empire, KTRX(FM) in Tarkio, Missouri, and continues to simulcast KMZU on KAOL(AM) in Carrollton. WHB and KMZU/KAOL are now collectively known on the air as "The Farm".

****

Another of Kansas City's historic stations, KMBZ(AM), is doing something that's just plain silly.

KMBZ now has reporter Dan Verbeck reporting from a mobile unit, "Cruiser 980", whose audio sounds deliberately distorted and clipped.

In his reports from the scene of fires and wrecks and the like, Verbeck signs off with the outcue: "Cruiser 980....clear."

Why is the station embarassing a fine reporter like Dan Verbeck with this kind of obviously consultant-inspired foolishness? KMBZ has been making substantial progress in rebuilding its news department over the past couple of years. Let's hope this is a short-term lapse and the station will get back to business quickly.

****

From St. Louis....

* Daryl McQuinn at KMJM(FM)/KNJZ(FM)/KATZ(AM) reports KNJZ, which recently flipped to a soul/R&B format, will take the KATZ-FM call letters as soon as the FCC is open for business again. These were the same calls KNJZ had before its year-long fling with "smooth jazz." The station at 100.3 MHz has *always* had one Z in its calls: WOKZ-FM (back when it was based in Alton, Illinois),

WZEN, KATZ-FM, KNJZ.
* AIRWAVES has made the news in the _St. Louis Journalism Review_. Radio columnist Larry Hoffman referred to the Airwaves Radio Journal and provided its Web address in the SJR's November issue, published this week.
****
From the Mid-America Radio Page (http://www.littleblue.com/kcradio/):
* Historical information on Kansas City stations is slowly being revised after research through microfilms of Kansas City newspapers of the 1920s through 1940s. Information on WHB and W9XBY has already been updated; there will be further updates on KMBC (KMBZ) and KCMO in the coming days.
* Work is now underway to incorporate FCC database information into the radio dial pages in at least a semi-automated manner. The purpose is not to duplicate what's already available on other searchable Web pages, including the ones at the AIRWAVES web site, but to provide value-added information for a smaller geographical area. At some point, the structure and appearance of the pages will change as a result, probably during December if all goes well. You know, copious free time and all that....

# 3102. San Diego Radio Watcher: 11.17.95

Newsgroup: rec.radio.broadcasting
Date: 1995-11-19 00:00:00 UTC
From: San Diego Radio Watcher <sdradio@zNet.com>
Message-ID: <48mrek$b7m@vixen.cso.uiuc.edu>
Source record: 28545

Here's the latest in waves from San Diego:

Volume One: One week ago, KUPR [Carlsbad, 95.7] released
the first in a series of CDs at a local music store. Called
"KUPR Collector's Edition, Volume One," the proceeds benefit
San Diego Earth Day. [and it's real good!]

Q-Notes: This week I had the opportunity to met two San Diego radio
personalities: Shotgun Tom Kelly,and Tom Jagger of KCBQ-FM at the broadcast
studios in Santee. Despite the parent company selling KCBQ, they still
put on a very tight, R&R show . . . and get this: they talk up ramps,
have fun -- hey, it's only rock and roll, right!

For those who stumble onto Shotgun Tom, he's always with his trademark
brim hat.

Riddle Me This?: Mr. KFI made the cover of the December issue of the Los
Angeles Radio Guide. It eplains the riddles, and rumors of KFI's favorite
answer man. Hear him on KFI [640 50kw/50kw] weeknights from 9 to midnight.

LA Radio People: Don Barrett has produced a history of over 1,600 LA
based disk-jockeys! It's available now. Info? Write: LA Radio Guide,
PO Box 3680, Santa Monica CA 90408, or 310.828.7530. You can also e.mail
at Benj@radioguide.com

Rumors: Ca$h rich; stations short: Noble president, John Lynch, is
said to be looking at getting another set of stations in the San Diego
market. The Escondido Times-Advocate confirmed that he was in the
running for KCBQ, and offered on a trio of Mexico stations in Tijuana.
So far, no deal, but plenty of rumors as the San Diego market is to change
before the end of the year. Like the following:

I'm told from several insiders at KFMB [including management] that there is
NO TRUTH that the privately-held trio of stations [AM/FM/TV] are on the block.

Two stations that have a "unique" format may have an LMA in the works. Both
are FM . . . [two sources independent of each other][if this happens,
SD listeners would have a pleasent surprise!]

KiFM was reportedly in the deal with a San Francisco area firm, but that
deal broke off a the last moment. Apparently KiFM's jazz format is safe
for the time being.

Spotlight: check out KFMB's afternoon talkshow host and his
crew: http://www.geopages.com/RodeoDrive/1102/spike.html
Taylor, is part one of the three-punch of great talk on KFMB.
[two is Ted Leitner, and three the Burger & Prescott "dining and dancing"

escapade.]
This will be the start of a series of monthly spotlights on
radio stations in the southern California area.

Music Gem: Sunday's I like to grab the local fish-wrap and see what else
Washington is fighting about. To offset the pain of budgets, and other
crimes, I tune to KiFM's Larry Himmel. He hosts the morning Sunday Champagne
Jazz. When he was filling in on KFMB last month, he said that he gets to pick
out the selections. check it out on Sunday on KiFM, [98.1 San Diego]

Chris Carmichael | We only have ourselves to blame for the mess in Washington.
San Diego | Voters continue to elect the same "business as usual"
Radio Watcher | political vermon.

From: shearman@io.org
Message-ID: <48mrep$b7s@vixen.cso.uiuc.edu>
Source record: 28547

CBL 740 AM in Toronto announced Thursday during the PM drive time show that "reception would be poorer for a while because we are repairing the main transmitter and we are using the standby transmitter."

No date given for return to full power on the transmitter located at Hornby, Ont at the junction of the 401 and Trafalger Road, west of Toronto.

I have noticed much more fading on 740 as I drive aroundthe eastern part of Toronto.

This does NOT affect any of the FM repeater transmitters CBC rebroadcasts on in Southern Ontario.

>that way.

CHML has been 50 kW for many years now, both night and day.
At one time they were 5 kW but that is a long time ago now
(1970's?). In fact all three Hamilton AM stations (CKOC and
CHAM are now 50kW, however CHAM drops its power at night to
10kW I believe . In spite of the power drop, at times CHAM
is heard out here in Alberta. I have never heard CKOC or
CHML in ALberta.

Bad news, good news

Liz, we hardly knew ya.....

After only eight months in Chicago, Liz Wilde and entertaining talker WLUP-FM have decided to continue live on separate paths. Liz, who rode into town with a reputation for being a female "shock jock" from Boston's WAAF-FM, never really caught on in Chicago. Liz placed a disappointing 24th in her timeslot with a 1.2 share. The split was reportedly amicable. Look for Liz to reappear in the East (perhaps New York) where she will pursue a morning slot.

Replacing Liz in the evening timeslot at WLUP-FM will be Wendy Snyder and Bill Leff. Wendy and Bill had been handling the overnight shift at the station. Although a permanent replacement for the graveyard shift has not been named, long time Chicago radio personality "Chicago" Eddie Schwartz is filling in on a temporary basis.

Departures.....

Doug Bensing, producer of the Steve Dahl and Bruce Wolf program mornings on WMVP-AM, parted ways with the morning show. Doug, who had been with Steve and Bruce since May of 1994 had formerly worked at WJJD-AM and oldies WJMK-FM as director of promotions.

Lisa Rosengard, director of marketing at soft rock WPNT-FM, has left the station to join Ameritech to work on an interactive cable television project.

Promotions and additions.....

As expected, urban contemporary WGCI-FM has named Howard McGee as their afternoon host to replace Doug Banks. Doug will be syndicating a show for Capital Cities/ABC starting in January of 1996.

Jaime Kartak, currently Program Director at Denver's KHIH-FM joins soft rock WTMX-FM as assistant program director. Jaime replaces Brian Kelly who moved to Milwaukee earlier this year as a Program Director.

Also at WTMX, traffic reporter Andi Kuhn adds weekend jock to the resume.

Syndicated talk show "Ask the Handyman" featuring Glenn Haege has been added Saturdays from 12-3 on hot talk WJJD-AM.

In a recent interview, the aforementioned Doug Banks noted that he expects to be joined by current rapper WEJM-FM morning host A.J. Parker on his syndicated show.

By the way, during the last radio watch, I mistakenly referred to A.J. as "he". A.J. was the female half of the WEJM morning team. Sorry about the mixup.

Sad note.....

Former Chicago radio personality Gary Dee, most recently mornings on country WUSN-FM passed away in Cleveland. Gary, who was known for his opinionated program, died of heart failure.

Joe Bonk
JJB92@aol.com

[Moderator's Note: I have it on good authority that WLS AM and FM will split off as soon as this week. The FM will play Christmas Music until the new format is in place. Most observers expect Country or Urban as the new FM Format. Sorry I can identify my source. Bill]

# 3108. DOCKET 80/90 APPLICATION PROCEDURES

Newsgroup: rec.radio.broadcasting
Date: 1995-11-20 00:00:00 UTC
From: ssimon9@ix.netcom.com
Message-ID: <48p8j9$89j@vixen.cso.uiuc.edu>
Source record: 28458

I hope several of you will e-mail me with up-to-date information and/or experiences with Docket 80/90 applications you have made, or witnessed, since 1990.

That's the last time I made such an application, and I am wondering if any of the rules, regulations, or procedures have changed.

*By the way, in case you are wondering why I haven't contacted the MMB at the Commission, it's closed -- non-essential! Although we have had our complaints about the Commission over the years, what would have stopped someone from firing up a pirate station, or someone just plain wanted to obliterate any rule they so choose????

Here are some questions:

Is there a fee for a 301 application?

What is the application "window" period for people to apply and compete?

Here's a tricky one: If a Docket 80/90 has already been granted a construction permit for a non-commercial operation even though it is in the commercial band (92.1-107.9), and the CP expires, does an applicant need to file a special application for a commercial operation? (I wish non-commercial applications would stay under 92.1 so that the rest of us can have it a little easier)

If two Class A channels are nine miles apart, and one licensee holds both permits, does that licensee still have to maintain studios in both communities?(this pertains to the studio in the city-grade signal rule, and for Class A, the 3.16/mv/m contour is 8 miles)

Any and all help is appreciated!

# 3109. Need Help with Bruce Williams

>I would like to obtain a list of stations that carry Bruce Williams
>(and their addresses & Program Managers if possible)
>
>I called my local affiliate, and they had no idea.
>I called Westwood 1, and they said they wouldn't give me the
>information. I said, "So you mean I have to go to another city and
>call around to figure out where/when to catch him?". They said
>grudgingly, "OK, we'll give you 1 city", then they told me to call a
>phone number that was disconnected.
>
>What's going on here?
>
>More importantly, can anyone help me?

There are those who opine Bruce's affiliate list has been getting a bit thin of late due to flagging ratings although he was able to add WMAL in Washington recently when WWRC dropped him.

WONE may be tightlipped on the affiliate list lest someone try to document whatever stations have been lost.

Your best best is to write Bruce and tell him of your troubles in finding where to hear his show. I'm sure he'll be quite interested in your story and will deal with the problem just as soon as his blood pressure returns to normal.

Lee,

What kind of job are you applying for? If you're looking for an on-air job, why would they care about your resume, unless you have also sent an aircheck or demo tape?

E-mail is a great medium and the GM's and PD's are using it more and more, but if you're looking for a job, they still will need to hear your tape. Your resume is only going to be looked at if your tape is good.

Secondly, you probably wouldn't send a resume by mail with a list of all the stations to which it was sent. Why send a mass e-mailing? You're attempting to market yourself to an individual when you apply for a job, not to a group. Sending to a list where the people receiving your message see all the other to whom it was sent detracts from your worth in their eye. It would in mine.

Compose individual cover letters for each station to which you wish to apply. Include a professional looking resume and a current demo tape or aircheck. The get on the phone and call the person to whom it was sent and ask if they have received it.

It might not be 21st century technology, but if you want the job, that's the way to go about it.

Good luck with your job search.

Best,
John Lovell, Radio Broadcasting Instructor
Dade County Public Schools, Adult and Continuing Ed. Dept.

# 3116. Re: Liberty Broadcasting Sale

Newsgroup: rec.radio.broadcasting
Date: 1995-11-20 00:00:00 UTC
From: Tom Taylor <totaylor@delphi.com>
Message-ID: <48p8jj$89s@vixen.cso.uiuc.edu>
Source record: 28466

Short version: The medium-market stations of Liberty -- Richmond, Albany, Hartford, for example -- go into Multi-Market. SFX -- which already owns stuff in bigger markets like Houston and San Diego, will keep Baltimore/Washington stations like WHFS and t
he Long Island properties. SFX principal Robert F.X. Sillerman is described by SFX as a principal investor in and advisor to Multi-Market -- but he's not an office of Multi-Market. The front end of the deal -- Liberty to SFX -- is worth $223.25 million.
The hand-off to Multi-Market is valued at $100.1 million. Tom Taylor/Inside Radio

From: wa2ise@netcom.com
Message-ID: <48p8jn$8a0@vixen.cso.uiuc.edu>
Source record: 28469

I have an old Tektronix oscilloscope I would like to GIVE AWAY for FREE to any person or station that would like to have it. It comes with a scope cart, 20 or so input signal plug-in units, it has a 5 inch CRT, worked last time I fired it up a few months ago. You need to come to my home in northeast NJ and pick it up (Oradell, NJ, exit 165 off the Garden State Parkway).

I figure that some starving AM or student campus station could use this for troubleshooting their audio and RF equipment. Fix rather than replace, save some money. Figure that near New York City someone could borrow a van and take it off my hands. Probably too expensive to ship, you'd have to pay it.

I need the space this stuff is occupying, and would rather give it to someone who can use it rather than just throwing it out.

>>I'm looking for:
>>1. The types of wackos you've got calling,

I always get a kick out of the ones who are clearly surfing the phonebook...
calling every station in town in the hopes that one will play their request.
I work at a duopoly...semi-live Hot AC, automated AOR. Often we'll get a
call on one station's request line for a particular song (often something
like YMCA or something), and 5 min later the same person (not always a kid,
either) would be calling on the other station's line with the same request,
not knowing we're the same station. Or the people who request a song you
actually play, you play the song, then they call back 1/2 hr later & chew
you out for not playing it....turns out they were listening to another station
anyway!

OTOH, you get just enough pleasant callers, who actually listen and ask for
appropriate songs to balance things out somewhat.

Steve

Oh, I don't know about that.

We've done very well with a pretty political 6a-6p...the difference is that most of our programming is
local so no matter how conservative we are, we are local and we talk about local issues as well as the
bozos within the beltway...I think the formula is the same as it has always been...take care of your
market and it will take care of you.

*CKEY(101.1,modern rock,Niagara Falls,ON;FM 101 The Planet)seemingly can't find anyone to do AM drive. The latest casuality is Canadian radio vet Scruff Connors.
A Canadian Press story picked up in the Hamilton Spectator last week reported that Connors "was on the phone one morning with his parents,and he totally lost it."(However,it didn't say if he was on the air or not.) His parents called police,who found Connors in a state of mental breakdown. Scruff said it was stress-related,saying that CKEY was "repressing" his usual on-air antics. CKEY hasn't yet commented on the matter,or confirmed that Connors had left. Scruff,however,released a statement from his hospital bed and doesn't seem to anxious to return.(Sean Healy(the Hamilton R-W correspondent)told me that it seemed like he was trying to get out of his contract;however,someone else on the Niagara radio scene said he was in the hospital 1-2 weeks ago,and wouldn't return to 'KEY.)
Local comedian Airborne Eddy(who also can be seen on WKBW(ch.7)'s Saturday night Off-Beat Cinema)is taking over AM drive for the time being.

*Dan Stark,production director at CKTB/CHTZ(610,full service;97.7,AOR; 97.7 HTZ FM)has left for Windsor,Ontario-where he now works for CHUM Ltd.'s 4 stations(CIMX,88.7,modern rock;89X/CIDR,93.9,AAA;The River/CKLW,800,full service and CKWW,580,big band/sports). Taking over for him is Todd Ouellette, who had the same postion at CKEY.(Hopefully,Todd can get a full-fledged Web site going at HTZ that's as good as the Planet's.)

*From Joel Denver's All Access web site(www.allaccess.com):Wally McCarthy, ex-PD of Utica's WKDY(CHR;Kiss 102),is heading to Park Communications' WHEN-AM/FM(620,news/talk/sports;Talkradio 620/107.9,new country;Hit Country 108)as its operations manager.

Happy Thanksgiving,all! TTYL...

Actually I remember Bob Crane working for a small station in
Bridgeport Conn. in the early 1950's. The station was on
600KHz and was clearly audible on the south shore of Long
Island. He had a very funny show. He was capable of
inserting sound effects very tightly into his chatter. I
have heard that he did this by using tightly cued sound
effects records.

I specifically remember his reviews of new records. He
would have a chicken cackling followed by a plunk to
represent eggs dropping. The worse the record, the more
eggs the chicken laid. It was really funnier than this
sounds. Or maybe my high school sense of humor was very
tolerant. Or maybe you had to be there.

Hello, I would be very interested to get the name of radios,
the times tables and frequencies of any broadcasting of classical
music on the shorwaves.

********** End of Forwarded Message **********

HCJB carries two classical music program per week. "Classical
Favorites" is broadcast every Monday at the following times: 10:00 UTC
to the South Pacific on 5900, 18:30 UTC to Europe on 15490 (this
frequency will change to 15540 this coming Sunday), and 2:30 and 6:30
(Tuesday UTC) on 9745 to the Americas.
We also broadcast "Inspirational Classics" which features sacred
classical music every Thursday at 10:30 UTC to the South Pacific, 18:30
UTC to Europe, and 2:30 and 6:30 UTC (Friday UTC) to the Americas.
"Classical Favorites" is produced in our British studios, while
"Inspirational Classics" is produced in our New Zealand studios.
Also listen for a complete broadcast of "The Messiah" by G. F.
Handal on Christmas morning beginning at 12:00 UTC.

Message-ID: <4918nr$2gc@vixen.cso.uiuc.edu>
Source record: 28403

Yes, WLIX/WLUX is only 250 watts; because of its low dial position
(and coastal location) that's all it needs.

There's an inverse coverage factor on the AM band - the lower the dial
position the greater the coverage for the same power.

In a compuserve discussion of the troubles WRAN-1510 Dover NJ had despite
its 10,000 watts, someone mentioned an existing chart that describes
power/frequency/coverage considerations, the chart showing that the
coverage achieved by a station on 1510 with 10,000 watts
could be accomplished by a station on 550 with just 180 watts.

This all makes me wonder WHY the AM band IS where it is, since stations
at the high end have such a disadvantage. Is it perhaps because the
original stations were at, for some reason, 360 meters which roughly
translates to 833 khz, and when more stations came on, whatever government
regulatory authority that was in place at the time just decided to
allocate more wavelengths/frequencies
above and below 360/830...without finding out the gross disadvantages
of placing at new station at 1500 rather than 550?

Source record: 28405

It would be interersting (& perhaps useful) to get into e-mail contact with other users/maintainers of the new Crown "AirForce" product family. It's a direct descendant of the Audisk. Tim Valley (original designer/programmer of the Audisk) has an arrangement with Crown whereby he is designing and programming the AirForce which is Crown logo-ed.

We were involved in the installation of a "private" AirForce network transmitting from San Jose a year and a half ago, and are now working with KMBY (Monterey/Salinas/Santa Cruz market) which is an affiliate of RADIO ONE, formerly Rocky Mountain Radio, out of Avon, Colorado.

An initial topic of considerable interest to us is networking the AirPort unit (out end, if you will) with live-assist workstations a'la' the Audisk.

: including broadcasting and print. Look for it in the archives under
: the FAX directory. Bill]

I don't know how many stations are like us, but we do not give out the fax number for anything that isn;t going to make us money. Press Releases, PSAs and the like are all free publicity and to expect us to spend that $.05 per page to print their information so we can give them between $30 and $300 worth of free commercial (publicity) time is pretty rude, IMHO.
Besides, it does tend to run ALL DAY LONG when everyone and their mother is trying to send you the latest news on how their product has been packaged new so that it is now less nutritious to eat the box than the product.

Spend the money and mail it, Radio isn't a charity institution.

# 3143. Re: NEED STATION FAX NUMBERS!

Newsgroup: rec.radio.broadcasting
Date: 1995-11-23 00:00:00 UTC
From: wdp@airwaves.com
Message-ID: <4918ne$2fs@vixen.cso.uiuc.edu>
Source record: 28409

} I don't know how many stations are like us, but we do not give out the fax
} number for anything that isn;t going to make us money. Press Releases, PSAs
} and the like are all free publicity and to expect us to spend that $.05 per
} page to print their information so we can give them between $30 and $300
} worth of free commercial (publicity) time is pretty rude, IMHO.
}
} Spend the money and mail it, Radio isn't a charity institution.

Why hasn't someone created a 'smart fax' that stores all the faxes on a
hard drive to be reviewed and/or printed (like email) at will? The
idea of having to hard-copy every single incoming message seems
draconian.

Sure you can use a PC, but most people don't have a spare PC to
dedicate to it. Why not a dedicated FAX machine with a screen and
keyboard that caches everything and lets you (or even those on your
LAN) retrieve and print at will?

Seems like that would not require too much. Monochrome screen, simple
processor, hard disk...

If anyone develops this idea I want a piece of it. :-)

Another good idea.... 1-900 number for press-releases. They pay a
buck a minute for connection and you, in return, promise to actually
look over their release rather than toss it in the trash with a curse
for wasting your paper and time..

Bill (I got lotsa ideas, I'm just not in charge!) Pfeiffer

In September, 1972 I was visiting Los Angeles for a few days and I had my listening plans all mapped out before I got there. At six I would listen to Robert W. Morgan on KHJ, then after an hour flip to KGBS for Hudson and Landry, and then to KMPC for an hour for (I thought) Dick Whittinghill. When I flipped to KMPC there was Bob Crane, doing the 'back to school special' as he filled in for Whitt. He was absolutely wonderful. Off the Wall. He had this running thing where he'd play a clip of Spike Jones song "Chloe". It would pop up at the strangest times. I would love to have heard him when he was in his heyday at KNX.
Nonetheless it was a thrill to get to hear him. It was one of those classic hours of radio you just happen upon by chance.

Source record: 28485

>Of course this is the digital era, and if there is a digital system that will continuously log to ONE tape >for 12 or even 24 hours, I would love to see it and hear it.

We have been using the Eventide VR240 digital loggers for the past 21/2 years with good success. These replaced an old Stancil r to r unit.

The media used is DAT. Logging (recording) two production studios, on air studio, and on air signal, a 90 minute DAT will last a couple of days ( depending on how busy the production studios are). Audio is first loaded into a buffer, then dumped onto the tape. The buffer does not dump to tape until it is full. Therefore, if little is going on in the monitored venues, the buffer takes longer to fill, and likewise the DAT will need to be changed less often. Audio is multiplexed onto one track.

If you are just recording one source (i.e. on air studio 24 hrs/day), it is possible to record an entire weeks worth of material on one tape.

Audio quality is determined by user selected sample rate. Worst case is slightly better than 3k, best out to 8k. However, higher sample rates mean faster tape usage. Being in the digital domain, wow and flutter are, for all practical purposes, non-existent.

I have no connection with Eventide. Just a satisfied user.

No kidding....There used to be two girls that would persistently call the WITR request line. Station folklore had it that one of them was in a mental institution. Anyway, the alleged wacko called the station one day, and I had the misfortune of answering the phone. She desperately tried to arrange a date, and I said, "No. I'm already interested in someone else."
She replied, "WELL, SHE'S A WHORE!!" and hung up. I've also heard that the Church of the SubGenious program tends to attract its fair share of folks with loose screws. Of course, we can't forget the lovable jokers who call up college station request lines and ask for classic rock tunes!!

How about the kids that call my public radio station with a news/classical/Jazz format and ask for Baby's Got Back or Cherry Pie. I love those. Sometimes we tell them that it's coming up next...keep listening. Yes, it's rude, but a lot of fun too.

Here's a transcript of the very first day of my internship, answering phones at Y100 in Philly, one year ago:

ME:Hi! Y-100!

10-YEAR-OLD KID: I wanna hear "Shine" by Collective Soul!

ME: Alright! We'll try and play it for you real soon, OK?

10-YEAR-OLD KID: You better play it next!!

ME: OK! Thanks for calling.
---
(4 minutes later):

ME: Hi! Y-100!

10-YEAR-OLD KID: You didn't play my song yet!

ME: We're trying our best!

10-YEAR-OLD KID: You BETTER play it next...'cuz my brother wants to hear it and he's gettin' MAD!!!!

ME: We're tryin', man! Keep listening, OK?
---
(4 minutes later):

ME: Hi! Y-100!

10-YEAR-OLD KID: Where's my motherf*ckin' song, a**hole?!??!?!?!?!?! My brother's PISSED!!! He's comin' down there!!!

(CLICK)

Needless to say, that almost ended my potential radio career. I had to be convinced to take death threats lightly.

And, of course, there's the kids who call for TLC and Real McCoy..even though we've never played those artists; and Ace Of Base and Madonna, even though we haven't played those artists in over a year. And, there were the hippies asking us to "play some Skynard, dude!!" I always felt like saying to these people: "'NEW ROCK'! Which word don't you understand?!?" I really thought these were dumbest people on the face of the earth.

Shame they pay my salary :P

# 3151. FCC blesses Westinghouse/CBS marriage -- WX closes 11/24

Newsgroup: rec.radio.broadcasting
Date: 1995-11-23 00:00:00 UTC
From: leftii@aol.com
Message-ID: <4918np$2g9@vixen.cso.uiuc.edu>
Source record: 28491

Reply-To: leftii@aol.com (Leftii)

Vote was 5-0 -- with a flurry of side opinions from various Commissioners. FCC approval came at a special one-item meeting Wednesday morning (11/22) -- Several commissioners took shots at CBS, Westinghouse and/or the media. But the vote was unanimous in favor of the complex package of 18 temporary and permanent waivers. (Commissioner Susan Ness chided Westinghouse for signing a deal where it wound up paying CBS a bunch of dough for every day the deal didn't close. Said the FCC acted expeditiously on the app and shouldn't be blamed for the money Westinghouse ponied up. Andrew Barrett took some swipes at CBS for "micromanagement" of its news. And Chairman Reed Hundt played schoolmarm once again on the subject of children's TV programming.)

Westinghouse now says it expects to actually take over the day after Thanksgiving -- but has no answers to questions like who will run the combined Westinghouse/CBS radio group (to be known as "CBS"). . .and how the management structure will look. Stay tuned! Tom Taylor/Inside Radio ("Tom@Inside-Radio.com")

# 3153. WOVV in West Palm Beach goes Country

Newsgroup: rec.radio.broadcasting
Date: 1995-11-23 00:00:00 UTC
From: mikedow@gate.net
Message-ID: <4918nt$2ge@vixen.cso.uiuc.edu>
Source record: 28493

On Thanksgiving Eve at 4:45 pm, Star 95.5, WOVV in West Palm Beach became the second country station the market. The former CHR (where I've been employed since July of 1994) is running jockless for the time being.
WOVV recently signed an LMA with Fairbanks Communications, which owns WRMF (hot A/C), WJNO (news/talk) and WRLX (Easy listening, but starting to play some very light vocals).
I still have a job. But we are simply playing thirty minute music sweeps from a gold disk library. It's a pain in the neck because you can't pull an hour ohead. The same tunes keep popping up.
The station is billing itself as Country 95.5. "We're turning over our radio station to the people who like country music. Tell us what you want. Show we run news? Should we have spots or traffic? Call us now and please be patient."

# 3154. WTB BROADCAST LIMITERS

I am looking for a pai of braodcast limiters for our station here,and
am willing to pay top dollar for the right ones.
the model we are looking for where manufactured by Urei/Teletronix and
came in a variety of models. CBS VOLUMAX,LA-2,LA-3a,LA-4,1176LN or 1178
LN.
If you can have a look around your radio station or ask your engineer
you may just have a old pair around the place.
Please get back with us if you have any information about the above.

Thanks for your time.

Scapegoating the media seems to have a long history in the United States. Since the late 50's, we've been blaming TV violence for most of our societal ills, with occasional accusations thrown out at the music and motion picture industries. Before that, we had accusations that comic books were causing juvenile delinquency (this was in the early or mid 50's and gave us the "Comics Code Authority").
In the 30's and 40's, I've read that radio dramas were accused of causing delinquent behavior. Before radio was big, the culprit was considered to be the pulp magazines of the day. And I'm sure the scapegoating goes back even farther.
We seem to like simple answers for complex problems. Even those who know better seem to fall into this trap...

Tom Desmond

If anybody (that is, those who are too young to remember those days of long ago in the 60s) wants to know that the "Drake format" was like, I recommend the "Cruisin' 1965" CD/Cassette. It features Robert W. "In The" Morgan recreating his morning drive shift on 93/KHJ, complete with the top songs from 1965, commercials, and JINGLES!!!! Seriously, this recording is one way for anybody not acquainted with the 93/KHJ or Drake sound to experience what went down back then.

Frequently Asked Questions (FAQ) File for OTR
Old-Time Radio
(FAQ Edited by Lou Genco (lgenco@crl.com))

Last Modified: Fri 11-24-1995
---------------------

Copies of this FAQ are distributed monthly to rec.answers,
rec.radio.info, rec.broadcasting, rec.antiques.radio+phono and other
newsgroups; and are on file at bloom-picayune.mit.edu in the file:
/pub/usenet-by-group/news.answers/radio/old-time-faq.

---------------------

Table of contents:

Q1. What is "OTR"?
Q2. You haven't mentioned OTR music, why not?
Q3. Where can I buy recordings of old radio shows?
Q4. Which vendors have (lower prices) (higher quality) (faster
response)?
Q5. Are OTR shows rebroadcast? If so, where and when?
Q6. I remember a great show called (x). When was it aired?
Q7. Are there any books about OTR?
Q8. Does anybody trade tapes of OTR shows?
Q9. What's this stuff about Copyright?
Q10. How can I get my local radio station to broadcast OTR
programming?
Q11. I have some old transcriptions and tapes, how can I make them
sound better?
Q12. Are there any OTR clubs near me?
Q13. I have some OTR tapes of the same program, but their dates are
different. Why?
Q14. Is there anywhere I can get a complete listing of all the
episodes in a serial?
Q15. Is there anywhere I can get a written synopsis of the themes of
OTR programs?
Q16. Is there a World Wide Web page (URL) or FTP address that I can
access for more info?
Q17. Is there an email newsletter on OTR? How do I subscribe to it?
Q18. Can I get archived copies of old issues of the OTR Digest?
```

Q19. What is the best way to archive OTR programs?
Q20. My old reels squeak. Why does this happen, and can I fix it?
Q21. Where can I find more information about antique radios?
Q22. What is the best radio / antenna to get distant OTR stations?
Q23. Is there a group for modern radio drama ("new-time radio")?
Q24. I have only email access to the Net. Can I still get the files at your FTP site?
Q25. Your Digest and WWW pages only deal with Old Time Radio. Where can I get similar information about early TV?
Q27. I have never heard "Old Time Radio". Can I get an audio sample via Internet?

---

Q1. What is "OTR"?

A1. OTR is an acronym for "Old Time Radio", a term loosely applied to radio programs broadcast from the dawn of broadcasting to the early 1950's. Alternate names are "radio nostalgia", "golden age radio", etc. Usually this applies to radio drama, mystery stories, comedy and adventures.

Q2. You haven't mentioned OTR music, why not?

A2. There was a good deal of "big band" and other music broadcast during this era. For some reason, there seems to be more current interest in the dramas rather than in the music. You will find much more discussion about this topic in alt.music.big-band. There is also an Old Time Music on the Radio WWW page (apparently for Bluegrass music).

Q3. Where can I buy recordings of old radio shows?

A3. There are several individuals and companies willing to sell tapes of OTR programs. A partial list can be obtained from my OTR WWW site or FTP address listed later.

Q4. Which vendors have (lower prices) (higher quality) (faster response)?

A4. Prices, quality and service differ somewhat among all vendors. Check with other subscribers to the OTR Digest to learn of their experiences, then check with potential vendors.

A comparitive price chart, listing many vendors, is available at my WWW site.

Audio quality is an important consideration when purchasing recorded tapes. As yet, there is no "standardized" description of sound quality. Jim Widner and other OTR collectors have suggested various metrics to describe the quality of OTR recordings. Discussion of these standardized descriptors is summarized at the archive site, and my FTP / WWW sites.

Q5. Are OTR shows rebroadcast? If so, where and when?

A5. Yes, several AM and FM radio stations, satellite feeds and a shortwave station rebroadcast OTR. Check my OTR WWW page for current info, or download STATIONS.OTR from my FTP site. If you learn of other sources, leave a note!

Julian A. Smith (jsmith@blues.epas.utoronto.ca), Frank Passage (passage@pluto.dss.com) and Bill Pfeiffer left the following information:

For AM listening, try the new National Radio Club's _AM Radio Log, 15th Edition: Complete Listing of U.S. and Canada AM Radio Stations_ (Mannsville, N.Y.: NRC, 1994). All AM stations carrying things like "Old Time Radio" are listed with the format code NOS (Nostalgia), and there are lots of other codes. [Order from NRC Publications, Box 164, Mannsville NY 13661-0164 USA. Price range: $20.00]

For FM listening, I'd suggest Bruce F. Elving's _FM Atlas_ (Esko, MN: FM Atlas Pub., 1993). Alongside lists, this has _maps_ of your area and its stations as well. [Order from Bruce Elving, PO Box 336, Esko MN 55733-0336. Price Range: $11.00 + approx $1.00 s/h]

The M Street Radio Directory, M Street at 800-248-4242 or +1 212 473 4668 voice, or +1 212 473 4626 fax. The address is M Street Corp., 304 Park Ave S Floor 7, New York, NY 10010 USA. costs $29.95 + p/h,

Q6. I remember a great show called (x). When was it aired?

A6. Check with subscribers to OTR Digest, or look through the program databases (WWW or FTP). Also see answer A14 below.

Q7. Are there any books about OTR?

A7. Yes, there are several books related to OTR. See my WWW page or FTP site for a list of some of them.

Jim Widner and Everett L. Slosman left this address for a bookstore specializing in OTR books:

Rainy Day Books
P.O. Box 775, Rt 119
Fitzwilliam, NH 03447
(603)585-3448

Bob Crump reminded us that most good used book stores will do a nationwide search for a title, if given enough time. Henry Brugsch <henry@g0gku.demon.co.uk> related a good experience with the following on-line bookstore:

Acorn Books acornbks@netcom.com

Q8. Does anybody trade tapes of OTR shows?

A8. Yes. Check with subscribers to the OTR Digest. My WWW page has a database of private traders as well. Leave a note in the OTR Digest if you want to trade, or send email to me if you want your library to be listed in the on-line database.

Q9. What's this stuff about Copyright?

A9. The copyrights on most OTR shows have expired. Several copyrights have been renewed. Examples of the latter include The Shadow (Conde Nast) and some of Arch Oboler's productions. See my WWW site for the latest "common sense" and legal citations.

Q10. How can I get my local radio station to broadcast OTR programming?

A10. Call the station and tell them of the many people who like to listen to OTR. Suggest this programming will increase listenership and help buy things from their advertisers.

Shawn Fulper-Smith (shawnf@cc1.uca.edu), a managing director of a non-commercial station, tells us: "The days of radio being ruled by the artisians is over, and for some time now it has been in the hands of people who only look at the bottom line, so to reach them you must talk through public radio pledges, or through sponsors on commercial stations."

Q11. I have some old transcriptions and tapes, how can I make them sound better?

A11. You might try using a good equalizer and/or digital signal processing (DSP) unit between the playback and recording devices. Some people have mentioned that the Radio Shack DSP unit does a fair job. There are also other, more expensive DSP units available from Ham radio stores and audio stores. Some subscribers have attested to the efficacy of the Timewave brand of DSP units.

Randy Riddle (Rriddle@aol.com) left this information:

There's a firm that sells archival quality turntables and sound processing units that can dramatically improve old recordings. Their sound processing unit runs around $300.

Audio 78 Archival Supplies
PO Box 187
San Anselmo, CA 94979
415-457-7878

Henry Brugsch <henry@g0gku.demon.co.uk> left this information about Digital Audio Format (DAT):

The dat-heads mailing list maintain an archive of all
their material at the following site:
ftp.atd.ucar.edu. Log on with the usual anonymous
then, your routine password. head on over to
/pub/dat-heads/ You will find a wealth of info up
there. All the digests to the current day, and mike
faqs, as well as market postings on equipment. Highly
recommendable for anyone to get their feet wet in this
media. Happy taping.

Q12. Are there any OTR clubs near me?

A12. Check the club listings in my WWW page, and
leave a note in the OTR Digest asking about local clubs for
your area. Send me email if you want your club listed.

Q13. I have some OTR tapes of the same program, but their dates are
different. Why?

A13. Sometimes broadcasts are dated according to their original
broadcast date, and sometimes according to a date on which they
have been rebroadcast. For instance, the Armed Forces Radio
Service rebroadcast many Mutual Radio transcriptions at a later
date. Your tape may be of one of these later dates. Alternately,
somebody might have made a mis-typopgoof.

Finally, some shows -were- broadcast more than once, and sometimes
on different programs! For instance, a few Suspense shows were
re-scripted / re-cast for Escape. You might also find
similarities between certain SF shows as done on X minus 1 and
Dimension X.

Q14. Is there any place where I can get a complete listing of all the
episodes in a particular program serial?

A14. Some of the OTR Digest subscribers have contributed Program
Logs for several well-known series. The logs are available at my
FTP & WWW sites. While you are there, check the online libraries;
some collectors have very complete collections of various serials,
and they are listed by name or date in their listings. I am
currently compiling a database of contributed catalogs and
libraries, which will eventually contain most of the
readily-available programs for popular OTR series. At present,
the dbf file exceeds 6 MB, and may (if the site software works) be
searchable with your WWW browser.

The "logs and publications" entry in my WWW page gives names and
addresses of several vendors of these items. It can be FTP'd as
sou_pub.otr. (Thanks to RadioJoe5@aol.com (Joe Coleman)). There
is also a Netscape table of logs and log sources at my WWW site.

Jay Hickerson maintains several logs and lists, as well as -Hello
Again-, an OTR newsletter. Jay is the author of -The Ultimate
History of Network Radio Programming and Guide to All Circulating

Shows- (last supplemented in Oct 95). Jay's address is:

Jay Hickerson JayHick@aol.com
Box 4321
Hamden, CT 06514
(203) 248-2887 FAX (203) 281-1322

Q15. Is there any place where I can get a written synopsis of the themes of OTR programs?

A15. Again, some vendors include this information with their catalogs. If you would like to contribute your interpretations of the themes, send them to the OTR Digest for inclusion in one of our databases.

Jim Widner has contributed some synopses / introductions to various programs. They are on file at his and my WWW/FTP sites.

Many of the local and national OTR clubs maintain informational libraries with this material.

Q16. Is there a World Wide Web page (URL) or FTP address that I can access for more information?

A16. Yes, there is a growing number of WWW sites, as well as FTP sites and a Gopher. Each site contains different information, so you might want to visit them all. The sites listed below are good places to start, since the major OTR WWW pages have links or pointers to each other. If you learn of any others, I'd appreciate your informing me via email!

(1) My site:

World Wide Web URL:
http://www.old-time.com

FTP:
Anonymous FTP to ftp.crl.com
directory: users/lg/lgenco

(2) AIRWAVES E-Publishing's Site (courtesy of Bill Pfeiffer):

FTP:
Anonymous FTP to radio.aiss.uiuc.edu,
directory: misc/rec.radio.b-cast/OTR.

GOPHER:
gopher radio.aiss.uiuc.edu 7070
(select "OTR")

World Wide Web URL:
http://radio.aiss.uiuc.edu/~rrb

Q17. Is there an email newsletter on OTR? How do I subscribe to it?

A17. Yes. The Internet OTR Digest is a freely available electronic newsletter, mailed just about every night to subscribers.

To subscribe, send email
To: old.time.radio-request@airwaves.com
Subject: SUBSCRIBE

To unsubscribe, send email
To: old.time.radio-request@airwaves.com
Subject: UNSUBSCRIBE

(The body of the message is ignored in both cases)

NOTE: Do NOT use this address to send articles to the Digest! Use old.time.radio@airwaves.com instead.

Q18. Can I get archived copies of old issues of the OTR Digest?

A18. Yes. The OTR Digests and Index are updated three times a week, and are accessible through the first two WWW pages mentioned above, from the AIRWAVES anonymous FTP site mentioned above, or from the Gopher mentioned above.

Readers with a WWW browser can access a "smart" archive program. This program can sort and display old OTR articles by author, subject, thread or date submitted. Just the thing to use when you want to catch up on a discussion thread, without plowing through a lot of extraneous material. To access this service, point your browser at: http://radio.aiss.uiuc.edu/~rrb/online.html

Q19. What is the best way to archive OTR programs?

A19. The most popular way seemed to be reel-reel tapes, using each of the four tracks to record monophonically. Modern reel machines are in the > $2000 range, and used reel machines are becoming harder to find.

Cassettes are generally fine for portability / ease of use / exchange, but they suffer from several problems when used as a long-term storage medium. These problems include "overwinding" and splitting of the tape at the leader. Because of their thinner track width and slower speed (1 7/8 IPS), the density of the information is greater than with wider and faster (3 3/4 IPS) reel tapes. This may lead to a greater loss of signal (particularly high-frequencies) over time.

The Hi-Fi VHS tape is gaining in popularity because of its six-hour storage capability and relatively robust mechanical construction. "Hi-Fi" decks need no video signal to synch the systems, and can thus record audio without an accompanying video signal. One T-120 Stereo Hi-Fi VHS cassette can easily hold 12 hours of OTR audio (recorded monophonically on the right and left channels independently). If the linear track can be accessed independently, this will add six more hours of recording time.

Some subscribers have mentioned Talking Book tape recorders as a possible archival method. These recorders operate at 15/16 ips (half the speed of a standard cassette recorder), and can operate in 4-track mode, thus giving up to 6 hours of play time on a standard 90 minute cassette. As yet, we have no info on long-term longevity of these recordings.

Don Coco (djc@crl.com) left the following information about sources for Talking Book type equipment:

The American Printing House For The Blind 1839 Frankfort Ave. Louisville, Kentucky 40206 Tel. (502) 895-2405 Sells Braille and recorded books, 4 track recorders which record at 15/16 IPS, and other products of interested to Visually Impaired persons. Price of 4 track recorder around $175

I.R.T.I.
1411 West El Camino Real
Mountainview, Ca. 94040
Tel. (415) 961-3161 or (800) 322-4784
Sells all including Radio's, TV's with SAP, Reading Machines, Computers ETC.

Conrad Trautmann (CONRADTRAUT@delphi.com) left this note in response to a query about finding used reel-reel machines:

You can also call Harris/Allied used equipment division at 1-800-622-0022 or call Radio World magazine at 703-998-7600 for subscription information. Radio World is an industry trade and has used equipment listings in the classifieds once a month.

(Jim Blackie [jblackie@aol.com] indicates that the Harris/Allied number has changed to: 1-800-300-0733.)

Richard Novak (rnovak@ix.netcom.com) wrote this informative note on using Hi-Fi VHS as an archival medium:

To clear up any misunderstandings concerning VHS HiFi machines and their ability to record audio, I offer the following..

It should be understood that what distinguishes a HiFi machine from a linear machine is that the audio track is recorded helically (diagonally) on the tape along with the video track. On linear machines the audio is recorded at the upper edge of the tape (and a control track at the lower edge, if anyone wonders what the extra head is for.)

On a HiFi VHS the audio is not recorded as an analog signal as would be the case with linear recording. Instead the analog audio signal frequency-modulates a carrier which is then recorded between the video tracks. A duplicate signal is also recorded linearly to maintain compatibilty with

linear VCRs. The FM signal recorded on the HiFi track should not be confused with FM radio broadcasts. One of my customers thought the FM switch on his HiFi was for recording FM from the radio. Today's machines no longer use the label "FM", instead use "HiFi". Less confusing.

The sound recorded from FM radio broadcasts (or any other source) onto HiFi VCRs is virtually indistinguishable from the source. The material can be dubbed to cassette with no generation loss.

There is no difference in audio quality using either six hour or two hour mode.

It is true that at slower speeds the diagonal tracks are closer together. This does degrade the video signal as anyone knows who has compared six hour video with two hour video. But does not degrade the FM carrier with the audio track.

The tape writing speed of the audio track in HiFi mode is the same regardless of linear speed. This is because the head speed remains constant and is independent of the linear tape speed.

Worked it out once and it is around seven meters per second. Whatever it is, it's a whole bunch faster than 7 1/2 inches per second. If anyone really wants to know the writing speed, it is the circumference of the upper cylinder (or video head) multiplied by the rotational speed which is 30 revolutions per second, or 1800 revolutions per minute. (Two heads 180 degrees apart at thirty rps results in 60 frames per second.)

Who cares how it works.. The point is that VHS HiFi is the best and cheapest medium around for recording masters. But not for archiving. Most experts still agree that reel to reel is the best and most reliable method of archiving. (Sticky shed syndrome from the 70s notwithstanding.)

Q20. My old reels squeak. Why does this happen, and can I fix it?

A20. There are at least two causes for "squeaky reels" on a reel-reel tape recorder. (1) The tape edge may be rubbing against the rim of a distorted take-up reel, or (2) the oxide may be sticking to your erase (or other) heads. If the former, the least frustrating alternative is probably a new take-up reel. If the latter, Fred Korb left this note:

If you have any squeaky reels that you would like to recover, I will be glad to send you more information on how to do it. Just send me a stamped self addressed # 10 envelope and I will respond. Send your request

to: Fred Korb, c/o Oldtime Radio Collectors and Traders Society, 725 Cardigan Court, Naperville, Illinois 60565-1202. I am willing to help you preserve the sounds of radio days gone by.

[Editor's note: Fred's method consists of a kit by which a lubricating film can be automatically applied to the tape as it is played. I tried it. Although temporary, it does indeed work! I'd recommend it for those squeaky tapes that you wish to re-record onto newer reels.]

Richard Fish <lodeston@bluemarble.net> also left this helpful info about an alternative method:

HYRDROLYZATION is the culprit. The tape material -- the backing, or the binder compound used to stick the magnetic particles to the plastic backing -- has absorbed water from the air. The water molecules actually make the tape expand a bit, so it doesn't fit the machined tape-guides properly anymore; and they can interfere with the lubrication impregnated into the tape; and it is theorized they can even interfere with the polished smoothness of the tape surface.

WHY SOME TAPES AND NOT OTHERS? It depends on the formulation of the plastic backing and binder. In the mid-70's, both 3M (Scotch) and Ampex, the two major tape manufacturers, started experimenting with their formulas. They thought they were introducing major improvements, but instead created a tape much more prone to hydrolization than anything had ever been. The problem did not show up for years, and the formulas did not get corrected until sometime in the mid-80's. Theoretically any tape could get hydrolyzed over a long period of time, especially if stored in a high-humidity situation, but in practice most squeaky tapes were made (roughly speaking) between 1975 and 1985.

WHAT'S THE FIX? Tom Lopez at ZBS (the most prolific and entreprenurially successful producer of radio drama in the US today) gave me his formula and I've done it many times now and it works:

Bake the tapes in a convection oven for 8 hours at 130 degrees Fahrenheit. It is entirely possible to bake a tape twice if the first time doesn't do the trick. You get about a three-week "window", sez Tom, before the tape starts to re-absorb water. So the best deal is to bake the tape and immediately make a copy. But if you forget to do it and it re-hydrolyzes, you can bake it again.

Q21. Where can I find more information about antique radios?

A21. An excellent place for discussions about antique radios, phonographs and accessories is the rec.antiques.radio+phono newsgroup, created by Bill Robie. A pointer to his FAQ may also be found at my WWW site. Basically, r.a.r+p is:

- A *discussion* group, rather than a sales group (see r.a.m)
- Whose focus is on radios, phonos, and related materials made before the 60s
- It steers away from "ham" radio gear (the Boat Anchors group covers that)
- They have a -very- comprehensive FAQ that new folks should read

Several museum sites are available at my WWW page. The WWW site, "The Bellingham Antique Radio Museum" is also available directly via URL http://www.pacificrim.net:80/~radio/ This site contains info and GIFs on old radio hardware, as well as soundclips of OTR show intros.

The University of Maryland also has a WWW site entitled "Broadcast Pioneers' Library". This is an excellent resource for the serious / professional researcher. It can be accessed through my WWW site, or directly via the URL: http://www.itd.umd.edu/UMCP_Libraries/BPL/bpintro.html

Additional sites with pictures of old radios or other hardware resources may also be found at my WWW site.

Q22. What is the best radio / antenna to get distant OTR stations?

A22. Several readers have been acclaiming the GE SuperRadio III as an excellent choice for picking up distant AM stations that carry OTR programming. Although the tuning dial has notoriously poor calibration, the sensitivity and selectivity seem superior to other radios. A SuperRadio FAQ is available via my WWW site.

-Some- readers have had good success with the Select-A-Tenna antenna advertised in several magazines, and the Grove Catalog. The S-A-T seems to be rather directional, and may eliminate off-axis interference.

Ham Radio magazines sometimes carry information about small loop antennas for AM DX-ing. Dan Hughes <dhughes@prairienet.org> left this note:

Several years ago one of the electronic magazines ran
plans with dimensions and number of turns, etc to build
one of these antennas. I have built several and I'm no
mechanic. If you (or anyone else reading this) would
like a copy of the article and plans, drop me a stamped,
self-addressed envelope: Dan Hughes, P.O. Box 933,
Urbana IL 61801.

If you are interested in AM Broadcast Band reception, and technical artlcles related thereto, send a SASE to the following

address for their product catalog:

National Radio Club
Publications Center
PO Box 164
Mannsville, NY 13667-0164

Q23. Is there a group for modern radio drama ("new-time radio")?

A23. There are several USENET groups whose charters include modern drama. Check the lists on your local Internet provider to see which are available to you. Here is a list of some of the WWW pages for radio drama (more may be found at my WWW site):

Atlanta Radio Theatre Company: http://www.webamerica.com/artc
ZBS Media? http://www.zbs.org/zbs.html
LodesTone Productions?
http://www.bluemarble.net/~lodeston/lode.html
Midwest Radio Theatre Workshop?
http://www.thoughtport.com/tpa/non/mrtw

There is also a mailing list for folks interested in current radio drama:

Send email to: majordomo@world.std.com
Subject:[blank]
text: subscribe radiodrama

Q24. I have only email access to the Net. Can I still get the files at your FTP site?

A24. Maybe. There are several FTP-by-email servers. Contact one of them for instructions.

ftpmail@decwrl.dec.com
with no subject line,
and two-line body with line one help and line 2 quit

ftpmail@grasp.insa-lyon.fr
(body: help) Please, European users only.

bitftp@pucc.princeton.edu
(body: help or ftplist for a list of anonymous ftp sites)

BITFTP@DEARN or BITFTP@vm.gmd.de
(body: help or ftplist for a list of anonymous ftp sites)
(Europe only)

Since the OTR FAQ is an "official" FAQ, a copy of it is stored at MIT, and is available from the MIT mailserver. For more info on how to get files by email from MIT, send a message
TO: mail-server@rtfm.mit.edu
SUBJECT: [blank]
BODY:

help
end

Q25. Your Digest and WWW pages only deal with Old Time Radio. Where can I get similar information about early TV?

A25. The OTR Digest and OTR WWW Pages are purposely self-constrained to OTR topics. Folks interested in early TV shows might be interested in this note from Kathy O'Connell (oconnell@pobox.upenn.edu):

Let me announce a brand new TV list!!! A woman named Linda has just started a list devoted to 50's-60's Television. You can contact her at LEEKNIGHTS@delphi.com I signed on immediately, and it's a wonderful place to meet other people interested in this subject. Very much like the OTR list, but for television!!!

Q27. I have never heard "Old Time Radio". Can I get an audio sample via Internet?

A27. Yes, if you have a suitable WWW browser and sound card. Connect to any of the WWW sites mentioned above, and follow the pointers to their audio clips and / or soundbytes. Most of the soundbytes can be downloaded, and played on your computer's sound card.

# 3161. Burlington Plattsburgh Radio Watch

Newsgroup: rec.radio.broadcasting
Date: 1995-11-26 00:00:00 UTC
From: jtymecki@aol.com
Message-ID: <4997c6$dak@vixen.cso.uiuc.edu>
Source record: 28411

Reply-To: jtymecki@aol.com (JTymecki)

(NOTE)This posting got "lost" several times in the 'AOL Newsgroup Vortex'
If you have seen this posting before, please excuse. TNX, Joe.

Burlington - Plattsburgh Radio Watch

Greg Mumley returns to the morning co-host position on WVMT (620, Oldies) with Ernie Fararr. Greg was out on medical leave for a while and is back and well. WVMT's sister station WXXX (95 Triple X, 95.3, CHR) has erected their new self supporting tower this week. This holds a directional antenna for a power upgrade and frequncy shift to 95.5. Both towers are up together next to each other for a while and it is a pretty cool sight!

Speaking of oldies...it sounds like Oldies 92 (WMNM, 92.1, Port Henry, NY) may be placing a heavier empasis on the 70's (in light of competition from KOOL 105?). I am hearing more tunes like stuff from Harold Melvin and the Blus Notes and less from traditional 50's artists. WZBZ (Oldies, 1070 , Plattsburgh) has started moving away from the all music format that they call Baby Boomer's Rock and Roll. At some point in the last few weeks they began running talkers Mike Walker and G. Gordon Liddy in mid days / afternoons.

Floydian Slip (which used to air on WEXP) returned to the air a few weeks on WCPV (Champ 101.3, CR-Imus). It will air every week, Wednesday nights at 9:00 p.m. Hosted by the show's creator, Craig Bailey, 'Slip is about all things Pink Floyd...lot's rare stuff. Visit thier web site at http://together.net/~ccb/floydslp.htm.

Two of the seven former pricipals of WEXP (U.B.C. Inc.) Russ Kinsley and Steve Schuyler have resurfaced behind WWIN (W39AS) TV. This was a religous LPTV assignment (not SO low power at 63 KW erp) that the new group has purchased and on which will run the WB network. This is yet another case of an LPTV channel marketing themselves like a regular TV station following in the footsteps of W27BI from Plattsburgh, NY. Jeff Loper, a face from TV 27, is involved in this project as well.

WEXP also was recently lauded for promotional work done for the now defunct station: Kaiserdicken took first place at the Pegasus Awards for the WEXP logo (often called the speckled bird). Harwood Moses Chamber took a merit award for the EXP newspaper campaign.

Vermont Public Radio has begun operating from their new facillity in Colchester. About 99 percent of the programming is originating from there as well. This is a culmination of a several year effort to consolidate the Windsor and Colchester studios and offices. The new facillity is, in a word, awesome!

FLASH !!! This just in - Franny Bastien, longtime newsperson at WVMT will be leaving to join the morning team at WEZF. Franny will start December 4th and will share the air with EZF's morning man Dave Simmonds.

For a list of stations and formats in the area, please drop me an email.
Regards, Joe
jtymecki@aol.com

# 3162. Buffalo/Toronto Radio Watch(11/24)

Newsgroup: rec.radio.broadcasting
Date: 1995-11-26 00:00:00 UTC
From: ag365@Freenet.Buffalo.EDU
Message-ID: <4997c7$dal@vixen.cso.uiuc.edu>
Source record: 28412

Reply-To: ag365@Freenet.Buffalo.EDU (Carl K. Gorney)

*Canisius & Niagara hoops will be on the air this season,though not on the station I thought(check the archives for the date,as it escapes me)-CJCL (The Fan 590). Actually,their games will be on 2 stations.
Alan Pergament's column in today's Buffalo News reports that the Golden Griffins(or Griffs;Canisius)and the Purple Eagles'(Niagara) will air on CFLZ(91.9,tourist info;C-Falls)and CJRN(710,full service/Sabres co-flagship) this season on what is being called the Basketball Net.'FLZ,whose antenna is on top of the Skylon Tower on the Canadian side of Niagara Falls will carry 33 games,while CJRN will air 13-thanks to not only Sabres conflicts,but also Niagara Falls Thunder(OHL junior hockey)conflicts. Canisius & Niagara are paying the 2 stations(in U.S.dollars)for the rights to the games after failing to find an American station to do so.
Pergament notes that the deal should be better for Niagara,since the stations are in Niagara Falls,Ont.-adding that listeners in some areas may have difficulty getting CFLZ(certainly not where I live;very receivable in my car-but less so in my home).

*How are the local stations celebrating the release of the new Beatles anthology?
The only station I noticed doing anything out of the ordinary was WGRF(97 Rock),which on Monday aired the entire Beatles song catalog A-Z.
Other than that,nothing I noticed.
Also,WHTT(Oldies 104)morning man Danny Neaverth was interviewed by WKBW (ch.7)for its sweeps week series on the 3-parter(yeah,call it a puff piece :>).
Danny,suprisingly,didn't think much of the Beatles when they first came on the scene. He also said that the Fab 4 might have made a concert stop in Buffalo-which never happened,because of the night it would have happened(Tue.) and the cost($6,000).

*Out of the immediate area:

-Erie's WJET replaced overnighter Jim Bean with singer David Leroy.

-Clarke Ingram,who PDs WPXY in Rochester(98 PXY),has been upped to the OM post at both 'PXY & Lincoln Group sister station WVOR(100.5;AC). Dave LeFrois is 'VOR's new PD(replacing C.C.Matthews,now in the same post at WDJX in Louisville,Ky.),while 'PXY nighter/MD J.J.Rice adds APD stripes there. Joel Denver's AllAccess site(where the 2 stories come from)adds that middayer JoJo is expected to jump to MD.

Hope you're not _too_ stuffed,everybody!

TTYL...

# 3163. Chicago Radio Watch: Special Rep

Newsgroup: rec.radio.broadcasting
Date: 1995-11-26 00:00:00 UTC
From: JJB92@aol.com
Message-ID: <4997c8$dam@vixen.cso.uiuc.edu>
Source record: 28413

WLS-FM, which had been simulcasting the AM talk format after an unsuccessful attempt at its own talk, has switched formats. Taking advantage of the yuletide season, the station now features holiday music. I haven't heard any deejays at this point.

The move is a precursor to a shift away from talk and to a full time music format. Country music remains the most likely winner in the format derby.

Joe Bonk
JJB92@aol.com

# 3164. Mid-America Radio Watch (25-Nov-1995)

Newsgroup: rec.radio.broadcasting
Date: 1995-11-26 00:00:00 UTC

Message-ID: <4997c8$dan@vixen.cso.uiuc.edu>
Source record: 28414

Two historic St. Louis stations set the table for a feast of facts
and rumors this Thanksgiving weekend....
****
First, it's now obvious that KSD(AM) has cut short its fling this
summer and early fall with the Satellite Music Network's "Stardust"
nostalgia format.
The clearest sign of KSD's new direction came when it hired its
new program director from another Missouri news/talk station.
Program director Steve Moore arrived this week from Columbia's
KFRU(AM), where he helped rebuild mid-Missouri's heritage news/talker
after the owners of KARO(FM) (now KPLA) rescued it from near-foreclosure
in 1992.
KSD owner EZ Communications outbid KMOX this year for the radio
rights to the St. Louis Rams, now airing both on KSD and on classic-rocker
KSD-FM. Along with the Rams, KSD is focusing on sports talk in
the afternoons, with the market's longtime bad-boy of sports, Kevin
Slaten, recently from all-sports KFNS(AM).
It is said that KSD is considering a high-profile syndicated morning
show, either carried live or delayed to middays to compete against
Rush Limbaugh on KMOX(AM).
****
An interesting question then presents itself: how much talk can
one market stand? St. Louis now has the following general-interest
news, sports, or talk stations: KSD, KFNS (sports), WGNU, KMOX, WIBV,
KRAM, and KATZ (black-oriented). On the FM dial, KWMU carries much
of National Public Radio's news and talk schedule, as does WSIE(FM)
on the Illinois side.
That makes seven commercial stations and two non-commercial
stations. Memo to Southwestern Bell: better hurry up the introduction
of the 573 area code to Missouri -- St. Louis will need more phone
lines for all those talk stations!
****
You can be sure if it's Westinghouse but can KMOX be sure if it's
CBS?
That's the question being asked about the multi-billion-dollar
Westinghouse acquisition of CBS.
There's speculation that Westinghouse will sell off KMOX to reduce
the debt it took on with the CBS purchase.
One market observer claimed to me that St. Louis is the smallest market
in which Westinghouse, er, CBS owns only radio stations and no TV
stations.
And, it was also noted, Larry Tisch found it easiest to part with
KMOX-TV when he wanted to cut down on his debt back in 1986. Channel 4,
now KMOV(TV), still shares the building at One Memorial Drive with

KMOX and KLOU(FM).
CBS had, in fact, been trying to sell KLOU(FM) on-and-off for the past couple of years.
Speculation centers on Emmis Broadcasting, owner of heritage album-rocker KSHE(FM), as the most likely candidate to get KMOX.
It is known that Emmis has expressed an interest in the clear-channel "Voice of St. Louis".
The once-imposing and still top-rated KMOX would make an impressive one-two demographic punch with KSHE: KMOX is a top draw in older demographics and KSHE is strong with younger age groups (especially men). KSHE has remained a fresh and lively album-rock station, increasingly rare in this day and age.
(When I was listening to KSHE the past few days, it sounded to me more like Kansas City's KQRC, with a generous helping of modern-rock crossovers, than KYYS.)
The way is clear for Emmis to acquire more St. Louis stations if it wants: KSHE is the only station it owns there.
****
A peek at the Kansas City Arbitrends this weekend showed continued strength for market-leading country station KFKF(FM) and a number-one finish in the 18-34 age group for its duopoly partner, young-country KBEQ-FM.
Country's top representative on the AM band, WDAF, which suffered a sub-par summer finish, appears to be recovering, bouncing back to second place 12-plus.
Smooth-jazz KCIY(FM), which was number two 25-54, has slipped a bit to number three, perhaps indicating summer numbers represented a peak for the station. Still, with the station's rapid growth, Heritage Media is well on the way to recouping the five-million-dollar purchase price for "The City".
Expect another strong performance from 70s-classic-rocker KCFX(FM), with predictable boosts from Kansas City Chiefs coverage and hype.
Also steady is hard-rocking KQRC(FM).
****
A couple of hard-core AM listeners have confirmed for me something that I've suspected the past few weeks: AM stations seem to be coming in uncommonly well during the daytime.
On Thanksgiving Day, just outside Columbia, at high noon, I was clearly receiving WMAQ and WBBM from Chicago.
Even better, KTTN, the 500-watt daytimer at 1600 KHz from Trenton, is a station I normally can pick up only when I'm due south of Trenton (about at Marshall for a range of 20 miles or so). This time, I was able to hear the station from just east of Kansas City to the Missouri River bridge between Boonville and Columbia, a range of about 90 miles. This was at mid-morning, long after critical hours had ended.
This might be a good winter for AM broadcasters to revise their coverage maps!

Les Jameson, fired last week from his midday talk slot at WLAC-AM (n/t), will undergo open heart surgery tuesday. The 65-year-old Jameson said he started having chest pains within a day of being canned. Surgeons will replace a bad valve and open some blocked vessels. There has been a public outcry against WLAC since Jameson's dismissal...including editorials in local papers criticizing the firing. One of Jameson's commercial sponsors, a local car dealer, went on television and blasted the station for the action. Jameson has been described as a lovable character with a charming British accent.

# 3166. PHOENIX: PRATT'S PAYDAY & FOXX'S HIT/RUN

Newsgroup: rec.radio.broadcasting
Date: 1995-11-26 00:00:00 UTC
From: Michael Hagerty <Michael_Hagerty@azfamily.com>
Message-ID: <4997ca$dap@vixen.cso.uiuc.edu>
Source record: 28416

70's KHTC(96.9-K-Hits) weekend air talent Carla Foxx's Ford
Explorer has been impounded by Phoenix police.
Detectives say the car matches witness descriptions of a car involved
in a fatal hit and run accident on Camelback Road
Monday(11/20) evening...and has front end damage consistent with the
accident.
78 year old Edward A. Smith, a prominent Kansas City attorney,
was killed instantly.
Police say they have not yet determined whether Foxx is a
suspect.
Neither Foxx nor her attorney, Joe Chornenky, are commenting
publicly.
Foxx is on leave from K-Hits pending the outcome of the
investigation.
Foxx made her name first as evening personality and host of
"the Affection Connection" and MD at AC KESZ(99.9). She was promoted
to middays a few years ago.
After nearly 10 years with the station, she left in February of
this year to become PD and midday talk host at
KHOT(100.3)...launching that station's "Hot Talk" format.
Owners Resource Media canned the format and Foxx just four
months later...Foxx landed the weekend gig at K-Hits six weeks ago.

---

AOR KUPD(97.9) morning drive legend Dave Pratt has signed
a 6-year contract extension with the Sandusky Broadcasting station
worth, sources say, $3 million.
That's an average of $500,000 a year, a healthy jump from the
$300,000 plus bonuses that Pratt was rumored to have been getting in
his most recent contract cycle. If true, Pratt, who's done mornings
at KUPD for 15 years or so, was already the highest paid local talent
in the market. The new deal puts him ahead of the reported $400,000
fee modern rocker KEDJ(106.3) pays for the local rights to the Howard
Stern syndicated show.
According to Charlie Van Dyke's "Radio Notes" column in the
Arizona Republic, other high-dollar talent ($100,000 a year
plus)includes CHR KKFR(92.3)'s Bruce Kelly, Country
KMLE(107.9)'s Tim & Willy, News/Talk KTAR(620)'s Pat McMahon(the only
one listed who is not in morning drive...McMahon does middays), A/C
KESZ(99.9)'s Beth and Bill and AOR KDKB(93.3)'s Tim & Mark.
As we've noted here before, it's a short list. Recent
morning drive openings at full-power stations have gone for as little
as $50K, with afternoons falling below $40K for what should be key
slots at competitive stations. There are many stations in the market

whose entire talent budget is not as big as Pratt's new yearly salary.

Source record: 28417

ALL CHRISTMAS, ALL THE TIME: On Friday(11/24), the annual all-Christmas music marathon began on adult standards KOY(550) and MOR KTWC(103.5). It's the second year of dueling carols between the two competitors.
When the yuletide tunes end the day after Christmas, KOY will resume its satellite-delivered "AM Only" format...but KTWC's future is up in the air. FCC approval of the station's sale from Newmountain II Broadcasting to MAC America
Communications(which has provided sales and engineering support as well as studio facilities under a modified LMA since the station signed on in May, 1994)is expected any day. If that happens between now and Christmas, observers say MAC America would honor the all-Christmas format, but move quickly afterward to make changes on-air to improve KTWC's 19th place performance 12+.
The station currently plays a very broad range of music from 1955 to the present. Johnny Cash, George Benson, Bobby Sherman and Whitney Houston back-to-back in the same set is not unheard of. MAC America(which owns AC KESZ)
has not announced any plans for KTWC, but look for the company to go for something that would pull strong 25-54 numbers without cannibalizing the steadily increasing KESZ(99.9) audience...thus giving the combo a #1 25-54 ranking.
Just attracting the numbers soft AC KKLT(98.7) or hot AC KVRY(104.7)have lost in the past year would do the trick.

FOXX UPDATE: Still no word on whether charges will be filed against KHTC(96.9-K-Hits)weekend jock Carla Foxx.
As noted in a separate post,Foxx's car has been impounded by police in connection with a Monday(11/20) hit and run
accident on Camelback Road that killed a prominent Kansas City attorney, Edward A. Smith. Detectives say Foxx's Ford Explorer matches witness descriptions and has front end damage consistent with the accident. They also say they have not yet determined whether Foxx was driving.
On the advice of counsel, Foxx isn't talking to the media, and her attorney says she has not yet given a statement to police. Expect movement Monday, when detectives return from the four-day holiday weekend.

By swapping with others on the Internet, I have compiled
a pretty good list of airchecks from the late 60's and early
70's from the 3 big Drake stations in Boston, Detroit and
LA.

Of course, I'm always looking to add to my collection and I
would particularly like some WLS and WABC from that era.

Here's what I have to offer you in a swap:

WRKO:

Johnny Williams (Bill Todd)
Joel Cash
Dale Dorman
Bobby Mitchell (Frank Kingston Smith)
Scott Brink (the p.d. at the time)
Jerry Butler (shortly before he moved to KHJ)
newsmen: John Masters and Robert Stevens

KHJ: Charlie Tuna
Real Don Steele
Johnny Williams (not Bill Todd)
(a little of) Humble Harv
(doesn't anyone have an aircheck of Cat Simon???...the
Johnny Williams from WRKO)

CKLW:

Ted Richards
Pat Holliday
newsman Daley (can't remember first name)

quality varies greatly on these tapes
---
so who was the best jock of all these greats???

no question. Johnny Williams WRKO
with Charlie Tuna a close 2nd

Let me know what you'd like to swap.

John Gallagher/Boston
jgallagh@interserv.com

(note: my internet provider blew out my phone
book so I'm missing a few addresses of people
I have previously swapped with. That won't happen

again as I now download them to my disk for
safe keeping)

I don't know if this is permitted on the newsgroup, but I have an opening for a PM drive/Production Director at KBOY-FM in Medford Oregon. Looking for a promo god/godess who's comfortable with digital production. KBOY is a mainstream AOR with great #s, and good $ if you're the right person. Beautiful area, lots of access to recreation...a really good small market operation. No liner cards in the CR, so have a personality, and a decent knowledge of rock from Hendrix to Bush. E-mail me at kboy@cdsnet.net or call (541) 779-2244 after 10 am weekdays. Thanks!

Bruce always does his show from either his New Jersey home, his Florida
home, or, when travelling, via two line Comrex in a road case. I used to
be GSM at the two stations he owns (with his son Matt) in East Texas.
When visiting, Bruce would do his show from Matt's office.

By the way, even _we_ couldn't get an affiliate list from WW1 for Bruce's show!

# 3176. Market Definitions and Listener Research

Newsgroup: rec.radio.broadcasting
Date: 1995-11-28 00:00:00 UTC
From: Joel_Runes@email.fpl.com
Message-ID: <49ea78$87n@vixen.cso.uiuc.edu>
Source record: 28422

I have followed with great interest the back-and-forth between carriveau, Julian Breen and others concerning the appropriateness and utility of Arbitron market definitions. I'd like to broaden the discussion a bit and make a few general observations. First, I should point out that I have worked for a competitor of Arbitron (but NOT in a policy-making role) and have perhaps a somewhat sharper view of the RAW data (i.e., listener interviews, questionnaires, diaries, etc.) which get processed through the sausage-grinder and come out the other end as expensive, coveted (or despised) ratings books.

TOPIC 1: What is a market?

On one level a market is whatever the research company defines it to be, because there are a lot of lazy ad agency buyers, political campaign media buyers, etc., who see their job as buying so many points in this market amongst that demographic group. I accept at face value Mr. Breen's assertion that market definitions are not completely arbitrary. Those definitions DO tend to conform to political subdivision boundaries, for example. But NOT because radio signals travel to but not beyond county lines. Rather, the decisions on market boundaries relate to availability of other research data, such as Census Bureau data, which is conveniently aggregated on the basis of MCDs, metropolitan statistical areas, and so on. Who wants to go through the effort of aggregating census tract-by-census tract data when the Census Bureau and value-added resellers of Census data have processed that data into larger areas? Certainly NOT the media research firms, because their ratings books are expensive enough as it is piggybacking on the standard demographic data sources.

For the local Class A FM stations, they care about listeners among those who can hear them, not about this county or that metropolitan area. But they run up against the reality that, unless they are going to make a go of it strictly on advertising from local businesses, they have to deal with those aforementioned lazy media buyers and their national accounts. Overall listenership across the entire listening area may be extractable from the market data, but only if the total is substantial enough that it doesn't get lost in the statistical noise associated with a relatively small sample size of a relatively large market. Large groups of assorted listeners are more easily and more reliably measured than small groups of listeners with particular demographic characteristics.

[ An aside: Radio is by no means unique in having its markets defined by others. Many industries are organized according to the

decisions of the trade press, which, in turn, sucks up to the "major players" who are its advertisers. For example, the auto companies needed the trade press to redefine compact cars into midsize cars and then into full-size cars; if the companies had done this directly they would have risked antitrust lawsuits, but since the trade press did it for them...]

TOPIC 2: WHAT THE RESPONDENTS KNOW, WHAT THE RESPONDENTS SAY

If you accept the premise that market research data is only as good as the accuracy of the information provided by the respondents, then dart boards and Ouija boards would replace ratings books in Program Directors' and General Managers' offices. I'm compelled to quote, out of context, Wha'd'ya Know? host Michael Feldman's first disclaimer:

All questions...have been painstakingly researched.
Unfortunately, the answers have not.

What respondents say about their listening habits may have a casual relationship with reality, but it is definitely a casual relationship rather than a resolute marriage. Most of the disconnect is NOT purposeful on the part of the respondents, but if they say it's raining outside, you'd better go to the window and check!

What respondents DON'T know is almost as disconcerting as what they do know that ain't so (to shamelessly steal another truism). What's the most populous county in the country: DON'T KNOW. There is an inherent problem when opinion polls are used to ascertain matters of fact. Opinion polls are OK at eliciting opinions IF they are properly designed and conducted, but the fact that 8.1% of the respondents say they listened to this station or that show doesn't make it so. All of the statistical analysis applied to the characteristics of the sample, to the characteristics of the non-respondents, to the lack of bias in the questions, doesn't do anything to account for incorrect answers.

I would surmise that radio station owners know this quite well. When a station puts up billboards or engages in other advertising and promotional activities, the purpose is as often for people to remember the name/slogan/format, etc. for the benefit of the pollster as it is to attract listeners. I suggest that Program Directors get beyond this concept an concentrate on programs real people will listen to rather than worrying about name recognition campaigns.

SORRY for rambling on at such length. I heartily solicit any reactions from AIRWAVES participants.

Joel_Runes@email.fpl.com

>I wonder if it is fair to say that the media could
>be held semi-accountable for the rapid growth of crime? Does
>reporting of such cases in the news fuel further acts?

It occurs to me that a great deal of those committing the crimes don't have a whole lot of time to devote to the media. What I think is contributing to the increasing crime wave is the decrease in actual parenting. My parents took the time to know where I was and what I was doing at nearly every moment. They made sure I was exposed to many points of view and involved in activities that furthered values they found important. My children are being raised the same way, and I have no fear of them contributing to the increasing crime wave anymore than my parents worried about me. I know I am giving them a good upbringing, teaching them the difference between wrong and right, and the value of doing what's right. I have to believe that if there were more parents - single and otherwise - who were truly involved with their children, the crime rate would decline, and that until then, it will continue to grow.

Although the media may not "cause" crime, I do think that it has been responsible for creating the impression that there has been a massive increase in crime.

Even though actual rates of violent crime have dropped in recent years in Canada, the public perception is that crazed criminals are roaming the streets of every town and city.

My inlaws came from Windsor, Ontario, and primarily watched Detroit news. They have since moved to a small town in northern Ontario but still watch the same newscasts off of the satelite. They honestly believe that they are at risk of carjacking, and kidnapping, and murder by crack fiends.

Between TV newscasts and daytime talk shows we are creating a perception that every person who walks our streets is a potential mugger or rapist.

I've travelled from coast to coast in both the US and Canada, and I know that this just isn't the case.

Hi, this is John Stewart from Audio Computer Information in Spring Grove, MN (A little like Lake Wobegon, but without the lake!). Every holiday season I switch over from writing and reporting on WBAL (Baltimore) and the Business Radio Network, and offer FREE "Cyber Santa" reports and advice for those first time computer buyers. These are done as phoners either live or ones you tape. I am not paid by any sponsors, and my main interest is to provide a fun and professional sounding bit to your holiday lineup.
FYI, I have more than 13 years in the biz, including on air with WTMJ in Milwaukee and Morning on WOAI in San Antonio. My books on tape for new users have been reviewed (nicely!) in major papers and magazines in the US and the UK. Please email me for more information. Radiojohn@MSN.com or Radiojohn@delphi.com. Let's have some fun this year!
Hope this gets posted this time, as it is being very well received in other areas! I will be on Triple-W radio network in Australia, and and being considered for NPR.

## 3180. Santa gets a consultant

Newsgroup: rec.radio.broadcasting
Date: 1995-11-28 00:00:00 UTC
From: TRRadio@aol.com
Message-ID: <49ea7n$88m@vixen.cso.uiuc.edu>
Source record: 28426

This was posted on 'Radio Rider' and thought you'd enjoy it.

"Santa...Meet Your New Consultant...."
by Corey Deitz
(First published in Radio Rider, Issue #14)

Hi Santa....I'm your new consultant. The home office hired me to fly in here a couple of times-a-year and give you my thoughts on how you can boost some of those sagging ratings. Oh, sure I know: you've maintained a pretty good rating with the "12 and under" demo for a long time, but Santa, babe, let's face it: it's not like you've had a lot of competition! Admit it: not many other old guys are running around dropping dolls down chimneys, now are they? Be honest: You're kind of winning the share you have by default. If someone comes along and challenges you, it could mean trouble.

Now look: I've done a little call out research...and your share of 18+ adults is just, well, pathetic. Our focus groups all show your credibility REALLY suffers with men and women, especially 18 to 49 and 54-plus is just a joke. Now, look: I've drawn up a few suggestions for you which I really feel are going to help a whole lot.

Firstly: LESS talk. I mean, how many times in any given conversation do you think it's necessary to say, "Ho, Ho, Ho?" One "Ho" is more than enough! According to my research, we're losing adults after that second "Ho". What we want to do is less "Ho" and more Music! And when the kids are sitting on your knee? Do some kind of "Santa relate" in 10 seconds or less. And don't feel like you've got to talk between every kid! A quick "Merry Christmas" is all you need, especially between siblings. What you don't want to do is risk boring them with a lot of superfluous chit-chat. The last thing we want are kids going over to the competition -if we ever have any.

Now, back to that music issue. When you're at the mall I want you to get those part-time helpers who take the photos to crank up the carols just a little louder. As a matter of fact, What I'm really thinking is "10-Carols-In-A-Row". If we have to, we might even consider speeding up each carol by 10% so we can fit another one into each hour and claim to play the MOST Christmas Carols ! Of course, we can't play just ANY Christmas carols and songs because some of them seem to test quite poorly. But, you know that "Grandma Got Run Over By A Reindeer" song? Yeah, I know it sucks but they LOVE it. We'll put that into a high rotation and hit it every 90 minutes or so. I'm thinking about a universe of music comprised of, say, 42 records. What? Yeah, I know there are hundreds of songs but hey: I'd rather play only the stuff that tested well....and nothing with any negatives. What do you mean

you KNOW there are other songs they like? This is no time for unscientific gut-reactions. Now, come on: if we're going to sure up your standing, we've got to go with what we know.

O.K. Next, let's get one of the elves to write up some nice signs with slogans like "Less Ho, More Carols", "10-In-A-Row Or Your Christmas Back", "More Music, Less Jingles". Oh, that reminds me: did I mention the Jingle Bells have to go? Yeah, people are really burned on those Jingle Bells you got from TM. How do I know? Well, I got 5 people together in a quiet room and conducted a FOCUS GROUP! Ever hear of one? You talk like you've been living near the North Pole! Do you have any idea how valid 5 peoples' thoughts are compared to the whole population? You get the right folks into a closed environment for 3 hours and what they tell you is almost like gospel!! NEVER doubt a focus group, Claus! I'm a CONSULTANT. I KNOW this stuff. What do you mean the last consultant told you to INCREASE the Jingle Bells? He cited WHAT research? No, I never heard of that research. Well, I guess we'll just have to agree to disagree.

So, that's pretty much it. I'll be back in 3 months to check up on you and see how well you've integrated these suggestions. I'd like to stay longer but I've got to catch a flight to PA. I've got a little furry guy in Punxatawney who's absolutely BLOWING his credibility when it comes to his predictions of Spring. Oh...by the way, that'll be $10,000. Merry Christmas!

Tripp Rogers

Since the FCC doesn't do anything to stations any more I'll just post the violations I observed today right to the net...the Powell Communications Company (whatever)...the PCC

Kudos go to Greenwood SC AM 1350 ( WLMA) for being the absolute WORST AM station I have ever heard. First of all they are off frequency somewhere between 50 and 100 hertz. Audio modulated at about 40% with loads of distortion, with frequency response worse that the most awful payphone you could ever imagine.

Second goes to WJES 1190 in Johnston SC who forgot to sign off at the correct time. We drove out of range well after their sign off time and they could still faintly be heard. Of course they are just simulcasting the FM and I guess they just totally forgot about it. So what else is new nowdays??? I guess they could give the AM to me and I could change the calls to WEWO or WOWE........]:), and hey, maybe I could eventually get some night time power....<ducking UNDER the ground system>
Actually their signal went a fairly long way tonight, but the skywave from WOWO and other stuff hadn't built in till later.

And the BIG one. WISW 1320.....gee at local sunset you are supposed to cut power to 2500 watts and go directional. NOT tonight . We were way west of the back side of the pattern and the signal was blasting in. HAD to be 5000 watts NON DA When I got home still that way. Where I live in West Columbia I normally have lots of skywave in the signal NOT TONIGHT. I'm sure the people at WIS-TV *WON'T* be pleased when they read this! I know they run a tight ship, and don't break the rules!

Powell (finding lots of illegal actions tonight)

# 3182. WEGQ to move transmitter

Newsgroup: rec.radio.broadcasting
Date: 1995-11-28 00:00:00 UTC
From: ASVIRSKY@frost.oit.umass.edu
Message-ID: <49ea7q$88s@vixen.cso.uiuc.edu>
Source record: 28428

I went home to Boston's north shore for Thanksgiving and saw a new tower under construction near the intersection of Routes 1 and 128. Further investigation revealed a sign proudly proclaiming American Radio Systems WEGQ 93.7's new transmitter facility. I would assume that they are still using the WCCM/ex-WCGY tower at the intersection of I-93 and I-495.

Does anyone know how old the current tower in Andover is? Has it been used for AM and FM for the same amount of time? Who owns the tower now, ARS or WCCM?

Thanks! Alex

## 3183. Those wacky request lines

Newsgroup: rec.radio.broadcasting
Date: 1995-11-28 00:00:00 UTC
From: robert573@dallas.email.net
Message-ID: <49ea7g$887@vixen.cso.uiuc.edu>
Source record: 28429

A friend of mine told me a story about a request show that was done on saturday nights, right before his shift started.

I think it went something like this:

Jock who hosts the show gets a request. Says he'll try to play it, but never gets to it. Guy calls back and says "You didn't play my song!" My friend who's on duty by this time, suggest the caller call back and request it again next week. Caller threatens to get local TV news station out to the radio

station and have them do a news story that states the station doesn't do what they promised to do.

Geee, some really weird people out there, ya know?

Then there was the call "I" got from some guy that goes something like

"hey I really like your station... you guys play g-r-e-a-t music, and I'm trying to make some tapes of some of these songs you guys are playing, but you keep talking over them! Please don't talk over the songs!"

Guy calls me back about an hour and a half later and says "hey you stopped talking over the songs... thanks!" But I hadn't stopped talking over them ... in fact I started talking over more of them (evil laugh)

I've never understood the humor in insulting people, especially people who
are fans of your radio station. That girl now knows you're the biggest
a**hole she's ever talked to (or not talked to, apparently) and has told
at least ten of her friends about the incident. You can bet they're not
big fans of the guest dj night anymore, and the station as a whole
suffers. Congratulations!

R & R publishes a salary survey every year, and breaks it up by format and market size too. Interesting reading for sure. Unfortunately, due to duopoly and consolidation, many positions listed have been combined or no longer exist at many stations.

The most recent listing was published in the September 8th issue.

Try 'Radio & Records'. They run the stats. you're looking for annually. In
fact, they just ran them several months ago. Try the 'Radio BB' on Prodigy and
the
BB Leader, Cyndee Maxwell. She writes for 'R & R' and she might be able to
give you what edition the salary stats. appeared. Good luck.

From: dk@crl.com
Message-ID: <49ea6g$86i@vixen.cso.uiuc.edu>
Source record: 28433

Vince Maffeo wrote the quoted material below:

" Would anyone like to comment on Westinghouse's plan for the Bay Area?

Pure speculation on my part: KCBS would be kept as is, since it is the #2 station in SF. KRQR would probably stay, given that it performs well, too, though I envision both station moving to the KPIX facility on Battery Street, moving out of the very expensive Embarcadero Center.

Even though KPIX(AM) puts a poor to non-existent signal into the San Jose region at night, making it not very useful in its inability to cover half the market, I'd think they would keep the talk format (AM/FM), since it has begun to gain momentum. Combined with the KCBS ratings the combo outdraws KGO -- a great thing to tell advertisers. I'd expect most office functions to be merged, resulting in cost efficiencies there, and reporters to overlap in the news area.

Again, this is pure speculation. I've observerd Westinghouse over the years, since they've owned KPIX for over 30 years. They prefer substance over style, so I don't expect their money to be spent on flash, only on substance.

Get a GE SuperRadio III ($40-50) from some place that will let you return it if it doesn't meet your needs. Try the radio with an external antenna - just a long piece of wire, going out the window if possible. It's a good radio for DX.

>point that he was at radio KABC, not KXYZ.

Reminds me of a time in the late 70s (I was at WMET/Chicago) when I used my 3-way calling to link the hotlines of WLS and WEFM. Fortunately for the purposes of my prank, both Jeff Davis at WLS and John Calhoun at WEFM answered their hotlines within a second of each other, and, each thinking the other had called them, proceeded to chat for about 15 minutes while I silently sat by, enjoying the dirt.

Then there was the inevitable "So, why did you ring my hotline anyway?" The answer..."But you called me, didn't you?...Oh, sh**!" Click.

Hopefully enough time has passed that if either of these guys sees or hears about this post, they'll find humor in it. BTW, these days I have more of a life and play on my computer, not my phone.

# 3193. December 1995 DX Audio Service

Newsgroup: rec.radio.broadcasting
Date: 1995-11-28 00:00:00 UTC

DX AUDIO SERVICE DECEMBER 1995
Informational Press Release

As 1995 rolls to an end, I can look back at all the issues that have been posted, and all the advancements that have been made in the DX Audio Service. In the past decade
we have set the benchmark for many of the talking magazines, and have taken the advancements of technology to the limits. We were the first magazine to utilize digital audio systems for production. We also started were the first tape magazine to use both Comrex and Zepher encoding for transferring audio over phone systems to the studio. As we end up 1995 we proudly announce the DX Audio Service WEB Page. The address on the Internet is: WWW.wcoil.com/~gnbc/ We are still working on the page, and uploading information. Most of this information is from past issues that members have asked to have in print, or items which don't "read well" in the magazine, (for example, frequency lists of FM stations from the 1940s). The pages have been designed to be as vanilla as possible so the graphics don't confuse computer speech
programs.

What is probably the most amazing thing is that the magazine still exists. When you consider the fact that everyone is a volunteer, and that there is no compensation. Wouldn't it be interesting to see some of the major broadcast operations in the world operate in this manor? I feel that we we have something very special in DX Audio
Service... people that care in providing a good sounding, quality magazine, on the subject of radio listening!

Here is what is on the December 1995 magazine.....

00:00 Introduction of the magazine by Fred Vobbe @ Address information.
01:19 AM Switch with Jerry Starr.
14:29 The Travellog with John Bowker. 1300 Kilohertz wrapped up from previous edition.

45:02 Close of side one by Fred Vobbe, and funny job opening at WWV.
46:30 End

00:00 Open of Side Two.
00:10 DXChange with Fred Vobbe (Buy/Sell/Trade)
01:01 Marketscope with Phil Wayne. Los Angeles radio with guest host Marc Marino.
08:20 Historical Moments in Radio. RCA High Power Plan?

13:20 News and Notes from the NRC
18:31 International DX Digest with Bruce Conti
Looking at the HCJB test, and other rare DX
23:16 Musings from the Members
29:36 DXAS Sidebar with Jarry Starr. Jerry explains the status
of WJDM 1660, and what they will be doing in the future.
33:44 Sports Networks Report with Ken Onyschuk
38:05 Call Letter Battles in the Industry with Chris Conner
44:31 More News and Notes with Fred Vobbe
46:30 Close of December 1995 DXAS - Happy Holidays

For those of you that are not familiar with the National Radio Club, let me take the opportunity to let you know about the club. If you know about the National Radio Club, we'll see you in 30 days.

The National Radio Club's is made up of over 750 members, worldwide, that enjoy listening to broadcast band radio. The National Radio Club is the worlds oldest, and
largest, medium wave DX club. The club was founded in 1933, and is a member of the Association of North American Radio Clubs.

The club is supported by volunteers that write and publish a printed bulletin of news and information called "DX NEWS". The National Radio Club also has a books for
the blind service called the DX AUDIO SERVICE, which features information from DX NEWS as well as other sources in the radio field.

The National Radio Club's publication center has a vast library of technical information, as well as back issues of publications which are full of valuable information.

Our goal is not to be a profit making business, but a profitable source of information on broadcast radio. There is no better organization for news and information about
broadcast radio than the National Radio Club.

For more information about our organization, contact Kenneth Chatterton at the National Radio Club Publications Center. P.O. Box 164, Mannsville NY 13661 USA. Sample issues of DX News Magazine and the DX Audio Service for $5.00. Be sure to ask for both, and also a catalog of reprints from the publication center.

This information must be included in the Station's Application for Construction Permit, which must be in the Station's Public File at its Main Office/Studio location. RF Radiation calculations are required by the FCC in applications for new stations and for changes to existing stations. This goes for AM and FM stations, as well as Television.

High-gain antennas, as used in this case, to bring the 60,000-watt transmitter output power up to the 1,770,000-watt Effective Radiated Power have a pretty narrow beam going out horizontally, with very little of the power going down toward the ground. With a combination of distance (height of the antenna above where you are), vertical pattern beamwidth (how much downward radiation vs main beam) and power limitation, most arrangements like this can be made to work.

The main problem encountered in the field comes from the main lobe (beam) signal reflecting off of nearby surrounding structures, especially metal structures as tall or taller than the antenna. This can cause considerable signal to bounce back under the tower and all over the place. It would be prudent, upon completion of construction, to have the areas around the antenna that are accessible by people measured by an experienced engineer with a Radiation Survey meter to be sure that the RF levels do not exceed FCC/EPA/IEEE/ANSI standard limits.

One thing I've been wondering about the market definitions: I've noticed that the DMA's and ADI's for television don't make any sense at all for radio. There's counties in Nevada that are in the Denver DMA, for example. Do they have something like this for radio, where every county is assigned to one market and only one market?
The new M Street is coming out any day now, and I may devise my own market definitions depending on which stations I think are audible in each county.

My boss has that same idiotic attitude. Question is, if you don't give out your fax number, how will you receive all that stuff that COULD BE a moneymaker? If you look at it right, everything has potential. Take those press releases and give them to your sales department. As for PSAs, what ever happened to "the public interest"? It's the sort of narrow-minded thinking this post demonstrates that limits so many people to mediocrity.

From: dk@crl.com
Message-ID: <49ea6t$877@vixen.cso.uiuc.edu>
Source record: 28447

Steven D. Kalb wrote the quoted material below:

" takes 10 seconds to sort a piece of mail and an additional 10 seconds
" to open it that calauclates (at $6.00/per hour) to a net cost of
" $0.066/per message vs. $0.05/per page for a fax. That does not take
" into consideration the cost to dispose of the additional evelopes, etc.
" all of which does ultimately have a cost to someone.

Having sent many faxes cross-country I can attest to the fact that overall there doesn't seem to be much savings between the cost of sending a fax and sending mail. Let's say you sent 3 sheets in the mail. Cost is 32 cents plus about 3 cents for the envelope. Faxing at 14.4 kbaud requires about 3.5 minutes (rounded to 4 minutes by the long distance company). Faxing halfway across the country would cost about 48 cents per fax, but only after 11pm or on weekends. Also add to the cost the number of times the fax must be re-sent to machines that botch it or otherwise don't handshake properly and the cost goes up further.

--
(c) 1995 Some days you get the beer,
David Kaye some days the beer gets you.

[Moderator's Note: A minute per page at 14.4? I generally get a page out in 20 seconds or so (well, a text page that is) in fax mode. Even faster in data mode. Bill]

Re: Memories Of L.A. Radio: 1960-1966:
This message is, in part, in response to article
<489mnu.4HS@Vixen.cso.uiuc.edu., written by John Rethorst,
jcr2@Cornell.edu.
>
>From the time I started enjoying radio until moving away.
> Listening post was Pasadena.

When my friend Larry Hart of Inglewood, CA, sent me this message and the subsequent replies it provoked, I couldn't help but throw my comments into the pot as well. Thanks to Larry for forwarding them, as I am not online yet.

KLAC experimented in the Fifties with a Top 40-sounding format for a very short time. I understand it used some form of reverb, but I'm not sure of its musical emphasis; it may have still been MOR. The well-known team, Lohman and Barkley, was
also born at KLAC around 1964 (Roger Barkley was PD at the time).
KLAC changed format to "Two-Way Talk Radio" in 1966, and went country in September of 1970.
KFI/640: Was a very old-line MOR station in its day, featuring programming from the NBC network, and--yes--Dodger baseball (until 1974). And around 1962, Vin Sculley even hosted a daily sports show from 5:30-5:45 Mon.-Fri.
In late September of 1968, a new KFI emerged. It was more upbeat, and they were what would have been "Hot AC" in those days. Air talent included Lohman and Barkley, Jerry Bishop, Jay Lawrence (now at KTAR in Phoenix), Robert L. Collins, Ron Thompson, and, I believe, Michael Hunter. Great-sounding station during the short time that that sound and those people were associated with it.
KFI, although MOR until 1977, always flirted with Talk Radio in some time slots. The Night Owl program with Ron McCoy, which was on the air as early as the late Fifties, was very close to what the "Nitecap Show" with Herb Jepko would sound like years later on KSL. (No coincidence, as Jepko worked for KFI during that time). Hilly Rose hosted an evening talk show in the mid-Seventies. And even in the Top 40 days, Dave Diamond manned the phones on Sunday nights. So when they finally went talk around the clock in 1988, it should have surprised noone!
XETRA/690: XETRA, (which liked to call itself XTRA), was XEAK in the late Fifties until 1961. They played rock, but like most stations from

across the border, ran religious programming in the early evening, just when the kids would have been listening. Their parents could do housework to "Fats" Domino, but teens did homework to "The Rosary Hour." With competition from KRLA and KFWB, this situation could not last.
During the first week of May, 1961, XEAK did some outrateous things. One day, for example, they played only one song: "Mopity Mope" by the Boss Tones. They also told listeners to tune in on Saturday morning, May 6, when they would replay the classic 1951 playoff game between the Brooklyn Dodgers and the New York Giants. During the game, they announced that when the game was over, a new sound would debut. They assured us, "This is not a huckster''s pitch," and encouraged us to listen while radio history was being made. And it _was_ historic: XEAK became XETRA--"XTRA NEWS 690."
While a trend-setter in its day, ultimately it was a hard thing for XETRA to cover L.A. and San Diego from studios in Tijuana. When a newsmaker was to be contacted, it would sometimes take hours for the international phone call to be made and returned. Fine, when you're the only game in town, but when KFWB went all-news on March 10, 1968, and KNX followed on April 2, it was time to throw in the towel. On April 2, 1968, XETRA started playing Beautiful Music, which continued until Sept. of 1980. (The Beautiful Music format change has its own interesting story. Another time.) The post-1980 period has been well-documented in other messasges.
Oh, and no, "Wolfman" Jack was not on XETRA or XEAK, I'm just about certain. XEAK had a great signal, but not much in the way of personality.
KMPC/710: Had a unique sound and lots of talent. Who could forget

Johnny Grant, Ira Cook, Wink Martindale, Roger Carroll, or Johnny Magnus who did "The weather with a beat"?
KBIG/740: Was beautiful music until 1974, also using the call letters KGLN. There was even a time when the FM was KBIG and the AM KBRT. Guess we were supposed to notice they were BIG and BRIGHT.
KIEV/870: Played some pop in the early Sixties, and they were Oldies in the Mid-Seventies. There was always some religion mixed in, including Roy Masters. Until 1961, they ran only a kilowatt; they changed to 5 at that time, and now they're applying for 30.
KHJ/930" Had two rock formats, one in 1959-60, the other from 1965-1980. Between those periods, they were noted for excellent news coverage, MOR music, programming from the Mutual Network, and- - have you forgotten?--special-events coverage and long-form news coverage from the RKO Network.
Evenings, at various times, as with KNX, talk programming was carried with hosts Joe Dolan and Michael Jackson. (Jackson had been at KEWB in Oakland, where he did talk on the graveyard shift, while the station rocked around the rest of the clock; he's now at KABC.) Old-time radio was aired on Sunday afternoons.
On April 27, 1965, "Boss Radio" came to "Boss Angeles", and the station rocked until 1980. The original lineup: 6 to 9 AM--Robert

W. Morgan 9 to noon--Roger Christian Noon to 3--Gary Mack 3 to 6--The Real Don Steele 6 to 9 PM--Dave Diamond 9 to midnight--Sam Riddle Midnight to 6 AM--Johnny Williams

This, of course, was just the original lineup. A lot of great talent was on the air daily on KHJ during that period.

KFWB/980: Great Top 40 station; in 1958, showed everyone how it was done. Gary Owens was mornings for awhile there. Other names of note: Joe Yokum, Bill Ballance, Gene Weed, plus the inimitable B. Mitchell Reed; too many good people to mention here; leaving some out is inevitable.

KFWB became an all-news station on March 10, 1968. But what a bizarre station it was just before that! In the mornings, Lohman and Barkley were playing Vikki Carr and Frank Sinatra, and at night, BMR and Dave Diamond were playing the latest in psychedelic rock. With KHJ dominating and Westinghouse turning KFWB all-news, L.A. was spared the torture of an even longer, more agonizing death of a former giant: KFWB.

Oh, and while I'm on the subject of KFWB: One of the real innovators there was Elliot Field. His humorous afternoon shows were done from poolside (or so the sound effects would indicate), and the jokes were first-rate. Classy stuff.

KGBS/1020: Was daytime-only rocker KPOP in late Fifties. Other formats: MOR or beautiful music: 1961-1966; country: 1966-1968 (Bob Kingsley was one of the jocks); Top 40 with eventually some talk mixed in: 1968-1974; Gentle Country: 1974-1976; 24-your-a-day Hot CHR as KTNQ (1976-1979), and Spanish to the present, keeping the KTNQ call letters.

KNX/1070: One of the highlights of Bob Crane's morning shows was the coughing fit he would have in the midst of cigarette commercials. Probably gave the executives fits as well. Funny and cool.

KRLA/1110: In 1959,there was a station playing country music out of Pasadena called KXLA. They ran 10,000 watts days and a thousand watts at night. Then came a daytime power increase to 50 kW, a long period of promotions and contests, and a brand new rock format. Among the notables at the mike were "Emperor" Bob Hudson (remember Hudson and Landrey?), Casey Kasem (who had just come from KEWB in Oakland; I don't believe he was ever at KFWB), Dave Hull, Jimmy O'Neal (of "Shindig" fame), Bob Eubanks, Wink Martindale, Dick Biondi, and even Bobby "Boris" Pickett for a short time. Later talent would include Shadoe Stevens, Bob Dayton, Russ O'Hara, Johnny Hayes, and the wonderful Cy Holiday. Their news department in the Sixties and Seventies included Lou Irwin, and, for a whild, a comedy troupe featuring Harry Shearer called the Credibility Gap. (The Credibility Gap debuted on KRLA the day before Bobby Kennedy was assassinated, forcing a five-day return to straight news).

KRLA was never The Big Station of legend, but it was listened to a lot, especially as they got on the Beatle bandwagon early, and Dave Hull was just as important to teens in L.A. as Murray the K. in New York.

KRKD/1150: Became nationally known in 1968 for the radio actuality

of the assassination of Robert F. Kennedy. They were a Mutual affiliate, and their reporter was the one on the scene at that fateful moment. They shared time with KFSG, a religious station that had been licensed since the 1920's. Nightly at 7 o'clock, KRKD would cease operation on 1150 and KFSG's evening broadcast would begin. I believe this changed in 1970, when KRKD became KIIS.
KGFJ/1230: An innovator even in the Fifties. Art LeBeau and Hunter Hancock brought Rhythm and Blues to an eager young audience on KGFJ. Soul through 1994, it's a legendary station which has recently fallen upon hard times.
KPPC/1240: This station, licensed in the 1920's, ran only a hundred watts. KGFJ on 1230 and KGIL, San Fernando, would reduce their power on Sundays to accommodate KPPC. In the late Sixties, KPPC played progressive rock on Wednesday nights, did religion or progressive rock on Sunday, and was silent for the rest of the week. Unique, indeed
KWKW/1300: Spanish. Carried L.A. Dodgers baseball in Spanish as early as 1964, if memory is correct.
KTYM/1460: Not just an ethnix mix, but even some Top 40 with Godfrey, and later Rick Ward. And the original home of Roy Masters.
KPOL/1540: Elevator Music!!!!! (The WPAT of Los Angeles.) Then more upbeat in late 70s, turning country in Sept., 1980, as KZLA-AM. Now Spanish.
KDAY/1580: Somewhere between rock and soul in the ealy 60s, this was the last major-market home of the legendary Alan Freed. It became a full-fledged soul station but was only a daytimer; thus, it couldn't compete with KGFJ. In 1966, they were "All- Request Radio) with an oldies and later an MOR twist. In the summer of '68, they evolved into Top 40, and added nighttime hours with a very directional 10 (later 50) KW power output. (Program Director during most of the Top 40 format was Bob Wilson, founder of Radio and Records magazine).
In 1971, KDAY leaned to the AOR side, until a return to soul in January, 1974.
Other stations of note:
KBLA/1500: This Burbank station increased its power in 1965, and started rocking. Some of the notable talent included Humble Harv, Dave Diamond (he wasn't at KHJ for long!(, and Bob Dayton (later of KRLA). KBLA also, in 1965, had Roscoe on in the afternoons.
In June, 1967, KBLA switched to country and became KBBQ; in 1972, with a major publicity blitz, moved back to Top 40 as KROQ, with air personalities Sam Riddle, Charlie Tuna, Jimmy Rabbilt, Steve Wood, and more. Silent since the late 70s, there have been persistent rumors of its return, but none have panned out. The KBLA call letters are now found on 1580, formerly KDAY.
XERB/1090: Religion and country till 1966. Early 1966, XERB joined XERF and XEG, all carrying "Wolfman" Jack during the wee hours. Went soul in August, '66, with the Wolfman as main talent; also flirted with Top 40 around 1969, and even some AOR. Major jocks of the period included Larry Dale, Ray Moss, The Magnificent Montague, legendary blues performer/producer/talent scout Johnnie Otis, Buddy Lowe, and others. Even James Brown and Joe Tex had weekly shows at one time.

XERB became XEPRS (The Soul Express) in the summer of 1971. Featuring Michael Paine ("Stay black till I get back") and other superb talents, its format was short-lived. Oldies, country, and finally Spanish were their major formats.

From 1975 to 1983, XEPRS provided English programming during evening and early morning hours. A major blow was the abolition of religious programming on Mexican radio in 1979. Evenings were then spent hawking oldies record packages and playing oldies, (mostly from those same packages. They wanted you to BUY!)

Spanish since 1983, few English words have been spoken, maybe with the exception of "Express",, and "Budweiser."

I have tried to touch on the major, and most fun, points here. Have I left anything out? Absolutely, both deliberately and unintentionally. Thanks to John Nethorst for starting the ball rolling. And "Gracias" to the other commenters as well. Even to Steve Dahl, who I worked with ever so briefly in Bakersfield, CA, at KAFY Radio. Even loaned him five bucks to get home to Palmdale once, but my big Chicago radio break never came . . . Oh, well . .

>> : Bulls clearly.
>
>ACtually you don't need anything special .. What you have to do is
get away from the WRKO signal on 680 in Boston. It is 50 thousand
watts day and night directional to the city from its stransmitting site
northwest of the Center of the City. So go to the west or north of it
in your car and tune in 670. There should not be a problem getting
MAQ with just a fair radio if you are away from the 680 interference.
Someone suggested the GE superadio. THat's good, but if you are right
in the path of the 680 signal you're still not going to get maq.
good luck.

>
>Bob Gerhard
>PD: KBAT/KQIP, Midland/Odessa, TX

Hope you boss doesn't read this thread. Take those press releases and give them to your promotions manager. Make him/her develop station promotions around the events and THEN give them to the sales department to sponsor the stations participation and sponsor the giveaways you'll dictate you need for them. That way you get noticed, you SERVE instead of TAKE the public and sales then can take it upon themselves to either do their job or look stupid next to you doing yours. The 'public interest' went out with the notion that it took a broadcaster to broadcast. When the mind set went from programming (serving the audience) to sales (ordering the audience) the audience became unnecessary. Which all PD's know is not the truth. A person with that mind set will ask why a client won't buy when he doesn't get response since the numbers are so good while the programmer will ask why the numbers are so good when the clients aren't getting responses. It's perspective. Used to be that broadcaster managers were responsible for considering both aspects of radio now they only consider the sales part. Luckily that narrow minded thinking is pretty well housed in owner run stations. A manager who worked his way up is more likely to see both sides while an owner who bought his way in is only likely to see how he made it and not how it is made.

Larry,
You left out one of KRLA's all time great air talents Jimmy Rabbit and KRLA was also the first AM station in the country to use automation after midnight on a show called Collage where they were the first to play the long version of the Doors Light My Fire and the Chamber Brothers Time has come today! Lee Baby Simms also worked there. I wonder if anyone knows where Simms and Rabbitt are these days?

Alfredo,

I couldn't tell from your question if want to know what happened to Lee Mirabal in YOUR market, or just in general.

Her show isn't carried in my market, but I used to listen to her when she was part of talk-net (NBC) many years ago. She followed brainiac Bruce Williams.

Anyway, unless something has happened in the last couple of days that I'm not aware of, she still has her Monday through Friday show.

Here's where you can get it...LIVE!

http://www.audionet.com

This is a cool sight to check out. Lee's show is on live beginning at 9am.

Hope this helps.

## 3210. Grand 'Ol Opry - show heard in NYC?

Newsgroup: rec.radio.broadcasting
Date: 1995-11-29 00:00:00 UTC
From: Michael Cohen <mc446@delphi.com>
Message-ID: <49gtd8$d2h@vixen.cso.uiuc.edu>
Source record: 28310

The NY Times had a nice article last Sunday on the Grand 'Ol Opry, which has now been on the air for 70 years - the longest running show in radio history. However, true to form, the Times failed to mention JUST WHERE ON THE DIAL ONE MIGHT HAPPEN TO TUNE IN THIS SHOW, or if it's not on the air in NYC, mention that fact either.

Can anyone tell me where I might find the Grand Ol' Opry on the NY radio dial?

[Moderator's Note: Try WSM in Nashville Tn. 650Khz, 50kw. Only problem in NYC will be WFAN on 660. They are also on satellite. Bill]

From: EDNSTRASSBERG@cahners.com
Message-ID: <49gtdd$d2s@vixen.cso.uiuc.edu>
Source record: 28313

I just bought one and I'm enjoying it, although I sure wish I could find the source of human-made noise that screws up AM reception in my neighborhood until after midnight every day.

I have another question though. I find that certain local AM stations that come in quite acceptably at night on ordinary portable radios in my house are riding on very high levels of co-channel interference when I try to listen to them on the SuperRadio. (That is, on the SuperRadio, these stations come in on top of a 2 or 3 Hz beat "note.") A good example is WUNR, which gets wicked interference from WWRL on the SuperRadio but not on a garden-variety Realistic portable. Don't be too quick to say, "well, of course; the SuperRadio is much more sensitive; what did you expect?"

I believe that if the beat note is audible on the SuperRadio, it should also be audible on an ordinary radio unless the ordinary radio has much better AGC than the SuperRadio (patently false) or unless the SuperRadio's AGC acts much more slowly than the AGC on the ordinary radio (I don't think it does).

I have not done side-by-side tests and maybe the answer is as simple as my having the axes of the ferrite loop antennas in the two radios oriented differently, resulting in the two radios receiving the desired and interefering signals with different relative amplitudes. Nevertheless, if someone can shed some light on this phenomenon, I'd like to hear an explanation.

Some of this is old news but I thought I would post it anyways.

WXKR, X94.5, (Classic Rock)
Last summer WXKR fired Jeff Lamb and Mark Benson and brought in the syndicated Kevin Matthews show. Eventually the flag ship station that was carrying Kevin Matthews switched his show from the morning until afternoon drive and WXKR was playing the show in the morning on a tape-delayed basis. But now, WXKR has brought in a local host, Scott Sloan. Scott Sloan does his show from 6-10AM and it is called "The Sloan Zone".

WVKS (KISS-FM) 92.5
WVKS has its annual Toy-A-Thon. This is a charity even-Radio-Thon to raise money for Toys for tots. I was on hand for the whole weekend, volunteering, taking pledges. WVKS raised over $50,000 and reached its goal for the seventh straight year.

## 3216. Rating Arbitron

Newsgroup: rec.radio.broadcasting
Date: 1995-11-29 00:00:00 UTC
From: senator@well.com
Message-ID: <49gtct$d24@vixen.cso.uiuc.edu>
Source record: 28316

Has anyone else read the item titled Rating Arbitron in the November 15 Radio World? It mentions a study released in October, done by Audits & Surveys Worldwide recently called thd Arbitron Radio-Schedule Audience Estimate Reliability Study, said to be the fourth such study done in 20 years. Covered 30 metropolitan areas, 104,166 diaries, and 39,600 schedules. The study "concluded that radio's favorite ratings system is a 'valid and reliable tool' for estimating the size of the radio audience."

Then--wait for it!--the item mentions that Arbitron contracted for the study to be done.

Do you know the sound of one hand clapping?

From: talk1370@aol.com
Message-ID: <49gtde$d30@vixen.cso.uiuc.edu>
Source record: 28318

To anyone who wants to pick up Stern in Ontario...
'KB's directional pattern is such that it screens out both the north and south shores of Lake Erie below Buffalo (sharp null to the west/southwest from the transmitter in Hamburg). So if you're anywhere from about Burlington westward you'll get little or nothing on 1520, and the signal is getting splattered by the local multilingual station on 1540 in Metro Toronto itself.
Having said that, one more piece of bad news...
'KB's contract to carry Stern expires at the end of this year. They've been advertising for a new morning host or hosts to replace him, since he hasn't been delivering the numbers against strong local talk competition in Western NY. (He does a little better on his Rochester station, but still underperforms the rest of that station's programming as well.) Haven't heard any announcement on who the new morning guy on 'KB will be, or if he'll be in place in time for New Year's Day (the longer they wait to make the announcement, the more you wonder) but they obviously don't see Stern in 'KB's long term plans.

Bob Smith, middays WXXI-AM 1370 Rochester NY

# 3220. WSUN Tampa-St. Petersburg goes all sports

Newsgroup: rec.radio.broadcasting
Date: 1995-11-29 00:00:00 UTC
From: JeffM@sanctum.com
Message-ID: <49gtdi$d37@vixen.cso.uiuc.edu>
Source record: 28320

WSUN MAKES A SPORTS TRIO

St. Petersburg Times, Nov. 29, 1995

by Roger Fischer

For a while, it's been just a lot of talk. Now WSUN is a lot of sports talk.

The 10,000-watt station becomes Tampa Bay's third all-sports talk station today, kicking off the new format with "The Fabulous Sports Babe," former bay-area sportscaster Nanci Donnellan, whose syndicated ESPN show will air from 10 a.m.-2 p.m. on WSUN-AM 620.

As with any format change, there are victims. This time the big name is Bob Lassiter, who has been with WSUN since January 1993.

Lassiter's 2-6 p.m. drive-time slot will be filled by a simulcast of the Scott Brantley-Steve Duemig sports talk show that airs on WFNS-AM 910. WSUN and WFNS are linked by a joint sales agreement and have been sharing programing. Also canceled: the 10 a.m.-2 p.m. Hooter's on the Radio show and the 6-8 p.m. show of psychic Gary Spivey (who must have seen it coming).

"We just made a business decision to change directions," said Todd Leiser, general manager of Cox Broadcasting's WSUN, WWRM-FM 94.9 and WCOF-FM 107.3. "We've seen the emergence of sports programing to be popular around the country. And having two stations allows us a lot of flexibility in accommodating programing from various sources."

As a general talk station, WSUN has gained a slight edge over competitor WFLA-AM 970 in the 25-54 age bracket, the most widely used target audience among general-interest radio stations. The bulk of the growth occurred when WSUN signed on as flagship of the Ron & Ron Radio Network. Ron Bennington and Ron Diaz will continue to lead off WSUN's morning, even though the show's slant is more on humor than sports.

Changes at WFNS are minimal: Todd Wright, the noon-3 p.m. host, will expand his Sports Drive to 10 a.m.-2 p.m., replacing and competing with Donnellan. The remainder of WFNS' schedule remains intact.

Having a third sports station "really doesn't change things," said Rob Weingarten, program director for WNZE-AM 820 "The Team." "It will be the Same product. . . . I'd be more concerned if they were bringing in more people from the outside to improve the product."

Weingarten said discussions are under way to localize WNZE's morning show, which currently comes from the One on One Sports Network.

## 3221. What is WOWO change all about?

Newsgroup: rec.radio.broadcasting
Date: 1995-11-29 00:00:00 UTC
From: cbmbest@ix.netcom.com
Message-ID: <49gtdj$d38@vixen.cso.uiuc.edu>
Source record: 28321

I am new to the newsgroup and have just been picking up pieces of the WOWO discussion. Have they lost their clear channel status. Are they cutting power and/or changing their pattern? Was it FCC instigated?

Thanks
Ray in Des Moines

[Moderator's Note: Anyone want to post the 'capsulized' version of this story for Ray? Bill]

# 3222. WTD: Manual & Power Supply for Broadcast Audio System 20 studio console

Newsgroup: rec.radio.broadcasting

In article <49gtdg$d31@vixen.cso.uiuc.edu>, dcdoc@aol.com says...
>
>Reply-To: dcdoc@aol.com (DC DOC)
>
>Does anyone know what happened to Tampa station 620 WSUN?
>Today the Hooters show and Bob Lassiter were gone and replaced by a
>simulcast of sports radio 910.
>What happened?
>Where will I be able to find Bob Lassiter?
>

I did hear in advance Monday night that 620 would change formats as of Tuesday 11/28. The station will still carry Ron and Ron, but both Hooters and Lassiter are out.

Perhaps this has something to do with what B.L. was talking about when she "stopped by" Bob's show and mentioned that new people would soon be on the station. At that time, she said that she couldn't disclose details. I wonder if she was excited about losing her airtime.

Just what we need, more sport yakking. I must say that King Moose will be missed. I hope he does pop up elsewhere...

Frog.

# 3224. Need Video of WSVN-Miami Newscast

>sea? Examples:
>KFI Los Angeles 1A ND1
>KNX Los Angeles 1B ND1
>KNBR San Francisco 1B ND1

Unless they have built a new site, KNX has a directional array...In Torrance, I believe. KNBR has a two tower array in Redwood City...the taller of the two has a Franklin "hat" on it. It might be easy to get the KNBR site wrong since it is directly next door to the many towers of the former KGEI shortwave station. KFI has great ground conductivity at that site on the L.A./Orange County border, and its signal does pretty darn well on land as well as at sea ;>

[Moderator's Note: M-Street *and* the FCC database both show KNX and KNBR as non-directional. Some stations have a smaller auxillery tower that is generally not used. WGN, WBBM and WMAQ in Chicago do that. Bill]

## 3227. '70's DJs

Source record: 28329

Jay Marvin asked..so...
Lee "Baby" Simms is afternoon drive at oldies KOOL AM/FM,
Phoenix....arrived at KOOL-FM about 2 years ago to replace Scott
Drake in morning drive...moved to afternoon drive on KOOL-AM about a
year ago...and in late summer
replaced Machine Gun Kelly as the stations began a 24-hour simulcast.
Jimmy Rabbitt is an open question. Last year I began a
KHJ "where are they now" thread...and no one knew for sure. A couple
of people said they lost track of him in Aspen, Colorado in the 70's
and one thought he was dead. Even
Johnny Williams(overnights at KHJ), who has a great
"Where Are They Now" web page (www.440int.com/)
that tracks the careers of legendary jocks has Jimmy listed as
missing in action after the 1972 KHJ stint.

# 3230. Re: LOOKING FOR RADIO JOBS:

Newsgroup: rec.radio.broadcasting

Reply to Anyone Looking for Work ... A couple of Ideas:

R&R is a good place, but not everything is listed (no duh?!). It is a good idea to find out what might be out there and areas to look in to.

Going to a GOOD library or job resource area and getting copies of the pages from a media contact book for the area you're interested in then calling to find out who the current director of the department you're interested in is ... then sending out your tape/resume or resume and great cover letter saying if they're interested you'll forward a tape or a resume and great cover letter ... whatever you're looking for.

THEN FOLLOW THROUGH!

Good Luck
E. A. Shepard

# 3232. More on KPLX's possible format change

Newsgroup: rec.radio.broadcasting
Date: 1995-11-30 00:00:00 UTC
From: robert573@dallas.email.net
Message-ID: <49jna0$q1q@vixen.cso.uiuc.edu>
Source record: 28332

Despite a posted notice from Cannon@onramp.net who said that the news of a possible format change for KPLX was a rumor started by competition, there is more information that says a format change is coming. Here's what I have been told by sources, as of today... some sources nameable, some not... (grin)

Billboard Magazine is reporting that Bill Evans, morning show host at KPLX, quit, along with the music director and afternoon drive Chris Huff. Theresa Whitney is now acting MD at KPLX

Also I have heard that KPLX and KLIF have signed up for extended traffic coverage services, as well as KLIF signing up for the all news AP network service.

KPLX has also supposedly hired a handful of low pay DJ's.

Also KPLX recently sponsored a concert over the past weekend, and on the back of the concert tickets, the following message was stated: "KPLX - We're country now... but not for long!"

KLIF has dumped their affiliation with Westwood One, meaning they are no longer an NBC affiliate.

Also, the music reps at KPLX indicate a format change is in the works.

I look at a couple of things here... first, KPLX could be changing to an all-talk FM station, which would be the the only all talk FM station in the D/FW market.

Secondly, KLIF could be planning a change to be an all AP news formatted station.

As to when the change might occur at KPLX, it is my guess that it will be right after Christmas, or New Years.

" >I wonder if it is fair to say that the media could
" >be held semi-accountable for the rapid growth of crime? Does
" >reporting of such cases in the news fuel further acts?

This assumes that crime is growing. Statistics point the other way:
crime is now at its lowest level since 1974, more than 20 years ago. It
seems to vary with the number of males in the age range of 16 to 30.

I think that people learn by example, and if they see TV shows every
night wherein people are pointing guns and shooting each other on screen,
viewers would likely imitate this in real life.

# 3237. Kids Radio has big new Partner

Newsgroup: rec.radio.broadcasting
Date: 1995-11-30 00:00:00 UTC
From: StellaStar@aol.com
Message-ID: <49jn92$q06@vixen.cso.uiuc.edu>
Source record: 28337

Radio AAHS, the 29-station satellite radio network for kids and families, has a new business partner. ABC Radio networks and Minneapolis-based CBC, the Children's Broadcasting Corporation, announced this week (11/27) that they've entered a joint agreement, under which ABC will provide the 24-hour Radio AAHS children's network with financial and technological support to develop operations like affiliate sales, national advertising sales, international sales, research, marketing, promotion and technology.
CBC will continue to provide programming for the Radio AAHS format, including interactive "Brain Game" quizzes, interviews, discussions, educational features, and live programming originating from Disneyland and Walt Disney World. Affiliates include stations in major markets like D.C., Los Angeles and Detroit as well as a range of others from Anchorage, Alaska to the newest affiliate in Wheeling, West Virginia.
The AAHS affiliation with Warner, which produced Radio AAHS monthly magazine and CD, ends with the December issue.
BTW, VOA (Voice of America) this week did a cute little feature on AAHS, focusing on the Baltimore/DC affiliates.

(Truth in posting: I, Stella, work parttime at Radio AAHS, but like most of the staff didn't know about the new partnership until it was announced Monday. This news release came out in the paper the same day I got the word )

Stella (just a kid at heart) Starr

[Moderator's Note: With ABC and Disney being partners, this is a natural. Hey, WLS FM is changing formats, maybe AAHS will be the format. Naw, they don't have the imagination for such a move. Bill]

Steven D. Kalb (kalb@ix.netcom.com) wrote:

: I have to take exception to Mr. Byrd's comments regarding fax machines
: and "useless" mail. Mr. Byrd fails to take into consideration the
: amount of time it takes to sort through piles of evelopes in the mail
: room (or front desk) many of which are improperly addressed. If it
: takes 10 seconds to sort a piece of mail and an additional 10 seconds
: to open it that calauclates (at $6.00/per hour) to a net cost of
: $0.066/per message vs. $0.05/per page for a fax. That does not take
: into consideration the cost to dispose of the additional evelopes, etc.
: all of which does ultimately have a cost to someone.

And the person that sorts through the dozens and dozens of fax items is
working for free? Don't you pay them $6.00 an hour as well?
Plus, you neglected to figure in the cost of the paper itself, the delivery
cost of that paper, or the gas, wear and tear of the vehicle in picking up
same, plus labor expenses.
If you're going to figure it out, do it right for both arguements.

: With regard to the comment we only accept faxes for those things that
: make us money I would suggest it is appropriate to remind the author we
: are in the information business. Absent that information (most of which
: may be useless most times) we have nothing to sell. By that logic we
: might want to toss out the AP machine. In and of itself it does not
: create dollars.My theory has always been I would rather throw something
: out than miss out on a great sory idea because I didn't want to spend
: the nickle. You can't make money unless you spend money.

If you throw out the AP machine, let me know, I'll be happy to disconnect it
and take it out for free and you don;t have to pay the $6.00 per hour to
have it done. I'll install it at our place, next to the UPI downlink and
we'll make money with it like we do with UPI. We'll sell sponsorship for the
newscast. Brings in a good buck.

: Incidentally, there is a gadget on the market that plugs onto a HP
: inkjet printer that turns it into a fax printer. My recollection is
: that it goes for about $150.00.

You must be assuming that we have a thermal paper fax or something.
We used a plain-paper machine. In order to spend the $150, I'd have to spend
$500 or more for a cheapo computer and printer for something to connect the
item to.

If we're so into information, why don;t we just give Bill a rest, change
this to alt.radio.broadcasting and mull through all the "1-800 I'm HORNY!"
posts and spams. It'd be just like giving out the fax number to anyone who

asked.

: All the best!
: Steven D. Kalb

From: Tom Leparskas <102412.3230@CompuServe.COM>
Message-ID: <49jn9b$q0m@vixen.cso.uiuc.edu>
Source record: 28339

Was reading Drake radio thread and Bob Smith's post from Rochester AM 1370. As a "second generation" Drake jock I came up in the early 70's. The 60's guys were of course the heros. I was born in Windsor Ontario Canada across the river from Detroit. I didn't grow up here but came back later to get a chance at The Big 8 CKLW which had just been sold from RKO to Canadian Baton Broadcasting. The legendary Paul Drew was still the consultant. This was late 1975 and yes there was some room for personality but liner cards have always been the Drake way. Jingles, Top 40 (30) hits crankin' and 20/20 News. Energy and humour at a breakneck speed it seemed. The "Drake" sounalike I grew up hearing was CHUM in Toronto with Jay Nelson, Bob McAdorey,Bob Laine and many other classics. Got the chance to work at CHUM this past summer and the "Drake" attitude more than anything still prevails. That is professioanlism to the nth degree, tight boards and jingles. These days CHUM is oldies.
Back to Detroit for a moment - the BIG Drke jocks at the Big 8 were Dave Shafer in mornings and Tom Shannon at night circa 1966. So many great jocks went through the buildings on Riverside Crive and on Ouellette Ave. it's scary. Charlie Van Dyke, Eddie Rodgers, ted Anthony, Gary Burbank, Bill Gable, Ted Richards , Pat Holiday and so many more. It was my pleasure to work with late Byron McGregor at CKLW who could give the 20/20 news read a roller coaster ride you wouldn't believe. But... there was always the FORMAT. Tight Bright and true to Drake and Drew etc. Cheers!

# 3240. PHOENIX:FOXX HIT-RUN UPDATE

Newsgroup: rec.radio.broadcasting
Date: 1995-11-30 00:00:00 UTC
From: Michael Hagerty <Michael_Hagerty@azfamily.com>
Message-ID: <49jn9l$q17@vixen.cso.uiuc.edu>
Source record: 28340

Phoenix police now confirm that they have found physical evidence establishing a Ford Explorer belonging to 70's KHTC(96.9) weekender Carla Foxx as the vehicle involved in a fatal hit-and-run on Camelback Road the evening of November 20th. Police sources, on condition of anonymity, say that physical evidence is the finger of the victim, 78 year old Kansas City attorney Edward A. Smith...and that the finger was found in the Explorer's grille.

Smith was in a marked crosswalk near the Biltmore Fashion Square shopping center when he was hit at 7:15 pm. The posted speed limit is 40 miles per hour. Smith's body flew at least 30 feet on impact...it is believed he died instantly.

Police are still not calling Foxx a suspect. Department sources say her statement to police amounted to "Talk to my lawyer"...and since it was dark, the Explorer has tinted windows and the vehicle was moving at least 40 miles per hour, witnesses were unable to see who was at the wheel.

Now, nine days after the accident, eight days since the car was impounded, police have a very tough case unless
Foxx tells them who was driving.

: BY>and the like are all free publicity and to expect us to spend that $.05 per
: BY>page to print their information so we can give them between $30 and $300
: BY>worth of free commercial (publicity) time is pretty rude, IMHO.

: Mark,
: Once upon a time radio stations were expected to serve their
: communities. That used to include running PSAs. Considering the fact
: that those "rude" people own the spectrum you make from I would think
: that giving them something tangible in return might be a good idea.
: It's been my experience that those stations that bond with their
: communities reap the greatest rewards. That $.05 often translates to
: loyalty that would cost hundreds more in promotion you'd have to buy.

: I sure hope your station isn't so rude as to send a press release
: (fax or mail) to the trades hoping for some free publicity.

Gosh Rich, really?
Thanks for the Radio 101 course.
We run more PSAs than any other commercial station in Chicago.
We also air more Public Affairs programming than any other commercial
station. And it all runs during prime radio time, not after 12 midnight
on Monday morning when everyone is sleeping off the weekend.
And as for serving our community, we're so meshed into the community that we
don't advertise... haven't bought an ad since about 1958.

We may be a "small" station, but we're in a Major Market, and to top it all
off, we have profits, not losses and we have near 350,000 listeners per
hour.
And *that's* Radio, Doctorate Course.

: those press releases and give them to your sales department. As for PSAs,
: what ever happened to "the public interest"? It's the sort of
: narrow-minded thinking this post demonstrates that limits so many people
: to mediocrity.

See my post to Rich Wood.
The narrow-mindedness is assuming we don;t air PSAs, isn't it?
The public interest has been served via mail for decades, a fax is not going
to suddenly make it more served.

People that send "Press Releases" have a job of getting free publicity out
of everyone. That's the difference between being a Publicist and being an Ad
Agency. That press release about an author of a new cookbook isn;t going to
germinate into an ad campaign. The Ad Agencies that are buying spots already
know the fax number.

For the past several weeks, I've noticed a station on 530Khz as received here in Washington, D.C. at 600AM EST (1100UTC) The language sounds oriental. Programming consists of top of the hour news, music (covers of american pop standards you might hear on WQEW), commercials, female announcer.

It's gone by 700AM.

Anyone know who this is?

Well, what the hell, Bill and Ray, here it goes...

The owners of WLIB/New York City, also on 1190, bought WOWO, downgraded WOWO's status enough to be able to add full service on WLIB, then got out from WOWO.

From: halem@radix.net
Message-ID: <49jnai$q4b@vixen.cso.uiuc.edu>
Source record: 28347

WWRC-AM here in Washington, DC is apparantly (sp?) still not happy with itself, as they have dumped "Mother Love" in favor of the more traditional Jim Bohannan show which is heard at 11 PM after Joe Madison. Seems maybe Mother Love was a little to strange or something for the station.

In other WWRC-AM news, the weekends get weirder. In addition to the hair loss info-shows, they now have a guy on in the late evenings who does psychic readings! At least that's who his guest was last weekend. The show was actually very entertaining, but geez, who needs it... IMHO.

Great post, Powell!

let me add to that...

I have heard that The Edge (KDGE, Dallas) have a thing going where if you catch the jock saying the "F" word on air... if you are the right caller, you win something....

Think they got this idea from Infinity???

Think the FCC cares? No, of course not, they don't exist anymore.

Whats next.... illegal HAM radio operators allowed????

Oh wait I know... anyone who wants to get into pirate radio, will be welcomed with the red carpet by former FCC executives....

>From Charm City...

A major news flash as morning man Brian Wilson and WOCT have parted company. Wilson was only on the air at WOCT for a couple of months. Personality conflict is pretty much being credited as the problem but Wilson was known for this and should not have taken WOCT by surprise. There is probably much more to this story that we just don't know.

Paul Harvey returns to the local airwaves. WWLG has picked up his broadcasts to air at 9am, 12pm, and 4pm. Harvey was last heard in Baltimore on WPOC a little more than a year ago.

Roy Duetchmann is the new General Manager at WGRX. Duetchmann, a market veteran, was previously GM at cross-town WXYV/WCAO.

Some airstaff changes in the nearby Annapolis market in recent weeks. At WYRE (810am, JAZZ), Tim Murphy takes over mornings from Gary Michaels who concentrates on his off-air duties. Also Craig Consadine is in afternoons replacing Keith "KC" Fisher. At WNAV (1430am, MOR), Stacy Lynn fills middays for Russ Handler who departs for Tampa Bay. And at WANN (1190am, Country), Mike Stephens is the new morning drive personality.

Stay tuned,

Jim Purther

# 3252. Re: Arbitron Radio Metro Definitions

Newsgroup: rec.radio.broadcasting
Date: 1995-11-30 00:00:00 UTC
From: hoeffel@aol.com
Message-ID: <49jn94$q09@vixen.cso.uiuc.edu>
Source record: 28352

To: Julian, Tom, et al:

Arbitron cannot possibly base their market definitions on statistical market areas, because they will not split a county. I know this from personal experience at WPST/Trenton. 'PST probably pulls a 20 share in Bordentown, a township that stretches out five to ten miles from downtown Trenton. But Bordentown doesn't count for Trenton/Mercer, because it is in Burlington County, which is classified as Philly. The same holds true for Plainsboro (Middlesex County), Allentown (Monmouth County), Morrisville, Yardley, Langhorne, New Hope, and others (Bucks County), Lambertville (Hunterdon County), and many more places.

WPST cumes over half a million folks, yet is classified as a "secondary" or "small market" station by many trades because the city of license is in Metro 133. The problem is that the metro definition is bulls**t! 'PST was recently named Billboard's Small Market Station of the Year, despite having a larger audience than the larger market winners above it.

Is this goofy or what?

Hoeffel

# 3253. Radio Audience Measurement

Newsgroup: rec.radio.broadcasting
Date: 1995-11-30 00:00:00 UTC
From: "Julian H. Breen"
Message-ID: <49jn96$q0b@vixen.cso.uiuc.edu>
Source record: 28353

Joel_Runes@email.fpl.com makes some interesting points which lead to the following observations about radio audience measurement.

All radio audience measurement, Arbitron's and everyone else's, is a form of research in the social sciences. That means although the data is presented to the tenth of a share, rating or cume rating point, in the real world it is more approximate than that. Although many dollars change hands and people are hired and fired over tenths of a share or rating, that is really somewhat of a misuse of the data. For that blame the user who craves quantification, not the measurer.

I always find great humor in the endless debates over the accuracy of Arbitron ratings. The fact is no one knows how accurate or inn-keeper Arbitron is because no one is a fly on the wall observing every radio listener in America all the time. What we do know is Arbitron obeys the appropriate laws of statistics and is reasonably repeatable.

Although Arbitron is probably not exactly reflective of every nuance of radio listening behavior, most people who use the data, myself included, believe it is generally reflective of same.

Most of the diaries are undoubtedly filled out by short or long term recall of behavior on the part of the diarykeeper. But, every diarykeeper knows his or her radio listening is important to someone during the diary week and is therefore more likely to be conscious of it. That's why Arbitron has historically been more stable and repeatable than single call telephone retrieved radio listening data.

As more and more radio stations become commodities rather than distinct entities in listeners' minds, the presensitization of the Arbitron respondent inherent in the diary methodology seems more and more a brilliant data collection strategy than a limitation.

Joel also brings up the question of what listeners know and what they don't know. It has been my experience that research respondents of any kind are usually reasonably good at describing their own behavior and opinions. At the same time they are terrible at projecting their own behavior into the future or doing creative work of any kind.

That's why I also find great humor in the attempts to "research" a new format. While it is certainly possible to determine the relative preference among a given population for a particular genre of music, that does not necessarily translate into a radio audience share as some research firms would have you believe.

Just think of the problem of how to "research" the Howard Stern phenomenon in a market in which he has never appeared. Let's see if I can frame a question: "If there were an irritating New York comedian on the radio every morning who talked about penises, sex, social issues and his family while ridiculing every ethnic, religious and physical minority (short people and the handicapped, for example), would you listen frequently, occasionally or never?"

Sometimes you just have to open the show and see if anyone buys tickets.

A couple of things from the thread on LA radio memories.

Someone had Bob Crane at KLAC, another at KGIL. Apart from the KMPC fill-ins during and after "Hogan's Heroes", Bob Crane's sole L.A. station was KNX.

KGIL, during the mid to late 60's and early 70's, was the home of "Sweet" Dick Whittington. Another post mentioned the outrageous "bits" KMPC's Dick Whittinghill used to do. I believe he meant Whittington, who staged stunts like dressing up as MacArthur and riding on the shoulders of a scuba diver onto the beach at Catalina. KMPC's Whittinghill was more of a dry wit...master of the double entendre(in many ways, a precursor of Robert W. Morgan's style).

|: I am leading a discussion on "Elements of Effective Interviewing" for
|: those relatively new to the "art". The interviews to be done are of a
|: light news/info type ... Any suggestions? Thanks... Tim

1) Read the subject's book, or at least their press release. Find out why
they're interesting.
2) Prepare a couple of questions where the answers could be interesting
to your audience.
3) Be prepared to _listen_ to the answers, and let a conversation spring
from them. Don't stick to your prepared questions -- they're just a
crutch, in case things don't work out. The worst interviews are the ones
that go "Well, tell me about your philosophy..." [twenty second response]
"Right. Now, how did you come about to write this book?"
4) Remember, you're not the star. The subject is. Don't say any more than
needed to keep things interesting.
5) For practical guidance, study the _early_ interviews of Dick Cavett
(through mid 1970s), or Terry Gross' current work on NPR's Fresh Air.

```
" [Moderator's Note: A minute per page at 14.4? I generally get a page
" out in 20 seconds or so (well, a text page that is) in fax mode. Even
" faster in data mode. Bill]

I always send out in "fine" or "superfine" mode, and the stuff I send is
often quite dense. If the item is a PSA or a press release (which I
assume it is) being sent to stations, then the copy would be quite light
in density and closer to the 20 seconds per page. Of course, you may be
faxing a lot to fax modems rather than fax machines which often can't
store very much and must wait for real-time processing.

JTYazel wrote the quoted material below:

" I am leading a discussion on "Elements of Effective Interviewing" for
" those relatively new to the "art". The interviews to be done are of a
" light news/info type (i.e. - Salvation Army kicks off bell ringing
" season/local author has best seller, etc.) Any suggestions? Thanks... Tim

Having done talkshows and news interviews, I'm of the belief that little is accomplished by asking the same old thing in the same old way.

The Salvation Army bell ringing is no news today. If I were doing the interview I'd ask questions someone who doesn't care aboout giving to the Salvation Army might ask: (1) Why should I care? (2) What is the Salvation Army anyhow? (3) Isn't there a better way they can raise money instead of ringing bells? (4) Do the bell ringers get paid? And so forth.

In my opinion, unless I can get some really interesting answers to questions the interview isn't worth doing. Nobody is served by an interview which covers the same territory time and again. If the questions can't be the *real* questions people might ask, the interview time should be spent asking questions of some other group which doesn't normally get airtime.

Source record: 28362

Reply-To: co470@freenet.carleton.ca (John Mielke)

the other day. It just
proves that listeners don't actually listen.

(T-up:)

Oh man, (sniff) cold season is here. If you haven't got one yet... you
can have mine! In fact, be caller 6 at 555-BLAH and it's yours!

(Tape your calls... loads of fun. Mine went something like this, although
I have an advantage living in Ottawa, where it's freezing cold lately:)

"Hi, BLAH FM!"

"Hi, am I caller 6?"

"Yes you are... who's this?"

"It's Joe... oh my gawd... I've never won anything before!"

"Really? Do you know what you've won today, Joe?"

"What?"

"Do you wanna know what you've won, Joe?"

"Yeah! What have I won?"

"My cold!"

"Your what?"

"My cold, Joe... it's yours! Drop by our studios at 25 Blah Ave., anytime
between 9 & 5 Monday, wait outside for about an hour... it's yours, buddy!"

"Yeah, uh, OK... thanks."

"No prob, Joe! Thanks for calling... but more importantly, thanks for
LISTENING!"

You know, sometimes I love not having enough prep, just so I have to
resort to this kind of shenanigans!

>
>Sure. Under loosened FCC regulations it is now possible for an owner
of a station to buy another station and take it off the air. Or just
buy-out or pay off another station owner and take his station off the
air.
Inner City broadcasting on 1190 in nyc was daytime only - protecting
WOWO. Since Inner City wanted to put its station on at night in NYC it
bought WOWO and applied for permission to lower WOWO's nitetime power
and for permission to keep WLIB, New YOrk on at night.
This is similar, but not quite the same as Westinghouse taking the
Little Rock station on 1010 off the air in a complicated deal inolving
also CFRB Toronto on 1010 to allow both WINS new York and CFRB to
improve their night time coverage.

USUALLY, you do best by taking time before the interview to put the guest at ease and in a good mood, as well as covering the main points they're going to make, and taking a few notes of your own, so you can hit the high points.
Example; where can people get more info after they hear this? How are tickets sold? Who heads up your referendum committee/opera club/ paramilitary troop?
Of course, I once did this; had a lovely chat with a fellow who was ill at ease in spokesman's role (his wife was to do it, but was sick). After a nice warmup, the engineer started rolling tape, I introduced the topic, and the guest stared blankly at every question I asked; he'd already answered them...before we started recording!

If I'm not mistaken, this is the same format that had its roots here
in Little Rock on KPAL Radio, back in the 80's. My kids were young
enough to thoroughly enjoy it and I was very disappointed when
continued efforts to find advertisers to support the concept never
worked out.

It was an incredibly creative effort and I'm thrilled to see that the
idea is still out there. Wonder why they only landed 29 affiliates
so far? Sales still the problem?

No... the Kid Kelly being discussed here was doing nights for Z100/New York in the late 80s. Z100 jocks tend to get imitated and copied a lot. I'm sure that the guy in Cottonwood was a wannabe.

Kid Kelly is currently Program Director and morning jock at WBHT/Wilkes-Barre. And he also hosts the syndicated Backtrax USA show. He's a great guy, and a teriffic jock.

} so far? Sales still the problem?

There are several problems with children's radio. The biggest, I believe, is the fact that Arbitron does not rate listeners under 12 in their books (Accuratings does, BTW) and so the only book a kid's station will get is the handful of parents or others over 12, who report the times they listen with their kids.

Another problem is education. When you say "Light AC" or 'Hot Country" or whatever, most people know in their minds what they will be hearing when they tune in. However with kids radio there is a learning curve. People have to be educated as to what that means. And since there is often no example of it on the average radio dial, it is hard to explain what a radio AAHS or Kidstar really is. That education process is expensive, and coupled with the lack of ratings, due to Arbitron's failure to rate the core audience, makes kids radio a risky proposition for the average radio station.

So AAHS formats wind up, usually, on small, rimshot AM's often with signals that do not cover the entire market well, especially at night.

So you have the triple whammy of ...

1) Unfamiliar format that doesn't *fit* nicely into one or more of the major formats that people are already familiar with.
2) A built in 2 strikes against you ratings wise since the core audience is not considered by Arbitron to be worthy of being rated by them.
3) Therefore the format is usually relegated to low-power, hard-to-get AM signals sometimes requiring two or more such stations to cover a larger city. In an FM-Stereo/CD world, being relegated to obscure AM signals is a *big* drawback.

These are the reasons, IMHO, that children's radio has not caught on any more than it has. Kidstar has promised the top 10 markets in the next year. I believe AAHS has better music, but Kidstar seems to have

a more involved format. AAHS is a music station, Kidstar is more of a 'full service' or 'lifestyle' format for kids.

Perhaps the new partnership of ABC/Disney and AAHS will give them the boost they need to get out of the AM ghetto and start sporting some serious FM coverage. As I said, WLS-FM would be a natural. They sure have never been successful at anything they have tried to date, so why not?

But I would not hold my breath....

I remember reading about Dick in a Billboard issue (the good old days when
Claude Hall blocked the Radio TV Programming section with interviews and
features on personalities and stations...sorry guys it hasn't been the same
since Claude left for those of us with a thirst for the 'behind the scenes'
stuff)..anyway I digress....I read a feature Claude did on Whittinghill. It
was part of a series he was doing on LA Personalities. I was so interested in
hearing him I wrote KGIL and asked if they'd be kind enough to send an
aircheck. They did. No question about it. He was damn good. Remember he went
to KHJ sometime in the late seventies (post Boss Radio) but never heard about
him after that.

If I had a pair or more of LA3 or LA4 limiters, they wouldn't be lying around, they'd be in heavy use! :)

: we are willing to pay top dollar for any of the above units.

And you probably will, too.

If it doesn't work for you to get some from another station, you may try some of the bigger road sound companies. Showco (Dallas), Maryland Sound and a host of others usually featured in Mix Magazine. Every November-January, they shed some equipment and get some new for the spring tour season. In the back of Mix is a page or two of classified ads and vintage equipment dealers. That may be a faster way to get what you want.

One area that you might explore is the Extremely Low Frequency Low Speed signalling used to ensure "worst case" communications with submarines. Otherwise, if you want to look at HF, I would recommend 3 books:
* Data Telecommunication, written by R N Renton, Pitman Publishing, 1973.
*** Data Communications, Robert Techo, Plenum Press 1980 covers most of the protocols and error correciton techniques with low speed telegraphy systems.
****Telegraph and Data Transmission over Shortwave Radio Links, Fundamental Principles and Networks, by Lowthar Wiesner, published by John Wiley & Sons for Siemens (3rd Edition, 1984). My favorite. GLuck.

MC> Can anyone tell me where I might find the Grand Ol' Opry on the NY radio
MC>dial?

Nowhere. The show isn't carried in New York. There are very few network shows airing in the city. The ones that are, with only one or two exceptions, originate here. All WOR Radio Network programming (for obvious reasons) airs in New York. Rush Limbaugh (originating at WABC) air here. Dr. Dean Edell (for obvious reasons) airs weekends on WABC.

Howard Stern and Don Imus syndicate their New York shows and Bruce Williams is on the brokered station, WEVD, when other paid programming doesn't preempt him.

# 3281. Comment on Seattle Radio

Newsgroup: rec.radio.broadcasting
Date: 1995-12-02 00:00:00 UTC
From: cannon@onramp.net
Message-ID: <49phkk$ac9@vixen.cso.uiuc.edu>
Source record: 28264

Just back from a visit to the Seattle area: what great radio! Seattle may be the only non-top 10 market with multiple AM news outlets, all of whom could easily be competitive in the top-10.

In mentioning this to a couple radio veterans, they note that Seattle has always had "good radio."

I'm wondering ... how much of this is geographic? Seems to me that it would be less of a temptation for a Seattle PD to drive 200 miles down the road to the next major market, listen for a while, and copy parts of what the stations there are doing. There's not much between Chicago and Seattle on the north, San Francisco on the South. (I'm including Portland in the Seattle area.) Maybe the relative isolation keeps operators from trying the "tweak d'jour" that the rest of us live with.

Comments?

# 3282. New Offshore Radio Station

Newsgroup: rec.radio.broadcasting
Date: 1995-12-02 00:00:00 UTC
From: anitam1061@aol.com
Message-ID: <49phkm$ack@vixen.cso.uiuc.edu>
Source record: 28265

AN OPEN LETTER

Allan H. Weiner
97 High Street
Kennebunk, Maine 04043
Phone (207) 985-7547

Tonight, my girlfriend, Elayne asked me why I want to put another radio station on another ship. My reply was, because I feel one is needed. I see the concentration and centralization of control of the media by fewer and fewer individuals. In the USA, the government dares to sell radio frequencies to the highest bidders. Who gave them the right to do this? Who said these frequencies are their property to sell?

I am old fashioned, I believe the airwaves belong to all.

The contact between a radio announcer and a listener is a precious thing. In this era of extremely commercial, heavily regulated, and very homogeneous programming, this one- to-one contact is lost.

Offshore radio was the last hold out. Free from the grasp of direct government or corporate control, these stations were the last hope of the listener for something truly unique.

The governments of this world do not own the radio airwaves, much as they do not own sunshine, which is basically the same electro-magnetic energy. Radio is a true natural resource that belongs to all. Offshore broadcasting is the purest form of the use of this resource. They are real natural stations!

I have a ship. I want to build another offshore broadcasting station to travel the world's seas and broadcast wherever a radio voice is needed. It will be safe, it will be legal, and it will be good. It will be available for lease to those who truly value radio as a communications tool to touch the lives of all they wish to reach.

I need a partner, one who will invest the money to do this right and finish the radio ship. Yes, there is money to be made and more.

This world needs at least one good fully-operational radio ship--out there, broadcasting its message, bolstering the human spirit.

Allan H. Weiner.

## 3283. What happened to Skip Bayless on KTCK Dallas?

I was wondering what happened to Skip Bayless, AM drive host on KTCK Sports Radio 1310 the Ticket, Dallas. I came back from out-of-town and he was gone. They just lengthened the airshifts of the other talent, no replacement was added. He was, IMO, by far the best commentator on the Dallas Cowboys, and I sorely miss him being on the air. The station says he "left for other projects". Someone recalls, however, reading in the paper he was fired. I was gone when that paper was printed. Was Skip let go due to falling ratings/budget or was there some kind of rift between him and the station? Does he have plans to return to radio in the future?

The audio response of the SRIII is a lot better and doesn't roll off like your typical radio. I've made this more noticeable on some other receivers when I've changed the coupling caps to widen the audio. Some night tune your SRIII and another radio to 1400 (or whatever graveyard channel isn't used in your area) and compare the sound of the "monkey chatter".

Also, the AGC on the SR is fast. Notice that noise bursts don't attack the AGC, and there is no recovery time when turning the radio to null a station.

: Unless they have built a new site, KNX has a directional array...In
: Torrance, I believe. KNBR has a two tower array in Redwood City...the
: taller of the two has a Franklin "hat" on it.

The second tower at KNX and KNBR are indeed auxiliary antennas.

KNBR originally had a bedspring antenna. The Franklin tower is located at the feedpoint of the old antenna. During construction they raised one of the support towers onto insulators to use as a temporary radiator. For a long time KNBR had problems with static charges building up on the Franklin during windy weather, so they would operate on the auxiliary tower fairly often. I don't know if this problem was ever resolved.

The second KNX tower was erected when vandals toppled the main tower back in the 1960s. It was one of two towers that had just been dismantled at KFAC, to be replaced with self-supporters so an apartment complex could be built around the towers.

At one point KNX experimented with using the second tower to form a DA, to suck in the power that was being sent over the ocean and re-direct it inland. They decided the extra coverage wasn't worth the amount of regulatory burden the FCC imposes on directional arrays.

Bob Gowa wrote the quoted material below:

" KNBR has a two tower array in Redwood City...the
" taller of the two has a Franklin "hat" on it.

" [Moderator's Note: M-Street *and* the FCC database both show KNX and
" KNBR as non-directional. Some stations have a smaller auxillery tower
" that is generally not used.

Bill Ruck at KNBR would be the logical person to ask, but I remember that KNBR is non-directional. I may be wrong, but I think the 2nd tower is a leftover from the time when KNBR had a *horizontal* wire antenna wayyy back in the old days. Unlike other stations, the current KNBR site appears to be its original site, dating back to the days when Hale Brothers (now the Emporium Stores) and the Chronicle owned it. KNBR was one of the very early 50kw stations, long before KGO and others went that high.

# 3291. New Audio Dialup List on Web

Newsgroup: rec.radio.broadcasting
Date: 1995-12-02 00:00:00 UTC
From: jcrose@dplay.com
Message-ID: <49phl8$af2@vixen.cso.uiuc.edu>
Source record: 28274

The new Zephyrlist has been posted on my web page.

This is a downloadable or screen-readable listing of 124 verified sites across the US that are willing to send/receive audio (voice overs, news feeds, etc). There's no fee to access the information.

We supply the phone numbers as a public service; scheduling and fees are strictly between the facilities involved.

If you have MPEG L3 (primarily the Telos Zephyr), MPEG L2 (many manufacturers), Musicam (proprietary enhancements to the MPEG L2 standard), or G.722 (just about every isdn or switched56 audio box made) you can be on the list for free.

There's submission info on the page.

If you don't have web access, send email for a sample copy and submission information. Sorry: no matter how much of a hurry you're in, we can't respond to fax requests.

If you don't have email access, how are you reading this?

[Zephyr and Musicam are registered trademarks, whose ownership is properly credited on the referenced web page.]

From: kibbe@primenet.com
Message-ID: <49phl8$af1@vixen.cso.uiuc.edu>
Source record: 28276

Anyone remember the morning schedule on WTIC Hartford, CT?

I believe it was:

Bob Steele 5:30-10:00am

Robert E. Smith and the theatre of melody 10:00 - 11:00am

Jean Colpert 11:00am - noon

Arnold Dean and the Lunch Bunch noon - 2pm

MikeLine 2-4pm

Lou Palmer 4-7pm

Brad Davis? early evening and overnight I think maybe

Thoughts, comments....?

## 3294. End approaching for "angry white male" talk radio?

Newsgroup: rec.radio.broadcasting
Date: 1995-12-02 00:00:00 UTC
From: cannon@onramp.net
Message-ID: <49phl5$aeo@vixen.cso.uiuc.edu>
Source record: 28277

With WLS apparently heading rapidly for a format change, what does this bode for the rest of the "angry white male" talk radio industry?

A friend who is GM of a major Limbaugh affiliate says they lost much of their audience to the OJ trial; I haven't yet asked if it's come back since the trial ended.

My take is that the necessary stridency would eventually kill the "goose", a never-ending diet of conspiracy, anger, outrage, etc., had to continually build in intensity and scope until it reached comic proportions. Those fabled "black UN helicopters" apparently haven't been seen much lately, and the listeners who believed the angst realized the shows had no credibility.

Comments?

[Moderator's Note: Yep, one comment. It is WLS FM, not the AM talker that is changing formats. Jay Marvin might like to comment, but I doubt that WLS AM is in any hurry to change what they are doing. Bill]

WGCI ANNOUNCES NEW MORNING HOST
Joyner to leave longtime Windy City perch

With the change of the new year, the hawk blows change to Chicago's #1 WGCI-FM, which will have a new morning drive host when 1996 begins. WGCI has elected not to renew the syndicated Tom Joyner Morning Show when the station's contract with the show expires. On January 2, comedian Steve Harvey, host of Showtime At The Apollo, will start. The change gives GCI its third morning show host in four years and bumps GCI vet Joyner off the station after 11 years. Shortly after announcing the TJMS in 1993, ABC Radio had claimed GCI as its first affiliate to sign up for the Joyner show based on Joyner's longtime Chicago popularity.
Speculation is that rival WEJM will pick up the show. And WLS-FM could be interested if it becomes an urban player.
Harvey, in addition to "Showtime," starred in the ABC sitcom Me And The Boys and recently starred in his own TV special, HBO Comedy Half-Hour: Steve Harvey. The comedian is not entirely new to radio or WGCI. He had been a fill-in host for Doug Banks, GCI's afternoon entertainer. Banks will leave Chicago shortly to start his own ABC show for afternoon drive, in January.
"WGCI 107.5FM has been a market leader for well over a decade and we expect Steve Harvey to be an integral and talented part of continuing this great legacy. WGCI and Steve Harvey will change the face and sound of morning radio in Chicago forever," says WGCI President Marv Dyson.
Elroy R.C. Smith, WGCI Operations Director/Program Director, said, When people wake up in the morning, their first thought will not be about brushing their teeth, or taking a shower. Instead, they will be compelled to tune in to WGCI 107.5FM.

Hi all...

Just thought you might like to know about a new national Australian radio show covering computers, the internet, games ... all mixed in with some pretty cool music. It's called Byte This and it'll be on all Triple M stations, starting this Sunday at 10pm. (Don't let anyone else tell you they were first... snigger snigger.)

There's heaps of stuff in the first show, like an interview with the head guy from Accliam in Europe, a yak with the Chocolate Starfish, software and hardware reviews and plenty of stuff on the internet.

We will also have a web site happening... (listen for details,) and we'll be on IRC while we're on the air... (again, listen for details, but it'll probably be #bytethis.) We'll be giving stuff away to net users who join the IRC channel or e-mail us while we're on the air. I hope you can get involved, should be fun.

Erm... also if any of you have ideas for the show or wanna send us sound files of yourselfs or something, we'll consider using them for sure...

Anyway, it's Byte This, Triple M, Sundays 10-midnight.
Cya then.

Anrew & Mobbs

Some airstaff changes in the nearby Annapolis market in recent weeks. At WYRE
(810am, JAZZ), Tim Murphy takes over mornings from Gary Michaels who concentrates on his off-air duties. Also Craig Consadine is in afternoons replacing Keith "KC" Fisher.

Keith Fisher, the morning voice of the Maryland Transportation Administration and
the son of Radio Legend Kelson "Chop Chop" Fisher (WWIN 1963-1979) is now afternoon announcer at JAZZ 88.9 WEAA-FM in Baltimore.

B.T.W. Kelson Fisher is credited on the Casablanca Box Set with breaking Donna Summers "Love To Love You Baby" in the U.S. on WWIN.

Up & down the dial in the #40 market:

*Arbitrends for both Buffalo & Rochester are in(found at Radio & Records' web site-http://www.rronline.com). Here's the Aug/Sept/Oct. Arbitrends for Buffalo:

```
# Stn./freq. Format/positioner Trend
-- ---------- ----------------- ------
1 WKSE/98.5 Contemporary hits(Kiss 98.5) +
2 WYRK/106.5 Country -
3 WBEN/930 News/talk;Bills flagship(NewsTalk 930) NC
4 WJYE/96.1 Adult contemporary +
5 WGRF/96.9 Classic rock(97 Rock) -
6 WHTT/104.1 Oldies(Oldies 104) -
7 WEDG/103.3 Modern AOR(103.3 the Edge) -
8 WMJQ/102.5 Hot AC(Q 102) -
9 WBLK/93.7 Urban AC +
10 WECK/1230 Adult standards +
11 WGR/550 News/talk(NewsRadio 55) +
12 WSJZ/92.9 NAC/jazz(Smooth Jazz 92-9) -
13 CKEY/101.1 Modern rock(FM 101 The Planet) -
14 WWWS/1400 Urban oldies NC
15 WWKB/1520 Hot talk/Sabres flagship(The Big 1520) -
16 WNUC-FM New country -
17 WDCX/99.5 Religious -
18 CFNY/102.1 Modern rock(102.1 the Edge) -
19 WUFO/1080 Urban AC/gospel(The Pacesetter)(daytime only) -
```

Now,Rochester's:

```
1 WBEE/92.5 Country +
2 WHAM/1180 News/talk;Bills(News Radio 1180) NC
3 WCMF/96.5 Album rock(96 WCMF) -
4 WRMM/101.3 Soft AC(Warm 101.3) +
5 WPXY/97.9 Contemporary hits(98 PXY) -
6 WNVE-FM Modern rock(The Nerve) -
7 WDKX/103.9 Urban contemporary -
8 WKLX/98.9 Oldies(Oldies 98-9) -
9 WVOR/100.5 Adult contemporary(Variety 100.5) +
10 WBBF/950 Adult standards -
(not listed:WMAX(106.7/AAA),WHRR(93.3/classic rock & Imus;The River),
WJZR(105.9/NAC/jazz),WYLF(850,adult standards)and WHTK(1280/hot talk/Hot Talk
1280))
```

If you need specifics,just ask me.

*Terri Davis moves from middays at WBLK to co-host of AM drive;she'll be the sidekick of Frank Dawkins. Part-timers are currently handling middays.

*More on the Beatles anthology:
-CHUM/104.5 aired the new Beatles track Free as a Bird(as well as other tracks,with the expected heavy promotion)on Monday,11/20-as well as CKFM (Mix 99.9)AM driver Rob Christie,CKLH(102.9 K-Lite FM)'s morning duo of Sunni & Hayes,and CHML(900,Hamilton)afternoon driver John Hardy. CHUM and CFCA (105.3,Kitchener,classic rock;Cool FM)also ran special Beatles programming throughout November,and CJEZ(EZ Rock 97-3)was the only Toronto station to air the ABC radio broadcast of the Beatles anthology,doing so last Saturday. Stateside,WHTT also aired the new track on the 20th(BTW,it was termed as Oldies 104's 1st "new oldie".)

*Roy Green's Talk Line show,heard on CHOG(talk/Argos;Talk640)as well as CHML,now originates from Talk640's studios in North York-according to Hamilton correspondent Sean Healy. 'HML has missed the 9am start time twice in the last week thanks to their local news. He adds that the main tipoff is that the Bell Mobility cellular number has switched to *640.
Healy did feel a bit for Roy,noting that Westcom(owner of both stations) had done a job of keeping the listeners on CHML while migrating Green over to Talk640. He adds that 'HML has downgraded the staff in the past year-night talker Bill Osborne was replaced with the syndicated Dr.Laura Schlessinger, Lee Dunbar went into semi-retirement(he still does a Sunday-night show),and daytime producers have gotten their own shifts on nights & weekends.

*Also from Radio & Records' web site:Louis Diaz is the new PD at WKLI (100.9,AC;K-Lite 101).

*In Syracuse,Ray Knight stays on at WHEN(107.9,country;Hit Country 108) as its APD/MD. Knight was WHEN-FM's PD,but seemed to be superfluous with Wally McCarthy stepping into the breach as WHEN-AM/FM's new operations director.

TTYL...

# 3302. D.C. Radio Watch / 30 Nov 1995

Newsgroup: rec.radio.broadcasting
Date: 1995-12-02 00:00:00 UTC
From: Max Cacas <76476.2472@compuserve.com>
Message-ID: <49phj8$aah@vixen.cso.uiuc.edu>
Source record: 28370

Greetings to all Airwavers! Here's the latest in radio biz news from the Nation's Capital!

Item First: Congratulations to John Matthews over at Disney/CapCities/ABC O&O WMAL-AM (630, NewsTalk). The Washington Post's "On the Dial" (radio) column reports he's been named News Director, after serving as acting ND for the last three months. Matthews succeeds John Butler, who left in Sept. to become PD of KCMO-AM/KMBZ-AM in Kansas City, Mo. Matthews, a grad of Syracuse University, has literally come up through the ranks at 'MAL. From an intern, he moved up to part-time receptionist, newsroom desk assistant, morning drive street reporter, and last January was named the station's managing editor.

Item Second: Back to the Future? - Across the hall at Jennifer Street, WMAL's sister station, WRQX-FM ("Mix 107.3"/Hot AC) has found a new "niche" sub-format.
For the last several months, Mix has been running a program of 80's music, "Friday Night 80s", spotlighting the music of the Cars, the Police, and Flock of Seagulls, among others. The show's been so successful, the show is now run five nights a week, becoming "Eighties Tonite". Host George Mason also mixes in 80s movie sound clips and little comedy bits. The show is a flashback for two reasons: one, this is the music that the station played in its previous incarnation as CHR / Q-107; and two, George Mason played a lot of these tunes when he was over at the former
CHR WAVA-FM (105.1) in exactly the same 7-Midnight time slot he now occupies at Mix. WRQX also programs an exclusively 70s music show, "Retro Saturday Night", which is ranked among the top three stations in its time slot.

Item Third: Mickey to boot radio? - Has anyone heard anything more about the report over on the Knight-Ridder Financial Wire that Disney is considering selling off *all* the radio stations it will acquire in the merger with Cap Cities/ABC? Word is that Disney would realize a pile of cash to offset its acquisition of CapCities/ABC...no word in the story over whether the ABC Radio Network, and associated syndication/production companies would be affected.

Item Fourth: WAMU-FM's (88.5, News/Talk/Bluegrass) Derek McGinty debuted this week on a new Discovery Channel (cable) program, "Live! with Derek McGinty". The show airs Wednesdays at 10pm Eastern, and his first guest this week was former CBS newsman Walter Cronkite. Details on the show can be found on the Discovery Channel's web page, http://www.discovery.com .

Item Fifth: Seventies "oldies" "Xtra 104" (WXTR-FM/WXVR-FM) has signed Washington Bullets star Juwan Howard to provide basketball updates Thursday mornings. Xtra's morning show is hosted by D.C. radio vet Marilyn Thompson, and ace Airwaver Wes Johnson. A tip of the ol' dipole to Wes!

Item Sixth : WRC-TV (NBC-4) here in Washington reports that a disk jockey at WERQ-AM in Baltimore has been fired for refusing to play songs containing what he called "racist lyrics". Marcel Thornton says he did it after thinking about what he'd heard at the Million Man March here in Washington last month. Thornton is reportedly circulating a petition among his listeners to be reinstated.

Item Seventh : "Meet Mr. January!" - This is the headline of an item from the December 1995 "Washingtonian" magazine under a picture of Donnie Simpson, the effervescent morning man at Urban Contemp WPGC-FM (95.5), whose program is also syndicated nationwide, and who is also seen on Black Entertainment Television's "Video Soul". Donnie's picture, atop a bed wearing what appears to be silk PJs (!) is a part of the "Alaye'" 1996 calendar. Joining Donnie in the pages of the calendar are actors LeVar Burton and Blair Underwood, and athletes Willie Gault and Warren Moon. (Note: No info in the Washingtonian article on how to get a copy of the calendar.)

Item Eighth : "I read it in the doctor's office...honest!" <g> - Not specifically D.C. oriented, but the December 1995 "Cosmopolitan" magazine has an excellent article on talk radio. "Beware Vox Populi...or Why You're Going Along With the Crowd Even If You Think You're Not" has one of the best common sense explanations of why most conservative-sympathetic talk radio only represents a very small part of the country's population, and yet receives far more attention and credibility than its relatively small audience warrants. Its on page 220 of the magazine.

That's the latest! More next week!

# 3303. Mid-America Radio Watch (1-Dec-1995)

Newsgroup: rec.radio.broadcasting
Date: 1995-12-02 00:00:00 UTC
From: transvox@crl.com
Message-ID: <49phj9$aai@vixen.cso.uiuc.edu>
Source record: 28371

KISF(FM) kisses program director Chuck Geiger good-bye after one year at the modern-rock station.

There's no word on who initiated the departure, but it must be noted that Geiger faced a difficult task in making "Kiss FM" competitive in the Kansas City market.

KISF's summer 1995 Arbitron share 12-plus was 2.3, down from 3.1 in the spring, and just behind AM-stereo nostalgia outlet KFEZ.

When Geiger arrived, the station was limping along with a contemporary-hit format, an also-ran to KMXV(FM), which switched to CHR in March 1994. KISF couldn't hold its own against head-on competition because of signal problems: the station's transmitter site is nearly 50 miles east of downtown Kansas City.

While its 1,184-foot antenna height compensates for KISF's rimshot location, Kansas City's midtown area has three 100,000-watt FM transmitters in the midst of terrain nearly as hilly as San Francisco.

It's an uphill task for rimshotters to make it through all the background noise that results from the combination of terrain and tuner overload.

It's especially difficult for stations targeting the 18-34 demographic, because of the high concentration of such listeners in midtown neighborhoods.

Geiger switched KISF to "new rock" in January, placing it in competition with KLZR(FM) from Lawrence, Kansas, which has an even worse signal in midtown Kansas City. Still, KLZR had already claimed the market's "modern rock" label from having been in the format since 1993.

Aside from KLZR, KISF also must contend with hard-rock KQRC(FM), which plays a substantial number of modern-rock crossovers, and, of all things, young country KBEQ-FM, which was number one in the 18-34 demo in the Arbitrends for August through October.

More competition may yet be coming: the owner of the still-silent station at 95.7 MHz, licensed to Ottawa, Kansas but most recently based in Lawrence, has a construction permit to build a 1,000-foot tower for KZTO(FM) in Leavenworth County. KZTO has announced plans for a hit-driven modern-rock format with the calls KCHZ, similar to co-owned KTOZ-FM in the Springfield, Missouri market.

However, KZTO/KCHZ has already missed August and September target dates.

Meantime, KLZR has actually begun to show up in the Kansas City Arbitrons, albeit with relatively tiny shares (0.6 for summer 1995). KLZR remains primarily a Lawrence station, which works to its advantage, considering Lawrence's image as a trendy college town with an active music scene. I've called it a "reverse rimshot".

There's no indication of any changes at KISF so far; in fact, the station just rolled out a new set of promos with a "hired-gun" voice. And it would be fair to ask: what other format can KISF realistically do at this point?

****
The normally sedate St. Joseph market (3 AMs and 2 FMs for a city of nearly 80,000 people) may get its third FM station.
The Baptist Temple School has applied for a 14,000-watt station at 91.1 MHz, with height above average terrain of just under 500 feet. It's reasonable to assume that this will be a gospel station of some type. The application showed up in the FCC engineering databases on Nov. 30.
****
Over in central Missouri, Mexico bible-thumper KJAB(FM) is taking a stab at a power increase on a new frequency.
KJAB, now broadcasting in mono with 380 watts at 90.1 MHz, has applied to move to 88.3 MHz with a 6,000-watt class-A facility. The station would not have to move from its present location in Mexico.
If the FCC approves the application, KJAB could cause substantial interference with Columbia's University of Missouri student station, KCOU, at 88.1 MHz. KCOU cannot increase its power from 430 watts because of overlap with the coverage area of KMOS-TV, channel 6, from Sedalia.
Mexico is 25 miles from the northeast corner of the Columbia city limits, so a class-A signal could easily make it to some parts of Columbia.
KJAB's present programming is mostly preaching and the heavily-biased newscasts of the USA radio network.
****
Other applications:
* KRES(FM) is asking permission to build a back-up facility running 37,000 watts from a site in its city of license, Moberly. KRES' present 100,000-watt master-blaster at Clifton Hill would not be affected.
* There are two applications for a long-vacant allocation in Macon, Missouri at 99.9 MHz. Macon is an economically depressed county seat with coverage from Moberly and Kirksville stations.
****
From St. Louis, Scott Simon informs me (and the FCC database confirms) that there are two applications for a new station in Breese, Illinois. The class-A allocation at 97.5 MHz probably could give adequate coverage to the Illinois suburbs though it wouldn't make it much farther across the river into St. Louis.
The two applicants are a Chicago woman and a Breese bar owner. Neither has any other broadcast interests.
****
Scott Simon also noted that black-talk station KATZ(AM) is actually brokered in AM and PM drive. Onion Horton and Mark Kasen are now looking for a conservative African-American host to lead into afternoon drive. According to Scott, KATZ's middays are local and not brokered, while the rest of the station's programming is syndicated.
****
Along with the signing of high-profile morning jock J.C. Corcoran to KSD-FM, listeners have noticed other changes at the struggling classic-rock station. One of those changes is dropping the words "classic rock" from the station's liners and promos.
****

I'm typing this late at night. The last time I did this, last week, I made two boo-boos, which I now want to fix:
* WSIE(FM) does NOT run most of National Public Radio's news programming, other than hourly news. WSIE is primarily a jazz station. (Three e-mails with that correction)
* KMOX-TV was sold by CBS to Viacom in 1985, prior to the Tisching of CBS the next year. Tom Wyman was trying to pare down the debt from fighting off various takeover attempts that year. (One e-mail)
By the way, have you noticed? For most of its existence, CBS has been chaired by men whose last names contained exactly five letters. And that's not counting Frank Stanton's first name!
(Seriously, thanks to Scott Simon, Alan Cassel, Frank Absher, Max Slover, and Daryl McQuinn for keeping me well-behaved and well-informed about St. Louis broadcasting.)
****
This week's other trivial fact: KCMO-TV (now KCTV) in Kansas City and KFEQ-TV (now KQTV) in St. Joseph started on the same day: September 27, 1953. KCMO-TV started out as an ABC affiliate and went to CBS in 1955; KFEQ-TV started out with CBS and went to ABC in 1966.
****
Yet another trivial fact: FCC data for Missouri and Kansas AM stations, derived directly from the engineering database, are now available with a finger to kcradio@littleblue.com . It's only a mildly fickle finger of fate: I revise this file every other week.

# 3304. JC CORCORAN BACK ON AIR

Newsgroup: rec.radio.broadcasting
Date: 1995-12-02 00:00:00 UTC
From: ssimon9@ix.netcom.com
Message-ID: <49phja$aaj@vixen.cso.uiuc.edu>
Source record: 28372

Long time St. Louis radio morning host J.C. Corcoran has inked a three-year deal with EZ Communications Classic Rock KSD-FM in St. Louis.

His show, "The Breakfast Club" begins Monday, Dec. 4.

He'll be paid $300,000 base over the three years, with incentives for increasing audience and advertising.

The contract was signed yesterday (11/30), the same day his second child, a daughter, was born.

He's been off the air since early July, when WVRV-FM, "The River", decided not to renew his contract.

It's the second tour of duty for Corcoran at KSD-FM.

He's been in St. Louis since late 1984. His history:

1984-1986: KSHE-FM
1987-1991: KSD-FM
1993: KMOX-AM (2 months)
1993-1995: WVRV-FM

He continues to be the entertainment reporter for KMOV-TV, Channel 4 in St. Louis and recently started doing an entertainment segment on a nationwide cable channel.

The Southern California Radio Watcher: December 1, 1995

>From Los Angeles, David Alpern <---alpern@bus.usc.edu

LA RADIO NEWS (REFERENCE: mostly care of the LA TIMES)

All-sports radio station KMAX-FM (107.1) has been sold by Douglas Broadcating to Odyssey Communications of New York. PD Keith James says Odyssey plans to keep the all-sports format stating "The sale is a positive thing."

More KMAX - the station has dumped the annoying evening duo "The Sports Gods," Dave Smith and Joey Hiam, who seemed to think they could say anything on the radio. Suspended recently for offensive on-air remarks, this LA RadioWatcher never could identify what a PD had originally found engrossing about their presentation style.

XETRA SPORTS 690 has made a deal with CBS radio to carry its NCAA basketball tournament coverage and its BASE-A-BALL and NFL packages beginning next year, displacing San Diego's CBS affiliate, KFMB-AM 760 ("It's All Good") and quite possibly LA's CBS (or is that Westinghouse, Group W?) O&O KNX-AM 1070. LA's KMAX also was carrying the CBS sports package this past year. XTRA does acknowledge that the station still has not rectified its signal problems in the San Fernando Valley despite the new 77.5 Kw stick in Rosarita, Mexico. PD Howard Freedman says the station is still "tweaking" its antenna to eliminate those pockets of reception problems.

KFI-AM 640 CH-CH-CHanges - Marilyn Kagan aired her last advice show this past Tuesday (11/28). While still with the station, holding down a swing shift, MK is focusing her efforts on expanding her local televised talk show into a national deal. Former weekender, Wayne Resnick will take over the weeknight 7-9 PM slot (which is audible at this time of night in 14 Western States during the Winter period). Promoted to his old 9-midnight weekend slot is the "Scott and Casey Show" (Scott Hasick and Casey Bartholomew). Casey is also the occasional VOICE OF KFI, on many of the station's positioning spots. Scott Greene will become the regular host of the weekend overnight shifts.

KNX and KFWB-AM 980 are now sister stations. CAN YOU BELIEVE IT. These two all-newsers are former rivals who have sledged one of the most creative battles over recent years. Especially noticable was a KFWB spot mocking KNX's nightly drama hour at 9 PM. According to KFWB, if you really want to hear drama, the most riveting tale unfolds every day and night right here in the city of Angels - REAL LIFE, and during the 9 PM hour it is only relayed and described on one station - KFWB!

>From San Diego <-- Chris Carmichael sdradio@sd.znet.com

NUMBER 22 WITH A BULLET: KUPR's CD that I wrote about last week debuts on the top San Diego music list at 22! The disk, which contains music from Dire Straits; David and David; and others, benefits a local charity in San Diego county. [KUPR Carlsbad, 95.7 7.2kw]

GONE: Aribtron's "market within a market" to San Diego -- North County, and Orange County are no more. It was apparently dropped at the first of the year.

As David reported from Los Angeles, the San Diego county papers are full of XETRA's coup of the CBS sports package. It is apparently a multi-year package and takes the cream: Monday night sports. Is there something going on at KFMB -- this was one part of two losses by the full-service station: [Can the San Diego Padres or an LA team be far behind. It's no secret that XETRA wants WANTS a professional baseball team to complete their pallett.] Xtra sports 690 has: SD Chargers, LA NHL Kings, UCLA foot ball and basketball, plus is the ONLY southern California outlet for ESPN. The package stars next month -- the 1996 Super Bowl. [And they were pummelled with power from a 77.5kw flamethrower from the west.]

NEWS MOVES: As previously announced by "Mr. News," Cliff Albert has moved his talents over to Gannet's KSDO. The word is the station is revamping the news section at the talk station. Albert had over 17-years at KFMB. He reportedly can't be on air until the first of next year, as his contract with KFMB official is over the end of this month.

Today, Stacy Taylor, Hank Baurer, and Berger and Prescott were praising Albert as the driving force behind the revamp of sports on KFMB. It was reported in the papers -- very prominate too -- the Albert was the force behind Baurer's and Keven Kernan's night time sports talk show from 8 to 11 p.m. [also noted that Stacy told the listners the station Cliff will be working at -- and with a day-long round of good-byes on air, it seems that the parting with the staff will be hard. IMHO, Albert is a true professional and will leave a vast void at KFMB.] [760 5kw/50kw DAI]. [KSDO 1130 10kw/10kw DAII]

SHOTGUN! Where is Shotgun Tom Kelly going to hang is trademark hat after KCBQ folds into the Par Broadcasting empire? Fine Arts station KFSD where he can introduce Beethooven and Chopin?? Talking about the religious experience of Rock and Roll on Christain talker KPRZ?? Border announcements on the San Ysidro TIS?? He's been placed at KFMB's Star 100.7 recently and on air with Stacy Taylor on the AM side.

Hal Abrams promises me this is a cool site: http://www.beachfm.com . IT IS.

I-MAN: Don Imus did his show from New York's Museum of radio broadcasting this morning. The best bit I heard was during the Nixon-parody when the I-man lost his place in the script, and the dead former presiden corrected him . . .
Fred Imus, owner of the AutoBody Express in Sante Fe, N.M., is apparently seeing a cardio-vascular physician in Albequerque today. Best wishes to him.

Heard on the airwaves over the last two weeks:

*Body piercing [Tom Leykis [KMPC]]

*Bosnia, Bosnia, Bosnia [Weissbach [KOGO], John & Ken [KFI],
and Leitner [KFMB]]

*Penn and Teller [Jeff and Jer [KKLQ 106.5]]

*Just can't say NO-OJ [STILL!?!]: [Ted Leitner [KFMB],
Bill Handel [KFI]]

*Magnetic shift in the north pole: [Art Bell [KOGO SD]]

DXing!! Winter's longer nights brings stations I don't normally get:
KDWN Las Vegas [720] and KVEG [840] North Las Vegas [all day].
KSL Salt Lake, [1160] from about 1:30 p.m. Pacific. KOA Denver [850]
and KOMA Oklahoma City [1520], 3:30 p.m. KOY Phoenix [550] [1kw!] after
sunset. TIS station from Jack Murphy stadium at 1710 in Oceanside after
sunset [a 30-mile hop]. I'm also getting "something" at 1660 that sounds
far off, but nothing I can confirm . . . .

SPOTLIGHT: Stacy Taylor, the afternoon talk show host on
KFMB, spotlight page is up at:
http://www.geopages.com/RodeoDrive/1102/spike.html . Taylor's sane look
at the world makes my afternoons "bearable" at work.

# 3306. Technical: Unipole Phased Array Question

Newsgroup: rec.radio.broadcasting
Date: 1995-12-02 00:00:00 UTC
From: "Jason R. Rieg" <jrieg@harris.com>
Message-ID: <49phjc$aal@vixen.cso.uiuc.edu>
Source record: 28374

I am in the middle of a design for a medium-wave unipole-tower array. I was wondering if anyone has a grasp on the method to transform the field ratios of the individual towers back to current ratios.

I can simulate the mutual and self impedances of the unipoles, but I am unable to make the next step to relate the field ratios, current ratios and impedances.

Any help would be greatly appreciated.

Please email along with posting.

Thanks.

# 3307. Re: Radio Audience Measurement

Newsgroup: rec.radio.broadcasting
Date: 1995-12-02 00:00:00 UTC
From: Joel_Runes@email.fpl.com
Message-ID: <49phjc$aam@vixen.cso.uiuc.edu>
Source record: 28375

I'm not one to draw out threads past their useful limits, but the recent reactions from Julian Breen concerning audience measurements raise a few more matters that might be worth pondering.

First of all, the observation that questions about what respondents have done are more reliable than questions about what those respondents would do is right on the mark.

Second, Mr. Breen's contention that people filling out diaries are generally conscious of the effects of their responses is also beyond dispute. Where I tend to diverge from Mr. Breen's assessment is when he concludes that the consciousness on the part of the respondents will translate into accurate responses. There have been interviews with many respondents to various surveys (I can't recall any Arbitron participants in particular) who have explained that they answered some questions in accord with the results they desired rather than the reality of their own circumstance. One respondent to the University of Michigan's Consumer Confidence survey admitted that he misstated his employment expectations to affect the survey results in accord with his political party's partisan advantage (BTW, George Bush lost anyway). I have talked to people who have filled out TV diaries including shows they did not watch but which they enjoy and "would have" watched had they not been doing something else. (Questions about what respondents did on a particular day are generally regarded as more accurate than questions about what the respondents "normally do".) Just as there are some political candidates who regularly do better at the ballot box than in the polls, so too it stands to reason that there are some shows that people watch or listen do but are ashamed to admit it.

But there is one other element of audience measurement which hasn't really been nailed down. By its nature it is difficult or impossible to assess. That has to do with a survey's nonrespondents. If a sample is scientifically chosen and the response rate were 100%, then the survey data could be correlated with the behavior of the public-at-large fairly well. The only errors would relate to sampling error and "incorrect" responses (whether purposeful or resulting from faulty recollections).

The response rate on the part of the scientifically chosen sample isn't 100%. It's not even 99%. As the pool of nonrespondents grows, the likelihood that the respondents are representative of the sample (and the universe from which the sample is chosen) decreases markedly. Some of the aberration can be filtered out by normalizing the demographics of the respondents to the demographics of the

community. But after that is accomplished, there is the residual unknown: Is the behavior of a 25-34 single, affluent, suburban male who is too paranoid or too hostile or too busy or too protective of his privacy similar to that of his neighbor who did respond? Although I can't prove their behavior is dissimilar, neither can the research companies prove their behavior is similar. My PERCEPTION is that the cultural schism between the respondents and the nonrespondents is profound, and that the effects vary from demographic group to demographic group. One thing is certain: non-participation rates are much higher for surveys of all types today than they were 10 or 20 years ago.

Mr. Breen suggests that survey results may be comparable from one survey period to the next (I forget whether he used the term "repeatable"). But repeatability from one quarter to the next does not translate into repeatability from one decade to the next.

In any case, a conclusion that the Arbs are useful depends on the application to which they are put. If the national ad buyers are spending clients' dollars on the basis of them, it makes sense for Mr. Breen's M&A analyses to be based on them as well. In that case let the advertising agencies and the financial analysts buy the data and pay the freight. That doesn't explain why the stations should spend money that could otherwise go towards quality programming on ratings books that are likely to distract more than instruct. The fact that the research is chartered by SOME of the stations and that the market definitions are affected by the financial interests of SOME of the stations in the market creates an appearance of partiality that may be greater than the reality of the situation warrants.

I hope that I have fairly characterized the views of others in this ongoing debate and apologize for the lengthiness of this response.

> beyond this concept an concentrate on programs real people will listen
> to rather than worrying about name recognition campaigns.

There's the rub. As long as you need people to remember your name in order to win the ratings race, we cannot abandon the concept of pounding our name into their top-of-mind awareness. We cannot concentrate solely on programming until we can concentrate only on measuring *actual* listening. It is a name game, pure and simple. As I've said many times, I don't care who they're listening to, as long as they think they're listening to me...and write it down!

(BTW: It will be interesting to see how much programming does change when we can measure actual listening as opposed to recalled listening; that is not relying on the participant's memory for any portion of the survey process.)

Julian is exactly right. Research respondents (people in general) are very good at reporting their current behavior and giving their opinions about existing things that they're familiar with. They are less good at projecting their future behavior and they are very bad at being creative or giving opinions of things that don't exist and/or they're not familiar with.

The so-called "format search" is the least reliable of today's common radio research studies. While listeners can easily tell you what existing elements they like and don't like on radio stations, they're not very good at re-packaging the elements into a new station or giving feedback on new, non-existent elements or concepts.

Arbitron does base their radio metro definitions on statistical market areas.
The "problem" is that statistical market areas are based on counties -- with a
few exceptions in New England.

# 3311. John Stewart on Triple-M in Australia

From: StuartE1@aol.com
Message-ID: <49phjl$aau@vixen.cso.uiuc.edu>
Source record: 28380

Just wondering why LDDS / WILTEL is the ONLY carrier that I know of that provides Caller ID (ANI) on incoming 800 lines. I'm referring to the "ready line" type of 800 number.

If anyone has CID or ANI on incoming 800 lines thru AT&T (not via T1 lines) I'd like to know about it and who your account rep is.

Thanks, stuarte1@aol.com

# 3313. Canada: WIC vs. CanWest-Global takeover

Newsgroup: rec.radio.broadcasting
Date: 1995-12-02 00:00:00 UTC
From: gord.bailey@freddy.com
Message-ID: <49phjm$aav@vixen.cso.uiuc.edu>
Source record: 28381

Winnipeg, Manitoba -- The takeover battle for Western International Communications is heating up. CanWest-Global Communications criticized WIC's board today for being "clearly dominated by self-interested parties".

Winnipeg-based CanWest has made a $636-million takeover bid for Vancouver-based WIC. Leonard Asper, CanWest's director of corporate development, call on WIC to set up a committee of independent directors to review the offer.

Earlier this week, WIC's board of directors sent shareholders a circular, recommending they reject the offer. In the circular, WIC said CanWest's offer was too low.

WIC's largest shareholders, the Griffith and Allard families, have also rejected the offer.

Asper also questioned the recent purchase of WIC shares by the Allard family. The family has purchased about 257,000 non-voting shares since CanWest announced its offer earlier this month. The Allards, and the Griffiths control 91-percent of WIC's voting shares.

Neither the Allards or the Griffiths could be reached for comment, and WIC president Douglas Holtby refused to comment.

# 3314. Chicago morning radio changes in January

Newsgroup: rec.radio.broadcasting
Date: 1995-12-02 00:00:00 UTC
From: MHz@bitstream.mpls.mn.us
Message-ID: <49phjn$ab0@vixen.cso.uiuc.edu>
Source record: 28382

Reply-To: MHz@bitstream.mpls.mn.us

[BILL: please delete my earlier posting on this in favor of this updated post, thanks]

WGCI ANNOUNCES NEW MORNING HOST
Joyner to leave longtime Windy City perch for V-103

With the change of the new year, the hawk blows change to Chicago. Both WGCI-FM and WVAZ, V-103, will have new morning shows when 1996 begins. WGCI has elected not to renew the syndicated Tom Joyner Morning Show when the station's contract with the show expires. On January 2, comedian Steve Harvey, host of Showtime At The Apollo, will start. The change gives GCI its third morning show host in four years and bumps GCI vet Joyner off the station after 11 years. Shortly after announcing the TJMS in 1993, ABC Radio had claimed GCI as its first affiliate to sign up for the Joyner show based on Joyner's longtime Chicago popularity.

But Joyner won't miss a beat in Chicago. Starting on the 2nd, he'll be heard on WVAZ, V-103.

Harvey, in addition to Showtime, starred in the ABC sitcom Me And The Boys and recently starred in his own TV special, HBO Comedy Half-Hour: Steve Harvey. The comedian is not entirely new to radio or WGCI. He had been a fill-in host for Doug Banks, GCI's afternoon entertainer. Banks will leave Chicago shortly to start his own ABC show for afternoon drive, in January.

"WGCI 107.5FM has been a market leader for well over a decade and we expect Steve Harvey to be an integral and talented part of continuing this great legacy. WGCI and Steve Harvey will change the face and sound of morning radio in Chicago forever," says WGCI President Marv Dyson.

Elroy R.C. Smith, WGCI Operations Director/Program Director, said, When people wake up in the morning, their first thought will not be about brushing their teeth, or taking a shower. Instead, they will be compelled to tune in to WGCI 107.5FM.

As for WVAZ, Don Moore, Vice President and General Manager of WVAZ, said, Tom Joyner is an excellent talent and we're extremely proud to have him as part of our V-10-3 family. We're looking forward to even greater success for The Tom Joyner Morning Show on V-103.

RU>increase in crime.

Barry,
That's a serious problem in New York. Since most police shows use
New York as their setting, the impression to those outside the city is
that we're dodging bullets every minute of the day. No one stops to
realize that New York ranks, I believe, number 142 on the list of
dangerous cities.

D.Kaye notes real crime is going down, but adds;
"I think that people learn by example, and if they see TV shows every night wherein people are pointing guns and shooting each other on screen, viewers would likely imitate this in real life."

While I agree that watching too many cop shows can fuel a personal paranoia about crime (geez, do something constructive with that tube time!), I grew up in an era when every other show on TV featured cowboys. There was no reported upsurge in citizens galloping around on horseback.

>>I also look for signs of professionalism, commitment and dedication. I need to see signs the person making contact with me has spent time preparing the materials they are sending and that the enclosures are polished, neat and error-free because, SURPRISE, that is exactly how I will expect you to be on the air. For all job seekers, regardless of the field you are applying for, this should be step number 1.

Second, this is radio. I must hear what you sound like. I don't have time, with 100 applications on the desk, to pick up the phone and request a tape.>>

Amen! Here's a little story about somebody I didn't hire this week. The guy walks in off the street unannounced, fills out a job application, drops off a poorly copied resume and cover letter, with his address and phone number crossed out and corrected in pen and ink. Along with this he leaves an incoherent note about why he doesn't have a tape. Afterwards I find out from the receptionist he wanted our TV station to make him a dub from his master, for free. (Like our production staff can just drop the commercial they've been working on for a week to do some stranger a favor!)

The guy calls me on the phone on about three or four different days after that. We never actually make contact...I'm either out or on another line every time he calls. (Mind you, I'm extremely busy. I anchor morning drive, spend at least three or four hours a day on the street, AND run the shop...and my help-wanted ads ALWAYS say "no phone calls.") Despite this, I give him the courtesy of returning every call...but never get any answer.

Finally a couple of days ago he shows up again, (again with no appointment and no tape), cons the receptionist into calling me out of my office, at which point, clad in T-shirt and shorts, he expects to be interviewed for my opening. I politely told him that without a tape, we didn't have anything to talk about, and I sent him on his way.

This is someone who allegedly has worked in radio before. I post this as a lesson on how not to impress a prospective employer. Stupid as it sounds, this story is true in every detail.

Every time I think I've seen it all, something happens to prove me wrong.

There's another alternative route of sending out those releases, in use at a couple markets where I've been lately; somebody's convinced stations to put in another line and printer for a feed that's basically just press releases, PSA's, flack stuff, etc. Don't remember the name of the "news service," but on the receiving end, it's a fairly low priority.
Those PR hacks have to have SOME way to show they're trying to get "free" press!

Stella (our public service director? This week, it's...)Starr

I was always under the impression that the advantage of fax vs. Postal Service was the immediacy, and that cost was not a consideration in that trade-off.

>Plus, you neglected to figure in the cost of the paper itself, the delivery
>cost of that paper, or the gas, wear and tear of the vehicle in picking up
>same, plus labor expenses.

Okay...let's add in the wear and tear on my shoes walking out to the mailbox, not to mention wear and tear on the mailbox itself. Plus the medical bills that will surely pile up from carrying loads of mail everyday. Wear on the carpet back and forth to the fax machine...oh, and there go my shoes again...and a trip to the trash can...oops, that's full of faxes and mail...

We're getting really petty here. Point is, fax and mail are equivalent in costs. The question we need to be getting at here is which one is better at helping you unearth new ratings and revenue? ( And let's not forget the immediacy of the fax machine, which is what people like Mark no doubt use as one of the selling points of radio itself, right?)

Best I can make out, Mark's point is that people waste his money when they "spam" his fax machine with "press releases." Everyone else's point is that all of the unsolicited stuff that spews forth from said fax machine could be turned into promotions, sales, PSAs, ratings and revenue. Hmmm....gosh, I wish I had Mark's "Doctorate of Radio" to help figure this one out...

Mark seems to be missing the point here, judging from his responses to me and Rich Wood. You're not looking at that fax machine and those "press releases" as potential ratings and revenue producers.

Armond Hammer had a habit of responding "That's good" whenever someone gave him "bad news," and sure enough, he found a way to make it good. That's a doctorate in success, Mark.

>or look stupid next to you doing yours.

Just to clarify...I was referring to the press releases which the original poster complains "are looking for free advertising." But you're right...they can all be turned into promotions that will help the station stand head and shoulders above the competitors, as well as help the programming dept. regain its rightful place of prominence!

I heard this station regularly a few weeks ago. The ID mentioned
studios on the East Coast and a transmitter in the Caribbean, the
Antilles, I think. It was a holy roller.

I would have thought an employee of Radio Marti would be privy to
lots of good intelligence info on radio.

CIAO Toronto (actually Brampton, a suburb) is a likely candidate.

"Seifert, Rick" <rseifert@usia.gov> asked at 2:42 am EST Nov. 30:

:For the past several weeks, I've noticed a station on 530Khz as received
:here in Washington, D.C. at 600AM EST (1100UTC). The language sounds
:Oriental. Programming consists of top of the hour news, music
(covers of american pop standards you might hear on WQEW-1560),
:commercials, female announcer. It's gone by 700 AM. Anyone know
:who this is?

Probably CIAO in Brampton/Toronto, Ontario, which is a multi-
ethnic station that used to be on another frequency but took
over the facilities of a station in Fort Erie. I think according to
the International Radio Club of America CIAO has applied for an
FM license.

This would be CIAO Brampton/Toronto. They moved from 790 to 530 a
few years ago, after the Ft. Erie station, CJFT, moved from 530 to FM
(they are now CKEY-FM). Power is fairly low, 1kW days, 250 W nights. A move
by CIAO to 1430, 50 kW (the old CJCL xmtr) was denied last year
by the CRTC. CIAO is a ethenic station, with Chinese being one of
several languages they broadcast in.

The only other station on 530 in Canada is in High Level, Alberta
(CKHL, 400 watts). As far as I know, only TIS stations use 530
in the USA. The Canadian station in Sailt Ste. Marie on 530 listed
in the FCC database (50 watts) I believe is also a TIS. Ditto for
the station in Fort Francis.

The use of 530 in Canada did not start in the 1980's. CJKL Kirkland
Lake used 530 in the 1930's before moving to 560 where they are today.

# 3331. Re: EFFECTIVE INTERVIEWING

Newsgroup: rec.radio.broadcasting
Date: 1995-12-02 00:00:00 UTC
From: ssimon9@ix.netcom.com
Message-ID: <49phk6$abm@vixen.cso.uiuc.edu>
Source record: 28399

In response to EFFECTIVE INTERVIEWING:

If you follow these guidelines, you will create questions that will deliver tremendous answers:

1. GUARANTEE A LISTENER BENEFIT. Don't go into an interview to do a story or subject just because it's "there" or it's "trendy". Always question yourself, "what is the most important thing that the listeners should gain from this subject?"

2. TELL ME WHAT'S HAPPENING NOW. Don't confuse your listener with the future or past. Broadcasting is a "real time" medium, so guarantee that the listener knows what is happening right at that very moment.

3. SOMETHING NEW, SOMETHING DIFFERENT. Require the subject to reveal something new, something different. If you don't, the subject's story is the same as the last time it aired, and if it is the same, then it doesn't deserve airtime.

4. I MUST SELL THE STORY. This is a personal comment, but too often, I see and hear advice given that the person doing the interview should not be a star, that the subject is the star. This is 1995, and success in this business is built on outstanding personality. If you really want the subject to succeed and have meaning to your listener, then be personal with that subject. If not, the listener will quickly learn that the questioner is too distant from the subject.

Incidentally, the above is taken from research that is used in television news, where I have most recently worked after 20 years in radio.

Say what you want about the surrepticious inadequacies of television and television news, but the fact is that television successfully uses these four guidelines. As a result, television creates huge audiences; television creates emotion.

Radio faltered when its managers and talent failed to identify these four guidelines. Happily, radio is making a resurgence today because many are practicing the above, and probably most of them don't know why they are succeeding.

Listen to the most successful radio broadcasters today in talk radio and news reporting, and apply the four guidelines to their work. Chances are you will find that they are, and the end result is that they have captured listeners, and over time, their listeners multiply.

Joel_Runes@email.fpl.com wrote the quoted material below:

" Second, Mr. Breen's contention that people filling out diaries
" are generally conscious of the effects of their responses is also
" beyond dispute.

If this is the case then why do certain top market stations pay as much as $25,000 to Arbitron diary keepers to fill in the diaries for them? One particular station has a standing offer to do this. Somehow I don't think that Arbitron would do anything against him since they make a *lot* of money selling reports to his company.

As to Arbitron's methodology, I can point to a 25% error factor between two local stations in morning drive -- people claiming they're listening to one station and yet reporting the programs of another station.

StellaStar wrote the quoted material below:

" nice warmup, the engineer started rolling tape, I introduced the topic,
" and the guest stared blankly at every question I asked; he'd already
" answered them...before we started recording!

I think it's better to warm up the interviewee by asking him/her about hobbies, interests, anything other than the subject matter. It will (1) help the person feel comfortable very fast, and (2) cause them to not think about their subject, so that when they come back to it during the interview, they can just launch into it as if it's something they've known all their lives. Well, it's worked for me anyhow.

Nope, I have had the pleasure of working with both of them. The Kid Kelly from KSMK worked for me at KRQ in Tucson. Last I heard he was in the Sacramento area somewhere. Also, at some point he changed his air name to Jimmy Z, to avoid confusion with the other Kid Kelly. I think he has since switched back

The other Kid Kelly, formerly of Z-100/New York and KC-101/New Haven, is the (Billboard-award-winning) PD and morning man at WBHT, Hot 97, in the Scranton/Wilkes-Barre market, in addition to hosting the Backtrax USA show.

I am a fan of both of them <grin>

FYI Radio AAHS has a very good Web site at:
http://www.radioaahs.com
which has a station listing therein.

ABC should be a great help in selling the network's inventory. Radio
AAHS does 2-hour live programs each week from both Disneyland and
Disneyworld. This is particularly relevent, given the soon to be
completed aquisition of ABC by the Walt Disney Co., which has approved
this arrangement.

# 3340. Buffalo/Toronto:WWKB changes

Newsgroup: rec.radio.broadcasting
Date: 1995-12-03 00:00:00 UTC
From: ag365@Freenet.Buffalo.EDU
Message-ID: <49ruqc$a36@vixen.cso.uiuc.edu>
Source record: 28208

Reply-To: ag365@Freenet.Buffalo.EDU (Carl K. Gorney)

going through changes...yet
again. A story in today's(12/2)Buffalo News reports that WWKB will become
a country station in January,getting its format from satellite. The story
did not say what type of country format will be airing,although Jones' U.S.
Country,Unistar's Hot Country and ABC/SMN's all are possibilities. As a result,
the Buffalo Sabres will be going back to WGR(NewsRadio 55)by then. The Sabres
and WGR management said that the reason for the Sabres move back to 'GR is
because KB's new format prevents any live promotion or discussion of the
Sabres during the day. Getting blown out the door at 'KB:Howard Stern(that was
expected),The Fabulous Sports Babe(1 hour of her show is heard on Toronto's
CHOG(talk/Argos;Talk640)),Dr.Laura Schlessinger(nearest place to hear her is
Hamilton's CHML/900 from 9pm-midnight),Ken Hamblin,Tom Leykis(WHTK in
Rochester is the closest he can be heard,though WGY in Albany comes in well
at night),and Ron Barr's Sports Byline USA. The Road Gang overnight show will,
apparently,stay put.
Here's what 'KB has tried to get ratings in the past decade:
-satellite oldies
-business news/talk(Business Radio 1520)
-CNN Headline News/local news(News First KB radio 1520)
-hot talk(The Big One/The Big 1520)

Prediction:They might as well start looking for another format,because
there are only 2 major players in the market for country:WYRK(traditionally,
a top 5 station with good demos and air personalities)and WNUC(new country;
mostly live with ex-'YRKers). WXRL/1300 does country as well,though it
doesn't register that highly in Arbitrons(it takes a traditional apporach to
the music).

# 3341. Re: KSD-FM SIGNS J.C. CORCORAN TO 3-YEAR DEAL

Newsgroup: rec.radio.broadcasting
Date: 1995-12-03 00:00:00 UTC
From: ssimon9@ix.netcom.com
Message-ID: <49ruqd$a37@vixen.cso.uiuc.edu>
Source record: 28209

It's the Second Go-Around for
St. Louis' Bad-Boy of Radio

by Scott Simon

(St. Louis) -- Thursday paid a big daily-double to long-time St. Louis radio star J.C. Corcoran, first with the birth of a new daughter, then signing a three-year contract with Classic Rocker KSD-FM.
Corcoran will host the "Breakfast Club" from 6-10 a.m. beginning

Monday, December 4.
He's been off the air since July, when WVRV-FM (The River) General Manager Linda O'Connor decided not to renew his contract at the end of the month, choosing to go with a more "music-intensive" morning show, now hosted by Vic Porcelli.
The three-year deal will pay Corcoran $200,000 per year, and includes incentives for increased audience and advertisers.
It's an interesting scenario for Corcoran, 40, who starred at the long-time St. Louis classic rock station from 1987-1991, when it was owned by Gannett. As the morning host, he delivered large audiences and special events, especially with 25 to 49 year olds.
One event, "The Food and Cash Salvation Blast" was a monumental public relations and charitable success, raising money and goods for the St. Louis chapter of the Salvation Army. Beginning in 1988, it was held over a weekend in December at St. Louis-area shopping malls, first at West County Center, then moving to Chesterfield Mall when the first site became too small.
But he fell out of favor with then-general manager Merrill Hansen, who dismissed him for the reason she later described as bad morale.
Corcoran now will work for general manager Karen Carroll which could also prove interesting.
She sued him when he made a derogatory comment about her on the air, ironically on KSD-FM, the station she now runs. The suit was never brought to trial.
There also could be friction inside KSD itself. Across the hall from the FM station is Frank O. Pinion (John Craddock), host of the KSD-AM morning show. It's no secret that Craddock dislikes Corcoran immensely.
That feud dates back to the late 1980's when Corcoran was at KSD-FM and O. Pinion was a sidekick to Lee Sherwood at KSD-AM. Corcoran on the air that "O. Pinion is so cheap, he brings his trash in from home and puts it in the station dumpster, so he won't be charged at home."
Now, the question remains how long will this marriage last. People who actively work in St. Louis radio always said Corcoran would never

work in town again after another dismissal, only to be proven wrong. On the other hand, the story of Corcoran's signing was published on page 5B of the St. Louis Post-Dispatch on Dec. 1. Past Corcoran signings and firings always made page one of either the front page or the prestigious local/regional section.
It's expected that long-time sidekick Mike Bush, sportscaster at Channel 5 in St. Louis, will be on the show. Jamie Allman, a news reporter at Channel 4, also is expected to be a part of the Corcoran crew. Allman made several guest appearances on Corcoran's show at The River.

WYNY ??????

Rumors are running rampant about the future of NYC's only country station. VP/GM Steve Caudillo resigned suddenly this week and Evergreen VP Jim DeCastro takes control of the station. Mentioned as possible formats for 103.5--Dance, Talk or Rock Oldies. A Friday meeting of 'YNY staffers might tip their hand. One rumor has Mancow being simulcast from Chicago. A Battle Royale with Howard Stern on Stern's home turf will be brutal between the two if the Chicago slugfest is any indication.

WBLS has adopted the "Power 107.5" slogan, dropping 'The Vibe'. Webb & Company looks to have Ken Webb, his daughter Teri, Sergio Dean (from afternoons) and former AM driver Michel Wright together in mornings. Holly Levis did a couple of days in the AM with them, but will return to her 1-4p shift.
The 'Power' slogan has been unused in NYC since the mid 80's when WPLJ used it in their CHR days.

Mix 105 moves their studios from 485 Madison Avenue to 1120 Avenue of the Americas on the 18th floor of the Hippodrome building. Their annual Coats for Kids drive, this year headed by Jon Bon Jovi, is looking to top 30,000 coats. This is the 9th year of the drive.

# 3344. Station Call Letters & Internet Domain Names

Newsgroup: rec.radio.broadcasting
Date: 1995-12-03 00:00:00 UTC
From: "Michael J. Phillips / Weatherboy ~NYC & LA~" <weather@cybercomm.net>
Message-ID: <49ruql$a3e@vixen.cso.uiuc.edu>
Source record: 28212

With the proliferation of radio and television stations on the 'net, and the number of available internet domain names decreasing, I was wondering if the radio industry as a whole as developed some sort of "code of ethics" in establishing their domain name/URL on the 'net.

Many stations often refer to themselves to names other than their call letters. (There must be many Z100's, Hot 97's, Magic 98's, Power100's, etc.)...and some stations refer to these names moreso than their call letters.

What I'd like to know is that if your station has made an internet presence and you have your own domain name, do you use your call letters..or stick with a more generic station-name?

And 2 more questions:

-If you use your call letters as your internet domain name, for example, http://www.whtz.com (<-this is *not* a valid/working URL), do you have a problem drawing users to such a site since your better known by your more-generic name like "Z100".

-If you don't use your call letters, and have a domain name like http://www.Z100.com (<-this too is *not* a valid/working URL), how are you able to have such a domain name without "stealing" the availability of that domain name from the other Z100's around the nation.

Has NAB or any other group established any set of guidelines for domain-name registration...or is it a pretty much first-come, first-served domain name game? The new InterNIC guidelines allows for anyone offering any sign of proof that they are known by a certain tradename can get that tradename as a domain name. (Before this recent guideline, anyone could get any domain name...and then copyright disputes came up with people intentionally buying/getting tradename domain names with the hopes of selling them in the future for a hefty profit. (i.e.: mtv.com)

So if your station has a web site, do you have your own domain name? Do you use your call letters or some other name as the domain name? How do you promote your domain name on your station?

Thanks in advance!

Weatherboy/Michael Phillips

DO>How could this happen Bob? You and the Hooters girls made my tedious (but
DO>high paying) work tollerable. I cant believe that they would throw away
DO>all the work that you guys have done to revolutionize talk radio as we
DO>know it to become the 3rd sports talk station in the market. Shocking!!!!!
DO>(as Aunt Nell would say). I will miss you.

Doug,
I'm afraid the last real "revolution" in Talk Radio was Rush Limbaugh. I guess this recent "revolution" didn't generate much cash. It's a hard hearted business. Since everything in our business is a "revolution" or some other kind of blockbuster, we'll have to find new words to accurately describe what's happening. If Kato Kaelin is considered "revolutionary," I hesitate to imagine how wimpy Armageddon will be.

" Tonight, my girlfriend, Elayne asked me why I want to put another
" radio station on another ship. My reply was, because I feel one is
" needed. I see the concentration and centralization of control of the
" media by fewer and fewer individuals. [....]

Expect to see even *more* concentration of broadcasting in fewer hands as President Gingrich eliminates the FCC. It's already headed that way. As of December 1, 1995, there are NO requirements that stations have operators on duty at *any* time, except for 1 designated chief operator who can be a contract employee working for many stations. National networks are now free to buy up as many stations as they want and run them totally automated as relay stations. There are also no longer any log requirements, so stations can operate at any power they want as long as when the (remainders of the) FCC knocks on the door, the station can prove that they are operating legally AT THAT MOMENT.

A longtime FCC engineer recently retired because he was told that unless he collects his benefits this year there may not even be an FCC or benefits next year. The big guys have taken over.

## 3348. '70s stations

Newsgroup: rec.radio.broadcasting
Date: 1995-12-03 00:00:00 UTC
From: salucce@ix.netcom.com
Message-ID: <49rurc$a47@vixen.cso.uiuc.edu>
Source record: 28216

Apparently the '70s pop music format is sweeping the nation. However, we still haven't gotten an all-'70s station here in NYC. I wonder why that is, being that it is faring well elsewhere. Maybe it's a fad that will pass, I'm not quite sure. Does anybody out there have a '70s station in their market? If so, how is it doing in the ratings?

# 3349. Re: End approaching for "angry white male" talk radio?

Newsgroup: rec.radio.broadcasting

Dan Cutrer wrote the quoted material below:

" With WLS apparently heading rapidly for a format change, what does
" this bode for the rest of the "angry white male" talk radio industry?

The corporate radio owners are beginning to discover that there is only a small number of paranoids hiding under their beds. For those stations which remain talkers I foresee two changes: the emergence of liberal national talk hosts such as Bernie Ward and the change in local talkradio to a more centrist view. This may mean that there will be more openings at stations in the future for moderates.

I notice that ABC's KSFO is not doing very well positioning itself as the voice of the people holding shotguns behind their locked doors. They can't seem to attract any quality advertisers, except those sold in combo with KGO, and stores like Safeway have issued press releases saying they're dropping KSFO from their buy list. I think this is very pragmatic in the eyes of advertisers: most people are centrists, not right wingers.

Are we talking about Rush here, or are we talking about the real far out
fringe (G. Gordon Liddy, and beyond)

It could be that with the OJ trial, the budget debates, Bosnia, etc, that
people might be burning out on spoken workd radio, period, and are
switching to music, just to "get away from it all". That would be my
best guess . . .

(Most of the real conspiracy wonks are generally just preaching to the
choir, anyway, in my opinion. Their programming is probably too strident
to attract most people)

# 3352. Re: Is The Media Responsible For Crime Growth?

Newsgroup: rec.radio.broadcasting
Date: 1995-12-03 00:00:00 UTC
From: richwood@commspec.com
Message-ID: <49rur6$a3v@vixen.cso.uiuc.edu>
Source record: 28284

ZO>It occurs to me that a great deal of those committing the crimes don't
ZO>have a whole lot of time to devote to the media. What I think is
ZO>contributing to the increasing crime wave is the decrease in actual
ZO>parenting. My parents took the time to know where I was and what I was
ZO>doing at nearly every moment. They made sure I was exposed to many points
ZO>of view and involved in activities that furthered values they found
ZO>important. My children are being raised the same way, and I have no fear
ZO>of them contributing to the increasing crime wave anymore than my parents
ZO>worried about me. I know I am giving them a good upbringing, teaching
ZO>them the difference between wrong and right, and the value of doing what's
ZO>right. I have to believe that if there were more parents - single and
ZO>otherwise - who were truly involved with their children, the crime rate
ZO>would decline, and that until then, it will continue to grow.

Bob,
I don't think we've factored in the fact that many more activities
are now criminal than ever before. The population is much larger. Our
civil servants in Congress spend day after day making new laws that
forbid something else.

When I was a kid, there were shows like Captain Kangaroo, Lassie,
Sky King, Fury and other warm and fuzzy kid shows. Today that's wimpy
stuff. If the Power Rangers aren't killing something it's a real
letdown. The other option is Barney. Diabetics avoid it. That level of
vapid sugary sweetness is deadly.

I don't believe there's a serious increase in crime. In fact, in
New York, crime is down significantly. You'd never know it by watching
the tube. Every newscast, every "reality" news show, every trash TV
talk show shoves the lowest level of human waste in our faces, hour
after hour. I know very few mothers who are having sex with their
daughter's boyfriends while hanging from slings. Somehow, Sally and
Jenny and Geraldo and Montel can find them everywhere.

The same thing goes for Radio Talk shows. To listen, you'd think
that everyone hates minorities, loves Newt, hates Clinton and hates old
people mooching off the yuppies. In fact, I believe the vast majority
of the population is far more moderate (after all, fewer than 18% of
the registered voters even bothered to vote) than radio or TV would
lead you to believe.

The media deals in hyper everything. The population is so jaded
that the level of hype has to increase as the population gets numbed by
the preceeding level. When that happens, our fear and anxiety level
goes up with it and we need more and more scapegoats to feed the
frenzy. After all, it's always someone else's fault.

Just thought you-all might like an update of what's happening in Philly, as
far as what formats (some in quotes based on my opinion) are on what FM freqs
--

Freq Calls Format Handle Positioner
92.5 WXTU Country
93.3 WMMR "Light AOR" "The Home Of Rock & Roll"
94.1 WYSP "Semi-Hard AOR" "The Rock Station"
95.7 WFLN Classical
96.5 WWDB Talk
98.1 WOGL 50/60/70s gold
98.9 WUSL Urban 18-34 'Power 99' "Continuous Jamz"
100.3 WPLY Modern Rock 'Y-100' "Philadelphia's New
Rock"/"The New Rock
Revolution"
101.1 WBEB Light AC 'B-101' "The Best Songs On The
Radio"
102.1 WIOQ Dance/CHR 'Q-102' "Today's Best Music..for all
people"
102.9 WMGK 60/70/80s rock 'Magic' "Classic Hits"
103.9 WIBF Modern Rock 'WDRE' "Philly's Modern
Rock..103-9, The New DRE!"
104.5 WYXR Rhythmic AC 'Star' "The New Sound Of
Philadelphia"/"The Rhythm
Of The City"
105.3 WDAS Urban 25-54 "Feel The Difference"
106.1 WJJZ NAC "Smooth Jazz"
106.9 WKDN Religious

And for comparison, one year ago --

92.5 WXTU Country
93.3 WMMR AOR "The Home Of Rock & Roll"
94.1 WYSP 60/70/80s rock "The Classic Rock Station"
95.7 WFLN Classical
96.5 WWDB Talk
98.1 WOGL 50/60/70s gold
98.9 WUSL Urban 18-34 'Power 99' "Continuous Jamz"
100.3 WPLY Mod. CHR 'Y-100' "The New Sound Of Y-100"
101.1 WBEB Light AC 'B-101' "The Most Music with Less
Talk"
102.1 WIOQ Pop CHR 'Q-102' "Philadelphia's New #1 Hit
Music Station"
102.9 WMGK 70s 'Magic' "The 70s Station"
103.9 WIBF Modern Rock 'WDRE/UN'

104.5 WYXR Hot AC 'Star' "Superstars Of The 80s &
90s"
105.3 WDAS Urban 25-54 "Feel The Difference"
106.1 WJJZ NAC "Smooth Jazz"
106.9 WKDN Religious

And, briefly, to go back to this time in 1993 --

*Power 99 was using the "Non-Stop Jamz" positioner
*Y-100 was in transition from Adult CHR to Pop-Mod. CHR
*Q-102 was CHuRban, and was using the "Continuous Jamz" positioner
*WMGK was light AC ("Soft Rock")

And, in late Fall 1992 --

*Y-100 was light AC "Kiss 100 WKSZ"
*B-101 was "E-Z 101"
*Ethnic WIBF had just joined the WDRE network
*WJJZ was Pop CHR "Eagle 106 WEGX"

That does it for another edition of "virtual radio-flippin'") :)

# 3357. WWRC-AM (Again)

Newsgroup: rec.radio.broadcasting
Date: 1995-12-03 00:00:00 UTC
From: richwood@commspec.com
Message-ID: <49rurh$a4c@vixen.cso.uiuc.edu>
Source record: 28289

HA>WWRC-AM here in Washington, DC is apparantly (sp?) still not happy with
HA>itself, as they have dumped "Mother Love" in favor of the more traditional J
HA>Bohannan show which is heard at 11 PM after Joe Madison. Seems maybe Mother
HA>Love was a little to strange or something for the station.

Mike,
I wouldn't think that "Mother Love" would fly in Washington. The
show is perfect for adults lost in the 60's in Los Angeles, but is too
California for a gritty place like Washington. They should have tried
the rapier wit of Kato and his well-known grasp of the pulse of the
universe. Maybe Kato could do a real estate show on the availablity of
free guest houses.

They're also carrying the watered-down National Enquirer show. For
that to succeed it'll have to have the real feel of the newspaper. No
station lawyer would get any sleep if the show actually had the teeth
of the newspaper.

I think their new PD is pretty sharp. My bet is that he'll make
many changes in the stuff he's inherited from the last dozen PD's
before him. If he can get out from under the gaggle of consultants he's
been saddled with. Good consultants mold stations to their markets. Bad
ones bring in their own formats and try to jam them into a market.

HA>In other WWRC-AM news, the weekends get weirder. In addition to the hair lo
HA>info-shows, they now have a guy on in the late evenings who does psychic
HA>readings! At least that's who his guest was last weekend. The show was
HA>actually very entertaining, but geez, who needs it... IMHO.

Many stations broker their weekends. These shows sound like paid
programming. It's not at all unusual for a Talk station to sell weekend
time for infomercial-type shows. There's lots of money in brokered
shows and they're very hard to remove. The GM and GSM see cash in
normally low-rated hours. They don't do much for ratings, but neither
do "Mother Love" and Kato.

Any format that considers "Tell us the most embarrassing place
you've farted" to be compelling radio is likely to fail in any city
with even a few brain cells operating.

Rich

# 3358. What station is "La Super 15-90" in Spanish?

Newsgroup: rec.radio.broadcasting
Date: 1995-12-03 00:00:00 UTC
From: mtm@clinet.fi
Message-ID: <49rurb$a46@vixen.cso.uiuc.edu>
Source record: 28290

Who knows what is the Spanish-language station broadcasting on AM 1590 and identifying as "La Super 15-90"? Based on my antenna direction, I would guess it is from California or at least from the Western part of the US. If I got the telephone number right, it is 640-1590 - no idea of the area code. Perhaps KXSP in Ventura CA??

If you have any information of the identity of "La Super 15-90", I would greatly appreciate your e-mail reply directly to: mtm@clinet.fi

I picked up this station in Finland, which was quite a rare incident, and would like to contact the station.

Well, though he should be shot for having crummy materials and no tape... ;)

I've been in radio 7 years now, and every job I've had (save one) I got from, well, walking in off the street unannounced. The stations that hired me did not have any advertised openings (or otherwise known ones).

However, I didn't try pulling the PD/ND/etc. out of the office or the newsroom. I simply left a well-crafted resume, cover letter and tape to their attention, and did follow-up later.

My philosophy has *always* been to visit the station in person, and drop off the resume by hand - even if it's just handing it off to the receptionist. I believe it shows that I give a damn enough to get off my butt and visit the place, even just to see what it's like from through the windows at the front desk. (Oh, and listening to the station on the air before writing the cover letter is important. I've been ND before and received letters..umm...addressed to non-existant people, with the call letters messed up and aiming for the wrong format.)

: costs.

Equivalent for who? The sender?
If you're paying someone just to open mail, you need an efficiency expert.

: The question we need to be getting at here is which one is better
: at helping you unearth new ratings and revenue? ( And let's not forget the
: immediacy of the fax machine, which is what people like Mark no doubt use
: as one of the selling points of radio itself, right?)

: Best I can make out, Mark's point is that people waste his money when they
: "spam" his fax machine with "press releases." Everyone else's point is
: that all of the unsolicited stuff that spews forth from said fax machine
: could be turned into promotions, sales, PSAs, ratings and revenue.
: Hmmm....gosh, I wish I had Mark's "Doctorate of Radio" to help figure this
: one out...

: Bob Gerhard

Keep working at it, Bob.
You do work at a Radio Station, don't you?
Funny, but all the mail I've gotten about this thread -from Radio personnel-
have all been supportive of my position.
All the negative comments have been from those that don;t seem to actually
*be* in radio, just wannabes.

For all those pro-"we'll make millions from them!"-faxed press releases, not
one has cited an example of actually converting a junk mailing into cash.
Like I said before, press releases come from Publicists - their job is free
advertising. Paid Advertising is done by Ad Agents and I'll say again, the
Ad Agents have the Fax number. PSAs come by mail just fine and we don;t have
to print it for them.
Why pay money when you can get free advertising?
I know I never did and I used to be a Publicist for Combined Insurance Co of
America. We got free print and audio all over the world, and do you think we

were not-for-profit? We had a clipping service to keep up with it all.

But if it'll make you happy, we're looking into Bill's 1-900 idea for the fax. And you can bet that it'll cover all the cost, petty or not.

Scott Simon wrote the quoted material below:

" 2. TELL ME WHAT'S HAPPENING NOW. Don't confuse your listener with the
" future or past. Broadcasting is a "real time" medium, so guarantee that
" the listener knows what is happening right at that very moment. [....]
" Incidentally, the above is taken from research that is used in
" television news [....]

It sounds like it. For years, a local station (ABC's KGO-TV) has used annoying intros such as "They're saying tonight in Oakland that a car crash this afternoon...." In an effort to sound current they make sure to pretent that something is happening when it's not. This has also led to the totally stupid stand-ups wherein the reporter stands on a highway overpass "I'm standing over the spot where the truck overturned this afternoon..." only serving to make the reporter look stupid.

As to the assertion that listeners get "confused" with the past, I'd like to see some research that proves this. I think background is extremely important to an interview, and background is ALL in the past.

From: richwood@commspec.com
Message-ID: <49ruqh$a3b@vixen.cso.uiuc.edu>
Source record: 28298

BA>One thing I've been wondering about the market definitions: I've noticed
BA>that the DMA's and ADI's for television don't make any sense at all for
BA>radio. There's counties in Nevada that are in the Denver DMA, for
BA>example. Do they have something like this for radio, where every county
BA>is assigned to one market and only one market?

Radio uses the TV DMA definitions. We use them because Arbitron and
advertisers use them.

BA> The new M Street is coming out any day now, and I may devise my own
BA>market definitions depending on which stations I think are audible in each
BA>county.

A worthy endeavor, I'm sure. However, until you convince ad agencies to
buy according to your new maps, it'll be little more than a quaint
curiosity. The ratings highways are littered with new ratings company
roadkill. Each new company uses different methodology which delivers
different results, so no comparisons can be made.

For something like this to work, the entire industry would have to
agree to use it.

# 3367. Re: Radio Audience Measurement

Newsgroup: rec.radio.broadcasting
Date: 1995-12-03 00:00:00 UTC
From: "Julian H. Breen" <breen@ix.netcom.com>
Message-ID: <49ruqi$a3c@vixen.cso.uiuc.edu>
Source record: 28299

This is in response to a post from Joel_Runes@email.fpl.com in this continuing thread. Since radio audience measurement is so important a subject, I think continuing the thread is useful and hope others do also.

As I attempted to point out earlier, radio audience measurement, Arbitron's and everyone else's, is a form of research in the social sciences which is inherently approximate. Mr. Runes raises some of the usual issues of various kinds of biases including:

* Respondents with an agenda trying to influence programming by voting for their favorites rather than simply reporting their behavior.

* The potential differences between the behaviors of survey respondents and nonrespondents.

There are many others he fails to raise including sampling error, weighting error and the possible distortions engendered by the hierarchy of editing procedures which Arbitron has developed over the years.

These potential biases and errors or ones like them are common to all research in the social sciences. The variety of human experience makes it difficult to measure and quantify, even activity as innocuous as hearing a radio broadcast.

Runes writes:

> In any case, a conclusion that the Arbs are useful depends on
> the application to which they are put. If the national ad buyers
> are spending clients' dollars on the basis of them, it makes sense
> for Mr. Breen's M&A analyses to be based on them as well. In that
> case let the advertising agencies and the financial analysts buy the
> data and pay the freight. That doesn't explain why the stations
> should spend money that could otherwise go towards quality programming
> on ratings books that are likely to distract more than instruct. The
> fact that the research is chartered by SOME of the stations and that
> the market definitions are affected by the financial interests of
> SOME of the stations in the market creates an appearance of
> partiality that may be greater than the reality of the situation
> warrants.

Although Arbitron data is the lingua franca of selling and buying radio advertising nationally, regionally and locally, it also contains considerable valuable programming information related to audience size, audience composition and usage patterns which can

be used to compare the audiences of stations and radio programs.

Mr. Runes apparently regards that kind of knowledge as a distraction.
I do not.

Having worked with 2-line Comrex for some years, I can tell you that he's not using it now.....

He's probably using an ISDN digital audio codec. These units have a studio return built in so that he could hear everything (commercials, callers, and even his producer), and also includes a data channel that can be used for computer displays. He wouldn't even need a phone line.

Allen H. Weiner said: >>asked me why I want to put another radio station on another ship. My reply was, because I feel one is needed. I see the concentration and centralization of control of the media by fewer and fewer individuals. In the USA, the government dares to sell radio frequencies to the highest bidders. Who gave them the right to do this? Who said these frequencies are their property to sell?I am old fashioned, I believe the airwaves belong to all. The contact between a radio announcer and a listener.."<<

May I please ask you a legit, non-obnoxious, on the level question? I heard you on Radio New York International, I drove past your old ship the SARAH almost every day after it was brought back to Boston, I read about you a million times in Pop Com and everywhere else, I know a ton of people whom you've worked with over the years and you're obviously a bright guy. So why go through all this and then end up with the same product everyone else puts on commercial radio. You guys were saying "we're the alternative man.." and then you played classic rock. With the exception of the Donovan "Intergalactic.." song, I could have been listening to a college station playing 60's and 70's. So why all the trouble, with nothing really alternative to say that you can't find on the rest of the dial. Is it THAT much different?

Don't get me wrong,some of my best listneing memories are of tuning in WICE and WFAT on 1610+- in New York City on a couple of cold, snowy nights back in high school. And, I even did shows on WBAI back then with the Family Electric Theatre back then while jocking at 99X. So I guess I understand the thrill. I'm not flaming you for what you think you need to do, I'm just questioning whether what you end up programming is worth your trouble? Is it really THAT much of an alternative?

Cheers anyway!

AN>The contact between a radio announcer and a listener is a precious
AN>thing. In this era of extremely commercial, heavily regulated, and
AN>very homogeneous programming, this one- to-one contact is lost.

Good Grief! I think I'm gonna spit up.

Somehow, the contact between an often undereducated, egocentric, socially backward disk jerkey is hardly what I'd consider "precious." The contact between a parent and child is precious. The contact between a teacher and a student is precious. The contact between an aging flower child and a listener is little more than another waste of electricity.

It's so amusing to watch this cosmic psychobabble approach to broadcasting. Radio pirates always seem to have some higher motive. Yet, when we hear the resulting product it usually involves someone's personal concept of what music mixes ought to be. Usually, it's something out of the 60's extolling the virtues of smoking some kind of plant life.

If we're going to have Pirates, at least make it constructive. Pirate radio is actually used for social good when someone sets up a low power station in a crime-ridden urban neighborhood to link neighbors to fight crime. There are actually stations serving tenements that do some good by warning people of dangerous situations. It's a far better use of the medium than bemoaning the lack of Swedish bagpipe music or not enough Beatles on commercial radio.

PRESS RELEASE

---

WJPZ RADIO, INC., ADJUSTS FORMAT TO MODERN ROCK

SYRACUSE,N.Y.--WJPZ RADIO, INC., announces that, as of December 15, 1995, it will adjust the slant of its contemporary hit radio(CHR) from rhythmic to modern rock. The new positioner will be "89.1-The Pulse," replacing Z89.

The mission statement of WJPZ, a student owned and operated non-commercial radio station, is to "educate students about professional radio."

According to Dan Austin, general manager/president, "WJPZ offers the opportunity for students to learn how to work with others in a professional environment to achieve common goals. Any decisions made regarding the station's future are to ensure that WJPZ carries out its mission."

For over twenty years, WJPZ has been teaching Syracuse University students about professional radio. The WJPZ management is confident that its marketing and re-imaging campaign will re-energize the Syracuse radio market while continuing its educational mission.

I simply toss out what doesn't appeal to me, but take advantage of what does by responding. WE don't live in vacuums!

[Moderator's Note: I think we can stop roasting Mark for his stand on faxed press releases. Many valid points have been made on both sides and in today's world of non-service radio, Mark's position is certainly not the biggest target we can shoot at. I won't kill future posts on the subject, but ask that we let it die a peaceful death unless there is something new to be added. Thanks. Bill]

## 3385. Re: Airchecks???

Newsgroup: rec.radio.broadcasting
Date: 1995-12-04 00:00:00 UTC
From: Stefan Daystrom <75300.3331@CompuServe.COM>
Message-ID: <49ut0n$t3b@vixen.cso.uiuc.edu>
Source record: 28222

Actually, Tom Konard's Aircheck Factory's current address is listed by him simply as: Tom Konard's Aircheck Factory, Aircheck Acres, Wild Rose WI 54984. Ie, no route or box number. Dunno if that means he's moved, or more likely Wild Rose is a small enough post office that they have no problem with the simpler form <g>.

And I agree about great selection and great service. Btw, don't hesitate to write to him with questions; he's good and happy to answer them. (You may have questions, depending on what you're looking for, because his list doesn't mention formats, in some cases doesn't mention less famous jocks, etc. But it's worth the digging <g>...)

# 3386. A Controversial Opinion About AM!

Newsgroup: rec.radio.broadcasting
Date: 1995-12-04 00:00:00 UTC
From: p006778b@pbfreenet.seflin.lib.fl.us
Message-ID: <49ut0o$t3c@vixen.cso.uiuc.edu>
Source record: 28223

I am convinced that many AM stations would be in much better financial shape if GMs hadn't thrown in the towel, and if there were PDs who offered innovative, versus copycat formats. Still, and I am not pleased with my opinion here, I am convinced that AM's problems are signal quality-related. Who wants to hear muddy music or talk, when one may hear it as it more naturally sounds, on FM/ Hopefully, more talkers will mover from AM to FM. FM is only a band; there's no rule saying it must be for music (or for that matter, 7 or so duplicate formats per market).

I was also, until very recently, opposed tp WOWO's power cut, along with so many other stations of which whose owners are filing for power cuts as well. Here's why:

Nobody enjoys listening to a distant station more than I. At the very least, DXing is intriguing, and one also may enjoy the flavor of that outside city without being there. But the reality is that commercial stations are like any other commercial medium. Like newspapers and TV stations, they must make money to survive, and you do hat by satisfying advertisers.

As much as I lovethe history of WOWO, as one example, I doubt that a local Fort Wayne business will receive business from 4 states away, or even 40 miles away, unless it is literally giving away money! When I owned a retail stiore, I found that it cost me much less to advertise on a 5kw local station than a 100,000 watt "super power" FM station which covered many more miles. Not only was the price far less, but I got more results! I learned that if you have a one-store operation, considering competition in outlying areas, the bulk of your business will come from within 5 or 10 miles. Period. So I stopped advertising in big newspapers and on big radio stations. I never touched TV. It just costs way too much.

As a broadcaster AND owner of a PR agency, I have booked guests on big 50 kw AM stations with a 20-state night time reach, yet 95% of the orders resulting from my guest's appearance always came from within the station's local area!

Sure, I'd love to have the FCC authorize even 500,000-watt AMs, for long distance, clear coverage. And now that I'm here in Florida, I sure miss my home town sttaions in the Boston, MA area. But the reality is, why should you run a 50kw transmitter when the bulk of your advertisers' aduience is within say 30 miles? In that case, only 5 kw will do, and with less maintenance fees to boot.

Finally, I hope to be proven incorrect, but I am yet to meet any advertiser who has done well advertising on radio after 6 PM. I also say

this from experience. Unless you are on a network wherethe numbers collectively are really high, advertising on a local station after 6 PM is often a waste. Therefore, if I had my own station, I'd likely cut it off at 10 PM or so, barring local weather emergencies, of course. Radio stations are like any other business; indeed, radio sells merchandise out of its own "storefront". Thus, the FCC has no right telling broadcasters thay must be on X amount of hours a day to be fulltimers, or whatever.--

I am a proud broadcaster, and have some 20 years under my belt, so believe me, I am very much pro-radio. But I believe I'm facing facts which have been proven not only by others, but by yours truly. I would loveto be proven wrong by you. my respected colleagues!

Thanks - and those who reply to me directly will all be responded to right away!

# 3387. Re: Radio Audience Measurement

Newsgroup: rec.radio.broadcasting
Date: 1995-12-04 00:00:00 UTC
From: trionews@aol.com
Message-ID: <49ut0p$t3e@vixen.cso.uiuc.edu>
Source record: 28224

In regards to listeners H.Breen@ix4.ix.netcom.com stated:
>>At the same time they are terrible at projecting their
>>own behavior into the future or doing creative work of any kind.

That is their perspective. A listener sees radio as something that they permit to come into their life. Radio sees radio as what they do to project what they want to see come out of their life.

He further stated:
>> While it is certainly possible to determine the
>>relative preference among a given population for a particular genre
>>of music, that does not necessarily translate into a radio audience
>>share as some research firms would have you believe.

That is their perspective. Listeners see a 'particular genre of music' as it relates to what their memories hold for that music. Not the music itself, regardless of how much consultants want you to think otherwise. Radio sees a 'particular genre of music' as the tool to reach a particular core audience while that music reminds the listener of a time in their life, whether is was good or bad. Older Music reminds them of an era. Current music is giving them memories tied to this era. The era of their own lifestyle.

To which pmokover@ix.netcom.com responded:

>Julian is exactly right. Research respondents (people in general) are
very
>good at reporting their current behavior and giving their opinions about
existing
>things that they're familiar with. They are less good at projecting
their
>future behavior and they are very bad at being creative or giving
opinions of
>things that don't exist and/or they're not familiar with.

This is true. It is because listeners view, from their perspective, a particular format as how it relates to their lives. Since it has not yet happened there is no relationship to judge it by. Radio sees format research as a tool to find an open niche of programming that needs to be filled. The listener is not aware of that niche as they don't yet have it and have no way a measuring it's effect on them should they ever get it.

pmokover@ix.netcom.com further states:

>The so-called "format search" is the least reliable of today's common
radio
>research studies. While listeners can easily tell you what existing

elements
>they like and don't like on radio stations, they're not very good at
>re-packaging the elements into a new station or giving feedback on new,
>non-existent elements or concepts.

They have nothing to compare it with. Where radio seeks to find a hole to fill, the listener is not aware a hole exists. One can not measure a negative. But a negative can be identified.
It is all a matter of understanding the perspective of the respondent. It is common market research protocol regardless of whether it's radio or widgets under study to approach such study from the perspective of the need of the supplier then trying to find a connection to the need of a buyer. This makes for the typical 'overnight success' story. But there is no such thing. An 'overnight success' story is simply a good shot in the right direction that has NOTHING to do with the music being offered. Now don't get me wrong. Radio (this applies to talk as well) is it's product. It's product is what it broadcasts. If it broadcasts music primarily it will consider itself to be a music station. When in fact it is not.

That is where so much goes wrong in ownership making knee jerked reactions to ratings results. The product, as it is seen, gets blamed. Actually the product of radio is entertainment. It doesn't matter what the genre of music is. It is how it is presented.

Look at the recent trends for country radio. One the radio side consultants are playing for numbers with high profile calls and imaging. Making the music the star draws people who like the music. Making the image the star along with the music renders top of mind awareness and therefore better ratings. But in the wings the listening public is bored with the over imaging and no substance. They are bo

# 3388. Chicago Radio Watch: 12/2/95

Newsgroup: rec.radio.broadcasting

Morning drive shuffle......

Urban contemporary WGCI-FM, Chicago's top rated music station, has found a replacement for Tom Joyner. The station named noted comedian Steve Harvey as their new morning host. Steve, best known for his work stand up comedian work also appeared on the television show "Me and the Boys" takes over January 2, 1996. His shift will be from 5 till 9 am. John Monds, who had been filling in on the morning shift moves to afternoons. Denise Jordan-Walker will handle the 9-noon shift while Shirley Hayes works 12-3.

Tom Joyner's syndicated program is expected to be picked up by urban contempory WVAZ-FM January 2. That will set up an interesting battle between Tom and his former employer, GCI.

Finally, Doug Banks, the top rated afternoon drive personality is expected to land at hip hop WEJM-FM and AM somewhere around the first of the year with his show syndicated by the ABC radio network.

Someone must see something that Chicago doesn't.....

Steve Cochrane, mornings at soft rock WPNT-FM must have one great publicity agent. Steve, who has not made a dent in the ratings in Chicago, is said to be mulling over a "serious" offer from WHTZ-FM in New York. It's unusual to see a station mentioned in a rumor. If you are looking for someone to deliver a rating in the 1-2 range, Steve could be your man.

The Worm speaks.....

Continuing Chicago's long tradition of athlete idolization, Chicago Bull Dennis Rodman has hooked up with sports talker WMVP-AM to appear on the station twice a week. Dennis, "The Worm", will appear with Steve Dahl and Bruce Wolf Tuesday's at 8 am. Dennis will also appear on the Peter Brown/Dick Versace program which airs Thursday afternoons. Dick, known as Dixie to friends, coached Dennis when both were in Detroit.

WSCR answers.....

Realizing they were short of ex-Chicago Bulls, daytime sports talker WSCR-AM added ex Bull Cliff Levingston as part of their two headed NBA expert team. Cliff joins former Piston/Net coach Chuck Daly as the stations basketball expert. Cliff and Chuck replace Doug Collins who did outstanding work for the station before his return as the coach for the Detroit Pistons.

Movin up North.....

Suzanne Le Mignot, formerly of all news WBBM-AM, has moved up I-94 to Milwaukee's WTMJ-AM where she will handle as an anchor/reporter at the information station.

Movin down South....

Full service WGN-AM has completed its search to replace Thom Brennaman on Chicago Cubs broadcasts. Ted Hughes, who spent the last eleven years as the number two man on Milwaukee Brewers baseball broadcasts, will move down I-94 and take over play by play responsibilities at WGN. The station also announced that the radio broadcasters will no longer handle the middle three innings on the television side. That is a true blessing because it means that radio listeners will be spared from having to endure Harry Caray butcher the game description during the fourth, fifth and sixth innings.

On a related note, WGN television is expected to name a television play by play announcer for road games and the middle innings. Harry Caray's role is being reduced by mutual agreement to television work only during the first and last three innings. Harry's grandson, Chip, is reportedly the front runner for the television work.

News of former personalities....

Bob Lassiter, formerly with talker WLS-AM, got caught up in a format switch in Tampa/St.Petersburg. Bob, who had been holding court afternoons on WSUN-AM, was made a free agent when the station switched to sports talk. That gives the market three sports stations, but no professional sports teams worth talking about.

Now, if all-news WMAQ wants to continue its migration away from all news or if hot talker WJJD-AM wants to rise out of the ratings outhouse, they would be on the phone with the Magnificent one and find out what it would take to return him to his rightful place in Chicago......

In <49rur6$a3v@vixen.cso.uiuc.edu> richwood@commspec.com writes:

> etc., etc.

The short answer, obvious answer is ....YES. The media hypes crime and makes it EXCITING and perhaps glamorous to young, impressionable folks, who may figure that the risk is worth the trial. Just look at the statistics of incarcerations vs. those that get off with a slap-on-the wrist.

BUT, the systemic faults lie with more than the media ...the courts and the already filled jails really tell the tale in our society today. Even at the depths of the 30s national depression was crime such a problem with society.

One really has to look at all the factors. And, the media appears to be the main root cause.

12/02 1759 EASTERN CARIBBEAN-MEDIA: THE GOSPEL ACCORDING TO ...

BASSETERRE, St. Kitts, (Nov. 30) IPS - It has always been a useful tactic for radio stations in the Caribbean to mind what they say or do not say about their governments.
But now, with so many administrations apparently on the warpath, radio stations will likely have to practice even more self-censorship.
Albert Deterville, owner and operator of Radyo Koulibwi (St. Lucian Creole meaning Radio Hummingbird), found out first hand last week how dangerous it is to be perceived as anti-government in that tiny eastern Caribbean island.
On Nov. 23, an official of the Ministry of Communication, accompanied by an armed police officer, arrived at the small FM station with an order for it to cease broadcasting immediately.
Deterville resisted for two days, saying he did not intend to see his $185,000 investment "go down the drain." But by Nov. 26 the Koulibwi was silent. Deterville had operated the station for more than five years on a temporary license and had consistently sought to acquire long-term operating permission. The government's licensing authority gave no reason for rejecting his application, but it is widely felt that the closure of Koulibwi was connected to its popular telephone call-in program on which the government and other elements of the St. Lucian establishment often came in for sharp criticism.
President of the St. Lucia Media Workers Association (SLMWA) Embert Charles says that despite the station's limited reach, the government was concerned about its potential to provide an avenue for public dissent.
Koulibwi was the only Creole language station on the island and Charles said, with this kind of access "you're inviting a particular sector of the society who in very graphic terms will say exactly what they feel and how they feel, as opposed to the sort of more sophisticated English speakers who might be more tempered."
Radyo Koulibwi gave air time too to groups such as the National Youth Council which has strong anti-establishment positions on a number of issues. Koulibwi, he said "was giving access to viewpoints which are not normally welcomed elsewhere."
The John Compton administration in St. Lucia has a history of heavy-handed responses to media criticism. The closure of Radio St. Lucia for several months, a year ago, is but one example.
Other administrations around the Caribbean have also earned reputations similar to Compton's. The situation is particularly grave given the fact that the majority of radio stations in the sub-region are owned by governments. During his tenure as Information Minister

in the government of St. Vincent and the Grenadines, Parnell Campbell often issued directives to the news and programs staff at Radio 705. One of these directed that government releases should be aired as received and not edited.
Former Radio 705 news director Theresa Daniels remembers Campbell's predecessor Burton Williams coming to the station to vet the major mid-day news bulletin before it was aired.
Of the two radio stations which are the main sources of news in Antigua, one is owned by the Lester Bird administration and the other by Bird's family.
The launching of Antigua-Barbuda's latest political party, the People's Democratic Movement (PDM) received extensive coverage from the Barbados-based Caribbean News Agency and the British Broadcasting Corporation's Overseas Service through its BBC Caribbean Report new program. In Antigua, broadcast media largely ignored the event.
Last August the Communications Advisor to the New national Party (NNP) government Terry Forrester instructed news staff at the Grenada Broadcasting Corporation (GBC) that news of a political nature must be cleared with him before being broadcast.
Journalists protested and weeks later major personnel changes were carried out, including the removal of the news director to a newly created and largely administrative post. His replacement was a known NNP activist.
The same thing happened in Dominica in October.
In St. Kitts-Nevis following the July 3 change of government, Labor Party activist Lement Liburd Jr. took charge of state-owned ZIZ Radio and Television. Although Liburd's official position is media advisor to the government, he conducts most major news interviews, often presents the news casts, anchors all live political broadcasts and hosts the radio station's only current affairs call-in program.
Although regional experts charge government interference, each administration has denied the charges and has pointed out that opposition parties and dissenting views are given regular voice on the state-owned media stations.
For instance Grenada's Forrester said the NNP government is committed to freedom of expression through the media. "We believe firmly that if you try to stifle a people, if you try to stifle any particular organization, you can only create problems for your own self."
But Vincentian political scientist Dr. Adrian Frazer says the current maneuverings is a reflection of the political culture. He says that because governments regard the media and especially radio as an important communications vehicle they invariably seek to staff state media with persons sympathetic to their own viewpoints.
Newly elected governments feel they can ensure adequate coverage of their policies by replacing those who had served previous regimes.
"The temptation to interfere is too strong to be resisted by most governments, " says veteran Trinidadian journalist George John.
John, who sat on the boards of two state-owned broadcast media in the 1970s, says that non-interference is too much to expect in small

countries where governments are so close to the people.
"And even if there is no overt interference, boards and journalists often behave as if there is some, they censor themselves."
Neither Frazer nor Charles expect a relaxation of government control of regional radio stations. With the region still largely oral and because of the reach, flexibility and immediacy of radio, politicians will go to desperate lengths to control the medium, Charles notes.

In article <49phkk$ac9@vixen.cso.uiuc.edu> cannon@onramp.net (Dan Cutrer) writes:

>Just back from a visit to the Seattle area: what great radio! Seattle may
>be the only non-top 10 market with multiple AM news outlets, all of whom
>could easily be competitive in the top-10.

Is this Seattle, Washington, you're talking about? I wonder why I can't find
any of that "great radio." This market has:

too many telephone talk shows (many of them taken off the satellite)

two "AM news outlets" that are a duopoly and share all their street reporters

two NPR stations who run identical programs about 10 hours a day

one classical music station that rarely if ever plays anything that might
force their suburban audience to pay attention rather than using it as
background wallpaper

The best thing about radio in Seattle is that it's close enough to the
Canadian border that you can pick up CBC from Vancouver or Victoria.

New York seems to have few radio stations for a city of its size.
Scranton and Salt Lake City probably have just as many.
Here in Cincinnati, we were deprived of an all-'70s station when WWNK stopped airing their nightly '70s stuff. They were slowly but surely heading towards all-'70s, but now they're bland, stale AC again. Then we had WPPT (The Point), which was an ARROW-type station. But it went away a few months ago when it bought WOFX's intellectual property.
The only cities larger than Cincinnati that have neither a '70s station nor an ARROW are New York, Atlanta, and Minneapolis. Sort of like how Cincinnati used to be the *only* market *anywhere* that had only one top 40.

AUDIO BROADCASTS ON THE INTERNET
The growth of audio on the Internet is expanding rapidly and will continue to do so as the quality improves.

KLIF-AM in Dallas (talk/sports) is now broadcasting "live" 24-hours a day on the Internet! The quality is comparable to a mid-level AM signal. KLIF also has several of its show highlights on-line as well.

The reasons that all radio stations should put their audio on the Internet are obvious: access to a world-wide audience, exposure of your product to agencies, and the ability of your national reps to listen to your station anytime, anywhere!

Oh, and you just might want to do it to keep pace with all of the "cyberstations" that are popping up, since these are your future competitors. The fact that cyberstations don t need an FCC license and will, therefore, continue to grow in number is reason enough to use audio.

In addition, the potential Internet advertising revenue from both audio and graphics will be a very large new revenue stream. Now is the time to position your station for it!

==========

Station and Network Count on the Web* 837 Stations 62 Networks

*As of November 8, 1995 MIT list of stations

==========

SOME STATIONS AND NETWORKS WITH INTERNET AUDIO ABC Radio (testing only): <www.abcradionet.com> CBC Radio (Canada's NPR site) <www.radio.cbc.ca> ESPN (NBA game of night) <espn.sportszone.com> KLIF Dallas, TX (Talk/Sports) <www.pic.net/KLIF> KPIG Santa Cruz, CA (Progressive Country) <www.kpig.com> WKSU Kent State University (NPR) <www.wksu.kent.edu> World Radio Network (Various Shortwave Broadcasts) <town.hall.org/Archives/radio/mirrors/WRN/audio.html> WTUE Dayton, OH (Dayton rock scene) <www.arsdayton.com> WWOZ Metairie, LA (Cajun and Latin music) <nt.accesscom.net/wwoz>

Note: the above use RealAudio from Progressive Networks.

==========

10 TIPS TO LISTENING TO INTERNET AUDIO.

1 Install a sound card in your computer (approx. $200)

2. Connect a pair of computer speakers (approx. $30).
Note: most newer Computers have built in sound support.

3. Download and configure the RealAudio player from Progressive Networks <www.realaudio.com> (free).

4. Join Netcom on-line service since you can t use most other on-line services to play audio <www.netcom.com> ($20/month).

5. Download the Netscape Browser which is needed to play the audio <www.netscape.com> (free).

6. Connect to Netcom and "minimize" their NetCruiser browser (minimize means you get it out of the way!).

7. Select Netscape browser and type in a Web site address with audio - I suggest KLIF since it s live! <www.pic.net/KLIF>.
8. Listen! The RealAudio player should appear on screen and play audio if configured properly.

9. Use at least a 14.4 modem. 28.8 is much prefered.

10. Use at least a 486 PC or higher.

==========

AUDIONET: THE ONE STOP AUDIO WEB SITE! <http://www.audionet.com>
AudioNet is a Web site with several audio programs and features all clustered together. It s like having a computerized radio/satellite dish with tons of choices. These include "live" radio stations, play-by-play, coaches' shows, network talk shows, etc. The benefit to the stations, teams, or networks is a high volume of traffic coming to choose from the several selections. This is much more beneficial than a stand-alone site with limited traffic. AudioNet is willing to provide, at little or no cost, what it takes to get your station s

audio on-line. Contact Mark Cubin at 1-800-34AUDIO.

Our esteemed moderator made several salient points concerning the difficulties facing radio formats aimed at children (similar, BTW, to the problems affecting programming for children on TV).

The primary difficulty he detailed was the lack of coverage of persons under the age of 12 by Arbitron. This ties in neatly with the ongoing discussion of audience measurement. Does the fact that Arbitron doesn't measure the under 12 audience mean that audience doesn't exist? Of course not. Does it mean that advertisers have no interest in reaching that audience? Quite the opposite -- the largest problem with advertising for children is that advertisers are falling over each other to develop ways of hawking inappropriate things to kids.

If there is quality programming for kids that is accessible, i.e., on a station the kids can hear and promoted so that the kids are aware of its presence, it is likely the audience will be there and the advertisers SHOULD be, even if the Arbitrons don't measure it.

The alternative is for children's programming to migrate to media directly supported by listeners, such as public radio and television and premium cable services like Disney. There is already some quality programming for children on public radio such as Rabbit Ears Radio and Kinetic City Kids as well as video programming on PBS affiliates.

A more serious problem, I think, is that children these days are exposed to video-based media so thoroughly and beginning at such a young age that other media, including radio, newspapers and magazines, start out at a big disadvantage. It wasn't nearly so extreme when I was growing up (born in '53) -- and I had the advantage of a home environment where reading newspapers, magazines and library books was a normal thing to do.

Mr. Pfeiffer's second issue is a little more difficult to deal with (the lack of understanding of what a "kids'" format is). My gut reaction is to say its GOOD that there's no general understanding of that format. But more realistically I would ask for a definition of a full-service format. Kids radio should be, and should be labelled, full-service kids programming. It should cover news and entertainment (music, story-telling, general fun) at a level understandable to kids and might have a somewhat greater amount of educational content than full-service programming for adults, but basically that's it.

} things to kids.

No, it means that the ad agencies and major advertisers take
Arbitron's word as a Born-Again Christian takes the Bible... The one
and only infallible truth. Other ratings services have tried to make a
dent in the Arbitron armor and have, for the most part, failed to do
so. Accuratings is the only survivor so far and even they are having
difficulties proving themselves to the biggest agencies, the ones who
really count when the big accounts come looking for ad time.

} If there is quality programming for kids that is accessible,

} it.

Frankly, Joel, I have grown frustrated and cynical when it comes to
applying logic to what is done in media, especially radio. I have
seen very successful stations change formats and die in the
ratings. In addition there seems to be very little correlation
between the real world and radio anymore. But that was explained many
times by many people... "Radio is not in the business of selling
products to listeners, it is in the business of selling listeners to
sponsors. That is a big difference in that it no longer really
matters what listeners think as long as the numbers can be shown to
agencies.

} The alternative is for children's programming to migrate to
} media directly supported by listeners, such as public radio and
} television and premium cable services like Disney. There is

That is true, but we all know the attacks that public broadcasting is under. They consume some fractional percent of the public monies and yet are under attack as though they were a primary user. But I don't want to uncork that bottle of worms. The sad truth is that the era of radio programmed for people is gone. Not in the process of going, *gone*! The current regs (or lack thereof) that allowed an unlimited media grab is the final nail in the coffin, I am afraid. Many of todays (so-called) broadcasters scoff at the notion of serving the public as some antiquated notion that has no place in today's marketplace. The FCC cares not one bit about it (unless you try to put 5 watts on the air someplace, then they come down with the force of the DEA on a major drug bust). But I digress....

} A more serious problem, I think, is that children these days are
} exposed to video-based media so thoroughly and beginning at such a
} young age that other media, including radio, newspapers and
} magazines, start out at a big disadvantage. It wasn't nearly so
} extreme when I was growing up (born in '53) -- and I had the
} advantage of a home environment where reading newspapers, magazines
} and library books was a normal thing to do.

This is very true. And it is one of the real obstacles in trying to create a radio format that entertains and serves a purpose. However radio has two big advantages over video medium. The biggest one is that it (audio programming) is the only mass media that can be fully consumed and appreciated while engaged in another activity. The other is that when done right, radio can stimulate the imagination in ways that video just cannot. As I have said on other occasions, I wonder how many different images of Barney the Dinosaur would be drawn by kids if the show was on radio? I wonder if *any* of them would have looked like the insipid, bland costume that is used?

I feel that children's radio is very important for both of the above reasons. Both major kids formats (AAHS and Kidstar) offer imagination building formatics. Stories, brain games and other involving features that are geared to kids, but are non-condescending and encourage kids to think for themselves, not just take what the tube hands them. TV, by it's very nature, cannot do this as well because it always presents ready-made images to accompany the story lines.

} Mr. Pfeiffer's second issue is a little more difficult to deal
} with (the lack of understanding of what a "kids'" format is). My
} gut reaction is to say its GOOD that there's no general understanding
} of that format.

Creatively that is fine. But the (sad to say) real world is such that if you cannot convey a mental image with a slogan or positioner, you are at a disadvantage. This is part of the problem when one tries to create a new format of any sort. Educating the public is an expensive and time-intensive project. And to be interesting, kids radio must (and does) defy an easy description.

Early Radio AAHS, like two-four years ago, was a very eclectic mix of music that was very free and progressive sounding. Today's Radio AAHS is much more predictable and (sorry to say) bland when compared to the original presentation. It carries much more familiar AC music and it's children's tracks are also more predictable, falling into the Disney/PBS mold more and more and airing far less music that could be labeled independent. I believe that this was done because of the difficulty in explaining the format to station owners and to make it sound more familiar to the average radio listener. Fortunately I have several hours of vintage AAHS, recorded from their flagship station in Minneapolis.

} But more realistically I would ask for a definition
} of a full-service format. Kids radio should be, and should be
} labelled, full-service kids programming. It should cover news and
} entertainment (music, story-telling, general fun) at a level
} understandable to kids and might have a somewhat greater amount of
} educational content than full-service programming for adults, but
} basically that's it.

Kidstar seems to be fitting that mold. They do a lot more with the format than AAHS does (even though I am partial to AAHS). They have kids newscasts and other features. They have their own online and voice-mail service that augments their programming. AAHS is mainly a music format, but they still do a lot of educational and growth-oriented features as well.

Another problem I failed to bring up in my other post is the reluctance on the part of station owners to risk an unknown format. This problem will only get worse as stations are bought up at ridiculous prices in the tens of millions of dollars. Another fine service brought to you by those bastions of the public good, the FCC.

Sure, 5 stations will gladly split the AC or AOR pie, even when it means that they will see only a 1.0 rating, but are not at all interested in being the one-and-only source of a unique format like kids radio. Sad but true and I can see nothing on the horizon but more of the same.

At one time, NAC (then called 'New Age') was a fringe format that was said to have no great commercial potential. But a few gutsy programmers did it. Now NAC formats command the top 10 in many markets, even though it is hard to pin down exactly what NAC is by traditional designators. Kids radio (or better called 'family radio') could also be like that. But it takes *someone* with the resources and foresight to take it from rimshot AM signals to a major FM signal, and the budget to sufficiently promote it. Only then will we see the format flourish as it should.

Many people are totally sick of the absolute predictability of radio in the late 20th century. Where have all the broadcasters gone? We need a few innovators and a few less imitators. Yes, I know, Fred.... I should go buy a station.... :-).

Anyway that is my take on kids radio, with a brief excursion into my
favorite rant about the state of this fine medium in general.

# 3401. Disney sales? (was: Re: D.C. Radio Watch / 30 Nov 1995)

Newsgroup: rec.radio.broadcasting
Date: 1995-12-04 00:00:00 UTC
From: "Mark S. Roberts" <transvox@crl.com>
Message-ID: <49ut1c$t4m@vixen.cso.uiuc.edu>
Source record: 28238

On 2 Dec 1995 12:42:16 GMT Max Cacas (76476.2472@compuserve.com) wrote:

:Item Third: Mickey to boot radio? - Has anyone heard anything more about the
:report over on the Knight-Ridder Financial Wire that Disney is considering
:selling off *all* the radio stations it will acquire in the merger with Cap
:Cities/ABC? Word is that Disney would realize a pile of cash to offset its
:acquisition of CapCities/ABC...no word in the story over whether the ABC Radio
:Network, and associated syndication/production companies would be affected.

In Kansas City, there have been rumors for several weeks that Disney would dump the Kansas City _Star_ and Cap Cities' other newspapers. The _Star_ is Cap Cities' largest newspaper, purchased from the Star's employees in 1977 after the newspaper was unable to get enough capital to replace its antiquated printing plant. (Anyone who subscribed to the _Star_ in the 1970s probably remembers well how hard the newspaper was to read because the print quality was so bad.)

In the _Star_'s business section on Friday (December 1), there was a thorough story about the rumors. Highlights:

* The stories being generated by some "industry analysts" (i.e., brokerages trying to drum up business) is that Disney wants to sell all Cap Cities' publications because they wouldn't fit with Disney's video orientation. Radio was not mentioned.

* The Knight-Ridder article this week said Disney is trying to structure the transaction such that "Disney could easily offload Capital Cities' publications and possibly its radio stations." (Quote is the _Star_'s paraphrase.) Later in the _Star_ article, it was noted that Knight-Ridder has been mentioned has one potential buyer. (Others include Gannett, A.H. Belo, and the {Chicago} Tribune Co.)

* One investment banker, Michael Yagemann of Bear, Stearns & Co. denied the reports. Yagemann is among the team working on the merger for Disney.

* If Disney sold its publications, there would be large capital gains on which taxation would be due. For instance, the _Star_ was bought for $125 million, with the basis reduced by the subsequent sale of the _Star_'s paper mill. The _Star_'s article estimates the newspaper's value today at between $600 million and $1.075 billion.

* "...some analysts pointed out that neither Disney nor Capital Cities has any significant money-losing properties that would force {Disney chairman Michael} Eisner to unload the publications or radio stations or anything else."

* The _Star's_ publisher, Robert Woodworth, said no one has asked to look at the newspaper's books, nor did he see any other indication that the _Star_ was up for sale.

Bottom line, right now, based on what is known today (being the good software project manager that I am) is that the probability of such a sale is less than half but not zero.

Seattle use to have "good" radio, but since the demise of KING-AM, radio is on the wane. The exceptions are Pat Cashman on "The Buzz" weekday mornings as well as syndicated Tom Leykis in the afternoon and Bill Gallant on KIRO-AM weeknights at 10:00. We really need Rick Miller and Jim Althoff back and can totally do without everyone on KKKVI.

Personally, I can't wait for this to happen. It will make most of the promotional and marketing schemes we do today completely obsolete. Sure, you'll have to make people aware that your radio station exists, and explain what it does, and give them good reasons to listen, but beyond that, all they'll have to do IS listen. They won't have to write it down, they won't have to remember your call letters; they won't even have to KNOW your call letters, for that matter, as long as the "people meter" (or whatever such device is used) records all ACTUAL listening.

This will take the bias and peer pressure out of the system completely, and the stations that program most successfully to the audience will win. Entertainment and personality will become important again, and programming will again be the most important element of the radio station...not whether you had the money to spend on billboards or telemarketing or 500 GRP's of television. (A million-dollar budget can make ANY dog of a station win in the ratings, and it has very little to do with whether or not anyone is actually listening.)

For those of us who value the quality of radio programming, this is a day to look forward to. We will surely dispense (for the most part) with the clever marketing and guerrilla tactics, and get back to doing great radio as the ONLY focus of the product. Which, to me, is what it should be all about, but frequently isn't.

# 3405. Re: '70s stations

Newsgroup: rec.radio.broadcasting
Date: 1995-12-04 00:00:00 UTC
From: William Pfeiffer <rrb@clm.aiss.uiuc.edu>
Message-ID: <49ut1r$t5d@vixen.cso.uiuc.edu>
Source record: 28242

I have always believed that the concept of a format that targeted a single decade was doomed to ultimate obsolescence and thereby, failure. Also, I have the belief that the move to the arro (All Rock & Roll Oldies) was just an effort to distance the station from the music of the sixties, which contained within it quite a bit of counter-cultural material, even in the top-40 side of things, and especially in the FM underground/progressive side.

This theory is also borne out by the number of reports of so-called seventies stations dipping into the early eighties, but I don't recall any reports of dipping into the late sixties.

Most seventies stations seem to concentrate on the 'safe' mid - late seventies pop, with almost none of the early seventies music that more resembled the sixties than the later seventies. Some, but not many, seventies formats delved into disco, while others chose the AC and CHR hits of the period, and others still sound more like classic rockers than anything else. I don't believe I have ever heard a seventies station that really 'did the seventies' from 1970 - 1979 and showcased the varied styles that were popular then.

In conclusion, it surprises me not that the fad of the arro format is losing steam, since it has never really developed into the potential it might have had if it had been done right, by someone who really understood the relationships between the musical styles of the period and had the ability and backing to truly market such a station. Instead of just looking at release dates, such a format needs someone who can get behind the sound and create a web that is irresistible to all of those who grew up in that decade and therefore see it as 'the good old days'. Isn't that what nostalgia formats are all about?

Date: 1995-12-04 00:00:00 UTC
From: Fred Weinburg <fred@talk.ktrt.com>
Message-ID: <49ut1e$t4q@vixen.cso.uiuc.edu>
Source record: 28244

In Las Vegas there is KRLV, 1340AM (which actually covers the market because of the valley). KRLV is commonly owned with KTRT/KBIX/KADS in Oklahoma and practices the same sort of locally based talk with some exceptions designed to tailor it to the market.

Jeff Bowen does the morning show, 5-8am. Bowen, late of KTRT in Tulsa, is a conservative ex TV guy.

>From 8-9am we do the Las Vegas equivalent of agriculture, horse racing with Ralph Siraco.

9-10 is Dr. Harvey Ruben, 10-11 is being played with as we write, 11-2 is the immensely popular Chuck Harder. Tim Neverett does 2-5 locally, Larry Grossman from 5-6, Larry King 6-7, Lee Pete and Andy Iskoe are live from 7-10.

Other times we are Bloomberg with NBC news. Station manager is Vince Lupo.

We have been very well received and I am pleased to report that sales are extremely strong.

Las Vegas seems like Tulsa in 1980 and we love the market. What we especially love is that in Las Vegas we don't have to compete against New Cities, Great Empire and Clear Channel who are the big guys we face in Tulsa. As the market gets bigger (and there are 12,000 people a MONTH moving in) we expect to see them all.

The local competition is ok, but doesn't keep me up nights worrying.

Just some random thoughts on the whole WSUN fiasco... If anyone has Bob's E-mail address and would like to forward this to him, I would appreciate it...

Well, Magnificent One, they finally did it, didn't they? WSUN finally caved in-- sold out to the bastards that have been trying to control our lives here in Tampa Bay, and in most of the United States of late-- the sports industry. It wasn't enough that they wanted our tax money, our tourist dollars, and even our very SOULS for their damn stadiums... It wasn't enough that they had taken over our newspapers, billboards, and TV stations; using their shills and pawns in the media to try and convince us that professional sports teams were somehow more vital to the community than the education of our children and the safety of our streets... They finally had to take away our voice. The Bob Lassiter Show-- one of the last bastions of sanity and reason left in Tampa Bay. Where the average Joe could call in and voice his opinion whether or not he agreed with you... And you, Mr. Lassiter, who so often put so eloquently into words what the citizens of Tampa Bay wanted to say, but lacked the talent-- they took your forum from you and from us and replaced it with the very same garbage that you had told us all along was ruining talk radio-- syndicated programming and simulcasting-- most of which with a sports-oriented slant. The people over at WFLA and WQYK must have been dancing in the streets. Malcolm has us right where he wants us.
It's just all too perfect, isn't it? But then again, you saw it coming, didn't you? That day when you told us talk radio was dying-- losing its once-respectable market share. I called in that day, as a 20 year old communication student at USF, to ask you why. You told me that "downsizing" and syndication were to blame-- that radio was becoming less and less community oriented, and more and more corporate. I told you I wanted to go into radio broadcasting-- you told me to major in something at which I could make a living, but not to give up on radio completely. You must have known that day that something was in the works at the station, but had too much class to say anything.
My memories of the show are few compared to many of your listeners, I'm sure... I have only been in Tampa since August. I discovered your show shortly thereafter, and became a faithful listener. I will always look back with fondness on those drives home from work in Brandon, and those afternoons after classes when I would sit in my room trying in vain to get my homework done, laughing throughout the show. I remember thinking that perhaps I would get to work with you or for you someday. The hours I spent listening to your show were more thought-provoking, and taught me more than I have ever learned here in college-- but it was the final lesson, the one taught this past week, perfectly illustrating the cold, harsh realities of radio of which you spoke, that was hardest of all to learn.
You told me that you knew of no one in the broadcasting industry who had ever left the business without some degree of heartbreak. And now, as a

disillusioned and discouraged 20 year old college student, I am beginning to understand and accept that idea as a simple truth. Keep up the fight, Mr. Lassiter. You are the best damn talk show host out there, and everyone in this market knows it. I believe I speak for all of us, your fans, when I say that we hope you stay in the area, and that after this short hiatus, we will continue to be blessed with your talent. If you do have to go somewhere else, however, I wish you all the luck in the world, and envy the market to which you go. Frog!

KDWN-720 is most likely the Las Vegas talk station you are speaking
about. They carry mostly local talk fare, but have recently picked up the
Art Bell Overnight show (Art's studio is a few miles up the road from LV
in Pahrump, NV). KVEG-840 Las Vegas should also be audible in your
location during hours of darkness. They are primarily a sports-talk
station, but carry the Don Imus show from about 3 AM to 7 AM.

Hope this helps.

# 3411. Re: WTIC Schedule in 1960's and 70's

Newsgroup: rec.radio.broadcasting
Date: 1995-12-04 00:00:00 UTC
From: wwgv@aol.com
Message-ID: <49ut25$t5v@vixen.cso.uiuc.edu>
Source record: 28248

Prior to the sale of WTIC AM/FM/TV3 by the Travelers Insurance Company, aprox 1976, my memory of the AM schedule is as follows:
5-6am-A farm program the name of which escapes me. I remember a host of this program who retired in the 60's identifing himself as "Your neighbor down the road." A 1/2 hour TV version ran on the weekends with the title of RFD #3.
6-10a-"The Bob Steel Show" Children's Story @ 7:45a, a polka, a march, no school announcements.
10-11a-"Your Theater of Melody" with Robert E. Smith. Show Tunes.
11a-12n-Jean Colbert with announcer Ed Anderson. Live guest interviews in the studio. From local school kids promoting the school play to Winston Churchill.
12n-12:35-News, Weather, Sports, the occasional editorial with the President of the WTIC Corporation, Leonard J. Petrolseli.
12:35-1p-Meet me on the Plaza with Arnold Dean-A mix of Big Band Music and interviews with people and personalities live from Constitution Plaza(weather permiting).
1p-3p-Mike Line-Rotating hosts form the WTIC announcing staff. A telephone call in with a mix of "how too" for the "Housewife" ie: How to remove a grape fruit stain from a cotton sweater, anyone have a recipe for honeynut eggnog......
3-6p. The Afternoon Eddition with ?
6-7p-News, Weather, Sports......
7-7:30p-Americana with Dick Bertel.
7:30-11-The Evening Edition?, Red Sox Baseball, UCONN Basketball?
11-11:25-News, Weather, Sports......
11:25p-5am-The Otherside of the day with Art Johnson. Music and Art Johnson's comments on the state of the world. At 3am a full four movement symphony.
The AM/FM simulcast 11p-11a. The FM was it's own form of classical/show tunes and "good music" 11a-11p. Saturday afternoons the FM ran the Texaco Metropolitan Opera brodcasts.
The AM was an original affiliate of NBC when the network formed in 1926. This realtionship lasted until the late 80's or early 90's. WTIC AM went on the air sometime between 1922-1925.
Does anyone remember any of the other announcers. Ed Hennesey. Steel predecessor in AM drive Ben Hawthorne. He did the commercails for the Electric Companies of Northeast Utilities (the selling of nuclear power) during the weekly WTIC TV3 Quiz Show "What in The World." Brad Davis was a staff announcer I remember from Mike Line, filling in on the Steel Show/Afternoon Edition/The Otherside of the Day and doing live radio commercials. Davis also did a Saturday afternoon teen dance how on WTIC TV3 called the The Brad Davis Show" brought to you by Connecticut Milk for Health. No real Rock and Roll, no black music. Lots of Bobbie Vinton and

the Rockvillle Rocker Gene Pitney. I do not remember Davis with a regular time on radio. Remember the announcing staff also worked on the FM and TV3. At one time Bob Steel did "Bob Steel Spotlight on Sports" on TV3 as part of the 6p news blocks. The announcers read the news on TV. They also covered the TV announce booth live. I'll never forget Ed Anderson who ancored the 6:05pm Saturday news on WTIC TV3 in the 60's. He read into the mike at the news desk. He never looked at the camera. A "to the bone" radio guy. Remember the Travelers Weather Service, besides Barbara Allen, who were the metrologists? Anyone who grew up in the signal of TV3 in the 60's remembers Ranger Andy at 4p and was probably on the show with their brownie or cub troop. Did you have your birthday appear in the cake on the "Hap Richards Show" at 9am. Remember WTIC TV3's daily am "Homemakers Movie" and monday nights "Afterdinner Movie" from 7-9p. WTIC TV was propably the only CBS TV affiliate not to run "Gunsmoke" and delay "Lucy" to 6:30p on Saturday. The WTIC AM/FM/TV of the Travelers era was very conservitive but there was a commitment and responsability to the community which resonates when you mention the calls today. The Travelers probably never made much money with the TIC's. They were too busy operating three public trusts in the public interest.

In Airwaves (c) #1664, it was scribed to the world:

>KVEG-840 Las Vegas should also be audible in your
>location during hours of darkness. They are primarily a sports-talk
>station, but carry the Don Imus show from about 3 AM to 7 AM.

KVEG is the ONLY outlet in Las Vegas to carry Art Bell Coast to Coast AM.
KVEG also carriers Don Imus live [after Art]; and the Tom Leykis show
live. [Art Bell 11 p.m. Pacific to 4 a.m., then I-man to 10 a.m.]

For San Diego listeners, it's the only way to hear the I-man live, and
the only way to get Tom Leykis in the winter months. She booms at
50kw days, 20 kw nights. I used to laugh when listening to the station,
but she's "gettin' better."

>KRLV, 1340AM

Should be noted that Fred Weinberg took a sleepy AM station and has did
what few have done in Vegas: pulled a lever and MADE MONEY the GREAT WAY.
I've listened to "his" station before and after he came it. A tip of the
hat to you sir in Tulsa, you're doing it right!

ZO>Mark seems to be missing the point here, judging from his responses to me
ZO>and Rich Wood. You're not looking at that fax machine and those "press
ZO>releases" as potential ratings and revenue producers.

ZO>Armond Hammer had a habit of responding "That's good" whenever someone
ZO>gave him "bad news," and sure enough, he found a way to make it good.
ZO>That's a doctorate in success, Mark.

Bob,
That's true. As a Talk station we get many good ideas for topics
and guests from those "rude" people who send us faxes. I would think
that even a DJ would find something interesting to include in his show.
I still contend that we owe our communities something more substantial
than the latest super dance mix.

>out our prize closet." A reliable source in the industry claims KPLX
>will soon change to alternative rock, competing with KDGE "the Edge"

Possibly a good move for them, since KDGE places a lousy signal into downtown Dallas, most of the inner city neighborhoods near downtown, and the south suburbs (The KDGE tower is located between Sherman, TX and Gainesville, TX, about 60 miles north of downtown Dallas). This gives KPLX a good shot at taking away a lot of KDGE's audience just by virtue of being easier to receive. And even with a lousy signal, KDGE has broken into the top 10 12+ in several recent books (although, like many "alternative" stations, they were down this summer).

Tom Desmond, who lives in a northern suburb where KDGE blasts in quite clearly, but has heard the complaints from many friends in the city who can't receive it so well...

We have recently dedicated one of our computers to sending and receiving faxes and I am experiencing a strange problem..

Our area is served by two different local service providers (Pacific Bell and GTE)

The faxes we receive from our listeners who live in the Pacific Bell area come out fine, but the faxes sent from our GTE listeners aren't getting through.

The machine is a 386/40 with a generic class 1 fax/modem running DOS 6.2, Windows, and Delrina Winfax Pro.

Delrina's best shot (after 3 hours with tech support) was an addition to the init string.
It sort of worked then quit working leaving me with the same problem as described
above.

Any ideas? I'd sure appreciate them.

Reply-To: resare@ridgecrest.ca.us

I am soon going to move to Florida from California along Interstate 10.

I would appreciate hearing what are favorite radio stations along the way. I prefer vintage rock to current grunge (avoiding rap and "dance" music).

Thanks for any help. Flames will also be taken.

resare@ridgecrest.ca.us

# 3428. Announcing: South Florida Radio Page

Newsgroup: rec.radio.broadcasting
Date: 1995-12-07 00:00:00 UTC
From: "D. Citron" <dcitron@univox.com>
Message-ID: <4a5usb$flu@vixen.cso.uiuc.edu>
Source record: 28128

Hello everyone, and Happy Holidays!

I have just created "David Citron's South Florida Radio Links & More",
a page of links to radio resources in south Florida. That includes web pages
of five stations, several radio programs, a link to a list of stations, and
of course a link to airwaves.

There's also a link to The New Market Mall home page (for Married With Children
fans), links to a list of holiday links and a list of malls, and a link to a
sample user manual I wrote. (That's my business, writing user manuals,
articles,
web pages, p.r., and lots of other stuff! Even radio spots -- hint, hint.)

Your feedback is welcome and encouraged! Look at http://www.univox.com/radio

ESPECIALLY -- Let me know if you're in Dade, Broward, or Palm Beach counties
and have a web site relating to local radio. (And if you don't (wink, wink, nudge,
nudge) I'll be glad to create one for you.) I'll be glad to add it to the page!

David

# 3429. Angry white male talk wearing out?

Newsgroup: rec.radio.broadcasting
Date: 1995-12-07 00:00:00 UTC
From: talk1370@aol.com
Message-ID: <4a5ut2$fn6@vixen.cso.uiuc.edu>
Source record: 28129

"There will be more openings at stations in the future for moderates."

There had better be, for two reasons. Number one, virtually none of the right wing talk hosts can be as entertaining in staging tantrums as Newt Gingrich, so they suffer by comparison. Even Limbaugh seems to be struggling...he sounds like he's trying now to recapture the fun of his early years, and lighten up on the heavy partisan preaching, but it may be a little late in the game. He's no longer the country's most listened-to radio personality, and hasn't been for some time.

Number two, once the novelty wore off, right-rant radio ran up against one big problem...there really aren't enough angry white guys to sustain it long term. A majority of people interested in hearing about and talking about issues (about 65% according to Harris polls) consider themselves moderate or liberal rather than conservative. And most talk programming doesn't just ignore them, it aggressively attacks them. How long can a format continue when it literally insults almost 2/3 of what would otherwise be a very large, educated and upscale potential audience? That audience has largely given up on talk at this point, and it's dividing itself among NPR stations, straight all-news outlets, classic rockers, heritage AORs and oldies FMs (with the younger end trying out new rock and AAA stations). It's not too late to get 'em back, but another year or two, and it will be...

Take a look at what's happening to Limbaugh and people like Bob Grant in NYC, especially with listeners under 55...and the numbers cannot possibly look pretty to any manager who isn't brain-dead.

An attack of good business sense will (I hope) moderate and broaden the message of talk radio before it becomes hopelessly typecast and marginalized. If that happens, talk still has the potential of becoming more of a mass appeal format than anything we've seen since the great top 40 stations of the '60s. But if it doesn't, it'll retreat to the margins it occupied 40 years ago, and be essentially non-existent outside the top 50 markets. A lot of big stations that made very big commitments to this kind of talk will be taking a very big fall. I make my living from talk, and don't want to see this happen...but we don't have much time left to turn it around.

Bob Smith, middays WXXI-AM 1370 Rochester NY

# 3430. Re: End approaching for "angry white male" talk radio?

Newsgroup: rec.radio.broadcasting
Date: 1995-12-07 00:00:00 UTC
From: ksco5@aol.com
Message-ID: <4a5ut5$fni@vixen.cso.uiuc.edu>
Source record: 28130

First, the "angry white male" story has been disproven by recent research widely published nationwide which shows that talk radio audiences are really quite diverse.

But the key issue here is there are differences between "conservatives" "right-wingers" and the conspiracy people.

1. I would define the "conservative" audience as mainstream and for the most part Rush's audience. This is the largest segment of the talk radio listening audience by far

2. Right wing listeners are more focused on the Constitution and the Second Amendment, among a few other issues (G Gordon Liddy and a few folks more to the right than him). This is a much smaller portion of the audience than mainstream conservatives are.

3. "Conspiracy" folks are the ones into the Tri Lateral/ CFR/ Birch stuff and are less than one percent of any audience. They hate Republicans as much as Democrats. Often they rail as much against Newt and Dole as Clinton and Reno. Yet they are often confused with conservatives. Anyone programming much of this isn't going to find much advertising or ratings, yet more stations than you'd think are doing it anyway.

KSFO has programmed mostly for the latter two, with a new prime-time host heavily into number three. If you target a group that is only one percent or less of the total potential audience, don't be surprised when that's what your numbers show.

Safeway isn't going to pull advertising just because the programming is right-wing. They look at the top ten (or less) stations among key female age groups in each market to make their ad buys. If more women were listening to KSFO, they'd be buying spots there.

What's really amazing is how many talk stations have GM's and PD's who know nothing about politics, yet are programming political talk. No wonder we see these mind-boggling decisions being made at various stations. Look where the greatest number of people are and target them, unless you're happy at the bottom of the book.

# 3431. NYC Radio Watchers Report 12/6/95

Newsgroup: rec.radio.broadcasting
Date: 1995-12-07 00:00:00 UTC
From: TRRadio@aol.com
Message-ID: <4a5utb$fon@vixen.cso.uiuc.edu>
Source record: 28131

First off, let me say it's been just over 1 year I've been the AIRWAVES 'ear to the ground' in NYC--it's been a pleasure.

Nothing new on the WYNY front--Evergreen hasn't tipped it's hand yet. But, the feeling among staffers is the station will change formats, probably after the first of the year. Opinion--Country is not, and never will be, a big draw in NYC. 'YNY's ratings show that, but it is and still could be a profitable format for a station in the market. The station recently hosted a Country Music Expo in suburban NJ with 20,000 attendees over a weekend. What happens next remains to be seen.
Remember--it's was 1/2/95 that KISS-FM unveiled it's new sound and they've never looked back.

On that note, I thought I'd take a moment and look back on the past year in NYC Radio stationwise.

KISS-FM and Hot 97 have given Emmis the top 2 stations in the market and a 13% share. But duopolies are far from the norm in the nation's #1 market. The Westinghouse/CBS merger gives them 4 stations--WCBS-AM/FM, WNEW-FM & WINS-AM. The only 2 all-news stations under one roof?!--maybe in the future, but for now, they remain separately competitive. Another duopoly will be formed when Spanish Broadcasting completes it's purchase of WPAT-FM, paring it with Mega 97.9 on the FM side. Heftel joins WADO-AM with WPAT-AM for another new duopoly after the first of the year. Both groups are expected to go after the Hispanic market as their target.

That's all for now--

Rich Wood's comments are interesting. I've heard some of
Allen's "Radio NY International" broadcasts on WWCR, and
they were sometimes worthwhile alternate commentaries
on public issues, from a more liberal perspective. (Made me
feel I wasn't such a lonely voice in the wilderness some-
times.) But sometimes they sounded like a lot of Stern wanna-
bes got together in a studio and let the stream of semi-
consciousness flow. A lot of "pirate" or "free" radio is so
self-indulgent, put on by adolescents trying to be boss jocks
or Howard Sterns (and the real Stern is childish enough),
that it's unlistenable. The only real connection a radio
personality makes with his audience, is when he subor-
dinates his ego to his message and to the idea of serving
the needs of the AUDIENCE rather than himself. I just
don't see that in pirate or offshore broadcasts.
Bob Smith, middays WXXI-AM 1370 Rochester NY

Why listen to some poor, landlocked, ratings battered AM or FM station-that is likely automated (lifeless) when you can hear digital satellite audio?

That is the question I have, as I laugh at radio today. When DARS hits town boys and girls, stations are going to thit the fan Im afraid.

Ta ta! I really could care less!

Enjoy!

>
> Bill Larsen

Hmm. Interesting that KING could never climb out of the twos, and KVI
could come from literally nowhere -- lower ones, in its last books as an
oldies station -- to beat the almighty (in terms of unbeatability) KIRO.
As for The Buzz (KIRO-FM), it's taken a long time for this station to
crawl out of shares in the ones (and, often, less than a one). And, just
think -- KVI didn't have the benefit of a sister TV station to make its
mark! (Remember: it climbed atop the ratings in Seattle _before_
FishComm's purchase.)

## 3436. Scott Drake?

> deliver a rating in the 1-2 range, Steve could be your man.

Steve did a _wonderful_ job at KDWB/Minneapolis. His show, however, is probably better suited for an Alternative station -- he was also rumored to have been going to WHYT/Detroit -- than a Hot AC (and remember his brief stint at WCKG, which ended when they decided he should do a sports-oriented show, a strategy he was said to have disagreed with). WPNT was consistently in the ones and twos long before Steve Cochran got there, and might be long after he's gone, though they _do_ have one of the nation's premier Hot AC programmers, in Lorrin Palagi. (There may only be room for one successful Hot AC, and even one stand-alone may not pull decent numbers.)

# 3438. Re: All-70's stations

Message-ID: <4a5utq$fqn@vixen.cso.uiuc.edu>
Source record: 28138

<<<Apparently the '70s pop music format is sweeping the nation. However, we still haven't gotten an all-'70s station here in NYC. I wonder why that is, being that it is faring well elsewhere. Maybe it's a fad that will pass, I'm not quite sure. Does anybody out there have a '70s station in their market? If so, how is it doing in the ratings?>>>

All 70's stations get a big audience at first, then lose listeners when the fad wears off. Most, not all, usually add 80's tunes to the mix. Such is the case at Magic 103 in Philly.

It will be interesting to see if Atlantic City's Sunny 103.7 will hold on to their #1 spot with all-70's when next spring's book there is done.

From: rockrap@aol.com
Message-ID: <4a5uur$fup@vixen.cso.uiuc.edu>
Source record: 28140

Reply-To: rockrap@aol.com (Rockrap)

Zoom Black Magic was the first pirate station to broadcast openly in defiance of the FCC (in both Seaside and Fresno, California) and even showed up once in the Arbitron ratings. Zoom has had numerous run-ins with the FCC but is still on the air semi-regularly in Fresno and, from time to time, in Los Angeles.
If you'd like to receive a copy of Zoomin', the official Zoom Black Magic newsletter, just email back your postal address.

## 3441. Ed Phillips

Newsgroup: rec.radio.broadcasting

From: kndw@shell.portal.com
Message-ID: <4a5us0$flc@vixen.cso.uiuc.edu>
Source record: 28141

I was perusing the "440 International" WWW site recently, and noticed the listing for "Johnny Mitchell", a/k/a "Johnny Holiday", a/k/a "Sebastian Stone", whose real name was Ed Phillips. He was one of the early Drake Boss Jocks at KHJ, KFRC and WOR-FM (he was the P.D. at OR-FM when they kicked off their Drake format, at the expense of the original WOR-FM landmark format of 1966-67).

The 440 International site shows Ed as having died in 1987.

Can anyone on R.R.B. fill in the details of whether they're accurate, and, assuming so, how he died and what he had been doing in his last years.

I'd butted heads with Ed a couple times while he was in NY, working under the Sebastian Stone personna both on air and as the P.D., but I came away from it with a grudging respect for the guy, and I'd like to know the "rest of the story". :-)

Thanks, all.

Message-ID: <4a5us2$fle@vixen.cso.uiuc.edu>
Source record: 28142

I haven't seen a study yet that gives conclusive evidence of the effects of EMF exposure.

However, if you are concerned about exposure, keep a couple of things in mind.

Transmitters do not radiate relatively high EMF. This is left to the antennas. Since the tower is mounted on a building in the middle of the city, the engineers probably have designed in a substantial beam tilt. This should increase the downward EMF at some angles.

Since the building is made of reinforced concrete, the EMF radiation through the building should be minimal if the re-bar is grounded and the spacing of the rebar is less than 0.1 times the wavelength. This would effectively shield the area below.

Without knowing any specifics about the design of the antenna and the building construction, it is anyone's guess as to what the field strength in the building will be.

You probably won't have to waste any money on a vasectomy, though.

Source record: 28145

As far as i'm concerned, dont waste your money. A comrex single line frequency extender doesnt "extend" anything. It merely "shifts" the audio so that you get a bit more bass but loose the upper end.

I've found that, in all but a couple cases, all it does is make a remote muddy. If there is a budget, go ISDN. ISDN lines are as cheap as regular lines, but allow you excellent quality audio. Get some ISDN gear for about $2000 total, and you'll sound great.

If you don't have that kind of money, don't waste your money on Frequency extension.

# 3447. KNX, KFI, and KNBR antennas

Newsgroup: rec.radio.broadcasting
Date: 1995-12-07 00:00:00 UTC
From: San Diego Radio Watcher <sdradio@zNet.com>
Message-ID: <4a5uso$fmm@vixen.cso.uiuc.edu>
Source record: 28147

This should help clarify questions about antennas on the real
clear channels in California:

KNX does NOT have a directional array. What you may see at their site in
Torrance is an auxiliary antenna.

KFI, near the Orange and LA county line, also has a 200 foot auxiliary antenna.

KNBR is not directional either. I bet the second tower is also an auxiliary
antenna. [David Kaye would have more info on this if not posted already!]

Some years ago KNX did some experimenting with a directional antenna. It was
actually a curtain antenna. They kept the towers for auxiliary
purposes.

In the meantime KFI, KNX, and others keeps on serving all the ships at sea
in the Pacific.

As one who sailed the oceans blue for the Navy, it was GREAT and UPLIFITING
to hear U.S. broadcasts. As previously posted, while on Midway Island KFI,
KSL, KNX -- and KRLD!! came in fine in the wee hours of the morning.

In a separate posting to me, I'm told that XETRA's new 77.5kw signal over-
drives the Canadian BC signal up north. It should be noted that the
station is still "tweaking" the seven tower array, and from what I'm told,
it'll be a killer signal in the southland day and night. Xtra Sports 690
has landed a major sports broadcast contract -- CBS Sports -- and will
carve yet another nitch in quality sports-radio broadcast.

>put 5 watts on the air someplace, then they come down with the force
>of the DEA on a major drug bust). But I digress....

I would submit there's no more or less correlation between radio and the "real world" than ever. True, we are in the business of selling listeners to advertisers, as I have pointed out here before. Why is it so hard to understand that this concept requires that we gather as many listeners in the desired demographics as we can? We are not in the business of getting people to turn off our stations! To say that it doesn't matter what listeners think is to profoundly misunderstand the marketplace. I will grant that in this marketplace, it doesn't matter what _ certain_ listeners, mainly those older than 50, think. And that is a problem.

But I've come to believe that people who say things like "today's broadcasters scoff at the notion of serving the public" really mean "today's broadcasters scoff at the notion of serving _me_." Every critic thinks that what he/she likes to hear, or believes to be wholesome, is synonymous with public service. 'T'ain't necessarily so.

You're dead right about one thing, though. The FCC doesn't give a damn about anything, except collecting money and doing everything it can to put well-meaning, responsible, public-service-minded broadcasters out of business.

Source record: 28151

It appears that KHAD/KDHR in DeSoto, Missouri, will soon be signing on the air again after being dark twice in 1995.

An ad appeared in the Dec. 6 edition of the St. Louis Post-Dispatch help wanted classified, looking for a sales person, with a phone number 414-874-9656.

A call to that number got a pager, but no return answer, even though the ad said it was their fax machine.

I thought it was a misprint, so I called 314-874-9656, and did get a fax machine. I wrote to request information about their effort to put the stations on the air again, but got no response as of Tuesday night.

Thanks for the DX info. Makes me want to spend some time in Hawaii.

When traveling in the Southwestern USA I found a remarkable difference traveling from Southern California into New Mexico, a span of probably not even 1000 miles. Of all the dozens of West Coast powerhouses, I could hear only KNBR, KNX, and KFI.

A whole new crop of stations came in, including KOMA and some powerhouse owned by a Native American tribe somewhere in Texas or Arizona. Without the Rockies in the way I could hear stations from all over the rest of the country. We Coasties are deprived of much other than basically the western states and provinces.

What was surprising to me was the number of fortune tellers and Christian talkshows I heard. I had expected 100 different varieties of country music, but wasn't prepared for the (sometimes scary) advice shows.

I have never heard anything from Hawaii except WWVH.

# 3454. CASH READY TO SEND FOR LIMITERS

Newsgroup: rec.radio.broadcasting
Date: 1995-12-07 00:00:00 UTC

I just read an Article written by AnitaM1061 concening the building of a new offshore Radio Station. This person wants to build a station merely because they want to....I know the feeling. I've felt that there is a new media that is developing and should be explored, and that is Internet Desktop Broadcasting.

There are already about 30 radio stations on the net, and maybe many more that I don't even know about yet, but the proliferation of higher speed modems, (14.4 and higher) have made it possible to send not only radio, but TV signals over the net.

Xing technology currently has a receiver that can receive TV and radio broadcasts over the net, and there are others that make software radio only receivers too. RealAudio, and Iwave for radio, and VDOLive makes a video net player for playing pre-recorded net streams.

I would like to start my own TV stations accessable from a web site and am working on it. Right now I can access TV from Finland, and radio stations from all over, like Canada, or Tiawan.

I know the feeling of building on a new media that, so far, is free of government restrictions and controls.

# 3457. End approaching for "angry white male" talk radio?

Newsgroup: rec.radio.broadcasting
Date: 1995-12-07 00:00:00 UTC
From: richwood@commspec.com
Message-ID: <4a5ut4$fnc@vixen.cso.uiuc.edu>
Source record: 28157

CA>With WLS apparently heading rapidly for a format change, what does
CA>this bode for the rest of the "angry white male" talk radio industry?

Actually, "angry white male" radio has lots more boding in its future. The reports of its death are greatly exaggerated. The real problem with this genre is that the market is glutted. We have pudgy angry white males, black angry white males, ex-con angry white males, criminal super-hero angry white males and soon, a female angry white male.

Every last one of them is spouting the same spiel, day after day after day after ...

Every last one of them is a mouthpiece for the Republican party. That doesn't bode well for their credibiility. No party can be so perfect so much of the time. We rarely hear about the Republican abuses. It's not that they don't occur, it's just that it's embarrassing to have to admit that Newt has an ethics problem or that one of their own is a lech or that one of their own was driven from office in disgrace.

The "angry white males" we hear on Talk radio in New York sound like the poor schlepps who never got an education and resent it when better educated minorities beat them out of a job because they're more qualified.

CA>A friend who is GM of a major Limbaugh affiliate says they lost much of
CA>their audience to the OJ trial; I haven't yet asked if it's come back since
CA>the trial ended.

I don't buy it. The OJ trial gave listeners an alternative. If the "angry white male" shows were as strong as they boasted, the numbers would have held. Numbers were down even in markets without wall-to-wall OJ.

CA>My take is that the necessary stridency would eventually kill the "goose",
CA>a never-ending diet of conspiracy, anger, outrage, etc., had to con-
CA>tinually build in intensity and scope until it reached comic proportions.
CA>Those fabled "black UN helicopters" apparently haven't been seen much
CA>lately, and the listeners who believed the angst realized the shows had
CA>no credibility.

Anger isn't a very productive emotion. Enough of it and it drains us of any sense of peace or motivation. It also seems to have the opposite effect than it intends. We end up with a populace that feels there's nothing they can do, so they stay home. Remember that less than 18% of registered voters even bothered to vote. The Republican "Revolution" is based on a majority of a tiny minority (53% of 18%). Even registered voters are a small subset of the total population.

Radio targets the total population, not just registered voters. If "angry white male" radio targets that small minority of the total population, you can understand how fragile the audience is.

We're coming into an election year. I expect the constant barrage of political controversy will begin to burn. Every Talk station will have "angry white males" surrounded by angry political news in newscasts surrounded by "angry white male" political commercials that surpass the negativity of past years. It'll strip every vestige of entertainment out of "angry white male" Talk.

When every word on the air has a partisan slant to it (either side) we ultimately zone out and stop believing we're being told the truth. Once credibility is lost, we'll pass used car salesmen as folks not to be believed.

## 3458. Re: What happened to Skip Bayless on KTCK Dallas?

Newsgroup: rec.radio.broadcasting
Date: 1995-12-07 00:00:00 UTC
From: eyel@aol.com
Message-ID: <4a5utu$fra@vixen.cso.uiuc.edu>
Source record: 28158

The answer: partly philosophical difference with new Ticket program director who wanted more fun in the morning, and partly management wanting to save $$ by eliminating Skip's salary and not replacing him with an additional employee.
The sale of the Ticket to SFX broadcasting (KRLD's parent) has caused a dramatic shift in the attitude and sound of the station, which just one year ago was the highest rated sports station in America.

# 3461. Tom Clay & his son...

Newsgroup: rec.radio.broadcasting
Date: 1995-12-07 00:00:00 UTC
From: trich <trich@thepoint.net>
Message-ID: <4a5uu5$fs7@vixen.cso.uiuc.edu>
Source record: 28161

I was sorry to hear of the passing of Tom Clay. I had the pleasure of knowing him and of working with his son, Ron at WQMF-FM in Jeffersonville, IN (Louisville).

For those who don't know, Tom had a top 40 record in the Fall of 1971 called "What the World Needs Now is Love\Abraham, Martin & John". He was kind enough to play it for me the first time I met him. I'll never forget how delighted he was when I told him Larry King featured it occasionally on his radio show.

A few years later, Ron told me a story about that record...it might even be true. He was learning the business back then and Tom had him training in production. He had put together some small pieces, but Tom told him to put together something that would dazzle him. Ron hunted around, found an old PSA featuring an announcer asking small children the meanings of words such as racism and prejudice and some sound bites from the assasinations of the Kennedys and Martin Luther King, Jr. He put them all togeth
er with some Beatles song as background music and played it for his dad.

Tom was impressed. He made some modifications to the record, including inserting his voice in the PSA piece asking the questions to the children and played it for a friend of his in the business. His friend suggested he drop the Beatles background, hire singers to sing in between the sound bites (The Blackberries) and reinstate the original announcer voice on the PSA. He then started playing the tape on his show.

Berry Gordy heard this recording, convinced Tom to release an edited version on Gordy's "Mowest" label, the record climbed to the top 10 on Billboard's national charts and made Tom a lot of money. Of course, Ron had made the original mix.

Ron said he confronted his dad about this soon after and Tom that he had just learned the first lesson of radio...never trust anybody.

When one of the airstaff at QMF lost his mother, Ron told him, "You'll see her again". After Ron died, I always thought about saying that to his dad. Fortunately, I knew I didn't have to. God bless 'em both.

# 3463. More WIC vs. CanWest Global

Newsgroup: rec.radio.broadcasting
Date: 1995-12-07 00:00:00 UTC
From: gord.bailey@freddy.com
Message-ID: <4a5uud$ft5@vixen.cso.uiuc.edu>
Source record: 28163

Toronto -- The controlling shareholders of WIC--Western International Communications--could be powerless to block a hostile takeover bid by CanWest Global Communications.

The Toronto Globe and Mail newspaper cites documents filed with a British Columbia court, showing that a legal opinion exists to that effect.

The Griffiths and Allard families--the controlling shareholders of Vancouiver-based WIC--are said to have had the legal advice for eight months. That advice suggests the company's non-voting shares have been converted to voting shares.

WIC's board has said repeatedly that it doesn't believe the shares have been converted.

Winnipeg-based CanWest has offered $636-million (Can) for WIC. It is suing over the status of WIC's shares.

---

Ottawa -- A long-standing battle over proposed royalty payments to recording artists and record companies is reaching a peak. The payments, known as "neighboring rights", are expected to be included in major changes to Canada's Copyright Act.

The proposals could come before Parliament this month.

Private radio broadcasters say their ailing industry can't afford more payments loaded on struggling small-market stations.

Established musicians say the new royalties are needed to encourage development of younger artists. Songwriters, composers and music publishers now get copyright fees that cost the broadcast industry about $22-million (Can) each year. Broadcasters estimate the new payments would add about the same amount.

Indications are the changes will require stations with revenues of less than $1-million a year to pay only a token amount.

A group of recording artists has appealed to Prime Minister Jean Chretien not to back away from the rights. This group includes stars like Anne Murray, Bryan Adams, Tom Cochrane, Celine Dion, K.D. Lang, Buffy Sainte-Marie, Michelle Wright, Oscar Peterson and the rock group Rush.

The group, in a letter to the Prime Minister, said that neighboring rights are critical to the careers and younger and emerging artists.

Broadcasters say they compensate artists and record producers by playing records on-air and exposing them to potential buyers. Private radio in Canada has lost more than $180-million over the last five years, and the Canadian Association of Broadcasters says more than 52-percent of stations lost money last year.

> offered innovative, versus copycat formats. Still, and I am not pleased
> with my opinion here, I am convinced that AM's problems are signal
> quality-related.

I think the FCC has to take much of the blame for the decline of AM radio. It's true that FM offers some advantages over AM as far as signal quality goes, but AM signals have 2 advantages over FM: the ability to travel over hills and other obstructions, and the absence of multipath distortion. Technology could be devised to deliver better quality audio over AM. For example, synchronous detection can be used to eliminate adjacent channel interference by allowing a listener to listen to the upper or lower sideband.

I'm not saying AM can ever be made to sound as good as FM, but it can certainly sound good enough to inform and entertain listeners effectively. That so many peolle think this is not so is due largely to the failure of the FCC to respond to the processing wars of the eighties, and their approval of many new stations and service upgrades that collectively make it harder to listen to AM than it was 20 years ago. The AM stereo fiasco didn't help, either.

A long time ago someone observed that when an AM station allows negative modulation peaks to hit 100%, it produces splatter. The FCC therefore made it a rule that stations may not run 100% negative peaks. When new audio processors came along in the eighties that allowed broadcasters to squash their audio to death and clip off the peaks just below the 100% level, the FCC should have realized that excessive clipping can lead to splatter just as surely as overmodulation can. They should insisted stations use monitors that measured splatter rather than just looking at modulation levels. They should also have adopted something like NRSC-1 and NRSC-2 ten years earlier.

And some of the power increases and new stations which the FCC authorized were insane. There was a 1 kW daytimer in a Boston suburb which the FCC allowed to go to 25,000 watts daytime and 12,000 watts at night, using a directional pattern that was just plain impossible. The result was serious interference to one of the highest rated stations in town, 50,000-watt WBZ.

In 1984 I was working in Salinas, California and had occasion to speak with the general manager of a Class IV AM in Monterey that was one of our

competitors. He was excited because the FCC was about to let all the Class IV's, which ran 1000 watts daytime but only 250 watts at night, go up to 1000 watts nighttime power. All that annoying interference he had to put up with after dark would just vanish in the face of 1,000 mighty watts! But it wasn't so-- the interference was coming from dozens of other Class IV's on the same channel in other parts of the country. When he went to 1 kW, so did they. All the FCC achieved was a great deal more interference to the Class III's on the adjacent channels. If they'd consciously meant to kill AM listening it would have been hard to think of a better move.

Today the AM band is a mess. The much-talked-about extension to 1700 kHz has been too long delayed and too ineptly implemented. There's hardly anyone left on the band but Christers and wackos. There may still be opportunities for individual broadcasters to draw listeners back to AM, but in most places the battle is long lost.

## 3468. A Bit More on Audience Measurement

Newsgroup: rec.radio.broadcasting
Date: 1995-12-07 00:00:00 UTC
From: Joel_Runes@email.fpl.com
Message-ID: <4a5url$fkv@vixen.cso.uiuc.edu>
Source record: 28168

Several times in this ongoing discussion of radio audience measurement Julian Breen has pointed out that all radio audience measurement is a form of research in the social sciences with the implication that there is an inherent degree of imprecision. I agree that social science research has its problems, but the degree of imprecision and the ability to compare the research results with the underlying reality is not identical in all cases.

Consider, for the time being, political opinion polls. The question is asked of the scientifically selected sample "Are you planning to vote for Mr. A or Ms. B?" When the poll is published the candidate who is ahead generally acknowledges the accuracy of the poll while the candidate behind belittles the accuracy of the poll. But on election night there is a method of comparing the poll results to reality. The same applies to exit polls. The questions as to WHY a voter voted one way or another can't be directly verified, but how they say they voted can be tested against the ballot count.

Similarly, the results of monthly Census surveys of samples of the population can be eventually measured against results of the Decennial Census.

This brings the nature of radio audience measurement into perspective vis-a-vis other social science research. While there is imprecision in all of these cases, there is no particular method of measuring the imprecision here. Even for newspapers there is the capacity to measure the results extrapolated from reader surveys with physical press runs.

---

Two other issues have been raised in this discussion that I would like to respond to. One was the statement that some radio station is willing to pay $25K to fill out Arbitron diaries on behalf of selected participants. If that's the case Arbitron is in the wrong business. They should be peddling diaries to be ignored for $25,000 apiece.

---

Lastly, Mr. Breen comments on the utility of Arbitron data for radio station management. I'm not sure how a program director would use the data. If it shows that my midday talk show host is laying an egg, that's probably something I should know anyway. If I'm trying to figure out how to change my schedule, data on my competition

might be helpful. But Arbitron doesn't include information on the non-commercial stations I might want to take listeners from. Nor does it suggest which non-listeners I might be able to attract. And, as Mr. Breen points out, asking the listeners what they would like to hear is not very reliable. So, in the end, it looks to me like "News You Can't Use." But I'm not totally sure of that. I'm willing to be convinced otherwise. Perhaps if there are some PDs or GMs tuning in to AIRWAVES (as they should), they could explain this to me.

>

I'm a graduate of B.I. Great school! When I went, they had it all spread down Lake street. I see they now have a snazzy new building with all the latest gadgets. It's a great school if you want to get into radio almost right away. They have great instructors who have or still are in the business. They'll teach you TV/Radio and Sales. Everything you need to get your foot in the door. They help you put an audition tape together and their placement facility is very good. You more than likely will start in a small market. That's something to think about. You will not start at the top. I'd recommend going their two-year degree program. I wish they had it when I was a student.

I landed my first job in Gallup, NM thanks to brown. For a small town, this station had excellent facilities. Many toys you'd find in the big leagues. My instructors were honest with job prospects... telling me not to take an offer and why. I have nothing but great things to say about B.I. If you want to get your foot in the door of a radio career, it's worth the investment. Keep in mind you'll learn a lot more in the real world... If you're willing to work hard with long hours.

I now work in Tallahassee, FL... Love it here. And I don't think it would have happened with out the help of Brown Institute!

## 3471. WJR Detroit

Newsgroup: rec.radio.broadcasting
Date: 1995-12-07 00:00:00 UTC
From: mfrat@gopher.chem.wayne.edu
Message-ID: <4a5uuf$fta@vixen.cso.uiuc.edu>
Source record: 28171

WJR is going to be undergoing a major schedule adjustment after the first of the year. Mitch Albom will join the JR force to take over the afternoon drive which had been the job of Joel Alexander and Dayna Mills. They will continue with JR and fulfill other station duties. Kevin Joyce will be replaced by Ken Calvert who will take more of an entertainment and sports approcah to his show. Joyce will take the 9PM to 2AM slot which is Rony Romney's old slot. The 12PM-2AM slot used to be filled by Dr. Laura Schlessinger.

Does all this juggling mean anything for JR's stronghold on the Detroit market?

Source record: 28173

In a world much more hectic, where people are pressed for time from all directions, one has to wonder whether there is a bias built in regarding the TYPE of person that would be able to (a) take part in a self-administered diary study, and (b) have the time to accurately fill out the self-administered diary.

In the mid 80's the MRA (Marketing Research Assn) noted that the self-administered diary was the worst method of data collection. They thought things too busy and time to pressed to have a true statistical representation from people who had the time.

From: mikedow@gate.net
Message-ID: <4a5uun$fuh@vixen.cso.uiuc.edu>
Source record: 28175

I worked with many of the WTIC people in the early 80s at WRCQ-AM in Hartford. The station was originally WRCH-AM and is now a CNN affilliate. Our Sunday lineup for about a year included Floyd ("Hap") Richard, Bob Ellsworth, Mike Ogden and Bill Hennessy.
Floyd hosted the morning kids programas Hap Richard. Mike Ogden replaced Ranger Andy in the afternoon Ranger Station. Bill Hennessy still does a lot of agency commercials in the area and works for the Connecticut State Lottery. Bob Ellsworth, last I knew, left the area for Washington to work for Voice of America. I still hear his voice occasionally on radio and television spots.
Bruce Dern was the anchor of the Channel 3 news. It opened with a shot of the weather instruments. Travelers ran an upscale geography quiz show called "What in the World. The host was John Dando and one of the regulars was Connecticut Republican party chairman Meade Alcorn.
Any more memories?

Mike

It was done by Frank Atwood for years, then Bill Clede.

> 6-10a-"The Bob Steel Show" Children's Story @ 7:45a, a polka, a march, no
> school announcements.

Among many other things ... you could set your watch precisely to the elements of Bob Steele's show. Weather at :25, and so forth. As I recall, the march was on Saturdays ... even though he had the highest-rated morning show in the country for years, Bob always worked a six-day week.

AFAIK, he's still on the air once a month on Saturday mornings. I had Bob do a spot for me early this year; his delivery is still superb ... nailed :60 on the first read.

> 10-11a-"Your Theater of Melody" with Robert E. Smith. Show Tunes.

Trivia: Robert E. had the worst breath in radio.

> 11a-12n-Jean Colbert with announcer Ed Anderson. Live guest interviews in
> the studio. From local school kids promoting the school play to Winston
> Churchill.

Ed Anderson, last I knew, still did the intro and outro for a weekly broadcast from his church that is carried on a local religious station. He was known for his collection of model trains, which was his prize.

> 12n-12:35-News, Weather, Sports, the occasional editorial with the
> President of the WTIC Corporation, Leonard J. Petrolseli.

Mr. Patrocelli started in the mailroom at WTIC, and worked up to owning it along with a local financeer when the Travelers sold it in 1974. One of his most famous editorials (often written by Dick Bertel, now with the VOA) advocated the return of pillories.

> 12:35-1p-Meet me on the Plaza with Arnold Dean-A mix of Big Band Music and
> interviews with people and personalities live from Constitution
> Plaza(weather permiting).

Mikeline was the bane of all the staff announcers' days. Hosts included
Floyd Richards, Brad Davis, Ed Anderson, Bill Henry and others.

> 3-6p. The Afternoon Eddition with ?

Lou Palmer, who left WTIC for ESPN at its startup.

> 6-7p-News, Weather, Sports......
> 7-7:30p-Americana with Dick Bertel.

Last seen as a Big Shot at the VOA, heard from time to time on weekends
on NBC (radio) news as of a few years ago.

> 7:30-11-The Evening Edition?, Red Sox Baseball, UCONN Basketball?

'TIC After Dark, I think ... that was a staff announcer show hosted by
whomever pulled the shift.

> 11-11:25-News, Weather, Sports......
> 11:25p-5am-The Otherside of the day with Art Johnson. Music and Art
> Johnson's comments on the state of the world. At 3am a full four movement
> symphony.

Art always pulled longer symphonies than those that were programmed; he
liked his 3:00 a.m. break. He always fancied himself as Hartford's
William B. Williams, and had the shortest temper of anyone I've ever
worked with in radio. He would run downstairs to TV and scream at the
engineers for turning up the control room monitors too loud, after which
they'd turn them up louder.

Art was gifted/cursed with sensitive hearing ... he could hear if the
Plaza management had inadvertently left the background music on the plaza
on overnight (even from an announce booth in the middle of the station).
It was always necessary to stand stock-still when Art was on the air; he
was easily distracted and would explode at anyone who "bugged" him. He
passed away about a year ago.

> Davis also did a Saturday afternoon teen dance how on WTIC
> TV3 called the The Brad Davis Show" brought to you by Connecticut Milk for
> Health.

Brad does a right-wing talk show now on WDRC-AM in Hartford.

> Remember the Travelers Weather Service, besides Barbara Allen,
> who were the metrologists?

Jerry Wilson, Ken Garee (now back with the New England Weather Service
based at Channel 3), Milt Barlow, and a few others I'll remember as soon
as I send this.

BTW, good to read from you, Bill ...

Hi People!

A new Christian radio program on WDCT 1310 AM will be focusing on
giving lots of airplay for more Christian music that (though still
is pop in some cases) leans toward the alternative side. The program
happens on Saturday nights from 10 pm to 12 am. Check it out and
feel free to give me input on the matter... Though I am not a regular
DJ on this program, I can definitely guarantee your advice and suggestions
will be heard. This station (for now) can only reach the Northern VA.
area...but hopefully southern MD will be reachable in a few months.
Groups you are likely to hear on the program are Lost Dogs, 77s,
Jars of Clay, Code of Ethics, Out of the Grey, Newsboys, etc...etc.
As you can see there is a wide spectrum of diversity. This program
is also interested in promoting local Christian artists... Tune in!

My email is polaris@wam.umd.edu

Peace to you!

John Cho

# 3480. Classical Music (was: Re: Comment on Seattle Radio

ne classical music station that rarely if ever plays anything that might
> force their suburban audience to pay attention rather than using it as
> background wallpaper

But, I bet that's why most of them listen to it, as it serves two
purposes:
1. as you say, it makes nice background music
2. it gives these people a chance to one-up the people who listen
to other formats (See, I listen to *classical music* I'm so
erudite . . .)

What would "force them to pay attention"? A little Schoenberg, or
some Webern, perhaps?

# 3481. Collectable recordings!

Reply-To: rich93a@aol.com (Rich93a)

Did anyone hear about the auction that brought in $300,000 for a reel to reel tape of an interview with John Lennon on WPLJ radio?
This brings up an interesting situation...Where does one find a collecter who is interested in this kinda stuff?
Also I happen to have a few reels from my days at ABC which were discarded when the company moved from the famous 6th Ave. address. Some are very intteresting , like the first day of WABC-FM or the last concert at the Fillmore East, which BTW was a joint broadcast on WPLJ AND WNEW.
Any help, comments would be appreciated.

> continue to pick her up in syndication. What is her appeal?
>

People call her with problems, and she gives advice based on
her own experiences and belief system (as anyone else in the
same position might do).

But of course, nowadays most of the populr takl show
hosts (Limbaugh, Leykis, et. al) come across as very
confident in their positions. To some people, that might come across
as conceit and arrogance. I'd recommend listening a little
while longer (say, a few weeks), and then decide.

Of course, if you just want schmoozing, there's always
Larry King (and there was Arsenio Hall . . .)
.

Mark Fratella wrote the quoted material below:

" I am amazed at her popularity and that stations around the country
" continue to pick her up in syndication. What is her appeal?

She's bright, can get to the root of callers' problems in just a few seconds, has good advice, and is a fun listen. I prefer Dr. Joy Browne, who seemes broader in her approach, but Dr. Laura is good, too.

I'd also rate psych-talk shows in the league of what I'd call the Bruce Williams School of Talkradio: people listen to these shows to hear the host make the callers sound stupid. Of course, in about half the cases, the callers do appear to be stupid. But the fun seems to come from the same root as the attraction of watching an accident scene. Kind of frightening in a way, but I've also found myself drawn to this kind of radio once in awhile, too.

I find that by outlining what we'll be covering in the pre-interview, the interviewee has a little time to develop answers before you ask the question. It leads to a quicker response and a smoother flowing interview. You also find out what to avoid so that you don't get that chilling cold stare when you stumble into forbidden territory.

I fondly remember those halcyon days in the 60's and 70's about WTIC Radio and Television. Channel 3 was a frequent visitor here in the South Shore area of Boston (when Channel 2 would be mercifully off-the-air, instead of having hours upon hours of the test-pattern). I recall "Ranger Station" and the Sunday afternoon showing of the last Monday's episode of "Here's Lucy" (which Channel 3 would pre-empt for a local movie). As a kid of 9, having something funny on a Sunday afternoon was a treat...considering the bland stuff that was prevalent on every other station at that time.

We must also NOT forget the most visible voice of WTIC RAdio and TV.....
the time signal "beep, beep, beep....beeeeeeeeeeeep !". Every hour on the hour...that time signal was always beeping away. I wish they still used it !

BTW: Does the "Traveler's Weather Service" still exist ? :-)

Here is a press release from CFRB AM 1010 and its FM sister
station, MIX 99.9 in Toronto.
I found the press release on the Canada NewsWire web site
at http://newswire.flexnet.com.

CFRB/MIX 99.9 COMBO IS NO. 1 IN TORONTO

TORONTO, Dec. 7 /CNW/ - CFRB AM 1010 and MIX 99.9 is the most
listened to radio combination in Toronto according to results of
the latest Bureau of Broadcast Measurement (BBM) survey. The Fall
BBMs has the two Standard Radio Inc. stations in the number one spot
for AM/FM combos in Toronto!

12+ Full Coverage CFRB/MIX CHFI/CFTR CHUM AM/FM Q107/AM640
---

Circulation 1,828,800 1,539,300 1,302,700 1,149,000
Hours Tuned 17,404,000 14,345,000 10,473,000 8,527,900
Average 1/4 hrs 124,300 102,500 74,800 60,900

CFRB Highlights:
---
- CFRB continues to be Toronto's No. 1 radio station
- CFRB continues to be Toronto's and Canada's most listened to
radio station with 1,054,500 regular weekly listeners
- CFRB's morning man Wally Crouter continues to be number one,
dominating mornings in Toronto with a 13.3 share
- CFRB's evening lineup with Michael Coren and The Toronto
Raptors makes CFRB the nighttime 18+ powerhouse in Toronto

MIX Highlights:
---
- Mix 99.9 is now Toronto's 4th most listened to radio station
- Mix 99.9 is English Canada's No. 1 Radio Station to reach
adults 18-34 with a weekly circulation of 480,500 people
- MIX 99.9's morning show, Rob Christie in the Morning is
number one 18-34 Female at a 14.1 share

Gary Slaight, Vice President and General Manager of CFRB/MIX
99.9 says he is pleased with the Fall BBM Survey results. ``MIX 99.9
has shown growth in key demos while CFRB continues to be the most
listened to radio station in Canada despite the increased
competition.''

I am not such an idealist that I think the audience for standard repertoire classical music would be any more happy with unconventional classical music than they would with heavy metal or avant garde jazz. My complaint is that KING-FM (which does what it sets out to do very well) is the only game in town. Of course there's an audience for that kind of music. But some of us would welcome more frequent challenging music.

[Moderator's Note: At leat you *have* a Classical station in your town. I am relegated to several hours in the afternoon on the college station and what I can get on my Satellite dish. Bill]

|: What would "force them to pay attention"? A little Schoenberg, or
|: some Webern, perhaps?

Over the past six months or so, WCRB (Boston) has experimented with playing movements-only and giving their air talent a lot more personality. Both, obviously, to make the station more up-front (shades of WNCN!).

The movements-only approach ran into serious opposition from listeners, I guess, because it was cut back and now they seem to play shorter works only during drivetime.

On the other hand, the personality approach is starting to work. It took a long (and sometimes embarassingly funny) time for their old-line classical jocks to get used to it, but now the station is becoming more human -- and easier to pay attention to -- than the classic neutral approach to this kind of programming.

They still go overboard, however. It's a bit silly to hear an announcer say something like "Isaac Stern is here to play a little Beethoven concerto". And then insist on call-letter identification as much as possible, leading to statements like "We're live here at Symphony Hall, to listen to the Boston Pops conducted by Keith Lockhart on WCRB."

Well, at least they're trying.

>guest - probe when my curiosity gets the better of me.

I think it's always a good idea to outline what the guest wants to cover and what should be avoided. Just like anything else, an interview has to be going somewhere, which means you need an originating point, a destination and a route. That's what the pre-interview should set up, and what the above is geared towards.

Hope it helps!

# 3497. Madison WI radio news

Newsgroup: rec.radio.broadcasting
Date: 1995-12-08 00:00:00 UTC
From: Timothy Noonan <TNOONAN@macc.wisc.edu>
Message-ID: <4a91hl$59b@vixen.cso.uiuc.edu>
Source record: 28014

The Wisconsin State Journal reports today (December 7) that WMXF 96.3 Sauk City WI will go silent tomorrow night at midnight, dropping their 70s oldies format as "Mix 96.3." At that time the station will change hands, from Odon Broadcasting to Midcontinent Media Inc. Nine people will lose their jobs. The station will return to the air Monday with Christmas music, and will premiere a new unannounced format on New Year's Day. Midcontinent also owns Madison stations WTSO 1070 and WZEE 104.1.

While I have your attention, if anyone is reading this in or near the Madison area, would you please e-mail me? I am anxious to meet other DXers and radio fans in southern Wisconsin.

Tim Noonan

# 3499. Re: Is The Media Responsible For Crime Growth?

Newsgroup: rec.radio.broadcasting
Date: 1995-12-08 00:00:00 UTC
From: William Pfeiffer <rrb@clm.aiss.uiuc.edu>
Message-ID: <4a91hm$59c@vixen.cso.uiuc.edu>
Source record: 28016

} zoniecat@aol.com (ZonieCat) commented:

} I think it's just too easy to whine
} and blame the media.

Is the media responsible for crime growth? Certainly not.

Is it a contributing factor? I cannot imagine how anyone could, with a straight face and w/o an axe to grind, deny it. Sure, every person is responsible for her/his own behavior. No question. However people emulate what they are exposed to, especially younger people/kids. If not, then why do we rate motion pictures? Why do we insist on standards for children's advertising? Why do we ban tobacco ads?

And speaking of advertising, why do we, in the media, make such great claims as to the power of our media to motivate buyers to purchase products, most of which are non-essential, and then deny that we have an equally compelling effect with our programming? I realize that it is TV/video media that is the main player, and this is a radio group, but it always amazes me how hypocritical we are in this regard.

} Perhaps the media should start portraying more
} characters taking responsibility for themselves and their actions and see
} if that catches on!

Now *there* is a thought. I had the misfortune to watch one of the daytime circus of human debris shows (can't remember which, does it matter?) and was amazed to see an entire show with a positive theme!!! It was some time ago, but it was about <gasp> forgiveness and healing of relationships rather than the usual fare of some panel of social deviates and an audience full of cat-calling 'good people' all feeling collectively superior to the freaks on the stage.

Guess what. The audience was just as enthusiastic in their praise and happiness as they usually are in their self-indulgent judgement and condemnation. In fact some of the faces in the audience showed a real joy.

In an increasingly isolated society, where more and more people don't read beyond the daily paper, don't attend theaters, many don't even know their next-door neighbor, we get increasingly large doses of 'reality' via media. It has become the yardstick by which many Americans judge what is going on in the world and (as Rush likes to say quite often) 'what to *think* about what is going on'. How we 'spin' events, what events get reported, or omitted, what sorts of architypes are offered, how the outside world is portrayed *must*

have an effect on how we, as a society, act and react to one-another.

To deny this fact, is IMHO, the ultimate act of mass denial I can think of. Does it mean that media is "to blame" when a nut-case does something he saw on TV or heard on radio? No, certainly not. But one wears blinders, IMHO, if they believe that it has no appreciable effect.

That's the crucial caveat..._appears_ to be the main root cause. Appearances can be deceiving. Anymore, I wonder what the media really is responsible for. (I know, many wonder if it's responsible at all!) It seems that whenever someone's upset with something, the media is the culprit. We're an easy target and - given our lack of a united front, there is pitifully little defense. I think it's just too easy to whine and blame the media. Perhaps the media should start portraying more characters taking responsibility for themselves and their actions and see if that catches on!

Great questions... I once read a study which looked at what happens to abandoned buildings in urban areas. It was observed that if just one window got broken, in a short time all the windows would be broken. But if the broken window was replaced quickly, the rest of them were usually safe. The conclusion the sociobabbler came to was that the "broken window syndrome" has a wider impact. He concluded that whenever a segment of society appears to be left behind, people in it feel empowered to either live be reduced standards or to treat those in it by a lesser standard. The "media" not only reports the locations of broken windows, but breaks a few in the process. To that extend "its" responsible.

Thus putting an end to more than six decades of broadcasting from that
building. While it was still under construction in 1929, CBS
leased six floors of the building (ten years for just $1.5 million!),
and 485 would be the headquarters of CBS from July 1929 until the
opening of Black Rock at 51 W. 52nd St in the early sixties.

And of course, Bonneville Broadcasting's (then-) WRFM and shortwave
WRUL/WNYW had studios in the building from that point until now.

Sal:

If you're still classifying WHTZ as a Top-40 station: as any original "peashooter" can tell you, Z-100 signed on the air on August 2, 1983...6:08 a.m. to be precise. The station which had occupied the frequency before Malrite's acquisition was WVNJ-FM (MOR during the day and jazz at night).

It might be fun to go back and see how many defunct NYC radio stations we can all reminisce about. Last year, a job-seeking friend of mine (with whom I'd worked at the late WNEW-AM) was lamenting that even though nearly his entire professional experience had been in the New York market, none of the stations on his resume existed anymore!

Are you talking about KCBS-FM Los Angeles (93.1) specifically? They
were the first ARRO station. Before that, they played rock-n-roll
oldies from, say, 1955 through the mid 70s, but little, if any,
progressive rock.

>This theory is also borne out by the number of reports of so-called
>seventies stations dipping into the early eighties, but I don't recall
>any reports of dipping into the late sixties.

KBGG San Francisco (98.1) used to be an all-70s station, but a few
months ago they added some material from the late 60s and early to mid
80s. They are not an ARRO station; they play a mix of pop and rock,
with disco on Saturday nights.

>In conclusion, it surprises me not that the fad of the arro format is
>losing steam, since it has never really developed into the potential
>it might have had if it had been done right, by someone who really
>understood the relationships between the musical styles of the period
>and had the ability and backing to truly market such a station.
>Instead of just looking at release dates, such a format needs someone
>who can get behind the sound and create a web that is irresistible to
>all of those who grew up in that decade and therefore see it as 'the
>good old days'. Isn't that what nostalgia formats are all about?

I lived in Los Angeles up until 9 months ago, and listened to KCBS-FM
quite often. They did dip into some progressive FM material, but
they played mostly hits from well known rock artists (Journey, Foreigner,
BTO, etc). They also went fairly far into the 80s (as far as 1988 --
Robert Palmer's "Simply Irresistible"). I did not understand these
programming decisions because they seemed to overlap other offerings
(such as KBIG (104.3)). It seemed to me that most of the 80s pop/rock
tunes could be eliminated and replaced with more progressive rock, but
perhaps they felt they needed to do that to draw in listeners.

I guess I don't really understand what you're asking. I see ARRO as a
different format than 70's pop (like the Drake stations that have been

listed in other threads). I got the sense that what they were trying to do at KCBS-FM was to recreate the sound of a progressive FM station.

My educated guess is that the WJPZ format change has very little to do with market positioning or training students.

Rather, it seems like WJPZ staff & management feel they will impress more friends & be much cooler at parties if they work at an alternative station. Sadly, that's a major part of what college radio is all about.

The station's current "Rhythmic CHR" format is unique in the market. What they're switching to is not. They cannot do it better than the commercial stations do.

In scanning this on-going angry white male thing, I agree with most of what Brian (KSCO) wrote. A news-talk program on TV recently gave stats on voter demographics in the year ago November "revolution". It seems the white male vote was the largest slice but the revolution would not have happened if angry women hadn't also voted. It appears the Republicans saw an increase in the number of women voting for their people. I see the female interest in conservative matters at work as well as at home. One of the women at work will tune in Rush (on another station) during her lunch hour ...and you better not bother her. Perhaps I'm in a very conservative area ...Minnesota?...but it seems women are a significant portion of the audience be it Rush, James Dobson or N.E.T. on cable.

The people looking for black helicopters and ufo sightings etc are fringe. What the conservative listener/viewer is concerned with is the Constitiution and moral values such as crime, treatment of other people and a work ethic.

This is not entirely true. How many times have you heard someone say, "Why don't you hear this on the radio?" That's what the format searches are attempting to identify: a large enough genre that people are buying and listening to because they can't find it on the radio. How reliable the results are is questionable, but it doesn't take a genious to figure out that if most of the record stores in town are selling loads of discs that you're not hearing on the radio, there is a hole and the audience has found it.

Well, as far as I can tell, most of the talk on 'KB is national
(Leykis, Dr. Laura, Ken Hamblin), whereas on WGR and WBEN(930 N/T) there is
much more of an emphasis on local talk(although too much is about the
Bills, IMHO). On the weekends 'GR picks up ESPN radio, which covers
sports from a national perspective. They also broadcast Bob Costas'
national show on Sunday nights.
>
> Now..to the questions-
> 1. Who in Buffalo has the Bills games?

WBEN (930, "NewsTalk 930") is the Bills flagship station.

Greetings, Airwavers! Here's the radio biz news from the Nation's Capital this week:

Item First: "Is this *hot* country or what?" -- The Washington Post's "On the Dial" (radio) column for tuesday, 12/5/95, reports that last Friday morning (the 1st), fire caused heavy smoke and structural damage to the offices and studios of Viacom's WMZQ-AM/FM (1390/98.7, Country simulcast). The fire is believed to have started in a faulty electrical switch in a liquor store located on the first floor of the station's two-story building on Connecticut Ave. in Northwest Wasington. Office and on-air staff was in the building at the time of the fire (915am Eastern); Gary Murphy and Jessica Cash, the morning team, popped a 20-song CD into the player, and left the building. The air staff did their shows from the station's remote truck in a parking lot over the weekend; broadcasts resumed from the studio last Sunday.

It's the third fire for WMZQ in 5 years; the Post reports that in November 1990, the AM station's old studios in Falls Church, Va. were gutted. (These studios were the home of the legendary Top-40 WEAM-AM [1390], and now house the studios of multicultural-formatted WUST-AM [1120], along with the transmitter of WMZQ-AM). Later, a short circuit in a lobster tank (!) from a restaurant also housed in WMZQ'S building caused minor smoke damage to the facility.

And...just to show that there *are* benefits to be derived from duopolys... <g> WMZQ's GM Charlie Ochs says broadcast operations will likely be moved to the Alexandria, Va. facilities of co-owned WBZS-AM (730, Business)/WJZW-FM (105.9, "Smooth Jazz"), until repairs can be made to WMZQ's studios.

(Author's note: Reading this item reminds me of the time in the mid-70s when the basement offices and studios of classical WGMS-AM/FM (570/103.5) went up in flames in the middle of the night. Cause: an electric typewriter left on by the office staff. The fire spread so quickly, the all-night man barely made it out of the studio with his life; a transmitter engineer (yes, they had them back then!) for the RKO-owned station popped a pre-recorded cassette tape into a machine, and for the next several hours, that cassette deck was the radio station! Morning man Dennis Owens then did his show with a hastily put together collection of turntables and cart machines. Fortunately, the station's huge classical record library survived, but not much was left of the rest of the station except a bust of Beethoven in the lobby! WGMS later took out a big two-page ad in the papers to thank many of the competing D.C. area radio stations that pitched in with engineering, office and other help in the wake of the fire. Today, WGMS-FM has studios in Rockville, Md., along with co-owned WTEM-AM (570, Sports), and WBIG-FM (100.3, 50s/60s Oldies).

Item Second: The Holiday Spirit - The Post reports that "Smooth Jazz 105.9" (WJZW--FM) is celebrating the holidays by asking listeners to mail or FAX stories about people in need. The station plans to air some of the stories, and

then try to match those in need with individuals, organizations and companies willing to help.

Item Third: The recent joint operating agreement announced last week by the ABC Radio Networks and Children's Broadcasting Network (CBC) is seen as a positive move by at least one affiliate. Virginia Carson, CEO of Capital Kids Radio, told the Washington Post that the move is a "tremendous step forward" for
"the Radio Zone", the name given to the three stations owned by her group in the D.C.-Baltimore-Va. area broadcasting "Radio AAHs" programming. (WKDL-AM, 1050 Silver Spring, Md. ; WKDV-AM 1460 Manassas, Va. ; WKDB-AM 1570 Baltimore). ABC will promote the format, and also sell national advertising for the network's programs. (Author stepping up on soapbox: A lot has been made here about *why* ARBITRON refuses to measure the under 12 audience, or, more importantly, why the advertising community refuses to even recognize that this audience even exists, and insist that ARBITRON measure the children's audience.
I believe ABC's very wise move will push the advertising community, and ARBITRON to finally realize the purchasing power of this market, and maybe we can finally get some support for creative and profitable children's/family radio programming. I, for one, applaud ABC for making an excellent business decision.)

That's it from "inside the beltway"...more next week!

Cheers, Max

# 3520. New England Radio Watcher: The Year In Review

Newsgroup: rec.radio.broadcasting
Date: 1995-12-08 00:00:00 UTC
From: fybush@world.std.com
Message-ID: <4a91gq$583@vixen.cso.uiuc.edu>
Source record: 28191

Quite a year it's been in New England radio, as our local broadcasters have proven they're not immune to any of the trends sweeping the industry...be it the rise of modern rock, the spread of duopoly (and more), the decline of AM, and much much more. Let's start here in Boston, with a quick dial scan of the stations that made news in '95:

*590 WBNW -- After getting off to a slow start at its launch in September 1994, WBNW continued to reside at the bottom of the ratings. The daytime money-talk schedule was shaken up this fall, with the departure of afternoon host Jeannine Graf.

*680 WRKO -- A good year for Boston's talk giant, with the PM drive Howie Carr show demonstrating continued ratings growth. 'RKO picked up the Celtics after the team decided it didn't want to be associated with the anti-Celts talk hosts on 'RKO's sister station, all-sports WEEI 850.

*850 WEEI -- In its first full year on the 50kw transmitter that used to be WHDH, WEEI posted mixed results. Imus continues to be WEEI's saving grace, drawing impressive morning ratings. An autumn shakeup of the talk lineup brought in the Fabulous Sports babe, and de-emphasized callers in favor of in-studio sports banter. A decent season got the Sox off to a good start on their new home at 850. And former Celtics voice and talk host Glenn Ordway took over as program chief.

*890 WBPS: After months of transitioning from Spanish-language religious WBIV 1060, this suburban outlet began establishing itself as Boston's second all-sports outlet. Programming is mostly Prime Sports (albeit with local AM drive), signal is weak in much of the market, and ratings thus far have been nonexistent.

*1030 WBZ -- The big news here came just a few weeks ago, as WBZ parent Westinghouse bought CBS. 'BZ picked up the CBS Radio affiliation in March, adding it to the existing AP and ABC Info networks. The Bruins came to 'BZ this fall, albeit without a very good record this year. Patriots games were replaced with NY Giants after WBCN outbid BZ for the Pats. On a happy note, talk show host David Brudnoy returned to the airwaves January 5th after being hospitalized for several months with what he revealed were symptoms of AIDS. Veteran newsman Darrell Gould retired after almost 30 years at WBZ. Finally, BZ took home a Marconi award for best major-market radio station of 1995. (Disclaimer: Yes, I work there. And yeah, I'm

more than a little proud. So?)

*1060 WBIV: Dead and gone...for now. The suburban AM that was once John Garabedian's pride and joy (as WGTR) gave up its transmitter and towers to the new 890 WBPS. The license was sold for a pittance to one Alexander Langer of Florida. Rumor has it that Langer will put the station back on as a daytimer... but so far nothing concrete (or steel, for that matter) to show for it.

*1090 WILD: A tough year for Boston's lone black-owned outlet, as WJMN 94.5 asserts itself as the dominant urban station. Still, WILD has been hanging tough, stepping up its promotions in a valiant attempt to compete.

*1200 WKOX: A complete change of format and focus marked 1995 for Framingham's AM station. WKOX dumped its satellite country format and became a Boston-based talker this fall, including a morning news block and a midday program from Gene Burns (still based in San Francisco and doing the show by ISDN). WKOX closed out the year by applying for a power increase to 50kw, and a daytime transmitter move to a site just 10 miles from downtown Boston. But the future is cloudy...rumors keep swirling of a buyout by Salem Communications (owners of WEZE 1260 in Boston).

*1510 WNRB: The end of the old WSSH call letters here, as new owners Communicom turned on their religious format, and changed the calls in February.

FM:

*88.1 WMBR: MIT's radio station turned on its new transmitter, boosting power from 360 watts to 720.

*88.9 WERS: Emerson College's station closed out the year amidst controversy, as college officials banned all but a handful of rap songs from the station. The administrators say it's out of concern for violent language; some students call it censorship. WERS also turned off overnights, because of administration worries about the safety of student DJs in WERS' studio right on Beacon Street.

*89.7 WGBH: Boston's oldest public radio station dropped its popular afternoon "MusicAmerica" show in the fall to make room for an expanded news block, and in the face of staunch opposition from listeners who liked the American popular standards show, refused to reverse the decision. At year's end, it still looks like a standoff...neither side is budging.

*91.9 WUMB: More news at this public broadcaster, too, as it became the third local outlet for "All Things Considered," in an attempt to maintain the needed listenership to qualify for CPB funding. WUMB turned on its second satellite station,

WFPB 91.9 Falmouth (Cape Cod) earlier this month.

*92.5 WXRV: The Haverhill-based station turned off the "Lite" ac format and WLYT calls this fall, becoming AAA "The River."

*92.9 WBOS: Boston's first AAA station continued the DJ shuffle, bringing in veteran Boston jock Ken Shelton as the latest morning host. Ratings remain moribund.

*93.7 WEGQ: Boston's 70's station settled in, ditching the WCGY calls that were associated with its former rock format. "Eagle 93-7"'s new tower is under construction in Middleton, Mass., some 15 miles closer to Boston than its present Andover location. The search for a morning host continues after the ouster of original morning guy Scott McKay.

*94.5 WJMN: "Jam'n 94.5" came under the same corporate umbrella as constant rival Kiss 108, only to find Evergreen buying said umbrella (otherwise known as Pyramid Broadcasting). Jam'n's new morning jock, Baltazar (late of Hot 97 in NYC), actually beat Kiss veteran Matty Siegel...leading to an on-air war of words for a few days.

*95.3 WHRB: The Harvard student station moved from a low transmitter site near campus to WERS's site atop Boston's One Financial Center skyscraper, giving the station greatly improved coverage.

*96.9 WBCS: Greater Media is committed to country here. After WKLB's sale (see below), WBCS renewed its million dollar pledge, promising to stay country through January 1, 1997... or else they'll pay a million dollars to the first caller to catch the format change. But with WKLB still running country, both stations are splitting a fairly small piece of pie.

*98.5 WBMX: Pretty much status quo at hot AC "Mix 98.5," except for an illness that's sidelined morning guy Joe Martelle through the start of next year. Barry Scott is taking his 70s-fest, "The Lost 45s," into syndication.

*99.1 WPLM: This South Shore old-timer finally bowed out of the cutthroat AC race (against Boston's WBMX, WSSH, and WMJX; Providence's WSNE and WWLI; and the Cape's WCIB and WCOD), and filled the smooth-jazz niche in late June. That was the good news. The bad news is they ditched their local jocks in the process, and turned on the SW satellite. Ditto (as always) for their AM sister on 1390, nearly impossible to hear up in Boston, or much of anywhere for that matter. That's one simulcast that's unlikely to ever be broken...

*100.7 WZLX: Two big changes at the classic rocker marked '95. Ken Shelton was ousted from mornings, replaced by George Taylor Morris. And 'ZLX moved from its Hancock Tower home of more than a decade, down the street to new studios in the Prudential Tower.

*101.7 WFNX: Boston's oldest alternative rocker saw several jocks leave...and saw some big competition move in, as WBCN shifted from AOR to modern rock. 'FNX is trying to bolster its less-than-impressive class A signal, with FCC approval for a new translator in Boston's Back Bay, just the spot to reach all those college students -- and Phoenix Media Group corporate HQ on Brookline Ave. to boot!

*102.5 WCRB: There might be a format change here...in 97 years. What can you say about a station that's owned by a trust...which legally commits it to remain classical until 2092?

*103.3 WODS: "Oldies 103" had a stable 1995...but there could be changes in store for '96, as new owners Westinghouse take over at the CBS-owned FM. Rumors are already swirling about a move from rented space downtown to the WBZ facility in Brighton.

*104.1 WBCN: Probably THE radio story of the year here, as "The Rock of Boston" became an alternative rocker. At year's end, it's still unclear how well Hub audiences have taken to aging DJs like Charles Laquidara (age 54) playng modern rock. 'BCN picked up the Patriots with a massive cash infusion from owner Infinity. And Howard Stern kept grousing about being tape-delayed to 7pm on 'BCN...a time slot that's been less than kind to the King of Some Media.

*105.7 WKLB: Another big story here...as Evergreen made plans to make this its third Boston FM, as soon as the FCC rules are changed. The local rumormongers all agree that the country format will likely be dumped...and the hot rumor is hot talk, a la Evergreen's WLUP in Chicago. WKLB started the year as WCLB...but did the call-change thing after a ratings book that showed suspiciously high numbers for WC_R_B, not to mention Brockton's WCAV, and even some radio diary entries for TV station WCVB! In any case, the changes at WKLB are on hold for now, as Evergreen waits for permission to take over from Fairbanks Broadcasting.

*107.9 WXKS: Pyramid Broadcasting, which took Kiss 108 from worst to first back in 1979, cashed out this year... selling Kiss 108, WXKS-AM, WJMN, and its stations elsewhere

to Evergreen for a nice big chunk of cash (into the 9 figures). Pyramid honcho Richie Balsbaugh had a strong emotional attachment to the Kiss format and jocks...but will Evergreen show the same restraint in the face of flat ratings at Kiss? Meanwhile, sister station WJMN continues to soar, prompting rumors that Evergreen might try to consolidate the CHR and urban audiences at Jam'n...and take Kiss in another direction. Should be an interesting year at Kiss headquarters, especially when WJMN moves from its current rented Waltham digs up to the WXKS facility in scenic Medford.

So that's Boston in a nutshell...meantime out in the hinterlands:

*Modern rock caught on in a big way, with converts that included new entry WDGE "99.7 the Edge" in Wakefield RI (nee WUAE), WWBX 97.1 Bangor ME (last noted as country WYOU), and WCYY/WCYI in the Portland market (formerly AAA)...not to mention WMRQ 104.1 Waterbury-Hartford, which actually began transitioning in late '94.

*Duopoly was big, too...with a new triopoly (pending FCC approval) in Hartford, among others.

*Gone but not forgotten: WHAV 1490 in Haverhill MA jettisoned its local news staff and its English-language oldies format, and was sold to Spanish-language WNNW in Salem NH. And just a few weeks ago, country WCAV in Brockton MA fired all its DJs and went to the bird. Country WHIM in Providence vanished - again - from its 1110 spot, only to turn up on the former WKRI 1450 W. Warwick, after 1110 became Spanish WPMZ. WARE in Ware MA kept its local news staff but ditched oldies for a simulcast of new owner WQVR-FM Southbridge (satellite country). And most painfully, the very cool WEXP-FM 105.1 up in Burlington VT (actually Plattsburgh NY) proved to be too good for its own good. In an overbuilt market, this very eclectic AAA-esque station couldn't make it, and was sold into duopoly, only to resurface in the hands of the radio Body Snatchers as satellite oldies WKOL. Thanks, but no thanks. At least southern VT got some cool AAA, as WBFL 107.1 Bellows Falls and WUVR 100.5 in Lebanon NH teamed up as "The River."

*Back from the dead: Little WHAB-FM at Acton-Boxboro High School in Acton MA reappeared at 89.1 FM. And WCMX in Leominster MA could be back on AM 1000 within a few weeks. WKFD 1370 in Wickford RI could be back soon, too.

*New to the airwaves: WBNC-FM 104.5 in Conway NH, WKCD 107.7 in Pawcatuck CT (brand-new, running SW Smooth Jazz), just to name a few. Out in Western Mass., AC WJDF 97.3 made its on-air debut in mid-summer.

And that's all I can think of. Not a bad year for a chronicler of radio...here's to a happy, healthy, RF-laden '96!

Someone else wrote the quoted material below:

" > <AHEM!!!!!!> Yes and no. If you are on the LOW end of the band, yes
" 5,000 > watts will do. 10,000 watts at 1510 is like 180 watts on 550.

I can cite several stations running 10kw and 50kw at the higher end of the band which get excellent coverage. KXFX, a sportstalk station in Portland on 1520 at 10kw can be heard in Eureka, California, a distance of 450 miles. KFBK in Sacramento, a 50kw on 1530 can be heard in Vancouver, BC Canada. KGA, a 50kw on 1510 in Spokane can be heard easily in Salinas (80 miles south of SF) -- and that's a distance of nearly 1000 miles.

The question is: how many local advertisers need that kind of reach? Unless a station is selling C.Crane's mail order radios or has some national accounts, the big signal isn't going to do them much good.

> I'm not saying AM can ever be made to sound as good as FM,

Actually, Bob Carver and his crew at Carver (the stereo equipment company) did a test, playing a CD directly through the sound system, then fed to a small AM stereo transmitter, played through Carver's FM/AM stereo tuner. Most stereo writers witnessing the test couldn't tell the difference!

Problems for AM, though: the 'stigma', and the fact that manufacturers -- many, anyway -- have just been too cheap to put quality electronics into the AM sections of their tuners, particularly with car equipment. I remember working at an AM stereo station in the mid-80's (KTAC/Tacoma), and it sounded _damn_ good. But guess what: a good sounding AM still sounds like sh*t on a bad receiver! (Or even a good receiver with bad AM tuner components.)

Funny...I've been following this string and all the responses I've seen pro and con have been from Radio Professionals like myself.

>For all those pro-"we'll make millions from them!"-faxed press releases, not
>one has cited an example of actually converting a junk mailing into cash.

Just today a rookie sales person turned a faxed in press release - from a store owner announcing their opening with absolutely no PR firm or ad agency involved - into an order. The same happened roughly two weeks ago. I've also seen press releases from non-prof agencies turned into revenue generating events, and have been doing this for the past eight years. Nobody gets free advertising at our station, trust me. But those faxed in press releases can be and are - as a matter of policy - treated as leads and turned into sales. It works, Mark, plain and simple. Just take a step off your high horse to get a look at eye level, and you'll see profits. Proven profits.

>Like I said before, press releases come from Publicists - their job is free
>advertising.

And your job - if you were actually doing it - is finding new ways of turning that free advertising into new revenue.

> Paid Advertising is done by Ad Agents and I'll say again, the
>Ad Agents have the Fax number.

You're relying on ad agencies to generate all your revenue? Do a little work and watch your profits grow, Mark.

*Nancy rolls the wheel-Barrow cross-town....

The battle between the 2 AC stations in the market,WJYE(96.1,straight-ahead AC)and WMJQ(102.5,hot AC;Q 102)just turned up a notch.
Nancy Barrow-who co-hosted Q 102's morning show(with Rob Lucas)for 2 1/2 years(she had been at Albany's WPYX(106.5,AOR;PYX 106)before that)-left Q 102 on Nov.30;she debuted as Joe Chille's new co-host on Monday(12/4)after former co-host Maryalice Demler left to concentrate on TV(currently on WGRZ(ch.2)as its health reporter;however,Ch.2 and WIVB(ch.4)have been competeting for her reporting services). Tony Violanti's column in Wednesday's Buffalo News said that Barrow was not under contract at Q 102,so there was no "non-compete clause" to deal with. Tom Kernan,who produced the morning show at WMJQ,also left to WJYE. Barrow said that she'd miss Rob,but that the move was "in a lot of ways,it's like going home."
That wasn't all. WJYE also debuted a more upbeat jingle package,and there may be more changes ahead. One tipster told me in private e-mail that as many as 2 more Q 102 staffers may also make the jump. It did not,however, say who.

*WBEN gets mo' Accu-rate with its weather....

WBEN(NewsTalk 930)dumped its long-time Weather Facts forecast on Monday for the State College,Pa.-based AccuWeather company. WBEN PD Kevin Keenan,in Violanti's article,said that the station wanted to "expand our weather coverage",adding that AccuWeather has over 70 meterologists on staff, including Elliott Abrams,who handles weather in AM drive. Keenan added that "Don Paul did a fine job for us but his priority is television." One possible reason for the switchover:Paul takes a lot of time off,thanks to his deal from WIVB,right down the hall from WBEN.
Also of note:Traci Chiepella,who produces the WBEN Good Morning Show,as well as call-screening Gary McNamara's mid-morning show,is leaving to take a news job in upper Michigan.

*WHTT(1120/104.1,oldies;Oldies 104)will be getting new studios sometime in early 1996. The new studios will be on the 4th floor of the Buffalo Hilton hotel downtown(right across the street from WKBW(ch.7)),with enough office space to house WHTT and its sister station,WSJZ(92.9,NAC/jazz; Smooth Jazz 92-9). (Personal note:Anything that can get rid of its echo when the APs take a mic is fine with me! ;)

*Another tipster told me that some Seneca Indians are planning a pirate station to broadcast from the Cattaragus Indian Reservation southwest of Buffalo(which I-90/N.Y.Thruway crosses). Someone involved with the planning says he can go on the air without the FCC's knowledge,since the reservation

is on "sovereign land" outside the FCC's jurisdiction. (Ohhhhh-K. :>) They're looking at 88.1 FM and a couple of other frequencies on the non-comm band. (88.1 may be out,since WUBJ/Jamestown already uses that frequency.) That person says he's looking at 25-50 kW ERP to reach the Buffalo area.

*Some of 'KB's syndicated talk may still find a home after it jumps to satellite country around January 1st. Business First said in its Dec.11 edition on the Sabres jump back to WGR(NewsRadio 55)that radio sources are saying that Stern may land at another station in the area. Prediction: Think Mercury is going to snap up the show for one of its 2 stations,WGRF (97 Rock)or WEDG(103.3 the Edge)? Also,Alan Pergament's Sports on the Air column in today's News notes that WWKB GM Terry Rodda said that "we're trying to see what,or if,we can do to hold on to her services." He adds that rumors are that the Babe will land on WGR,displacing local talker Ron Dobson-which he added make sense,since 'GR has a heavy sports presence and will be getting the Sabres back in early January.

*Last week's Business First had a story by Joe Marren about WQRT-FM(98.3) in Salamanca,which jumped from country to classic rock in October. Mike Washington,CEO/president/part-owner Mike Washington said that no advance notice was given due to technological aspects(if & when the change could occur),and outcry over the change if it was publicized. That didn't happen-both listeners and advertisers have accepted it.
Washington added that it made good business sense-along the N.Y./Penn. border,4 country stations compete(WPIG/95.7 in Olean,WXTA/98.1 in Edinboro/Erie,PA.,WCQA/96.5 in Dunkirk,and WHUG/101.7 in Jamestown)-plus,when WGRF (97 Rock)moved its antenna closer to Buffalo,it became harder to pick up. Also,the station now broadcasts round-the-clock,instead of signing off at midnight.

# 3530. Protest Salavadoran Govt. Silencing Community Radio Stations

Newsgroup: rec.radio.broadcasting
Date: 1995-12-10 00:00:00 UTC
From: frbspd@crl.com
Message-ID: <4afg1s$ock@vixen.cso.uiuc.edu>
Source record: 27951

Radio Action Demonstration to Protest Salvadoran Government
Shutdown of 10 Community Radio Stations

Demonstration at the Salvadoran Consulate,
Flood Building - Powell & Market, San Francisco
Wednesday, December 13 - 12 noon.

Contact: Stephen Dunifer, Free Radio Berkeley (510) 644-3779

In solidarity with the 10 community radio stations shut down by the Salvadoran police at the behest of Juan Jose Domenech, president of ANTEL (the state agency in charge of broadcast regulation), Free Radio Berkeley, San Francisco Liberation Radio, Radio Libre will be sponsoring a support action at the El Salvadoran Consulate on Wednesday, December 13, 12 noon.

Notification of this was received from the World Association of Community Broadcasters (AMARC) from whose press release we quote the following:

SAN SALVADOR, DECEMBER 1995 -- In a simultaneous operation in communities throughout the country, the Salvadoran National Civil Police (PNC) closed and confiscated the equipment of ten community radio stations on Monday December 4. All of the stations are members of the Association of Participatory Radio Stations and Programs of El Salvador (ARPAS), and the World Association of Community Radio Broadcasters (AMARC).

According to members of the PNC, the operation was carried out at the request of Juan Jose Domenech, President of ANTEL, the state agency charged with regulating broadcasting and telecommunications. Sources within the PNC said that Domenech had ordered the closure of "all the community radio stations".

Most of the stations operated with very low-power and were heard only in the immediate vicinity of the municipality in which they were located. The three most powerful stations broadcast with 100 watts and were heard in most of the department in which they were located. There is no indication that any of them interfered with the signals of other existing radio stations.

The stations are owned by their municipalities, by associations of residents or agricultural workers, or by non-governmental organizations concerned with improving social conditions. All of them are participatory and educational in nature and strive to serve the poorer sectors of the population. In more isolated zones, these radio stations also serve as the "community telephone system", broadcasting messages, both emergency and personal, to and from listeners. They are the most important source of

local and regional news and provide an electronic public bulletin board, announcing community events and activities. All of these radio stations offer a space in which all members of the community can exercise their right to inform, to express their opinions, and to be heard.

All of the stations have a history of cooperation with the authorities, broadcasting messages on behalf of municipal governments, the National Civil Police, the Ministry of Health, the Ministry of Agriculture, the Ministry of Education and even ANTEL, the agency that has ordered their closure.

While none of the stations have received broadcast licenses from ANTEL, some of them have been operating since 1990 and almost all of them have been on the air for at least 2 years. During this period, it has been shown that the stations do not interfere with existing stations and numerous appeals have been made to ANTEL, the Legislative Assembly and other authorities (see AMARC's RadioAction Alert of August 19, 1993). In a statement issued December 5, ARPAS noted that "the radio stations have done everything possible to assure their legality and continue to do so... But in this country, admired around the world for its ability to negotiate, it has not been possible to move foreword in the discussions with ANTEL."

According to ARPAS the principal problem is the "tremendous confusion" in El Salvador's broadcast legislation. "If Salvadoran laws restrict the use of radio to the state and commercial spheres, if public service and social and cultural development are not part of the broadcasting norm, if the laws do not support the rights of citizens and civil society to have access to the means of communication, then it is urgent that those laws be revised.

(end of AMARC release)
---

Speaking for SF Liberation Radio, Richard Edmondson stated: "The action of the Salvadoran government is deplorable and should stand as a reminder of what we can lose when governments silence free speech."

Stephen Dunifer with Free Radio Berkeley said, "I see some rather disturbing parallels between the actions of ANTEL and the Federal Communications Commission (FCC). Both agencies do not believe communities should be empowered with their own low power FM broadcast stations and have refused to create a special low power service category. Further, the FCC also has a history of using heavy handed police tactics against unlicensed broadcasters. In many ways the micropower radio stations operating in the US serve the same function as the now silenced community radio stations in El Salvador. Apparently neither government can tolerate the idea of democratic, grass roots community radio controlled by the people it serves. It is rather ironic that the Colombian government, certainly not a bastion of civil right and liberties, has just recently issued 1000 licenses for low power community radio stations. We support the following demands and will be ready to offer material and technical

assistance to these community radio stations."

* That the confiscated equipment be returned and that the eleven
radio stations be permitted to broadcast once again;
* That the president request that ANTEL accelerate the process of
granting broadcast licences to El Salvador's community radio stations.
* That the Salvadoran broadcast legislation be reviewed to ensure
that it is in accordance with El Salvador's situation as a new democracy.

COUNTRY 101 TOPS AIRWAVES IN RADIO WARS!

Country 101 continues to lead the overall ratings race in the Halifax Metro scene, BUT CBC radio has a lock on the key weekday breakfast-time slot.
Country 101 (CHFX-FM) has 19.1 per cent of the total hours tuned weekly by listeners age 12 & up in the Halifax Metro area, according to figures released on December 07, from the Bureau of Broadcast Measurement.
SUN-FM show significant increases in audience among the region's seven commerical stations versus a year ago, said media analyst Bob Coffin of Halifax advertising firm McArthur Thompson and Law.
The fledgling station's overall share has increased to 9.9 per cent while breakfast has increased to 9.1 per cent. SUN started as an eas-listening station but now plays a heavily-promoted style of light rock oriented to women.
CJCH-AM, which broadcast a mix of local and imported talk programs, showed big percentage gains in audience but still trails most other commerical broadcasters by a wide margin.
Oldies 96/CHNS has a highly-publicized debut in late August of veterans Frank Cameron & Doug Sauders as morning hosts, but it was probably too early to register much in these ratings, which were gathered in September & October.
Public Broadcasting CBC showed large gains with it's elite Stereo service which plays mostly classical music, BUT it's still a minor player in the market.

CHFX-FM ( Country 101): 19.1
C100-FM (Light Rock Hits): 18.5
Q104-FM (The Home Of Rock & Roll): 16.7
CBC Radio:16.3
SUN-FM (Yesterday Hits & Today's Favorites):9.9
CHNS-AM (Oldies 96/CHNS):7.6
CBC Stereo:4.1
CFDR-AM (780/KIXX Country):2.9
CJCH-AM (News Talk Radio):2.7
*Total hours: 6,290,300

*Breakfast audiences for Monday to Friday by percentage:
CBC Radio: 21.6
CHFX: 17.9
C100: 16.9
Q104: 14.9
CHNS: 9.7
SUN: 9.1

KIXX: 3.1
CJCH: 2.7
CBC Stereo: 2.7
*Breafast hours: 1,647,800
(source- The Mail Star ...Halifax.)

.....In upcoming reports, what does the ratings mean for stations? Will there be on air changes? I will let you know, as soon as I get them!

I want to take this time to wish the "Best Of The Season" to all, and a Happy New Year!

>>will soon change to alternative rock, competing with KDGE "the Edge"
>
> Possibly a good move for them, since KDGE places a lousy signal into
>downtown Dallas, most of the inner city neighborhoods near downtown, and
>the south suburbs.

The folks over at KLIF/KPLX are increasingly not amused at the antics of the one poster who keeps shuffling this stuff onto this group. Again: KPLX is close to being the most profitable FM in Dallas/Ft. Worth! The log was heavy on Saturday, December 2, the Production Director worked overtime getting stuff ready. No one "cleaned out the prize closet." No one made announcements "We're country, but we won't be for long."

Best bet at KPLX is that who(m)ever is posting this tripe is either a disgruntled job-seeker, former employee, or friend of one. You may recall that a prior posting that got no response led this same poster to query a second time : Why no responses to my prior post 'bout a format change.

Bill, what you've got here is someone with a vendetta, who is using this group to try to hurt an excellent operation, extremely profitable, that has no intention of changing format. At some point, he might oughta be told to stop it!

I don't think people listen to Dr. Laura to hear people sound stupid.
They listen because she's funny, straight-to-the-point and gives good
advice.
I can't listen to Dr. Joy because she just gives advice, there's no
entertainment component, which I think is important if you're going to
listen to someone for three hours.
I find that people who don't like Dr. Laura also don't like Paul Harvey,
I guess they just want the straight goods (Dr. Joy, etc.).

The answer? Is there something I don't know? I am not a
"Broadcast professional", with all that means. It means that not only
do I not have any T-shirts, it also means that I listen to what I want
to listen to and judge accordingly. Yes folks I am the reason the
professionals have a job - I am an audience member.

Dr. Laura is the current leader in a long line of radio
shrinks. She is based in Los Angeles. For years, the primo radio
shrink on the air was Dr. Tony Grant (female), a contempory of hers
was also Dr. Susan Forward (of O.J. Trial fame). Tony Grant at one
time went national when she worked at KABC - this was the mid
eighties.

Dr. Grant left KABC and was replaced by Dr. David Viscott who
is as far as I know, the only one of this group who is a psychiatrist
- the others being psychologists, "councellors" etc.

Tony Grant's next stop was KFI, she eventually left as she had
been recently married and wanted to leave LA. She was replaced by
Barbara De Angelis. Who was replaced by... Dr. Laura.

She used to come on after the Rush Limbaugh show. In the past
year during my travels I have noticed that she has been syndicated.
I have also read an interview with her in one of the radio industry
trades.

But shrinks on radio have always been popular in self absorbed
Los Angeles where you can never be too rich or too superficial. They
are also especially popular with women.

There were radio shrinks before there was a Rush Limbaugh,
there will be shrinks after Rush Limbaugh, there will also be

political talk shows after Dr. Laura. Wheras they may share some
listeners, they appeal to different audiences.

> Therefore, if I had my own station, I'd likely cut if off
> at 10 PM or so, barring local weather emergencies, of course

And risk a loss in your morning ratings? Because the last station people listen to for even a _moment_ or even _way in the background_ at night is likely to be the station their dial is tuned to in the morning. So if you go off the air too early, if they ever turn their radios on after that, they will no longer be set to your dial position the next morning.

In view of that, isn't it better to put on _something_, even if something very cheap (repeats of programming earlier in the day, automated programming, whatever), that fits with your other programming, rather than go off the air? This is the reason many stations stay on the air 24 hours, I'd bet, even though I would think it's even more obvious that there's little result from advertising at 3:15 am than at 10:15 pm <g>.

KPOF-AM, 910 Khz in Denver runs classical most of the afternoon, and does a darn good job of it.
The rest of the time they run Christian programming. WILL -AM (580?) in central Illinois, used to
be PBS ran classical some years ago, don't know if they still do. I remember as a punk driving down those central Illinois blacktops listening to string quartets through the static crashes...Classical on FM is getting a bit scarce too (!)

Cross-posted to: ba.broadcast,rec.radio.broadcasting

How do you read the numbers in the Arbs?

Does a station that get a "6" have twice as many listeners as a station
that has a "3"?

I've heard there are breakdowns by shift. Are the overall ratings
factored so that a station that might have a high morning drive
rating be offset by a station that has a high mid-day rating?

Dave

# 3544. A Controversial Opinion About AM!

Newsgroup: rec.radio.broadcasting
Date: 1995-12-10 00:00:00 UTC
From: richwood@commspec.com
Message-ID: <4afg2v$oe9@vixen.cso.uiuc.edu>
Source record: 28030

P0>I am convinced that many AM stations would be in much better financial
P0>shape if GMs hadn't thrown in the towel, and if there were PDs who
P0>offered innovative, versus copycat formats. Still, and I am not pleased
P0>with my opinion here, I am convinced that AM's problems are signal
P0>quality-related. Who wants to hear muddy music or talk, when one may
P0>hear it as it more naturally sounds, on FM/ Hopefully, more talkers will
P0>mover from AM to FM. FM is only a band; there's no rule saying it must
P0>be for music (or for that matter, 7 or so duplicate formats per market).

Shel,
It's hardly a "controversial" opinion.

Radio is driven by programming. Bad programming on FM fails just as miserably on FM as it does on AM. With FM signals squashed, mashed and processed to death, you can't make the claim that it's "natural." I once watched an engineer run each of New York City's FM stations through a spectrum analyzer. Only WPIX-FM (now WQCD), WNCN and WQXR-FM showed any content above 10kHz. WPLJ was so heavily processed that there was virtually no dynamic range.

When you move a Talk format from AM to FM, you see virtually no change in numbers. Don't get suckered by the self promotion you often see here about the "great future" of "young FM Talk." Either programming offers listeners something of substance or it'll fall by the wayside as irrelevant to listener's lives. If listeners feel that it's important to know where other listeners farted, then they'll listen to Kato Kaelin and the show will succeed. If that kind of inspired programming isn't relevant, it'll fail, regardless of which band it's on. If listeners feel that Rush Limbaugh is relevant, they'll listen. Since they obviously do, your argument that "no one" wants to listen to AM radio falls flat.

P0>my home town sttaions in the Boston, MA area. But the reality is, why
P0>should you run a 50kw transmitter when the bulk of your advertisers'
P0>aduience is within say 30 miles? In that case, only 5 kw will do, and
P0>with less maintenance fees to boot.

No, it isn't reality. At this point in time, it often takes 50kw to cover a metro without interference. In the New York metro, 5kw isn't going to get you what you need, unless you're willing to limit your market to the nearest borrough. I can imagine the reaction you'd get by suggesting that WBZ reduce its power to 5kw.

P0>Finally, I hope to be proven incorrect, but I am yet to meet any
P0>advertiser who has done well advertising on radio after 6 PM. I also say
P0>this from experience.

That's strange. We have many advertisers who do very well after 6pm. It depends on the product. We're unlikely to sell coffee after 6pm, but any creative salesperson should be able to find a compatible match and get their client a good, productive deal. I used to work for a man who made his reputation and early fortune selling overnight radio in Chicago.

P0>at 10 PM or so, barring local weather emergencies, of course. Radio
P0>stations are like any other business; indeed, radio sells merchandise
P0>out of its own "storefront". Thus, the FCC has no right telling
P0>broadcasters thay must be on X amount of hours a day to be fulltimers, or
P0>whatever.--

No. Radio stations are not like any other business. Radio uses spectrum owned by its listeners. Maybe I'm old fashioned, but I still believe radio and TV has an obligation to serve it's community. If you're going to monopolize a frequency in a market, you damned well better use it to fulfill that obligation or you should turn it over to someone who will. It's also in your own self-interest. The more valuable services you provide to listeners, the more they'll reward you with their loyalty.

Frankly, I'm very tired of broadcasters making excuses. I see aggressive broadcasters out there making livings rather than excuses. They're the successful ones who prove your theories dreadfully wrong. One of them posts here regularly and violates all of your "rules." Each of his stations serves its community creatively and aggressively. Maybe not to your liking, but it allows him to make enough money to buy even more stations where others have given up.

P0>I am a proud broadcaster, and have some 20 years under my belt, so
P0>believe me, I am very much pro-radio. But I believe I'm facing facts
P0>which have been proven not only by others, but by yours truly. I would
P0>loveto be proven wrong by you. my respected colleagues!

I'm a proud broadcaster, too, with 38 years under my belt. I haven't given up and still make a handsome living doing what I love most. Actually, I'm doing all those things you say can't be done. I have the wonderful advantage of speaking with hundreds of fellow broadcasters every month. Most of them prove you wrong.

Rich

David A. Kaye (dk@crl.com) wrote:

: Someone else wrote the quoted material below:

: " > <AHEM!!!!!!> Yes and no. If you are on the LOW end of the band, yes
: " 5,000 > watts will do. 10,000 watts at 1510 is like 180 watts on 550.

: I can cite several stations running 10kw and 50kw at the higher end of the
: band which get excellent coverage. KXFX, a sportstalk station in Portland
: on 1520 at 10kw can be heard in Eureka, California, a distance of 450
: miles. KFBK in Sacramento, a 50kw on 1530 can be heard in Vancouver, BC
: on 1520 at 10kw can be heard in Eureka, California, a distance of 450
: miles. KFBK in Sacramento, a 50kw on 1530 can be heard in Vancouver, BC
: Canada. KGA, a 50kw on 1510 in Spokane can be heard easily in Salinas (80
: miles south of SF) -- and that's a distance of nearly 1000 miles.

Those are skywave signals and don't really count. The groundwave primary coverage area is signifcantly smaller at the top end of the band, compared to the lower end. Since groundwave accounts for almost all daytime coverage and is the primary mode of interference free nighttime reception, it's more significant when assessing coverage.

To make a ridiculous example, at 7 MHz (40 meter ham band) a kilowatt station can easily be heard halfway across the country on skywave yet will be inaudable 20 miles away. There's a big dead zone between the end of the groundwave coverage to where the first skip returns.

WDAF radio and KCTV television are reporting the arrest
today (December 8) of Phoenix radio personality Carla Foxx on charges
of leaving the scene of an accident that killed a Kansas City
civic leader.
Phoenix authorities have been investigating an accident two weeks
ago that killed Kansas City lawyer and philanthropist Edward A. Smith.
Smith was crossing the eight-lane Camelback Road when a truck hit him.
The Kansas City _Star_ reported the truck was owned by Carla Moore,
which is Foxx's real name.
The _Star_ also reported that Foxx had been suspended from her job
after the accident.
Smith was in Phoenix for a meeting with other members of the
executive committee of the Bryan Cave law firm. Smith, who was
77 years old, had been active in philanthropy for nearly 40 years,
and was considered part of Kansas City's unofficial power structure.
He was an officer and director of H&R Block, and was involved with
the Nelson Gallery of Art, the Jewish Community Foundation,
the Menorah Medical Center, the Kansas City Philharmonic,
and many other groups.

From: talk1370@aol.com
Message-ID: <4afg41$ofq@vixen.cso.uiuc.edu>
Source record: 28035

A couple of questions on this...
1)CFRB has been #1 forever in AQH and almost forever
in cume, but seems to me they've had cumes above 1.3
million a week in the recent past, now they're barely
over a million.
2)What about CFRB's demographics?
3)Given that unprecedented short-term renewal, might it
all become academic anyway if they can't put a leash
on John Oakley and some of the other motormouths? If
they can't, by next fall you'll punch 1010 and get only
WINS because the CRTC is threatening to shut 'RB down.
(God, what a quality comedown from the days when Andy
Barrie was doing thoughtful talk in middays, and no won-
der he bailed out and went to CBC/740)
Meanwhile you have to hand Slaight credit for turning Mix 99.9
around...that's the station he really cares about, and he's created
an interesting hybrid of hot AC and AOR. But in the long run, even
if he manages to keep CFRB out of trouble, I'd be more worried
about the trends than happy about still eking out a win over CHFI
and CHUM-FM in cume.

I work for Triple M, or MMM, in Australia. I decided to register mmm.com.au over triplem.com.au simply because it is easier to type, and easier to spell out on the air. The Triple M Network covers Australia, so we will not have any conflicts with other MMMs... however, we did get a call from the 3M Computer Media company (they ppl that make floppy disks) saying that they would quite like to have mmm.com.au

By the way, domain name registration in Australia is a joke, and seems to take forever. Ours is still 'in the pipeline,' so for the time being we're using http://www.aone.net.au/bytethis for a programme related website.

David...

The "Johnny Holliday" you hear on ABC Radio *is* in fact, the same as the man you heard on KYA-AM many, many, *many* moons ago. He moved from KYA-AM in the days when it was owned and operated by Avco Broadcasting, and moved to co-owned WWDC-AM/FM (1260, 101.1) here in Washington, where he hosted morning drive for many years. Interesting story I heard him tell a few years back:
He says it was time to move on from Top40 KYA to something more like the MOR/AC format of WWDC when his own 7 year old daughter called him on the contest line at KYA one day! These days, along with his ABC Radio chores, Johnny is also the play-by-play voice of University of Maryland Football and Basektball, now heard here in Washington on WTOP-AM (1500). Before this he'd also been on WWRC-AM (980) and WMAL-AM (630) here in Washington. And, as if that all wasn't enough, he fills his evenings on the local dinner theater circuit, these days playing Julian Marsh in the Burn Brae Dinner theater production of "42nd Street".

Cheers,
Max

P.S. speaking of "Avco Broadcasting"...can anyone with a long memory recount for the group the other stations owned by this insurance/financial services group when they were in the radio biz back in the 60s/early 70s? I know of WWDC-AM/FM, and KYA-AM. I know that some of the stations were part of "Crosley Broadcasting", which was bought by Avco, if I'm not too badly mistaken.

I'm new to this group and I am finding this very interesting. I thought our station was doing an outstanding job of ignoring our listeners, but after reading about your stations policies, I am starting to rethink my position.

We do use our fax machine to learn of new promotions and to learn about possible guests, but we also use it to keep in touch with our listeners. I would say 99% of our contests and giveaways involve faxing in an entry and we literally get over a hundred faxes a day on various topics from our listeners. We even fax them a weekly newsletter called "Fun Fax" that tells them about goings on at the station and in our community.

I just thought you might be interested in hearing what we do with our fax machine.

Radio personalty Carla Foxx was charged today with leaving the scene of a fatal traffic accident. Following an inital court appearance she was released on her own recognizance.

Foxx, legally known as Carla Moore, became the subject of a Phoenix police investigation after witnesses described the vehicle that ran down Edward A, Smith, 78, as he was crossing Camelback Road near 24th Street.

The day after the accident, police seized Foxx's Ford Explorer and found front end damage and other physical evidence consistent with the accident.

Foxx was suspended from her weekend announcing job at 70's KHTC on November 22. Previously she programmed the short-lived talk outlet KHOT and handled middays and nights at AC KESZ in Phoenix.

Smith was a partner of Bryan Cave, an international law firm, and was active in numerous civic and charitable organizations in Kansas City.

Quoting Charles Hobbs's post of 8 Dec 1995 09:46:26 GMT:

~People call her with problems, and she gives advice based on
~her own experiences and belief system (as anyone else in the
~same position might do).

This is fine, except that by calling herself "Doctor" she implies that she has psychological training. She does have the Ph.D, but it is not in psychology, medicine, or any mental health field (I think it is in physiology; but I may be mistaken).

This strikes me as an implicit misrepresentation. She has the right to hold forth on any issue she chooses, but by putting out the "doctor" shingle, even if she disclaims being a psychologist on the air, she is giving people the wrong impression.

Well after reading the morons in chi.media rave on and on about how
Mancow sucks and Stern rules (or the otherway around) I have come to
the point of deciding that they both must attract a pretty lame
following if all their fans can talk about is who beat who up the
worst. When a Stern fan calls Mancow 'Man-cow-shit' I see the true
level of that lameness come alive in print. I bet that poster must
have felt soooooooo clever to have made that pun.

I guess I am getting old and jaded but I cannot understand why anyone
would care which juvinile shock jock beat up on which other juvinile
shock jock. Been there, done that, grew up, couldnt care less about
that anymore.

AN>The short answer, obvious answer is ....YES. The media hypes crime and
AN>makes it EXCITING and perhaps glamorous to young, impressionable folks,
AN>who may figure that the risk is worth the trial. Just look at the
AN>statistics of incarcerations vs. those that get off with a slap-on-the
AN>wrist.

AN>BUT, the systemic faults lie with more than the media ...the courts and
AN>the already filled jails really tell the tale in our society today.
AN>Even at the depths of the 30s national depression was crime such a
AN>problem with society.

AN>One really has to look at all the factors. And, the media appears to
AN>be the main root cause.

Anthony,
Sorry. No sale. The media is simply the most visible scapegoat.
While I agree that much of what the media does is irresponsible
"journalism," it's too simplistic to claim they're the root cause.
They're certainly the root reflection. After all, if crime didn't
exist, there'd be nothing to report.

You'll have to back your accusations up with something more than it
"appears" to be the root cause. It "appears" to me to depend on one's
political persuasion.

Kids and crime? Try the PARENTS!

PARENTS are responsible for raising their kids -- and that includes intervening when it comes to television viewing. We've come a long way from the the two or three channel choices of the pre-cable era. There's lots of good stuff out there, too. Intervene! Help your kids understand right from wrong. Instead of Married With Children this Sunday night, try National Geographic Explorer or something!

[Moderator's Note: Thanks for bringing up the parent angle. While parents cannot monitor everything with their kids, I agree that too many parents abdicate their responsibility to the tube or the radio, then they complain about what their kids are seeing. I would like to see more parents take an active role in their kids, even if it means skipping some of their 'adult' activities. Otherwise, I vote that they just stop having kids to begin with. Bill]

I was in the audience for one of those shows just to see what's it like.

The audience is usually trained "like monkeys" by the stage director.

He tells them when to laugh, clap, make expressions, etc., and they seem to follow without fail.

So, i guess my thought is that you cannot go by audience reaction to any topic.

You're right, Anita! Basically, I was giving the format just prior to the most recent format and/or call letter changes. In the case of several NYC radio stations in the recent past, they've been more format "modifications" rather than "changes" (i.e., 'NEW "modified" its format a bit during the summer, as did MXV and PAT) but yes, I DO remember the 1st day "Z100" logged on... I was working in lower Manhattan and listening to my walkman that day and I heard "She Works Hard For The Money" by Donna Summer at a peculiar spot on the dial and asked myself, "what is this?" Well the rest is history. But to prove that I remember WVNJ, I even recall them using the slogan "WVNJoy, Stereo 100" (Easy Listening if you were at the dentist's office). Thanks for the memories!

>106.7 WLTW Lite A/C 1982 WKHK (Country)
>107.5 WBLS Urban ? ?

Sorry Sal--You're a little off on alot of this.

92.3 Is now K-Rock, before 1985 is was WKTU, top 40 from 82 or 83 to 85,
Disco/Dance music before that 1975-1982 (Was the station which knocked off
WABC from #1).

93.7 WPAT has been easy listening since the 60's, until last year's change to
Soft A/C.

WNYC is the NY City owned station and maybe sold. It runs a variety of
programs.

95.5 WPLJ evolved from it's AOR heyday in the 70's to Top 40 Power 95 in 1983
at the same time as Z-100 hit the air. It's change to Hot A/C began evolving
in 1991 with the arrival of Scott Shannon into 1992.

WQXR has been classic since the 60's.

97.1 has been WQHT's home since 1988 with the great frequency swap with
103.5. WQHT evolved from WAPP (CHR) in the mid 80's. With respect to
MikeRadio, I'd classify them as 'Hip Hop'.

97.9 has been Spanish since another frequency swap in 1988. Before that, it was WEVD with various programming. In the swap, WFAN moved to 660AM from 1050AM. SBS bought the 1050 frequency and swapped it with 97.9FM. WEVD now occupys the 1050 frequency.

Kiss-FM has been at 98.7 since 1981. They were a Dance/Rap/Hip Hop/Urban station from that date until earlier this year when the 'Smooth R & B/Classic Soul' format swept the ratings. Prior to 1981, they were owned by RKO. They were the original WOR-FM (Top 40) in the 60's, then changing to 99X in 1973 with the call letters WXLO. They went to A/C in the late 70's before the Kiss days.

WBAI has been owned by Pacifica since the 60's, and was involved in the George Carlin '7 words' lawsuit over 1st amendment rights.

Anita previously explained the Z-100 transition from WVNJ (WVN-Joy).

WQCD switch was from Love Songs WPIX, which had a variety of formats from the 70's on including Top 40, Disco (Two years too early), AOR, and A/C.

WNEW-FM went to Alternative/Modern Rock earlier this year after 28 years as an AOR.

WYNY switched frequencys as previously explained. Their history goes back to WNBC-FM in the 1960's & 70's. In 1977, they went all-news as part of the NBC All-News NIS network which died about 6 months. After a period as Y-97 playing soft love songs, WYNY went A/C and was the top rated such station in the early 80's. The switch to country came in 1987 when WHN became WFAN.

WAXQ came to be 3 years ago this month after a long life as WNCN and classical. For a couple of years in the 70's, they became WQIV playing progressive rock, but switched back to classical after listener protests.

WMXV has been A/C since 1986--first as NY's Soft Rock WNSR. Previously, they were easy listening WRFM.

WLTW changed formats in 1984 or 85 from country WKHK. Before that, they were WRVR jazz.

WBLS has been an Urban station since the 60's.

Hope this clears up some of the questions.

Tripp Rogers

The following comes from the IRJ archives, with some annotations by
me. Please feel free to send comments and corrections. I think this
could be an interesting thread.

---

A few clarifications on the NY Radio History (Bob Casey,Scott Fybush)

WMCA dropped top40 Sept 70 or so
WWDJ came on in May 71 (was Country WJRZ)
WNCN became WQIV in November 1974. I have a poor aircheck of
that (microphone to speaker)
WWDJ became religion on 4/1/74 (no April Fools joke, after a
killer April Fools show in '73)
"Movin' Easy Y-97" took over from WNWS. As often happens, the
format change precedes the call change so there
was a time of Y97=WNWS
WPIX formats varied - top 40 in the 70's AOR around 77; late in 79
they went to a mix of regular AOR and "new wave" (ie The
Selecter, XTC, Gruppo ,Sportivo). In 1980 theywere top 40 again.
Around 82 (I'm not in the same room asmy aircheck collection) they
started messing with Adult Contemporary formats, ie 'Nothing but
Love Songs', "Your X wants youback' and late in the 80s' gave up the
AC completely and became some kind of Modern Jazz/Adult Alternative
(not familiar with the format particulars)
WQCD, "CD-101.9".
WXLO softened into an AC from top40 99x late in the 70s, before going
Urban Contemporary as WRKS.

WOR-FM changed calls to WXLO, and start going by "98.7, XLO"
sometime in the early 70s. Sometime after they started using
99X. For a brief time in the spring of 78, they started going by
99 FM (using the Steely Dan tune "FM" to promote themselves) and
claimed to be an "album" station. However, by early summer they
were playing top 40 again. (Incidentally, is Sue O'Neal still in
radio? She was a DJ at 99X in 1978. She also was on Hot 97's air
staff in the late 80s.)
(gregbo)

WABC went talk in '82

I will have to check Rick Sklar's book ROCKING AMERICA to see if the
exact date of the flip is there. Before the flip, they were still
top 40 but were also airing Yankee games.
(gregbo)

WAPP-103.5 came on in the late spring/summer of '82. Had a commercial free
summer. They fluctuated between AOR and Rock40 for
several years as New Yorks Apple

In the fall of 84 they went (pop) top 40, but flipped back to Rock 40
in the late spring of 85.

WTFM was once on this frequency. I don't remember what they
played (muzak, perhaps).
(gregbo)

In August 1986 WAPP became Hot 103, WQHT (corrects calls, WHQT is
in Miami area) after a week of Classic Rock smokescreen format.
Format is what's now called top40/dance.

WPLJ evolved into top 40 from a familiar AOR format in Spring of 83
(about the time Flashdance was popular, Eddie Van Halen played
on Michael Jackson's "BeatIt" and top 40 came back to FM in NY)
yes WPLJ went top 40 before Z100 came on the air.

95.5 was WABC-FM's old frequency. I'll have to check Rick
Sklar's book for the exact date of the call letter change and flip
(to AOR/progressive rock, I think). WABC-FM used to simulcast
WABC-AM from 11pm-5:30am, I think (during Charlie Greer's show)
and perhaps at other times.
(gregbo)

WHTZ came on the air 8/2/83 as z-100 (put in the original posting
as sort of an afterthought, it appears, even though the
station dominated the market from '84-'89)

Hmmph. Maybe it dominated the market, but I preferred to listen
to WPLJ (Power 95). One of their slogans was "While they're talking,
we're playing" ("they" refers to Z-100). They also had one of my
favorite DJs, Willie B. Goode.

(Question: Were Scott Shannon and J.R. Nelson the first
"Morning Zoo"?)
(gregbo)

Country WKHK became WLTW around Jan '84.
WKTU became WXRK in July of 85

In the summer of 78 or thereabouts, WKTU flipped from some kind
of rock/folk format to disco. It caught just about everyone by
surprise and caught on very quickly. Other stations started
including quite a bit of disco in their formats, including WABC
(for the first few months of 79 they expanded their playlist to

include disco and broke several new disco acts), and WBLS, which
was an Urban CHR station back then, but added disco stuff to their
playlist (Rod Stewart's "Do You Think I'm Sexy", for example).
WKTU's popularity declined somewhat after the summer of 79, and
WBLS' popularity increased.
(gregbo)

WQHT-103.5 moved to 97.1, swapping with WYNY, which had become a
country station when WHN was bought by Emmis who turned 1050
into WFAN. The date 9/22/88 seems appropriate.

My memories are somewhat vague, but before this, WYNY was an easy
listening type of station around 77, and played top 40 in 82.
WHN played country and aired Mets games during the 70s.
(gregbo)

WRFM became WNSR around ?? April 87? not a fan of either station.
WNSR became WMXV around 3/31/92.
RFC's favorite station WDRE was AOR WLIR, adopted new music format in
August '82, became WDRE in December 87 after long license
renewal denial, new owners, same format,and eventually most
of the people who worked for WLIR worked for WDRE.

---

These stations should also be included, but I don't have or don't
remember the details.

WNBC (660) becoming WFAN. It's been discussed on this list before.
WQXR (classical)
WNYC (classical, I think)

--gregbo

## 3573. 485 Madison Avenue

CH> Why listen to some poor, landlocked, ratings battered AM or FM
CH>station-that is likely automated (lifeless) when you can hear digital
CH>satellite audio?

Chester,
Perhaps because the automated (lifeless) satellite service won't
offer anything relevant to the lives of local listeners.

CH> That is the question I have, as I laugh at radio today. When DARS hits
CH>town boys and girls, stations are going to thit the fan Im afraid.

Nope. It'll simply be another competitor. Every new service has
always claimed that it'll wipe out existing services. Hardly ever has
and hardly ever will. In our business it's "programming, programming,
programming."

CH> Ta ta! I really could care less!

Who cares? Since I don't see your signature on my paycheck, I won't
lose much sleep over your prediction.

Rich

Because even an automated station can give me local elements (weather, news, local interest announcements, public service) that I will never get from a satellite station. Especially in the morning while I'm getting ready for work, I want to know such basic items as how bad the traffic is, and what sort of weather I should be prepared for when I step out the door. Lets see satellite radio give me that. Similarly, I doubt that satellite radio will do a very good job of giving school closing information, which is a very big deal to parents.
In short, if the music is good, the sound quality is decent, and the basic local service is provided, I'll be listening to local radio, not a national service. This remains true even if a computer is running the show at the local station.

Tom Desmond

Peter...

Laugh all you want...like watching Vanna White, DARS may *sound* pretty...but such a station will never be able to give you the local news, weather, and traffic, and it certainly won't give you information that pertains to your local community. Because its coming from a satellite, DARS will *not* be local...and that's where the successful radio stations of today who have such things as part of an overall programming mix will be able to readily compete with DARS.

You're entitled to your opinion...just have something *meaningful* to say to this group the next time you return! Oh, and you know the caveat about not letting the door hit you on the way out... <g>

Cheers,
Max

Reply-To: ag365@Freenet.Buffalo.EDU (Carl K. Gorney)

*Say the magic letters(KB in this case)and look what you get:

---
>From: maimzini@aol.com(Dr.Maims)

Do you remember me tellling you(in private e-mail)that Keymarket doesn't know
what it's doing? Does the KB mess prove the point?
(As Butthead(or is it Beavis?)would put it,"Uh,huhuhuh..yeah.")
---
>From: miranda@shadow.net(Mike Miranda)

Thanks for keeping us up to date on "KB". That station will always have
a special place in my heart since I remember the glory days of their
top-40 format. We lived 2 miles away from the transmitter so there
wasn't too much else we could listen to!

Sorry to see the sad shape it's in today. Always wanted to work there
(local boy makes good) but never got the chance. The closest I came was
overnights on 50 KW WBT Charlotte, doing oldies with no format! That was
before Larry King, but I digress.

In it's hayday "KB" was like a morning show is today....24 hours a day!
The station and the people there were a big inspiration for me.

Keep us posted... and again thanks!

Mike Miranda (a.k.a. Mike Sheridan)
---
.From: Sean Healy <shealy@uoguelph.ca>

: again. A story in today's(12/2)Buffalo News reports that WWKB will become
: a country station in January,getting its format from satellite.

A 50,000 watt station like WWKB doesn't deserve a 24-hour satellite
format. How sad.

(Then again,neither did CKEY-which became CKYC(Country 59),which morphed into
The Fan 590.)

: the Buffalo Sabres will be going back to WGR(NewsRadio 55)by then.

So, I can hear the Sabres again in Hamilton? That's good. I wonder if
the affiliation will continue with the Canadian stations.

Really, do they have a chance with anything? I'm surprised they keep the
transmitter turned up. The country format won't fly---the Buffalo market
seems to be already saturated with country.

---
From: fybush@world.std.com (Scott Fybush)

Not just the 50kw...the good memories that so many people in
Buffalo and all points east still have of the old KB. I mentioned
the station just in passing at work the other day...and four or
five people all piped up at once with their memories of tuning
in KB way back when. You can't buy those kinds of memories...and
it's just a matter of tapping into them the right way. Too bad
they haven't found it yet.

Topeka station WREN(AM) wants to fly its Kansas coop and land
in Missouri some 65 miles east-northeast of its present site.
WREN is asking the FCC for permission to:
* Move its transmitter site from between Topeka and Lecompton,
to a location near the Worlds of Fun amusement park in Kansas City,
Missouri
* Change its city of license to Kansas City, Missouri
* Increase daytime power to 15,000 watts (directional) from 5,000
watts (nondirectional)
* Decrease nighttime power from 5,000 watts (directional) to
3,500 watts (directional)
* And operate fulltime; this is notable because WREN's license
presently calls for shared-time operation with KFKU at the
University of Kansas in Lawrence (however, it appears the
university hasn't operated KFKU for at least five years).
About the only thing that *doesn't* change is the station's
frequency, 1250 KHz.
The site being requested is close to the proposed site for
KGGN(AM), a daytimer at 890 KHz licensed to Gladstone, Missouri.
Both KGGN and WREN are owned by Michael Glinter. After WREN went
silent in 1990, Glinter put WREN back on the air in 1992 with a
southern gospel format. He obtained a construction permit for
KGGN in 1990. The station still has not made it on the air.
The proposed KGGN site would involve a slight decrease in power
from 1,000 to 960 watts.
WREN moved twice before, once in 1948, when former presidential
candidate Alf Landon moved it from Lawrence to the Kansas state
capital. During the 1930s, WREN functioned as the NBC Blue Network
affiliate for Kansas City, even after KCMO joined the Blue Network
as a consequence of its 1939 power increase from 100 to 1,000 watts.
Much earlier, the station started in the town of Florence, Kansas
before moving to Lawrence in 1927.
WREN has one of the few remaining shared-time arrangements in the
United States. Besides being the capital of Kansas, Topeka may also
be the capital of shared-time licenses: WIBW has to give up five hours
of time on 580 KHz every weekday to KKSU in Manhattan.
The FCC reported the WREN application in the engineering database
released today (December 8).
****
More action north of the Missouri River: Suburban AM oldies
station KCXL has joined the ranks of Kansas City stations
offering a club for listeners to join.
On-air announcements over the 500-watter are promoting five-dollar
annual memberships in the "Good Time Oldies Club," featuring

promotions and special offers for the nominal five-dollar fee.
KCXL joins two other commercial AM stations that solicit listener contributions. Stereo nostalgia station KFEZ also offers a listeners' club while country-gospel daytimer KEXS holds periodic radiothons asking for pledges to stay on the air.
KCXL also recently celebrated its first anniversary back on the air. An Independence computer technician bought KCXL from the Small Business Administration after its previous owner gave up on the station and turned it off.
****
An award this week in Kansas City for the president of National Public Radio: Delano Lewis received the International Relations Council's award for international understanding.
Lewis, who's been a telephone company president and Justice Department lawyer, is a former resident of Kansas City, Kansas.
****
As forecast on the Mid-America Radio Page since March, Columbia country station KCMQ(FM) is closer to a power boost.
The FCC has amended its allocation table to allow KCMQ to apply for 100,000 watts, up from its present 18,000.
The station will probably move its transmitter from one mile east of my mom's house to the KRCG-TV tower at New Bloomfield when it gets approval to hike power, which would make it Columbia's first commercial 100,000-watt station.
Group owner Zimmer Broadcasting has a country duopoly in the Columbia and Jefferson City markets, teaming KCMQ with top-rated KCLR(FM).
****
More on the Macon Mystery, or, why *are* applicants flocking to a long-vacant allocation in the economically distressed north Missouri county seat?
Two of the three applicants are established farm broadcasters. David Shepherd's family owns KWIX and KRES just 30 miles down Highway 63 in Moberly, while Kanza, Inc. owns KMZU(FM) in Carrollton, Missouri and WHB(AM) in Kansas City.
Kanza is probably looking to extend its coverage area to be more competitive in north-central Missouri; it's reasonable to assume KWIX and KRES are attempting to consolidate their position in the area.
KWIX and KRES also are one of the applicants for a vacant channel in Moberly.
****
Over in St. Louis, rapidly changing talker KSD(AM) has hauled in its first big syndicated daytime catch: on Tuesday, December 5, it began broadcasting the "Don and Mike Show" based at WJFK(FM) in the Washington, D.C. market, according to reports on the stl.general Usenet newsgroup.
****
In the "Should I Stay Or Should I Go?" department, KISF(FM) morning host Booker Madison has left after all. There were reports he was considering staying despite a job offer in Pittsburgh after program director Chuck Geiger left "Kiss FM." Former morning host Ed Parreira

is reported to be acting program director at the modern rock rimshot.
****
Here's a TV note, to follow up on one of the big Kansas City media stories of 1994.
More than a year later, it's obvious that the big NBC-Fox affiliation swap has hurt both the Kansas City TV stations involved. Ratings for WDAF-TV, no longer co-owned with WDAF(AM) and KYYS(FM), and KSHB-TV remain sluggish, with both stations together garnering the number viewers that just one of the other network affiliates easily manages.
Still, it took 16 months for the first top-level casualty to emerge. KSHB news director Mark Olinger has left the station. While no reason was given, subsequent media reports indicated that the station wanted a more traditional newscast.
Olinger was originally hired by Channel 41 when it was a Fox affiliate wanting an MTV-style newscast. When the NBC network affiliation fell in KSHB's lap as the result of the sale of Channel 4, the result seemed to be newscasts with a split personality.
****
Quote of the day, from KCTV's Wendall Anschutz after Friday's blast of snow and cold: "Someday the weather will cause the TV stations to close and the schools to stay open."
****
Blatant plug of the day, from me: the Mid-America Radio Page now is combining FCC engineering data for FM stations with information from the database that I keep. Check it out at either site listed below. The file name is fmpage.html. It's still under development, and a similar page is in the works for AM stations.

# 3579. Changes to happen at KKBH

Newsgroup: rec.radio.broadcasting
Date: 1995-12-10 00:00:00 UTC
From: San Diego Radio Watcher <sdradio@zNet.com>
Message-ID: <4afg2j$odr@vixen.cso.uiuc.edu>
Source record: 28065

The following is an EXCLUSIVE of the San Diego Radio Watcher, any use by news media, please credit Chris Carmichael and the published source, Airwaves Journal. This report, copyright 1995, Christopher Carmichael, a Nevada Corp.

Changes to happen at San Diego's Beach

Gannett's KKBH, 102.9, the Beach, is expected to drop the 70s format and revamp the current line up of personalities. Inside sources at the station have told me that a majority of the current on-air staff may go as soon as December 15.

Since the change to the 70s format, the continued decline in ratings have happened. Latest trends, released on Dec. 6, have put the Beach at its lowest level. The first of the year, KCLX had a 2.9 share, but with the change in formats and cals in April, the fall begain. The latest trend has the station at 1.7.

The changes, and format shift, are not known at this time.

Nervious times for the staff at 102.9, the Beach.

(c)1995, Christopher Carmichael. News media please credit.

Here in the UK, there are two "classical" music stations. One of them,
Radio 3 is run by the BBC, and the other, Classic FM, is commercial.
To my mind, the main distinction is that Radio 3 does *music* -
comlete symphonies and operas, live concerts and so on, whereas
Classic FM plays *tunes* - individual movements, excerpts from operas
or arias and the like, with a DJ type presentation rather than the
Radio 3 Announcer.

While driving from the San Frnacisco bay area to Los Angeles, I came
across a classical station at 1050 AM, receivable over about a 200-mile
range. Turned out to be KKGO, Frasier Park/Bakersfield, CA simulcasting
KKGO(FM), Los Angeles (except for the ID). It was quite refreshing to
hear a class act on the AM band.

Culture does exist in California, even outside of a perti dish.

Bob

The SF Bay Area has had 2 AM classical stations from 1962 until a couple
months ago. KDFC(AM) has had classical continuously since 1946. Now
there are none, but still 2 *commercial* FMs playing classical.

KKGO-AM, Frazier Park (Bakersfield) CA is all classical. It's a 10kw daytimer simulcasting KKGO-FM, Los Angeles, which cannot be heard north of northern Los Angeles County.

Ah, but the ultimate job of a commercial station's programming is do
deliver listeners for/to advertisers. If the "market were there" for
another Classical station, I'm sure there would be one in Seattle, given
the existence of so many stations to begin with! (Maybe KRPM, now KCIN,
would be the odd one out? Or KIRO-FM?)

KING-FM apparently feels that what they do works; they are certainly one
of the country's highest rated Classical stations.

Question: doesn't KUOW play some Classical? (I used to live there, and
thought they did, but I honestly don't remember.)

Best,

Eric,

It's good to hear kind words about a broadcasting school. Would
you agree that broadcasting school trains you to get _real_ training when
you enter the industry? As a broadcasting student I was told, and now
tell my students, that after all your school training you can get a job,
but you'll spend your first year in radio learning how it really works.

It's the first year or so in the industry that teaches you how to
do your job, allows you to hone your skills and gives you the on-air time
to succeed.

John Lovell

# 3587. Re: Brown Institute/National Education Center

I can't say much about Brown Institute, though I have heard good
things about them. You may want to stop by the website at:

http://www.webcom.com/radioweb

It's the site for the Dade County Public Schools Radio Broadcasting
Program. It has links to many schools, mainly colleges and universities,
that offer radio broadcast related courses and provides information on
what should be taught at such a school. See what they teach and then
decide if the school you want to go to has the same level of instruction.

Good luck with your broadcast education.

Best,
John Lovell

## 3588. Seattle Radio-Classical music

For what its worth, KING-FM has had some of the highest ratings for a classical station in the country. That might not make it as an explanation if you're a classical fan looking for something very particular, but it does produce enough commerce to keep a classical station in Seattle.

I spent 18 years with King Broadcasting, and know of the challenges and difficulties they had with KING-FM. They could have dumped the format many times, and done something that would produce much more money. Instead they kept working to make it highly rated and successful.

As a 25 year programmer, when faced with comments about radio stations somehow becoming more challenging or educating their listeners, I try to remember that CD playyers have a place in the world

> --gregbo

Many, if not most, of the 70's stations around the nation have discovered the limitations of remaining solely in the 70's, and have attempted, with varying degrees of success, to expand their base without losing (much of) their core listeners (though I have to admit, Simply Irresistable is a stretch...).

I don't know that they were trying to re-create Progressive FM radio, so much as be the opposite of what they (KCBS-FM) had been (and what KRTH was and is); i.e., the _anti_-hype position. A no-nonsense, real presentation, with real music for real people. Close resemblance to the Progressive days (and, arguably, that's where the presentation got its start), but there were a number of ACs and AORs that used similar styles, and many do well with it.

As for the 70's Pop stations, it simply _won't_ be the 'next generation of oldies'; Top 40 stations in the 60's pulled HUGE shares, because the music was universally popular. The 70's ushered in the beginning of the fragmentation so obvious today, and listeners began to scatter to other formats (for example, Progressive!). In other words, far too many people flipped off [K.C. & the Sunshine Band, fill in the space with whatever Pop band annoyed you] to leave [them] turned on 20 years or so later!

Thoughts are welcome!

todd

Jeremy Lansman wrote the quoted material below:

" Speaking aobut such things, why don't I ever hear about KPOO, Poor
" Peoples Radio, in the San Francisco Mission district? Is it becasue
" it has a license?
" PS. I was the first to turn in the KPOO transmitter.

Good point. KPOO was the last station to be wedged into the SF area, and it suffers from having a very poor signal.

It survives, but except for carrying the Board of Supervisors meetings, it doesn't appear that anyone listens to it. It's in the Fillmore (not the Mission) and suffers from the same problems of any station programmed by committee. It appears to have no vision. They also appear to do no outreach other than to their small neighborhood.

I strongly disagree with a comment made concerning Z89's (WJPZ 89.1FM) move to modern rock. The Syracuse market is not servered by this format what so ever, and it has been a glaring complaint among record reps, students, and listeners alike. The only stations that are even trying are a low power outlet at a high school that is not on the air all the time, and cross over play from a main AOR outlet (95X) and a modern CHR (93Q). I applaude Z89 for finally making the leap into "college" radio, even if it is after the format has become commercially viable.

On a related note, I take exception to the comment on that professionals can do it better. All one has to do is look at Z89's ratings and you know what impact their 100 watt operation has had on the Syracuse market. Both 93Q and Y94 are probably breathing a little easier at having this CHR-Urban station change format, but are probably wary of how they will pull away listeners for the "Edge" type sound. Yes, they are students, and they are operating Z89 as close as they can to a commercial station allowed by law. Their philosophy is different than most college stations around the country (ours included) and feel an arrangement as close to a commercial station gives their students a more "real" working environment that closer emulates the commercial radio world. However, as much as I may not totally agree with this philosophy nor agree with the tightrope Z89 walks with FCC rules concerning underwriting, promotions, and the like, they can do good job when compared to the "professionals" in the market, some of which got their feet wet at Z89.

I wish them success and I will check them out on my frequent trips into the city.

: - Larry Ross
: WBEE/WBBF/WKLX Promotion Director and
: WJPZ Alum (Rocket Ross)

What Larry leaves out is that he is referring to Syracuse University station WJPZ-FM "Z-89" and that Syracuse, New York, a medium-size market, currently has no modern rock station ... which will be remedied on December 15th with the debut of "The Pulse".

This station is professionally run and has a strong signal. And I have to admit, I CAN'T WAIT TO HEAR PROGRESSIVE ROCK IN THIS MARKET!!!

If the students from the Newhouse School of Communications can't do it right, who can?

Waiting for Dec 15th ...

Dan Danhauser

## 3595. Technical position open in Pittsbhrgh

Newsgroup: rec.radio.broadcasting

n 2 questions...
>
> I had heard that Stern would get blown off 'KB, but I could never
>imagine them going country! It's a shame for all fans of local talk (I
>always listen to their Sabres post game) and out-of-market sports.

Stern may not be dead in the Queen City just yet. The December 11th
Business First reported that radio sources say he might land on another
station locally. Keep in mind that,among Stern's audience,there is a large
number of Big Apple residents who attend colleges in the area.

> Now..to the questions-
> 1. Who in Buffalo has the Bills games?

WBEN(NewsTalk 930). The games couldn't air here due to an exclusivity
contract between the Bills and 'BEN

> 2. If the Sabres rights go back to 'GR, what would happen
>to the broadcast setup/announcers/etc? Would they remain the same or
>change back to Rick Jeannerette? (even though I know he does TV now.) How
>many years was the KB/Sabres contract for? and lastly, wouldn't it be
>breach of contract for the team to jump ship like that (unless there was
>some sort of escape clause?)

First,the rights go to WGR as of the 1/5 home game against Toronto-by
then,'KB will have jumped to country. The setup(Pete Weber(PBP)/Danny Gare
(color) & host Dave Miller)will remain as is. The contract was for a number
of years(I don't know off hand _how_ many). No,it wouldn't be if the station
notified the team,which 'KB did in this case-and the Sabres had no problems
with the switch.

>
>Over the weekend on the air Dan Ingram announces what the W in WCBS-FM
>stands for (we know the CBS part). It stands for "Westinghouse"
>as in Westinghouse Columbia Broadcasting System. WCBS. :-)

A year or two ago, when publisher Ziff (Sr.) died, the newscaster on
WBZ in Boston who made the announcement, made a very clear implication
(though he didn't come right out and say it in so many words) that WBZ's
call letters came from William B. Ziff.

I hadn't known of any connection between WBZ and the Ziff family. Nor
did I ever hear before that the "W" might have originated with someone's
first name!

Would be interested if anyone else has ever heard this.

By the way, WBZ has been a Westinghouse "Group W" station for ages, and
as many of you know, was among the first handful of commercial broadcast
stations in the country.

Regards,
Andy Ingraham

IMHO, Chicago could use another country station. Green
Bay/Appleton/Oshkosh has 7-country stations for 400,000 people. I dont
see why Chicago cant have a couple for 7+ million people. I guess there
is a station for old, new, upbeat and contemporary country. The other
extra country stations in Green Bay/Appleton market are rimshots from
other markets.

If my info in correct, another has occurred resulting in a complete off
the air situation.

WNSW, Brewer Maine, 1200 went dark after being bought (the actual terms
of the deal I do not know) by a station in Mass who wanted to go 50KW.

Interesting note: Prior to WNSW being purchased by Steven King about
a year ago, the owners had applied and was awarded one of the
expanded AM band frequencies (1650 if memory serves me). I have
heard nothing in that band as of yet, but I wonder if King is going
to put up the frequency or sell it?

WW>6-10a-"The Bob Steel Show" Children's Story @ 7:45a, a polka, a march, no
WW>school announcements.

Bill,
You're brining back memories. Bob Steele was my hero as a kid. He
was the guy who told me I didn't have to go to school. I didn't care
much for the polkas, but you'll endure anything for a day without
school. WTIC did a better job reporting school closings in my hometown
(Westfield, MA) than the locals did.

WW>to 6:30p on Saturday. The WTIC AM/FM/TV of the Travelers era was very
WW>conservitive but there was a commitment and responsability to the
WW>community which resonates when you mention the calls today. The Travelers
WW>probably never made much money with the TIC's. They were too busy
WW>operating three public trusts in the public interest.

WTIC under Travelers was one of the most community-oriented
stations I've ever seen. I remember visiting the station shortly after
the Constitution Plaza facility was built. All I have to hear,
anywhere, is the morse code di di di dah ("V" for Victory) and I think
of WTIC. It's been their time tone since WWII. It was a great station.

Rich

Source record: 28093

-- [ From: Robert Paine * EMC.Ver #2.10P ] --

Mike Dowling mentioned that Floyd "Hap" Richards did a children's show on WTIC. I don't know if he meant TV, radio or both. I remember The Hap Richards Show at 9 or 9:15 am on Ch. 3, but wasn't aware he did a similar children's show for radio.
In later years, Bob Steele played a march every morning. His sign-off theme is The 2nd Connecticut Regiment March. My mother said that was also the theme for a 1930's WTIC program, The Wrightville Daily Clarion, which featured Paul Lucas, Eunice Greenwood and Fred Wade.
Mike Ogden took over the Ranger Station when Ranger Andy (Andy Andrews, formerly of the Hal Pearce and His Gang radio show) died in the first part of 1968.
Bruce Kern was Ch. 3's news anchor (I don't know if the term was generally used then) from 1957/58 until about 1974/75. Ch.3 did a 30th anniversary special that featured Gerry Brooks in Bruce Kern's anchor role. It wasn't mentioned that he was impersonating him but implied as the resemblance between the two was remarkable.
What In The World was moderated by John Dando and featured John F.(?) Schereschesky, Marcia Allcorn, James N. Egan and Aline Saarinaen. Ben Hawthorne, who preceded Bob Steele in WTIC radio's morning show, was the announcer.
Bob Steele did Close-Up On Sports. His opening was "Good evening sports fans and everybody, how are you tonight?"
The local (TV) news, sports and weather were aired as separate programs. Each had an opening and closing and there was none of the interaction as local news has today.
I remember WTIC AM and FM simulcast The Bob Steele Show in the early 60's. The station ID was "WTIC, AM and FM, Hartford, Connecticut", followed by the time signal.

Quoting PETER Q. GEORGE, N1GGP's post of 8 Dec 1995 09:46:43 GMT:

~We must also NOT forget the most visible voice of WTIC RAdio and TV.......
~the time signal "beep, beep, beep....beeeeeeeeeeeep !". Every hour on
~the hour...that time signal was always beeping away. I wish they still
~used it !

The AM station does. Channel 3 lost it when Post-Newsweek purchased the station; the FM dropped it when it underwent one of its format changes. The tone is the first four notes of Beethoven's Fifth Symphony, which make up the letter "v" in Morse code. It was originally aired as an hourly "v for victory" during World War II.

Trivia: The only time the time tone was to be missed was if it would run over the National Anthem at the start of a broadcast sporting event; it would have to be patched out by the engineer on duty. One engineer was fired for triggering the time signal as a joke during the playing of Beethoven's Fifth on the overnight show. They took that little beep very seriously.

~BTW: Does the "Traveler's Weather Service" still exist ? :-)

No, its closest successor is the New England Weather Service, based at Broadcast House (home of Channel 3, former home of all the WTIC's), and owned by Arnold Chase, son of financeer and soon-to-be-former WTIC owner David Chase. NEWS is quite a sophisticated setup, some would say a national model, and some old TWS'ers are employed there.

10>Speaking of succeeding how's Olie doing on that station or any
10>station for that matter, and pass on my best to Bob A!

Jay,
Except for an occasional puff piece in newspapers, I don't hear much about it. My impression is that it's too much of the same old thing, too late. The fact that it's on a religious network spooks many stations, as well. I can listen to Limbaugh and get the same thing and not waste another 3 hours listening to a rehash of why "liberals" are to blame for everything from meteor showers to potholes.

It's interesting to hear someone who advocated and conspired to involve us in Latin America bitch about Bosnia. Just more partisan crud that's beginning to burn.

BTW, Bob Aaronson is improving. He's been moved to a rehabilitation facility and is gradually coming out of the coma.

Rich

KTNN signed on when I was working at KZZP in Phoenix, and came in just fine at night there. They were Country in the day and almost Top 40 at night (with a nighttime DJ whose name I still remember, Chip Begay). Later they switched to album rock at night (it was called Night Flight Rock), which made for a really interesting transition from the country format at about 6 PM!

And there were authentic (I presume) Navajo chants or songs in the wee hours of the morning, interspersed with the country songs. A very interesting listen.

> KYSR is currently an LA area AC station - among many is this area.

I wouldn't say so. Have you listened lately? Within the last couple months or so it changed to an AC/modern rock hybrid! It now shares its playlist as much with modern rock KROQ (but leaves out the harder and non-hit stuff they play) as with any other AC station in town. And has virtually _no_ overlap in its playlist with soft AC sister station KXEZ (about whose possible format switch there are rumors around too, btw).

Check out www.realaudio.com

they have links to radio sites on the web using real audio server
programs. I downloaded a beta of Real Audio Player 2.0 and then tried
to access a live broadcast of KING-FM in seattle (i'm connected via
modem at 19,200 bps) and it sounded crappy with a lot of dropouts.

If what the folks at Real Audio say is tru, they'll have FM quality
audio available in near real time over the internet. But right now
the sound quality is poor for music and comparable to a bad AM signal
for talk.

Source record: 27901

Recently religious station WWRD-FM (100.7, licensed to Brunswick, GA) is now calling itself "Arrow 100.7," and playing oldies from the "60s, 70s and more." Sounds either satellite or automated. Music so far is rock- based stuff like Linda Ronstadt, REO Speedwagon, Queen, etc.

This follows change in ownership to Renda Broadcasting, which owns WEJZ-FM (96.1) in Jacksonville, and WFKS-FM (99.9) in Palatka, FL.

: I have started listening to Dr. Laura Schlessinger's show recently and I
: have noticed that she is a very arrogant, sarcastic, and conceded person.
: I am amazed at her popularity and that stations around the country
: continue to pick her up in syndication. What is her appeal?

--
Dr. Laura's appeal is: She is a woman, a mom, she has very strong
opinions, and she believes in what she is doing. Concete may play a
role, but it's mionor. There is one thing you shold take notice of, the
calleres. Most of these people want to hear a specicfic message, that
what they are doing is okay. Dr. Laura tells them what they really need
hear, the truth, that maybe some of their actions are not the best ones
to take.

You also should remember this, anytime you say something dumb on the
radio, you, my friend will get it between the eyes. Talk show hosts are
people with ideas, some we like others we don't. They are on the air to
propogate their views, and the views of the audience they represent. If
you walk into their wolrd get ready for an opposing opinion, believe me
you'll get one.

" He tells them when to laugh, clap, make expressions, etc., and they seem
" to follow without fail.
" So, i guess my thought is that you cannot go by audience reaction to any
" topic.

Exactly. People like to "go along" with all the show-biz stuff. They want to help out, to do "their part" in making the show a success. I have no doubt that audience members would even stand up and lie.

A STORY: On the old Ed Sullivan Show there was a guy who made a living as a pickpocket. They always introduced him as being insured by Lloyds of London or some such. This guy must have been in his 60s. He was basically an old vaudeville comic and this was the only show-biz job he could do. While a member of the audience stood there, he talked to them and removed their pens, wallets, even their watches. From what I could see on TV at home, there was NO WAY the audience member could not have felt him removing the stuff. Later I learned his trick: When he first met the person in the audience, he whispered to them: PLAY ALONG WITH ME.

>CH> Why listen to some poor, landlocked, ratings battered AM or FM
>CH>station-that is likely automated (lifeless) when you can hear digital
>CH>satellite audio?

Well as an owner of a small market radio station that is automated.

I will worry about Satellite Radio when they want ot broadcst the
local High School Football, Basketball and Baseball games. Provide
free airtime for the Lions CLub Charity Auction, Sponcer Blood Drives
and Health Screens with the local Community Hospital, Train
Derailments, the Man Hunt for an esacped Convict. Sponcer
Neighborhood Crime watch's. etc.

It's the local community based broadcaster the offer news and
information on the local level. Yes the Satellite radio broadcaster
offers nice music, but so does DMX and DSS. THey still have to
listen to me to know whats happening in the community where they live,
where what we are reporting directley effects their lives.

Ron Cole
Owner and Operations Manager.

# 3622. NY Radio; Let's Do This Right

Newsgroup: rec.radio.broadcasting
Date: 1995-12-13 00:00:00 UTC
From: mikedow@gate.net
Message-ID: <4algji$p1h@vixen.cso.uiuc.edu>
Source record: 27908

This is the stuff about this newsgroup I love the most. Let's put together a complete encyclopedia of dial positions and call letters. I''' cut and paste things together and present it when were finished. We can even make it a part of Airwave is someone is willing to donate some FTP space.

Here's what I propose (and remember I'm making this up...)

95.5 1960--WABC-FM, simulcast of WABC 770
1965--WABC-FM, country
they called themselves New York County. Joe Hayseed id
mornings, Billy Plowboy did middays, etc...
1971--WPLJ, polka
"A Little Bit of Bratwurst in the Big Apple." Stosh Mikulski
handled the AM duties. Format signed off with a salute to
Bobby Vinton and Lawrence Welk.
1972--WPLJ, AOR
Unusual AOR that played lots of Barry Manilow and Bette
Midler.

Remember that I MADE THAT STUFF UP!

We can get together and put together something that can be a lot of fun. Boston has a better archive than New York. How can the Yanks let the Sox beat 'em?

Are you up to the challenge Knickerbockers?

Mike

# 3624. PHOENIX: KZON GOES ALL THE WAY

Newsgroup: rec.radio.broadcasting
Date: 1995-12-13 00:00:00 UTC
From: Michael Hagerty <Michael_Hagerty@azfamily.com>
Message-ID: <4algj4$p0q@vixen.cso.uiuc.edu>
Source record: 27910

After three months of a mid-step between its former AAA approach
and modern rock, KZON(101.5-The Zone) took off the gloves this week
and launched an all-out assault on alternative KEDJ(106.3-The Edge).

This makes Phoenix perhaps the country's most saturated modern
rock market, with The Zone, The Edge, KUKQ(AM 1060) and
KBZR(103.9-The Blaze), which plays a mix of AOR and modern.
The war should be fascinating to watch. The Blaze,The Edge and
KUKQ are all at a financial and signal disadvantage to The Zone.
The Blaze has a street buzz and momentum going for it at the moment.
The key question is...does The Zone mean it this time?
This is the third sound for the station in three months...listeners
may be beginning to wonder if it won't be
Country or CHR by spring.

# 3625. Re: Dr. Laura

I think its interesting that all responses thusfar to this question
are written by males. Trust me, I am not a "feminazi", but it looks
like this might just be a male/female perspective issue. Most women I
know appreciate Dr. Laura's assertive, common sensical, "you don't have
to act the way you feel" advice. My friends and I have a running joke
about all the groups of women we see congregated in coffeeshops
discussing Dr. Laura's book, "Ten Stupid things Women Do to Screw up
their Lives."

I don't know if Dr. Laura is the ratings equivalent of Rush, but she
certainly has an ever-expanding following...and a primarily female one I
would guess.

Glad to hear someone remembers the late WVNJoy, WVNJazz. I was "lucky enough" to be the guy who signed the station off forever at 4-am that August morning before 100.3-FM went from "worst to first" as Z-100.

Actually, I recall that WVNJ-FM was rated #17 in the 12+ NY Arbitrons. That wasn't all that bad considering that the transmitter was on a 600 foot mountain 20-miles west of Manhattan, and the station owner was a strong believer in running as many commercials as possible.

Beautiful Music WVNJ was often running 18-minutes of spots when the three competing BM stations were limiting themselves to eight spots an hour. The GM was also a wizzard at trade deals and co-operative advertising and wasn't bashful about running multiple spots for the same advertiser in the same hour. I recall one hour with 16 (no kidding) spots for automobile shock absorbers on the log.

A couple of months after WVNJ-FM disappeared, another guy (Bill Schaeffer) had the honor of signing WVNJ-AM off at 4:59-AM and it has been Spanish language WSKQ ever since. BTW, the folks currently working at two other New York stations on my resume, WPAT AM & FM, will soon get to repeat that kind of event when those two stations switch to Spanish formats.

Also, I wanted to point out that WTFM 103.5 Lake Success New York was a beautiful music station that differentiated itself from the pack with, among other things, an announcer with a French accent. Former WMCA "Goodguy" Dean Anthony put in a number of years at WTFM also.

Thinking about the past history of religous station WFME, Newark now owned by Family Radio of Oakland, CA. I believe it was the FM station of country formated WJRZ 970 (now WWDJ) when it was in Newark back in the 60s. I know both stations shared the same studio address for a number of years. I grew up in Newark and remember that both stations were on the same block as the Board of Education offices in the 60s.

Tonight while going through my mail, I was half-listening to (yes, I admit it, it was a moment of weakness) KYYS when a spot came on.

It had a Gary Owens-like voice talking about how stores try to get you to buy stuff during the holidays with weird phrases about how wonderful the store is. One of those phrases was, intoned in a mock-pompous voice:

"...A century of tradition for over 50 years."

I nearly collapsed laughing.

So much so I didn't catch who the spot was *for*.

(found out later it was for HQ)

> remember that CD playyers have a place in the world
>
Yeah, radio is like mass transit. It's an efficient way of moving
many people from one point to another, but cannot be expected to
provide individualized service on every possible street. That's why
people still drive cars or use taxis, and that's why people still
buy tapes and CD's
eand that
buy tapes and CD's

# 3631. NY Radio - WEVD??

Does anyone remember WEVD "The station that speaks your language"?

As I recall they did a lot of multi-lingual stuff during most of the day.

BUT... overnight (around 1977-78) there was a lady who did a really cool acoustically influenced eclectic sort of folk rock show. I worked overnights then, and used to love it.

Anyone recall her name???

# 3632. Dolphin player sues Dolphin flagship

Newsgroup: rec.radio.broadcasting
Date: 1995-12-13 00:00:00 UTC
From: z800525a@bcfreenet.seflin.lib.fl.us
Message-ID: <4algir$p0b@vixen.cso.uiuc.edu>
Source record: 27918

Miami Dolphins linebacker Bryan Cox has filed a $15 million lawsuit against Dolphin flagship station WIOD. In his suit, Cox takes aim at WIOD talkmaster Phil Hendrie, who he claims has maligned and slandered him. Hendrie, famous for doing impressions on his highly-rated afternoon drive shift, did a fake interview with Cox on a broadcast in early November. The fake Cox (Hendrie) blasted his teammates, coach Don Shula, and said he himself was gay. Cox retaliated several days later during a post-game interview with Dolphin announcer Jim Mandich, using obscenities to describe Hendrie and WIOD's top-rated personality, Neil Rogers. Cox later announced his intent to sue, saying "I don't want apologies, I want to see some people lose their (censored) jobs." Rogers has been critical of Cox' on and off-field antics over the past few seasons. Cox himself hosts a talk show on all-sports WQAM.

This is not the first time the Dolphins and WIOD have locked horns. Over the past year, Dolphins owner H. Wayne Huizenga has had several of his VPs send memos to WIOD demanding that Rogers be censured for comments about Huizenga. This may certainly seal the Dolphins' not renewing their contract with WIOD after it expires following the 1996 season.

A few legal points pop up here. As a person who has studied First Amendment and Mass Media law, I feel that Cox's lawsuit has no merit and will probably be thrown out due to his status as a public figure. Cox has been known in the recent past to be quite profane, giving fans in Buffalo the finger, claiming his being fined for that was "racism," and his giving ESPN a interview that waws mostly bleeped. I am curious to see what opinions any of you have out there and have there been any similar cases involving sports personalities and flagship stations? Does a team owner have a right to dictate what opinions may be given by station employees, if the team does NOT own the station?

Hi,

My name is Fredrik Bojerud, a swedish radio jock since 1983. Currently working at Stockholms "Klassiska Hits 106,7" (Homepage at: http://www.algonet.se/~klhits)

I�m trying to locate Dave Otto. He used to be the morningjock at Denver�s Y 108 (KRXY). During the summer of 1988 I visited the United States, and among other things I got in contact with Dave Otto when I was trying to get an appointment to do a tour of the station. When Dave learned tha I also was a DJ he arranged for me to join Him as a morning co-hoast for one morning at Y108.

I called Him some years later, Y108 had changed to Mix 107,5. Today I havn�t a clue what happend to KRXY or Dave Otto. I you know anything, please let me know.

Don�t hesitate to ask me if there is anything you want to know about radio in Sweden.

Fredrik Bojerud

# 3639. PHOENIX RADIO note re: KBSZ power increase

Newsgroup: rec.radio.broadcasting
Date: 1995-12-13 00:00:00 UTC
From: forest@sedona.net
Message-ID: <4algjq$p21@vixen.cso.uiuc.edu>
Source record: 27925

KBSZ and its new age days/contemporary instrumental based nights format was finally awarded a long sought after power increase on Dec 7, 95. This includes a new dial position which will be used at once at the lower power (94.1fm) from 93.7fm and the power increase -- 25kw (93.7 was just 6kw) should kick in within the next 30 days. This will also avoid being co-channeled with KHJ at 93.7fm in Tucson, the class C that blew KBSZ out of the west side of the valley. This should finally get KBSZ in the book.

# 3640. Info on legendary Zoom Black Magic Radio

Newsgroup: rec.radio.broadcasting
Date: 1995-12-13 00:00:00 UTC
From: rockrap@aol.com
Message-ID: <4algka$p2q@vixen.cso.uiuc.edu>
Source record: 27926

Reply-To: rockrap@aol.com (Rockrap)

Zoom Black Magic was the first pirate station to broadcast openly in defiance of the FCC (in both Seaside and Fresno, California) and even showed up once in the Arbitron ratings. Zoom has had numerous run-ins with the FCC but is still on the air semi-regularly in Fresno and, from time to time, in Los Angeles.
If you'd like to receive a copy of Zoomin', the official Zoom Black Magic newsletter, just email back your postal address.

# 3641. [FREE!] AIRWAVES RADIO JOB SERVICE

Newsgroup: rec.radio.broadcasting
Date: 1995-12-13 00:00:00 UTC
From: EDITOR@airwaves.com
Message-ID: <4alp59$9sv@vixen.cso.uiuc.edu>

Rec.radio.broadcasting and AIRWAVES MEDIA WEB have begun a free job placement service on the World Wide Web.

This service is open to anyone seriously seeking employment in radio broadcasting ... OR ... Anyone offering employment in radio broadcasting.

This includes all facets of the industry from Air Talent and Board Ops to Programming, Management, Sales and Engineering Staff.

Job related postings are still welcome in rec.radio.broadcasting and AIRWAVES RADIO JOURNAL. This new job service is designed to further assist those who are seeking employment in the increasingly competitive radio broadcasting industry.

This new service is just another way that AIRWAVES and rec.radio.broadcasting remain committed to the art, business and science of broadcast radio and those who make it work.

For complete instructions on how to use this service, read the following information file carefully.

Best of luck in your search.

"Position Wanted: Web Page Design. F/T, P/T or Freelance"

---------- Cut here and save ----------

Here is the deal...

1. Send email to EMPLOYMENT@AIRWAVES.COM.
2. Use a descriptive subject that says one of the following...

o A) Help Wanted: Brief Description of opening.
o B) Position Wanted: Brief Description.

Example...

- Help Wanted: Air Talent, New York City area
- Position Wanted: Engineer, 20 years Experience

Your post MUST begin with either 'Help Wanted' of 'Position Wanted' or your mail will be returned.. This is required for article sorting and

threading.

3. Letter should be no more than 100 words
4. Include your....

o A) Full Real Name
o B) Postal Address
* Required for Help Wanted ads
* Optional for Positions Wanted ads
o C) Voice and/or Fax Phone (voice preferred)
o D) Email address
o E) If offering a job, your company name and title.

5. No resumes, but you can include a URL to your web or FTP site if there is material there (resume, picture, sound clips etc) that might be of assistance.
6. If and when you fill your request, write and have your listing removed. It will be removed in about 30 days anyway.
7. To look at the listings... point your Web Browser at..
http://radio.aiss.uiuc.edu/~rrb/job.html

Note: This service is *only* for QUALIFIED individuals who are SERIOUSLY seeking employment in radio broadcasting and bona-fide employers in need of qualified help. This is NOT a "Gee it would be cool to play Megadeth on the radio" list. any listings that don't appear serious and qualified will be discarded. However, I take no responsibility for the legitimacy or qualifications of any poster to this service, that is your job when contacting someone.

In case it needs saying, this is a publicly accessible database. Please use caution in all dealings with people who may contact you via this service. If this is too big a risk for you, don't use it. We take no responsibility for any contact made via this service.

To view ads already online Go to http://radio.aiss.uiuc.edu/~rrb/job.html

Happy Hunting.

CRTC LOOKING INTO Q104, SUN-FM MANAGEMENT DEAL!

A cost-saving management agreement between two local radio stations owners has prompted an investigation by the CRTC and could lead to its being dissolved.

The CRTC says in a "call for comments" that the deal may give the stations an unfair advantage in metro's crowded radio market. The federal goverment's broadcasting watchdog is also worried metro's radio market could quickly become a near-monopoly if it allows the management agreement.

In May, Newcap Broadcasting Incorporated (which owns Q104 & 780/KIXX Country) moved into Art Hustins Ltd. (which owns 96.5/SUN-FM) offices in Bedford, and the two companies amalgamated their adminstrative and advertising staff. The two companies did not have the CRTC blessings. On December 8th, 95, the CRTC launched an investigation of the agreement and called for public comments on the agreement.

"We may find that there's nothing wrong with the agreement, but we may find that 100 per cent of it is wrong, or that it's somewhere in between" Donna Shewfelt, the CRTC senior officer for the Atlantic region, said yesterday. SUN-FM owner Art Hustins, Jr. said he isn't worried about CRTC's call for comments "I'm not alarmed by this at all, ", he said. I don't think there's anything wrong with the agreement. It does exactly what it was designed to do: create efficiencies for both companies.

The Newcap/Hustins agreement is similar to six other radio station partnerships that have been forged in Canada since 1992. But this is the first such partnership in a radio market as crowded as metro's

"...The proposed management arrangement between Newcap and SUN involved two licensees operating in a market where there are other radio licensees present," says the CRTC's official call for comments. " (It) could enable Newcap and SUN to reduce their operating cocts and give them a competitive advantage over other licensees."

Newcap and SUN-FM must respond by January 30.

Date: 1995-12-13 00:00:00 UTC
From: Jay Marvin <102547.1273@compuserve.com>
Message-ID: <4algi7$ov2@vixen.cso.uiuc.edu>
Source record: 27966

[Moderator's Note: Although not specifically radio related, it is my opinion that this impeding legislation will have a profound effect on how we all communicate on this network so I am including it and urging all who care about the almost unheard of freedom we enjoy on this international communications medium, to think carefully and to do what they can to make their voices known in opposition to this bill. For those who scoff and say they never can police the net, realize this, they don't have to. All they have to do is police the providers who will police the users out of self-preservation. Please take this as information only and do not start a thread on it here. Thanks Bill]

RE: INTERNET PROTEST DAY (TUESDAY DECEMBER 12)

Fellow Internet users,

Efforts currently underway in Congress to pass legislation which would regulate the content of the Internet, including measures which are a clear violation of our right to free speech, threaten the freedom and security of every user of the Internet. At the request of Voters Telecommunications Watch, we are distributing the following call to action to all members of the MindVox community. We strongly urge all of you to participate in the Internet Protest Day next week.

Thank you.

==========
CAMPAIGN TO STOP THE NET CENSORSHIP LEGISLATION IN CONGRESS

On Tuesday December 12, 1995, Join With Hundreds of Thousands
Of Your Fellow Internet Users In

A NATIONAL INTERNET DAY OF PROTEST

PLEASE WIDELY REDISTRIBUTE THIS DOCUMENT WITH THIS BANNER INTACT
REDISTRIBUTE ONLY UNTIL December 20, 1995

---
CONTENTS
Internet Day of Protest: Tuesday December 12, 1995
What You Can Do Now
List of Participating Organizations
---

INTERNET DAY OF PROTEST: TUESDAY DECEMBER 12, 1995

Outrageous proposals to censor the Internet demand that the Internet Community take swift and immediate action. We must stand up and let Congress know that we will not tolerate their attempts to destroy this medium! Please join hundreds of thousands of your fellow citizens in a national day of protest on Tuesday December 12, 1995.

As you know, on Wednesday December 6, 1995, the House Conference Committee on Telecommunications Reform voted to impose far reaching and unconstitutional "indecency" restrictions on the Internet and other interactive media, including large commercial online services (such as America Online, Compuserve, and Prodigy) and smaller Internet Service Providers such as Panix, the Well, Echo, and Mindvox.

These restrictions threaten the very existence of the Internet and interactive media as a means of free expression, education, and commerce. If enacted, the Internet as we know it will never be the same.

Libraries will not be able to put any books online that might offend a child somewhere. No "Catcher in the Rye" or "Ulysses" on the net. Internet Service Providers could face criminal penalties for allowing children to subscribe to their Internet Services, forcing many small companies to simply refuse to sell their services to anyone under 18. Worst of all, everything you say and publish on the net will have to be "dumbed down" to that which is acceptable to a child.

As Internet users, we simply must not allow this assault against the Internet and our most basic freedoms go unchallenged.

On Tuesday December 12, the organizations below are urging you to join us in a NATIONAL DAY OF PROTEST. The goal is to flood key members of the House and Senate with phone calls, faxes and email with the message that the Internet community WILL NOT TOLERATE Congressional attempts to destroy the Internet, limit our freedoms and trample on our rights.

Below are the phone, fax, and email address of several key members of Congress on this issue and instructions on what you can do to join the Day of Protest to save the Net.

---

WHAT YOU CAN DO NOW

1. Throughout the day Tuesday December 12, please contact as many members of Congress on the list below as you can. If you are only able to make one call, contact House Speaker Newt Gingrich. Finally, if the Senator or Representative from your state is on the list below, be sure to contact him or her also.

2. Urge each Member of Congress to "stop the madness". Tell them that they are about to pass legislation that will destroy the Internet as an educational and commercial medium. If you are at a loss for

words, try the following sample communique:

Sample phone call:

Both the House and Senate bills designed to protect children
from objectionable material on the Internet will actually
destroy the Internet as an medium for education, commerce, and
political discourse. There are other, less restrictive ways to
address this issue.

I urge you to oppose both measures being proposed in the
conference committee. This is an important election issue to
me.

Sample letter (fax or email):

The Senate conferees are considering ways to protect children
from inappropriate material on the Internet. A vote for either
the House or Senate proposals will result in the destruction of
the Internet as a viable medium for free expression, education,
commerce. Libraries will not be able to put their entire book
collections online. Everyday people like me will risk massive
fines and prison sentences for public discussions someone s
somewhere might consider "indecent".

There are other, less restrictive ways to protect children from
objectionable material online. This is an important election
issue to me.

3. If you're in San Francisco, or near enough to get there, go to
the Rally Against Censorship from Ground Zero of the Digital Revolution:

WHEN: Monday, December 11, 1995 12:00 - 1:00 PM
WHERE: South Park (between 2nd and 3rd, Bryant and Brannon) San Francisco.
SPEAKERS: To be announced
BRING: Attention-grabbing posters, signs, and banners that demonstrate
your committment to free speech and expression, and your feelings
about Congress.
FOR UPDATED INFORMATION (including rain info):
http://www.hotwired.com/staff/digaman/

4. Mail a note to protest@vtw.org to let us know you did your part.
Although you will not receive a reply due to the number of
anticipated responses, we'll be counting up the number of people that
participated in the day of protest.

# 3644. Mid-America Radio Watch (11-Dec-1995)

Newsgroup: rec.radio.broadcasting
Date: 1995-12-13 00:00:00 UTC
From: transvox@crl.com
Message-ID: <4algi7$ov3@vixen.cso.uiuc.edu>
Source record: 27967

Kansas City's newest radio station officially announced the beginning
of operations today (December 11).
No, I'm not talking about WREN(AM), or even about KZTO(FM), whose rimshot
move-in hasn't been built yet.
I'm referring instead to WPBE684, a travelers' information system
station at 1610 KHz.
An article in the Kansas City _Star_ described WPBE684 (without using
its call letters) as a preview of intelligent transportation technology
being considered for the Kansas City freeway system.
The Missouri Highway and Transportation Department has connected seven
roads signs (including one across the state line) to the WPBE684 transmitter
at the southeast edge of the downtown freeway loop. Whenever there is a
traffic hazard near one of the signs, the sign will flash to tell motorists
that they should tune to 1610 KHz on their dial about the problem and how
to detour around it.
According to a state highway engineer interviewed by the newspaper, the
WPBE684 transmitter was left over from a construction project and didn't
cost the state anything extra. The TIS service is intended for drivers
on freeways near the downtown area and the Missouri River bridges. Some
information on Kansas freeways will also be provided.
****
Another Radio Watcher asked me an interesting "what if" question
concerning WREN's proposed migration from Topeka to Kansas City: what if KKSU
at Manhattan, Kansas proposed fulltime operation on 1250 KHz?
The thinking behind the "what if" question is that it would be a way
for WIBW in Topeka to ditch the time-sharing arrangement it's had
for 66 years with Kansas State University at 580 KHz.
That time-sharing arrangement may be a stumbling block for any sale
of WIBW, which is up for sale as the result of the merger of its
parent Stauffer newspaper chain with another chain that's not interested in
keeping Stauffer's stations.
I happen to think it would be unlikely. As recently as 1990, I heard
reports that K-State repeatedly turned down Stauffer's offers to construct
a statewide FM network for the university in exchange for turning in the
KKSU license.
For K-State, the parttime operation on a low AM frequency may make quite
a bit of sense: the station doesn't have to fund a fulltime operation and
still gets statewide coverage. KKSU maintains its own transmitter to this
day.
In any event, I think it's safe to predict that it will be years before
the WREN application is either approved or denied.
****
Two months and a week after he collapsed from a brain aneurysm,
"DJ Ray" Velazquez has returned to the KLZR studios in Lawrence, Kansas

for his weekly ambient/techno radio show, "Nocturnal Transmission."
Velazquez was back at the mike last night (Dec. 10) for the first time
since his illness.
Velazquez, an independent DJ who formerly was with KKFI(FM) in Kansas
City, underwent emergency surgery at the Kansas University Medical Center
in Kansas City after the collapse. KLZR helped out Velazquez by airing
frequent announcements asking for contributions to a medical fund that
had been established for him.

# 3647. Re: A Controversial Opinion About AM!

Newsgroup: rec.radio.broadcasting
Date: 1995-12-13 00:00:00 UTC
From: talk1370@aol.com
Message-ID: <4algib$ovb@vixen.cso.uiuc.edu>
Source record: 27970

An interesting sidelight about the relative importance of FM signal quality vs. programming quality...
CapCities/ABC has done a series of studies over the years (the first of which came out while I was working for them in Buffalo back in the late 70s) on how important it was to a listener to be tuned to AM vs. FM. They found out that it mattered VERY LITTLE to most listeners whether their favorite station was on AM or FM, and not much more whether or not it was in stereo or mono... and this is even for music-format listeners! The overriding and almost exclusive factor was the programming content and the quality of the format's presentation. Only on the noisiest far fringes of a station's reach, or in areas which AM stations null at night when they go directional, are they hurt by being on AM rather than FM, as far as the LISTENER is concerned.
ABC's own experience proves it...their AMs tend to be well programmed and well promoted, and as a result do well. Their FMs (except for WPLJ, KSCS and their Minneapolis and Atlanta stations) have not been as strong.
Bottom line...an AM station, providing it has even a halfway decent signal to cover its prime market, is going to do as well as it's programmed. If AM ever dies, it'll be because stupid managers didn't put something worth listening to, on the air.
Bob Smith, middays WXXI-AM 1370 Rochester NY

# 3648. Avco (was re: Ed Phillips / San Francisco)

Newsgroup: rec.radio.broadcasting
Date: 1995-12-13 00:00:00 UTC
From: "Mark S. Roberts" <transvox@crl.com>
Message-ID: <4algic$ovd@vixen.cso.uiuc.edu>
Source record: 27971

Max Cacas <76476.2472@compuserve.com> asked:

P.S. speaking of "Avco Broadcasting"...can anyone with a long memory recount for the group the other stations owned by this insurance/financial services group when they were in the radio biz back in the 60s/early 70s? I know of WWDC-AM/FM, and KYA-AM.

WRTH(AM) [now KFNS] in the St. Louis market, licensed to Wood River, Illinois, near Alton.

This is *not* the present WRTH, which was WIL.

WRTH was the market's dominant MOR station in the early 70s. I remember it from having it inflicted (my viewpoint at the time was that AM was for old folks and time not spent listening to KSHE or KADI was time wasted) on me by my high school driving instructor, who insisted on listening to it in the car.

Even after WRTH went on to other call letters and formats, the image linking WRTH and its format lingered so strongly in St. Louis that WIL(AM) picked up the calls when it flipped from country to nostalgia several years ago.

The WIL call letters and country format are still preserved on the FM.

I've actually grown to like MOR (occasionally): some of those artists were pretty good, as it turned it.

From: stellastar@aol.com
Message-ID: <4algic$ove@vixen.cso.uiuc.edu>
Source record: 27972

I have permission to reprint this e-mail from a Brown grad of a few weeks ago, Jim Bonner (equ@aol.com)
In response to my query, he titled it "To Brown, or Not To Brown?"
(insert clip)
I would...but with reservation. I would have to qualify my answer with the type of person that is applying. I felt kind of stifled there but then again I got a job because of Brown. At about $9,000 brown is quite expensive. Then again, jobs are very hard to find with no training. Employers are always looking for education as a weeding tool. In that respect Brown has a monopoly in the Midwest. Unfortunately, there are a very few outstanding instructors there. You can go through the whole program and never get one that ever really went anywhere in the business. I was fortunate and had some good ones. It is difficult to describe. My answer is "Yes, but with a very big 'BUT'" I would have to talk with that prospective student. I know that didn't help - hey, I tried.
(end clip)
He mentions Phil Heuer as an excellent teacher, with valuable info about actual show prep, though very strict and intolerant of B.S. and student whining.
I worked with Phil when he was "Harley Worthit" in the early 80's at KELO-AM, which held #1 ranking in South Dakota's biggest city for long after AM lost its ascendancy. He was hard to work for, but a very good teacher of radio basics, and people who left there went to many good other jobs. As did Bonner; e-mail him at EQU@AOL.com for more comments.

I guess it may eventually come to pass, that some High Authority will make us change our URL to http://www.wply.com. Right now, with http://www.y100.com, we get listeners checking out record companies' web pages, and seeing that they're saying things like -

MADONNA - "You'll See" -- 36 spins this week at Y-100!!!!!!!

or

COOLIO - "Gangsta's Paradise" -- Now playing on Y-100!!!!

The listeners then e-mail us, telling us to play Madonna's "You'll See", obviously not giving a damn that we're a rock station...and not knowing that the thing is actually referring to WHYI in Miami.

For the record, I believe we get listed in those ads as "WPLY" and 'HYI is the one that gets to be listed as "Y-100", obviously because they existed before we did.

BTW, is there any other Y-100 in the country (besides us and Miami)?? I'm curious!

The word is that WMKS (or kissin' 93.3) is changing to an alternative rock format here in Macon Georgia. Presently they play country music, but have fallen so far behind country giant WDEN (FM105); it is time for a change.

ron.jordan@nashville.com writes:
>I usually try to kep up with Chicago Broadcasting, but I musta missed
>something. Where's Brennaman going?

The reason he is being replaced is because WGN refused to compromise with him on off days. He wanted to miss about five Cub games to do NFL games for Fox, but WGN didn't want him to miss any Cub games. So he decided to move on, and WGN had to replace him. He has since signed a deal with the new Arizona team, the Diamondbacks, though they don't actually start playing until 1997, or maybe 1998. I believe I read that he will be working with them in other capacities until then, doing things like putting together a speakers' bureau or something.

I'm glad to see him go. I've been told that he's a great guy in person, but I was tired of his cliche-ridden delivery. Like this gem, when the Cubs were playing St. Louis and the Cardinals had the bases loaded:

"The sacks are drunk with Redbirds."

Gag.

# 3654. Revised FESTIVAL OF CHRISTMAS PROGRAMMING

HCJB FESTIVAL OF CHRISTMAS PROGRAMMING

HCJB, The Voice of the Andes is proud to offer the following
special Christmas programs for your enjoyment.

Monday, December 18
"Flip Side" is a wacky look at Christmas as well as insightful
commentary on the theme from perspectives we don't always consider.
Music and commentary will be our road map to understanding the holiday
season that much better.
8:00 and 17:30 UTC to Europe, 9:30 UTC to the South Pacific, 1:30
and 5:30 UTC Tuesday (Monday evening local time) to the Americas.

Tuesday, December 19
"Celebrate The Gift", a special Christmas music program featuring
Twila Paris, Phillips, Craig & Dean and others. An hour of joyous
Christmas music.
7:30 and 17:00 UTC to Europe, 9:00 UTC to the South Pacific, 1:00
and
5:00 UTC Wednesday (Tuesday evening local time) to the Americas

Wednesday, December 20,
"Christmas Light Around the World", David Low provides a whirlwind
tour of Christmas celebrations in Latin America and around the world.
8:00 and 17:30 UTC to Europe, 9:30 UTC to the South Pacific, 1:30
and 5:30 UTC Thursday (Wednesday evening local time) to the Americas.

Thursday, December 21
Drama "The Good Shepherd," the story of Eliezer, one of the
original shepherds who witnessed the miracle night of Christ's birth,
and his grandson, Reuben, who is embittered by the loss of his parents,
two of the first Christian martyrs. This drama handles the age of
question of how could a loving God allow cruelty and suffering. Hosted
by Doug Oldham.
7:30 and 17:00 UTC to Europe, 9:00 UTC to the South Pacific, 1:00
and 5:00 UTC Friday (Thursday evening local time) to the Americas.

Friday, December 22,
"Music at the Ranch, an hour of country Christmas music will be
featured on "Morning in the Mountains.
12:30-13:30 UTC to the Americas.

Friday, December 22,
"Holiday Call in" Join HCJB's program staff for an hour and a
half of telephone chat and a look at Christmas customs around the
world.

7:00 UTC to Europe and the South Pacific, 1:00 UTC Saturday
(Friday local time) to the Americas.

Saturday, December 23
Music special "Music at the Ranch", a hand-clapping hour with
Christmas music, Country and Western style featuring the Flying W
Wranglers and special guest Paul Overstreet.
7:30 and 17:00 UTC to Europe, 9:00 to the South Pacific, 1:00 and
5:00 UTC Sunday (Saturday night local time) to the Americas.

Saturday, December 23
On a special edition of Solstice this week some celebrities drop
by to wish us a merry Christmas, courtesy of impressionist Ben Price.
You'll be greeted by people like Prince Charles, Arnold Swarzenegger
and Forrest Gump in our youth program by Hayley Coates and Ashley
Field. From our Australian studios.
10:00 UTC to the South Pacific, 18:00 UTC to Europe, 2:30 and 6:00
UTC Sunday (Saturday night local time) to the Americas.

Sunday, December 24
Drama "The Christmas Carol," the traditional 1939 version of
Charles Dickens' famous classic. Brief commentary following the program
by Rob Quiring and Brian MacHarg
7:30 and 17:00 UTC to Europe, 9:00 to the South Pacific, 1:00 and
5:00 UTC Monday, (Sunday night local time) to the Americas.

Sunday-Monday, December 24-25
"Back Home Hour", musical originally performed live on HCJB in the
mid-1950's.
2:30 UTC to North America, 7:00 UTC to Europe, 8:30 UTC to the
South Pacific, (all times UTC Monday).

December 25
Drama "Christmas comes To Pleasant Hill". Set at the turn of the
century, "Christmas Comes to Pleasant Hill" traces the consternation of
a quaint town with its most unlovable citizen, Bertha Wiley. After
living a life of bitterness and misery, Bertha is forced to take in a
young girl orphaned by the death of her father. She comes to terms with
someone whose love and concern overshadows her bitterness.
7:00 and 17:00 UTC to Europe, 9:00 UTC to the South Pacific, 1:00
and 5:00 UTC Tuesday (Monday evening local time) to the Americas.

Monday, December 25
The Messiah. George Fredrick Handal's classic composition
featured in this traditional Christmas Day broadcast on HCJB.
12:00-14:30 UTC

Wednesday, December 20
"The Story of the Founding of HCJB" John Beck hosts the annual
broadcast of the founding of the pioneer missionary broadcaster, HCJB,
with historic audio clips of Dr. Clarence Jones and others.
8:00 and 17:30 UTC to Europe, 9:30 UTC to the South Pacific, 1:30

and 5:30 UTC Thursday (Wednesday local time) to the Americas.

Maybe the most interesting recent development con-
cerning CKLW is that they appear to be finding some suc-
cess again by becoming the one thing they never wanted
to be in the past...a truly Canadian station. They've gone to
a talk format and tilted it largely at Southwest Ontario
rather than trying to act like another Detroit station, and
it's apparently bringing in more money than at any time
since the heyday of "The Big 8" as a top-40 outlet. CHUM
Ltd. (their current owners) also have three other stations,
two FMs and another lower powered AM, that program music
and DO attract a cross-border audience. (The AM on 580 is
big band; the FMs are, respectively, new rock and 70s classic
rock.)

Bob Smith, middays WXXI-AM 1370 Rochester NY

Here in the New York City market, we used to have an AM classical station,
WQXR 1560, now WQEW 1560 "American Standards" (they're doing a 81 hour
Frank Santra marathon for his 80th birthday (plus an hour for next year))

On FM we used to have WNCN untill they went hard rock as WAXQ. I had
friends who were hard core classical fans, and used to tell me back
in the 70's and 80's that WQXR sucked as a classical station and WNCN
was the station for serious classical fans.
There's also WNYC-FM they play classical fairly often.

Anyone play classical music in a screaming jock top 40 format? I didn't
think so....

# 3659. Re: Classical Music (was: Re: Comment on Seattle Radio

Message-ID: <4algio$p06@vixen.cso.uiuc.edu>
Source record: 27982

In article <4a91h5$58l@vixen.cso.uiuc.edu>, jcrose@dplay.com says...

>Over the past six months or so, WCRB (Boston) has experimented with
>playing movements-only and giving their air talent a lot more personality.

>Both, obviously, to make the station more up-front (shades of WNCN!).

Mario Mazza, WCRB's program director, was the WNCN PD until they went rock.

>The movements-only approach ran into serious opposition from listeners,

There's a small but very vocal group of listeners who complain about us
playing separate movements.

They don't understand that all we're doing is playing a movement from a
well-loved symphony or concerto in a ten minute slot we used to fill with a
piece of mediocre music by somebody no one's ever heard of. The only reason
that other stuff ever got played was because it was ten minutes long and we
had ten minutes to fill.

We think the movements make for a much better sounding mix of music.

I'm particularly proud of the new WCRB music mix, by the way, because I
wrote the computer software that produces it.

We still play lots of complete pieces, by the way.

>On the other hand, the personality approach is starting to work. It took a
>long (and sometimes embarassingly funny) time for their old-line classical
>jocks to get used to it, but now the station is becoming more human -- and
>easier to pay attention to -- than the classic neutral approach to this
>kind of programming.

Personality is key to the success of any radio format in the satellite era.
It's one aspect of a station's sound that cannot be duplicated by
competitors armed with black boxes or satellite dishes. And we've found
that strong air personalities are a valuable asset to our sales and
promotion departments too.

>They still go overboard, however. It's a bit silly to hear an announcer
>say something like "Isaac Stern is here to play a little Beethoven
>concerto". And then insist on call-letter identification as much as
>possible,

You'd be surprised how many listeners confuse WCRB with WGBH, WHRB, or even
WBUR (which plays no classical music at all!). In the old days it was very
common for listeners to tell us they really liked Robert J. Lurtsema,
thinking him to be our morning man instead of WGBH's, or asking us not to

beg for money so often (which, being a commercial station, we don't do).

This morning's national edition of the New York Times has
an article about Ms. Tammy Bruce, leader of LA NOW. She's
just been censured by the national board of the National
Organization for Women.

The AP report mentions that Tammy Bruce is a radio talk
show host --daily-- in LA.

Could someone please write to me direct at: croth@omnifest.uwm.edu

and provide me with the band, frequency, call letters,
and start/end times [and the formal name of the show]?
[You do not need to know all of these things to write me.
Even partial info appreciated.]

[If you're enterprising, phone the station or consult
printed newspaper listings.]

Direct e-mail appreciated if you know. Please indicate if
your data is 100% accurate or a close guess. [As a writer, I've
done this before, and I get inconsistent responses, so if several
people write me, I'll be able to determine the exact answer.
]

Thank you in advance. This is for an electronic time capsule
devoted to First Amendment controversies.

Cordially,

Chris Roth
The First Amendment Teach-In
croth@omnifest.uwm.edu

[I assume the above-mentioned program is not syndicated to
any other markets. And I assume that it is not simulcast
in LA--on AM and FM simultaneously.]

[In a few seconds, I'll post my radio guide to WI. As
a thank-you to participants here.]

# 3665. PHOENIX: FOXX CHARGED IN HIT&RUN

Newsgroup: rec.radio.broadcasting
Date: 1995-12-13 00:00:00 UTC
From: Michael Hagerty <Michael_Hagerty@azfamily.com>
Message-ID: <4algis$p0c@vixen.cso.uiuc.edu>
Source record: 27988

70's KHTC(96.9-K-Hits) weekender Carla Foxx was charged Friday (12/8)with leaving the scene of a fatal accident...a class 4 felony under Arizona law.
Foxx surrendered to authorities Friday morning under an arrangement between her attorney and the police.
78 year old Kansas City attorney Edward A. Smith was killed November 22 when he was struck by a Ford Explorer on Camelback Road in Phoenix. Contrary to earlier reports,
Smith was not in a crosswalk as he attempted to cross the busy boulevard.
Police now say it was Foxx(real name: Carla Moore)herself who called the police the next day to report her vehicle had been in an accident. The car was seized on November 23 and physical evidence was found linking the car to Smith's death, but sources say Foxx and her attorney weren't telling detectives much else.
Since then, police have placed Foxx at the Hard Rock Cafe, 2 blocks from the accident scene, just prior to the hit & run.
Authorities say Foxx was drinking at the Hard Rock, but they cannot, at this point, say for sure whether she was in any way impaired. They leave open the possibility of other charges being filed in the future, if evidence is found to support them. They could include driving under the influence and vehicular manslaughter.
Foxx was released on her own recognizance following her initial appearance in court . A pre-trial hearing is set for January 4.
Foxx had only been at KHTC six weeks at the time of the incident, and was put on leave as soon as the station learned of the situation. Best known for her 8-year run at AC KESZ(99.9), she presided over the ill-fated and short-lived "Hot Talk" format at KHOT(100.3) as PD and midday talk host for three months earlier this year.

# 3666. A response to Dan, Re: KPLX/KLIF Format change

Newsgroup: rec.radio.broadcasting
Date: 1995-12-13 00:00:00 UTC
From: robert573@dallas.email.net
Message-ID: <4algj4$p0o@vixen.cso.uiuc.edu>
Source record: 27989

In rrb,

cannon@onramp.net (Dan Cutrer) writes:

(snip.... snip>

>The folks over at KLIF/KPLX are increasingly not amused at the antics of
>the one poster who keeps shuffling this stuff onto this group. Again:
>KPLX is close to being the most profitable FM in Dallas/Ft. Worth! The
>log was heavy on Saturday, December 2, the Production Director worked
>overtime getting stuff ready. No one "cleaned out the prize closet." No
>one made announcements "We're country, but we won't be for long."

Hey, Dan... Why does it look like you are trying to cover up, make
excuses for, and do damage control for KPLX/KLIF?

<snip.... snip>

>Bill, what you've got here is someone with a vendetta, who is using
>this group to try to hurt an excellent operation, extremely profitable,
>that has no intention of changing format. At some point, he might
>oughta be told to stop it!

Dan, did you ever stop and think that people who ask about these rumors
don't have a vendetta? They might be people, such as yourself, who don't
understand why KPLX/KLIF would even want to change formats. I am under
the impression you are trying to get the posters to not mention anything
about a potential KPLX/KLIF format change, regardless of what they have
heard... why?

Also, about your comment that the folks at KPLX/KLIF are not amused
about these posts... Whether it is the case or not, it looks to me
as if you work there, and know that there is "some" truth in these
rumors.

>Best bet at KPLX is that who(m)ever is posting this tripe is either a
>disgruntled job-seeker, former employee, or friend of one. You may
>recall that a prior posting that got no response led this same poster
>to query a second time : Why no responses to my prior post 'bout a
>format change.

Need I remind you that these questions were forwarded to a representative
of KPLX/KLIF long before they were posted here? Also do I need to remind
you that This representative never responded to a bulk of them...? He
only commented on a couple of the smaller detailed questions and left the
big ones unanswered.

If the original purpose of the posts was to stir up discussion of formats at KPLX/KLIF, you seem to have done more to continue that by continually offering denials than anything the poster could have done.

The formats of KPLX/KLIF have absolutely no impact on my life, merely I am just curious about the workings of the radio market in my community. I have heard all kinds of silly rumors about KPLX/KLIF, and I'm simply interested if ahyone else knew about them.

If I hear any more of these silly rumors aboyt KPLX/KLIF, I might bring them here to see if anyone else knows about them. After all, that is what "Airwaves" is for... "discussion of the radio industry". Do you feel that all the discussion about the WLS-FM format change should have been filtered by the moderator? If a rumor came up here that said Disney was considering selling the ABC radio division, shouldn't it be permitted for discussion here?

Rob Bass

[Moderator's Note: Since my name was mentioned, let me say that I am here to pass on as much information as I can. I do not verify content. If I receive a 'verifiable' communication from an official spokesperson at some organization, stating that something in this group is patently false, I will see to it that a retraction is published. I will reject any post I find to be obviously untrue or misleading. Barring that, this a public forum and I take no responsibility, nor make any claims as to the reliability or accuracy of anything posted here. Bill]

# 3667. WWW AM/FM Radio Search Page Now Online

Newsgroup: rec.radio.broadcasting
Date: 1995-12-13 00:00:00 UTC
From: wdp@uiuc.edu
Message-ID: <4am11o$oeh@vixen.cso.uiuc.edu>
Source record: 27990
Cross-posted to: rec.radio.broadcasting,rec.radio.shortwave,rec.radio.info,chi.media,ba.broadcast,misc.misc,rec.video.satellite.tvro,rec.video.satellite.misc,rec.video.cable-tv,alt.radio.pirate

Thanks to the hard work of a net-friend, AIRWAVES now has free, easy-to-use World Wide Web page for searching the FCC's AM and FM radio station database.

You can search by frequency, call letters, city, state, province, or by region (several USA Metro areas are pre-selected or you can enter your own lat/long).

The AM search shows calls, city, state/province, frequency, day power, night power, critical-hours power (if used) and antenna specs such as DA-1, DA-2, DA-3 DA-D DA-N or ND-1 .... etc.

The FM search returns calls, city state/province, power, antenna height and whether the station is directional.

In addition you can see a color map of the transmitter location by clicking on the call letters in the search-results window. Currently the map feature is limited to the lower 48 states. We are working on a feature to include directional pattern data. We do not offer TV data but may do so at some later time.

To use this you must have a forms-capable browser. I suggest using Netscape 1.1N (or later) since much of the formatting is Netscape Enhanced (tables, backgrounds, centering etc). It is usable on Lynx, Mosaic and other browsers with varying results. The output page is formatted nicely and resembles the old "Whites Radio Log of the early 70's and is easily downloaded and printed.

The URL is http://radio.aiss.uiuc.edu/~airwaves/fccdb.html

Please let me know if you like the service, and please try to keep traffic as low as possible during business hours (8AM - 5PM central U.S. time). This is provided as a public research tool and *NO* commercial use may be me made of the data. The FCC database is not 100% accurate. We know this so don't write telling me about some station which is improperly listed. I do not control the database and I do not make corrections to it. To do so would be an impossible task. Enjoy the service. It is free and I think you will find it is very helpful.

Bill

Todd Reasland (reasland.1@postbox.acs.ohio-state.edu) wrote:

: Hmm. Interesting that KING could never climb out of the twos, and KVI
: could come from literally nowhere -- lower ones, in its last books as an
: oldies station -- to beat the almighty (in terms of unbeatability) KIRO.
: As for The Buzz (KIRO-FM), it's taken a long time for this station to
: crawl out of shares in the ones (and, often, less than a one). And, just
: think -- KVI didn't have the benefit of a sister TV station to make its
: mark! (Remember: it climbed atop the ratings in Seattle _before_
: FishComm's purchase.)

Heh-heh. I probably shouldn't admit this, but since no one else is listening...

You know what happens when a highly-placed AM DXer/radiophile gets randomly selected to receive an ARB book? He says something like, "Well, there are 12 people in this household who listen to the radio." And the ARB person says, "OK, we'll send you 12 books." Someone I know in the Seattle area did that, and you should have seen the next ratings results. One of KGO's strongest showings in years. Probably because it was a Winter ARB, and the skip was in all day. Now about that Colombian on 890... they didn't make the top ten.

Seriously, now, you people who flit through town doing band scans, then run back to whereever American Airlines flies, don't have a clue about radio in this town. It sucks. It's sucked for years. Prior to the talk craze, it was 45 stations playing variations on an oldies theme. News??? Don't make me barf, 'kay?

KIRO gives you 12 second sound bites, followed by bells, whistles, beeps, buzzers and screamingly inane spots for mattresses and cars. They block in Dave Ross from 9 to Noon, and the supremely insipid/moronic Dorie Monson (former and still sports jock) from noon to three. They used to have a noon news hour, but dropped it about two years ago.

KVI's claim to fame is Limbaugh, 9-noon. Siegel pulls decent numbers noon to three, but look who he's up against on KIRO. Now KOMO (another leg of the Fisher monopoly) has created a noon-3 spot for Ken Schramm, best known for hosting KOMO-TV's Town Meeting, a bombastic, half-baked superficial vox populi program. Add to this mix KNWX-770 (formerly KING-1090), with lame short bits and CNN Headline News, owned by KIRO. That's AM, folks.

FM's already been dealt with. The only difference between KPLU and KUOW's NPR programming is that KPLU airs "Car Talk" one hour later on Sunday mornings.(P.S. The reason is took KIRO-FM so long to crawl out of the mud

is because it's gone through half a dozen format changes since it was KSEA.)

Those of you with cable TV systems that suck have a pretty good idea of radio in the Seattle area. 57 channels and nothing on. The best programming --by far-- done in these parts is from two college FMs, KBCS at Bellevue Community College and KCMU, the University of Washington's perennially maligned beacon of hope. (It's not nice to play alternative rock on campus...it may embarrass the NPR snoots at KUOW.)

Been here, done this.

# 3670. Re: End approaching for "angry white male" talk ra

Newsgroup: rec.radio.broadcasting
Date: 1995-12-13 00:00:00 UTC
From: richwood@commspec.com
Message-ID: <4algk3$p2g@vixen.cso.uiuc.edu>
Source record: 27993

KS>First, the "angry white male" story has been disproven by recent research
KS>widely published nationwide which shows that talk radio audiences are
KS>really quite diverse.

Brian,
Please tell us what that research is. Where can I find it? Who did
the research and what was the methodology?

KS>1. I would define the "conservative" audience as mainstream and for the
KS>most part Rush's audience. This is the largest segment of the talk radio
KS>listening audience by far

Where do you get your figures? While it's certainly the largest
segment of Talk radio, I seriously doubt it's "mainstream" in any
majority sense. Don't forget that Talk Radio listening, while large in
radio terms, is a very small percentage of the total population. We
make a very serious mistake by suggesting that it represents the
beliefs of the total population. Conservatives and Republicans talk of
a "revolution," yet they fail to acknowledge that they won by a small
majority of a tiny fraction of the population. Even a small majority of
a tiny minority of registered voters. Fewer than 18% of registered
voters bothered to vote.

KS>2. Right wing listeners are more focused on the Constitution and the
KS>Second Amendment, among a few other issues (G Gordon Liddy and a few folks
KS>more to the right than him). This is a much smaller portion of the
KS>audience than mainstream conservatives are.

How does the bashing of blacks and other minorities constitute a
"focus on the Constitution?" The focus I hear on political Talk Radio
is that illiterate white males are pissed that blacks get a crack at
the same jobs they feel they should have. In New York, the top rated
Talk station parades a litany of angry white males complaining about
race.

KS>Safeway isn't going to pull advertising just because the programming is
KS>right-wing. They look at the top ten (or less) stations among key female
KS>age groups in each market to make their ad buys. If more women were
KS>listening to KSFO, they'd be buying spots there.

You're not looking at the same information I am. I received a
letter from ABC telling me that 61 major national advertisers demand
that their spots NOT run in Limbaugh, Liddy, Buchanan and any other
Talk show dealing with controversial issues. If you're an ABC, CBS,
NBC, Mutual or other major network affiliate, you have to run your
network inventory outside those shows.

KS>What's really amazing is how many talk stations have GM's and PD's who
KS>know nothing about politics, yet are programming political talk. No wonder
KS>we see these mind-boggling decisions being made at various stations. Look
KS>where the greatest number of people are and target them, unless you're
KS>happy at the bottom of the book.

It's amazing to me how many Talk stations have personalities who know nothing about politics. Their shows are nothing more than monologues of their personal opinions. There's very little attention to accuracy. If you were to take most political Talk shows and apply rigorous academic standards to them, they'd almost all fail. The response to any criticism is: "don't you have anything else to do with your time?"

It's the Alfonse D'Amato approach to debate. When asked by Sam Donaldson why he's dogging Clinton over Whitewater when his own office was investigated over ethical abuses and he insisted on secrecy, he attacked Donaldson as a mouthpiece for the Democratic Party. Rather than answer a question, he attacked.

Until you provide me with the research that proves otherwise, I'll go with my ears and judge Talk Radio by what I hear on the air.

CW>DOes anyone know if WLS radio in Chicago is looking for a new talk-show
CW>host? I heard Denny Schaffer say this morning, on WVKS in Toledo, that
CW>WLS was interested in him. How much truth to this?

The "truth" is probably that he's negotiating a new contract. It's a
time-honored radio trick to get the boss to think someone else is
willing to pay more than he is. It's amazing how employees get these
awesome job offers when it's time to renew.

" Anthony,
" Sorry. No sale. The media is simply the most visible scapegoat.
" While I agree that much of what the media does is irresponsible
" "journalism," it's too simplistic to claim they're the root cause.

Sorry, Rich, but facts do not bear this out. There was the case many years ago when a TV movie showed a girl being raped with a household plunger. The very next day, some kids in San Francisco raped a neighborhood girl with a household plunger. The court established that they *had* watched the movie the prvious evening. Naturally, the court absolved KRON of any liability in the matter.

Several years ago a rash of carjackings happened in San Francisco, about 5 in a matter of 2 or 3 days. Such a storm of carjackings had never happened here before. A couple days previous there had been big news coverage of a carjacking in Chicago, with a virtual how-to explanation.

Several years ago there was a rash of car burglaries -- I seem to remember 9 or 10 in a couple SF neighborhoods. The M.O. was that kids would pour motor oil over a stretch of street and wait for cars to skid out of control. Then they'd jump on the car and break the windshield. Sound familiar? The story had gotten wide coverage a week earlier when it happened in *Miami*.

Scott and J.R. were the first "Zooleaders," as it were. I was there, too - having joined the ranks in mid-July. Professor Johnathan B. Bell and Captain Kevin were retained from WVNJ. (John was director of public affairs at VNJ and continued that job at Z-100; Kevin originally ran our mailroom before his entree via sports - he'd been a hotshot college football player for Pitt.)

Claire Stevens (ex-WZFM) and Ross Brittain (ex-WABC) joined in mid-September, and the first incarnation of the Zoo was complete. Ross left on August 30, 1985; Jack Murphy arrived shortly thereafter. (Shadow Stevens filled in for a few weeks in September, 1985 while Scott was in France and subsequently hospitalized with a kidney stone.)

Ross returned early in 1987 (exact date available upon request), and my last show with the Zoo was on 4/3/87; I left to produce the morning show at WNEW-AM and serve as their assistant program director.

After that, kids, for Z-100 history, you're on your own!

# 3676. NBC's Monitor Radio

Newsgroup: rec.radio.broadcasting
Date: 1995-12-13 00:00:00 UTC
From: "Seifert, Rick" <rseifert@usia.gov>
Message-ID: <4algjh$p1g@vixen.cso.uiuc.edu>
Source record: 27999

I noted a mention of NBC's "Monitor Radio" a few posts back.

For what it's worth, I was one of those that listened to, and therefore, was... "On the Monitor Beacon" ..insert sound effect here<g>.

We used to take family trips (a several hour drive in the car) to visit friends on weekends. Dad always tuned in the "beacon", so we all had to listen (he controlled the car radio....most of the time) :-). No walkmans in those days (early 60's). I'll never forget the likes of Gene Rayburn spinning Herb Alpert's "Tijuana Taxi", or my personal favorite, "A Taste of Honey". Wasn't Bill Cullen a host as well?

Mind you, I was a teen at the time, and this kind of program wasn't exactly what I would have punched up on the car radio. At first, I thought my only hope was that the station would fade out, and a retune would be in order, perhaps with better results. Unfortunately, dad had either WTMJ Milwaukee, or WIBA Madison tuned in, and both had day coverage that wouldn't quit. .But after awhile, I came to enjoy the show, and was actually dissapointed when it folded.

Interesting sidebar: This longterm mobile listening proved to be instructional as well. I learned about the effects of directional antennae, nightime pattern/power changes etc. all thanks to my dad and "monitor radio".

Sorry that there is a feeling radio in Seattle has always sucked. After 27 years in radio, and having worked all around the country, I know that it doesn't. That frame of reference comes from years of association with top quality programmers and managers in multiple formats around the nation. It comes from the days when KING-AM was the unofficial farm station for the RKO radio stations. It comes from the number of Seattle radio personalities that moved on to success in large markets. It comes from the number of calls for tapes of Seattle stations when I was consulting. It comes from the success, early on, of The End - the first huge numbers success in the Alternative format. It comes from the looooong term success of stations like KUBE.

Hey, no market is perfect forever, and radio today in Seattle may not be what it was. But to say radio in Seattle sucks, and always has, is simply uninformed and incorrect.

Does anyone know about Benchmark Communications? They own 4 stations here.They took over WVOC AM about a year ago. This station once enjoyed great ratings, but has plunged to nothing now.(I believe from an 8 share last fall to a 3 in the Summer Arbitron). They replaced the former PD (the one with the 8 share) with some guy who seems to not even know what he's talking about on the air. They fired a lot of their longtime people and changed the programming all around. I also notice they change slogans now about every month.
I bring this up because they also own WCOS and WHKZ here. Both stations did well under former owners , but now seem to have fallen on rough times.

We are in need of a pair of urei Limiters/Universal Audio and would
appreciate if someone could checxk in their Engineering Department
and see if they have a old pair around.
we would accept a pair of LA-4's or LA-3's or a pair of 1176'ln's
if you can search arounf your station and see whats around,we would
send the funds over night to you.

Any help would be appreciated.
Thanks
Wade Winsink

# 3685. 1920's Type "Toy" Desk Mike

Newsgroup: rec.radio.broadcasting
Date: 1995-12-15 00:00:00 UTC
From: steveclby@aol.com
Message-ID: <4ar5a2$stf@vixen.cso.uiuc.edu>
Source record: 27932

Reply-To: steveclby@aol.com (Steve Clby)

For Sale:

Desk type carbon microphone which I believe is a toy due to it's construction. The mic has a round center disk, approx. 2-3/4" dia. suspended by springs within a 5-1/4" dia. outer ring. It's 8" high overall and has a 4-3/8" dia. base. The top of the outer suspension ring is crowned by a plate reading "W-A-R-D" (with hyphens). The mic is all steel with a pressed base. There is a "on-off" switch lever, made of pressed paper, which pertrudes from the base and operates by pushing (2) contacts together in the base. The cord is fabric wrapped with (2) lugs and is fairly long. The mic is in VG condition with some light surface corrosion discoloration. There are (3) springs missing (they look fairly standard hardware item).
$95.00 shipped in the US

Thanks for your consideration,

Steve

# 3687. FM Music Radio in Mono

Newsgroup: rec.radio.broadcasting
Date: 1995-12-15 00:00:00 UTC
From: Rob Landry <umar@cybercom.net>
Message-ID: <4ar5a6$stp@vixen.cso.uiuc.edu>
Source record: 27934

Almost everyone who does FM music does it in stereo.

Even broadcasters whose heavy use of audio processing suggests they are more concerned with loudness than with audio fidelity still broadcast in stereo. Broadcasting a stereo pilot results in a loudness penalty of about 1 dB.

Stereo signals are far more prone to multipath than mono signals. Listeners in stereo incur a noise penalty of approximately 20 dB. The listener can eliminate the noise penalty by switching to mono, but not the multipath sensitivity. And many car radios do not have stereo/mono switches.

What car radios do have, in the other hand, is circuitry that blends the two channels when the signal falls below a threshold. Many listeners in cars really hear mono much of the time even when their stereo lights are on.

My question is this: has it ever occured to an FM music broadcaster to shut off the stereo? Rimshots and stations with poor transmitting locations could dramatically extend their coverage. Stations in markets like San Francisco where the terrain often does horrendous things to FM signals could reduce their multipath problems significantly. And if you go mono you can be 1 dB louder than everyone else in town.

So has anybody out there ever tried mono? What results did you get?

Rob Landry
umar@cybercom.net

[Moderator's Note: If only we could get that little light to come on and still reap the benefits of a mono signal. I think that little light would tell even the most ear-dead listener that the station was not in stereo. What ever happened to FMX, anyway? Bill]

From: heykurtz@aol.com
Message-ID: <4ar5au$suf@vixen.cso.uiuc.edu>
Source record: 27938

Regarding the comments about the '70s format being a "fad"...

We work with a number of stations in the '70s format around the country and firmly believe in its future. Everything in our reseach points to a sizeable appetite for the genres of music that make up the '70s format in most markets. There have been no indications that this appetite is declining.

There have been, however, a number of times when '70s stations have soared in Arbitron after their launch only to see their numbers die pretty quickly. My experience is that most of these stations fail due to poor execution rather than a lack of interest in the format in their markets.

# 3693. Canada ending shortwave broadcasts

Newsgroup: rec.radio.broadcasting
Date: 1995-12-15 00:00:00 UTC
From: Greg Monti <gmonti@npr.org>
Message-ID: <4ar59a$ssh@vixen.cso.uiuc.edu>
Source record: 27940

forwarded from SPJ Pressnotes, 12/14/95
----

CANADA ENDING FOREIGN BROADCASTS
Canada will abandon its Radio Canada International shortwave service next March to save money and concentrate on domestic service, becoming the only member of the Group of Seven major industrialized countries without a shortwave radio service.
"Given our limited resources, we have no choice but to concentrate on our domestic services," CBC President Perrin Beatty in a statement.
Until this year, RCI's $12 million budget was funded by annual grants from Canada's federal government. In February 1995 the federal budget directed the publicly-funded CBC to assume RCI's costs. Beatty is implementing a $165 million cut in the CBC's funding.
The service currently broadcasts a minimum of 232 hours a week in eight languages to North and South America, the Caribbean, Africa, Europe, Asia, Russia and the states of the former Soviet Union.
It also provides 24-hour daily satellite radio service for Canadian Forces in Bosnia, the Golan Heights, Rwanda and Haiti, and NATO bases in Germany, Belgium and the Netherlands.

My GE Superradio III sounds fine on its wide AM bandwidth on
strong stations broadcasting a decent signal. By "fine" I mean
voice and the odd jingle sound as good as they would on a cheap
studio monitor.

The current FCC/NAB regs call for filtering the audio to less
than 10 kHz, so AM will not match a high quality FM signal.
Furthermore, as long as the FCC regards the MW spectrum as a
proper termination for light dimmers et al instead of a
communications medium, AM will be unsuitable for high fidelity
music.

TA> ABC's own experience proves it...their AMs tend to be
TA>well programmed and well promoted, and as a result do
TA>well. Their FMs (except for WPLJ, KSCS and their Minne-
TA>apolis and Atlanta stations) have not been as strong

Bob,
WPLJ's FM signal is so heavily processed that it can't be argued
that FM is "better." It sounds only slightly different from an AM
that's processed, yet clean. Put a spectrum anaylzer on it and you'll
find nearly AM audio bandwidth. Put a VU meter on it and you'll find it
looks like a voltmeter. It's a terribly fatiguing station to listen to.

# 3696. Re: Arbitron Numbers... How to read?

Newsgroup: rec.radio.broadcasting
Date: 1995-12-15 00:00:00 UTC
From: heykurtz@aol.com
Message-ID: <4ar59e$sso@vixen.cso.uiuc.edu>
Source record: 27943

Regarding...

"How do you read the numbers in the Arbs?

Does a station that get a "6" have twice as many listeners as a station
that has a "3"?

I've heard there are breakdowns by shift. Are the overall ratings
factored so that a station that might have a high morning drive
rating be offset by a station that has a high mid-day rating?"

---
---

It depends on which numbers you're looking at. The two primary numbers
you will see throughout the report address rating and share. Ratings are
reported as a percentage of the population for the demographic and market
you are looking at, while shares are reported as a percentage of those
members of the demographic in the market that are listening to the radio.

Since you virtually never see ratings as high as a "6," I assume you are
talking about shares. The answer to your first question is "yes," it can
generally be assumed that a station with a 6 share has twice as large of
an audience as a station with a 3 share, as long as these numbers apply to
the same market and demographic group.

You are also correct that there are breakdowns by shift. In fact, through
computer applications, you can get breakouts for virtually any time period
you can come up with (even down to 15 minute segments of time).

Prior to my current job, I spent a year and a half with AccuRatings and
six years with Arbitron, so I would be happy to answer anyone's questions
about ratings or other forms of radio research. Feel free to send me an
EMail.

Hi,

I have recently moved to the San Francisco Bay Area from Australia.
For nearly 15 years I listened to American Top 40, first hosted by Casey
Kasem, then with Shadoe Stevens. Ironically, since coming to the U.S. I
have been unable to find the show. Is it still being produced, and if so,
where and when can I listen to it in the Bay Area?

Thanks.

Joe

> Does a station that get a "6" have twice as many listeners as a station
> that has a "3"?

Yes and no. The Arbitron numbers published in newspapers are "average quarter-hour shares." They measure the number of different people who sample a station during an average 15 minutes. This number is then divided by the number of people who use radio during an average 15 minute period to produce the station's share. A 6 share means that during an average 15 minute period 6% of the people using radio sample the station.

Average quarter-hour audience can also be expressed as a "rating", that is, the average quarter-hour audience of a station divided by the population of the market. Ratings are always lower than shares because not everybody in the market uses radio in an average quarter-hour.

So if station A has a 3 share and station B a 6 share, then during an average 15 minute period twice as many people sample station B as A.

But the total number of different people who sample station A in a week may actually be larger than the number who sample B. This measurement is called the "weekly cumulative audience" or "cume persons".

If station A had a higher weekly cume audience than station B, but B had twice the average quarter-hour share as A, that would mean that while more people sample A in a week they don't stay tuned very long, whereas people who sample B tend to stay tuned longer.

> I've heard there are breakdowns by shift. Are the overall ratings
> factored so that a station that might have a high morning drive
> rating be offset by a station that has a high mid-day rating?

Advertisers who use ratings to buy a station may be interested in different dayparts. Some only advertise in morning drive (6 - 10 am). These folks may not care what the overall ratings of a station are-- they may only look at the morning drive ratings. Furthermore, an advertiser will probably be more interested in the ratings for a particular dempgraphic group (e.g. men 25 - 54 years of age). If the number one station in town is a CHR station appealing mostly to teens and 18 - 34's he might not use it if he's trying to reach an older audience.

>rock.)
CKLW was switched with CKWW when CHUM purchased it - the "Canadian format" station is just CKWW on a different frequency; CKLW at 580 is running the same big band that 800 had on before the acquisition. The Canadian station was there all along, it just moved up the dial (and up the transmitter power).

The classic rock FM is now a AAA, "The River", which is at last over a 1 in Detroit.

And none of the other two music stations are over 2 in the U.S. market - hardly the equal of the old CKLW.

>Those of you with cable TV systems that suck have a pretty good idea of
>radio in the Seattle area. 57 channels and nothing on.

(lot's of stuff deleted also)

I think I have to agree with the comments regarding news - and the same goes for the local TV stations, too. If you listen to the news here, you get the feeling that nothing exists in the world outside of Seattle, unless the cops were busy in Tacoma or the U.S. Military is busy again. This phenomenon may not be unique to Seattle though.

I have to completely disagree regarding music. The music on the air in Seattle is superb, at least in the rock realm. Every kind I can think of is covered: hard rock, "new/modern/alternative" rock, classic rock, soft rock, 60's oldies, 70's oldies, "adult alternative" rock, hot adult contemporary, R&B/urban top 40, 70's disco (5 hrs/wk), and dance, oh and "favorites of all time". Perhaps if you are listening for something other than rock music, there is no more room?

UM>and still reap the benefits of a mono signal. I think that little
UM>light would tell even the most ear-dead listener that the station was
UM>not in stereo. What ever happened to FMX, anyway? Bill]

Bill,
It was tried. C-Quam had such a terrible time with interference
that early receivers actually had a delay in the light circuit that
would keep it lit even when there was no stereo signal. The radio went
to mono, yet the light remained lit for a while in hopes the stereo
would return.

# 3707. Mid-America Radio Watch (15-Dec-1995)

Newsgroup: rec.radio.broadcasting
Date: 1995-12-17 00:00:00 UTC
From: transvox@crl.com
Message-ID: <4b0hdo$dr8@vixen.cso.uiuc.edu>
Source record: 27807

Mildly beleaguered talker KCMO(AM) now faces the task of finding a new afternoon host.

No one is saying much, but what *is* known is that Rick Roberts has resigned from the station. General manager Ron Carter isn't telling the media much else, saying it's a station personnel matter.

Carter told the Kansas City _Star_ that the station will try out various fill-in hosts and producers while the search for Roberts' replacement proceeds.

_Star_ entertainment writer Brian McTavish, who writes the newspaper's weekly radio column, reported hearing Roberts' last show on Monday (December 11), during which, according to McTavish, "I heard Roberts performing what sounded like a mocking impersonation of [Mike] Murphy, KCMO's affable morning host and a local radio icon."

Tavish also relayed another listener's report that same day claiming that Roberts responded to a caller who had asked, "Is this hate radio?" by replying, "Kiss my ass" just before he hung up.

---

At best, KCMO still is muddling along. "50,000 Watts and Still Nothin's On" could be one of its liners.

To be sure, Bonneville has a difficult task with KCMO: it's decided to concentrate news, political talk, and sports on duopoly partner KMBZ(AM). With other AM competitors nibbling off bits and pieces of the remaining news/talk and talk audience, what's left for KCMO to do? Bonneville's been trying "Talk Radio with Attitude", but that just doesn't seem to fit with the sober, responsible image the Bonneville organization projects.

It takes a long time to develop a personality-driven talk station: Mike Murphy, Jack Carney at KMOX, and similar "icons" in other cities just don't sprout up overnight. The revolving doors that seem to have been installed at the KCMO studios aren't helping matters.

Bonneville deserves credit for trying to build a locally programmed radio station, but it's going to have to be more patient about it and focus toward a style of programming that is more consistent with its expertise and corporate culture.

****

The owner of news/talker KNHN(AM), Bill Johnson, is profiled in this month's _Kansas City Small Business Monthly_. Johnson bought the former KFKF(AM) in 1990, initially programming CNN Headline News around the clock.

Former KCMO morning talkers Mike Shanin and Jerry Fogel landed at the station, kicking off a transition to its present news/talk format with a conservative slant.

Johnson described his biggest initial challenge as money: he told the magazine that it took three years before "it was starting to annually perform on a positive basis."

While KNHN shows up with low 12+ and 25-54 ratings, Johnson markets the

station at a "business-to-business" clientele.
Johnson, though, said it's not all about money: "If an entrepreneur is going into business just for fiscal success, I would suggest he revisit his objectives. If he's not passionate about the industry he's getting into, and willing to live that passion 24 hours a day, he probably would be better served working for someone else."
According to my research, next year marks KNHN's 70th anniversary. KNHN is among a handful of locally owned stations.
****
A TV note: KSMO-TV, channel 62, is being sold to Sinclair Broadcasting of Baltimore. Sinclair had an option to buy the station from ABRY Partners for $18 million.
General manager Jim McDonald, who does not expect to remain with the station, told the Kansas City _Star_ that he estimates the station's value at $60 million. Under McDonald's tenure, the station increased its power, snared Kansas City Royals telecasts, and picked up a UPN affiliation.
****
Into File 13: the FCC has deleted the license of KLRK(FM) in Vandalia, Missouri, about halfway between Columbia and Hannibal. KLRK was only on the air briefly after it was created as another of the 80-90 drop-ins that infest Mid-America.
KLRK, at 100.1 MHz, was in bankruptcy. However, expect the allocation to be reopened and applications to be filed. It's happening in Macon with the allocation at 99.9 MHz.
---
And more allocations are being created: I saw one this week for Dixon, Missouri, sorta-kinda in the middle of nowhere between Fort Leonard Wood and Jefferson City. I know the town well: my aunt and uncle used to own the funeral home in Dixon. And there is no way on earth that Dixon, with all of about a thousand people who drive to Waynesville or Rolla to do most of their shopping, is going to support any radio station.
****
Web pages at more stations: KPNT(FM) in the St. Louis market has finished up its pages at http://www.kpnt.com/105.7/ and KLZR(FM) in Lawrence, sort of a KC rimshot, has announced plans to build a Web site.

Source record: 27808

Here's the latest from Southern California! David Alpern Los Angeles, and Chris Carmichael, San Diego.

San Diego <--- questions? SDRadio@sd.zNet.com

The Power of Local, Live Radio.

Two events happened in San Diego this week that benefitted many under-privleged. What apparently started out as a passing comment on KKLQ's number one rated morning show of Jeff & Jer to get 500 bicycles for local children, turned into a mini-festival carnival.

The team, in conjunction with KGTV Ch. 10, wanted to get bicycles to needy children. As the events unfolded, Jeff & Jer ended up staying in a wooden shack -- surrounded by 80-tons of snow -- for nearly 24-hours. As indicated, their goal was only to raise 500 bicycles.

As it turned out, the momentum gathered, and a ground swell occured. With the team in the "Bicycle Mountain" shack, and giving live reports on KKLQ A/F, and live TV shots on the ABC station, San Diego hearts melted.

At press time, over 1,900 completly assembled bicycles will be distrubuted to children in San Diego county.

Meanwhile, the Power of Radio will fill the cupboards of the needy in San Diego. KFMB AM/FM and TV co-sponsored a food drive with local grocery stores and other points of interest. Non-pershible food, or cold cash made its way to the KFMB studios today. In all over ten TONS of food was gathered! Challenges went out, and the final by Jeff Prescott and Mike Burger capped the event with trailors of food being dropped off at the studios in Kearny Mesa.

This is not the only time that I've witnessed the "Power of Local Radio." Roger Hedgecock of KSDO has raised considerable sums with "illegal" car washes and other organized events.

The point: Three stations serving three different audience have the POWER to DRIVE listeners to do something.

I congratulate all three stations for this. The next time someone says to me that radio is a vast wasteland, I'll pull up this post and show them the press clippings. [KKLQ 106.5 San Diego; KFMB 760, 100.7, US-TV 8; KSDO 1130, KGTV US-TV 10]

MOVES: Mark Jagger's last day at soon-to-be-sold KCBQ-FM was today, In January, he moves to KFMB-FM [100.7, "Star FM."] As the paper-work gets processed in Washington, Compass' station personel whittle down in numbers. Mark's noontime gig at KCBQ was a popular feast -- as he held a "57-LUNCH" all fax request. You can still visit his KCBQ web page. Start at http://www.kcbq.com .

As reported earlier this week, KKBH is "in discussion" on where to go next. Insiders at the station tell me that "format changes" are still being discussed, and changes will happen. Apparently Gannett, the owner, was caught by surprise by this reporters posting to the Internet.

RADIO WAVES:
The "San Diego Tribune" reported that San Diego-based Triathlon is continuing a buying spree with two additional Nebraska stations. This on the heels of acquiring ten stations in the Colorado and Washington state areas. The company already holds stations in the front range of Colorado and Wichita, Kansas.

The firm, formed last June, is a financial partnership betwen Force Two Communications, and Silverman Cox. Norman Feuer is president and chief executive officer.

FULL STEAM AHEAD AT KCBQ:

KCBQ-AM ended the football season with the high school final at Jack Murphy stadium. Now, announcer Jim Klapthor will continue with the high school basketball games. First one starts Monday with the game from San Dieguito HS playing Costa Mesa with a 7:15 PM tip-off. KCBQ-AM is carrying SDSU Women's basketball games from Peterson gym at SDSU First game is this Saturday at 3:55PM playing Long Beach State. The sports maddness never stops!!!

Overheard:
"We're building a business plan that says no federal monies after 1988." -- Doug Myrland, KPBS general manager [non-commercial]

"This is amazing!" Jeff and Jer of KKLQ after the goal of 500 bicycles was tripled.

"It's difficult to thing about dropping call letters that have been a San Diego tradition for so many years." Steve Jacobs of Par Broadcasting in discussing plans of the buying of KCBQ A/F.

LA RADIO......The little guys PART II:

Sure we hear lots about the big guys: the KROQ's, ARROW's, and KLOS's, but with over 80 signals eminating from within a fifty mile radius of downtown, there are a plethora of smaller signals which receive almost no press. This week, let's site a few.

KMNY - 1600 AM (Pomona) is a little guy trying to compete with the bigger talk radio stations by using a niche marketing strategy - BUSINESS TALK. This station has a poor signal which is

marginal at best on the Westside of Los Angeles. If my advise was requested...I'd suggest focusing more on corporate issues, such as the current M&A wave and less on stock market stocks. The present format appeals only to the most diehard stock quote hunters, which despite being a vast audience, is the type of information which is more appropriate for a print medium.

KCRW - 89.9 FM (Santa Monica) is a big little guy. Little by definition, only because it does not attain much more than a 1.5 share of the local radio audience. But KCRW is a powerhouse NPR, and PRI station. The original LA home of the AAA format, KCRW showcases what really good college radio should sound like. KCRW is also the flagship for NPR's JEWISH SHORT STORIES FROM EASTERN EUROPE AND BEYOND, and will be presenting a string of Hanukkah themed programming. KCRW on the WWW is found at -- http://www.kcrw.org/m.html

KLON - 88.1 FM (Long Beach) is LA's only JAZZ outlet, and is Non-Commercial!! While commercial attempts at the format have failed (aside from The Wave (KTWV - not truely Jazz) KLON has consistently programmed to the area, and via cable radio, to the nation, all of the Jazz standards. A power upgrade some four years ago has helped the station gain listeners in the San Fernando Valley.

>The current FCC/NAB regs call for filtering the audio to less
>than 10 kHz, so AM will not match a high quality FM signal.

It's 10kHZ, not _less than_ 10 khz, but the key words are "high quality," and there are not a lot of those around in any case.

As the owner of both a Carver TX11a at home and a Delco/Bose Gold Series stereo in the car, I can assure you that a high quality AM stereo signal is quite listenable, although it will not satisfy the critical hi-fi listener. (Nor will most FM signals, to be honest about it).

But most people are not critical hi-fi listeners. Even those who are (such as yours truly), are not listening critically all the time. When guests come to my house, I like to put KCWR on the Carver and ask them what they think they're listening to. Without exception they guess it's KUZZ-FM, unless they hear a break. They are always quite surprised to find out they're hearing AM.

Bottom line, receivers are the problem.

From: sborre@asc.upenn.edu
Message-ID: <4b0he4$drr@vixen.cso.uiuc.edu>
Source record: 27811

Today's Philadelphia Inquirer reports that Roy Shapiro, g.m.
of all-news KYW-AM 1060, has assumed control
over sport talk WGMP-AM 1210. This is the result of
the recent merger of Group W with CBS.

Despite having a 50 KW signal (day and night), the GAME has
never found an audience. The article speculates that a
format change is in the works to bring the programming more
in line with KYW's market leading performance. Possible new
formats include news/talk or a version of news
that would feature longer news stories than KYW. For many
years, 1210 AM was known as the home of WCAU.

> Does a station that get a "6" have twice as many listeners as a station
> that has a "3"?

If we're talking shares (as in AQH, or average quarter hour shares), not exactly. A station with a 6 share has 6 percent of all listening for the demographic over the time period. All listening together totals 100%.

But listeners are different than listening. Listeners are surveyed as "cumes."

A station can be number 3 in shares and #1 in cumes, because over a given week more people tune in and listen.

I could go a lot farther, but a LOT of qualifications are involved.

Benchmark Commucications hit Delmarva some time ago - it bought WDSD/WDOV in Dover, DE, and followed a similar pattern of firing/replacing. Didn't change the format much, and those stations had a strong following prior to purchase, so they're doing o.k.

Benchmark also bought Delmarva stations WKHI and Froggy 99; no great change in format or following, but again, fairly extensive personnel changes.

Seems to be a pattern.

From: golfstick@aol.com
Message-ID: <4b0hdu$dri@vixen.cso.uiuc.edu>
Source record: 27817

I'm hoping some of you out there can help me. I am looking to break into broadcasting after working a few years in an unrelated field and I don't know how I should go about this. I've looked around and there seems to be three options open to me.

First, I could go back to school and get a degree in broadcasting. This path offers the chance to get air time at the school's station, but requires a large amount of time. I already have a B.A., and I really don't want another.

Second, I could try a trade school. There is a school for radio and television near where I live called The Academy of Radio and Television that offers a course of study in radio announcing/production. The course is relatively short (less than a year), but costs nearly $8,000. I attended an open house at the school, and the people there do seem to know what they're doing. But I have never heard of the school before. What kind of reputation do they have, and can I get a job after attending the school? Would the cost be worth it? Has anyone out there attended this school?

Third, I could send resumes out to the radio stations in my area. I can visit the close stations and drop off a resume and cover letter, and mail these to stations out of town (for the right opportunity I can relocate). But I would like to know if stations actually hire people who walk in off the street. I've read that announcers should have a tape. I have never worked in radio before, so can I do without one?
Also, could I somehow work as an intern even though I am not in school?

Please E-mail or post here if you have any thoughts.

Thanks

# 3718. Re: classical music

Newsgroup: rec.radio.broadcasting
Date: 1995-12-17 00:00:00 UTC
From: Rob Landry <umar@cybercom.net>
Message-ID: <4b0hdv$drk@vixen.cso.uiuc.edu>
Source record: 27818

What matters more today is how radio listeners want to hear classical music, rather than how Beethoven and Mozart wanted it heard. Beethoven and Mozart wrote their music to be experienced in live performance. They never imagined it coming out of small black boxes in people's homes, businesses or vehicles.

They certainly never intended it to be used as an accompaniment to work or play.

By John Ross's logic radio stations shouldn't play classical music at all.

Probably 99% of radio broadcasters in the country would agree, by the way. They see no money in classical, so they don't play any.

WCRB has seen a spectacular growth in its audience since we started making the music mix conform more to what we percieve as our listeners' needs. We're number eight in the market 12+ according to the latest Arbitrends. WCRB is almost fifty years old, but until this year we had never been in the top ten.

If Mr. Ross feels classical music deserves to be heard, he should applaud our efforts and those of WBOQ on the North Shore. We've introduced hundreds of thousands of people to classical music over the past fifty years.

We're not an educational institution, nor are we an art museum. We are a commercial enterprise whose first priority is to attract enough listeners to keep our advertisers happy and insure our survival. When listeners want something beyond what we offer, they can go to WHRB, which is programmed for a more sophisticated audience and offers a wider, more challenging spectrum of music.

WHRB is also a station I'm proud to have been associated with for the past twenty years, by the way.

Lastly, Rodney Flora, WCRB's music director, tells me it was not unusual in Mozart's day to hear single movements of music in concert.

Peace!

Hmm...had some pretty damn good stations when *I* worked there! And today
you have NAC (KWJZ, formerly KEZX), AAA (KMTT), Alternative (KNDD), AOR
(KISW), Classic Rock (KZOK), CHR/R (KUBE), 50s/60s (KBSG), 70s (KJR-FM),
Hot AC (KPLZ), Mainstream AC (KLSY), Soft AC (KRWM), lots of Country
(KMPS, KYCW, and KCIN [formerly KRPM]), Contemporary Christian (KCMS), and
the aforementioned FM Talk (KIRO-FM/The Buzz)! What are you missing?
(Oops, forgot to throw in Classical [KING-FM]) Urban? Well, KUBE kind-of
covers that territory. Plenty of Talk on AM.

What is it that you're missing??

Say Rich (and this isn't just a personal message, but a solicitation of opinion as well)...
Your organization (WOR) does very nicely programming a varied mix of talk...
I look at you, and at stations like KABC or KGO, and wonder this...even independent of ratings, do broader-based, less politically typecast talkers do better FINANCIALLY and attract more advertiser support than the partisan ones? It kind of looks that way...

Bob Smith, middays WXXI-AM 1370 Rochester NY

## 3725. CKLW and "Monitoring Times"

Didn't the Shadoe Stevens version of AT40 go out of production sometime around the beginning of 1995? Seems to me he went off to spend most of his time on the sitcom "Dave's World" as Harry Anderson's co-star (CBS-TV, Wednesday night). The producers at ABC/Watermark (losing stations to Casey Kasem's rival Westwood One show based on the Radio and Records chart) decided not to find another host and try to restart the show a second time, although they still have rights to the name and concept and may take another shot at it sometime in the future. Don't know where Casey is in your area, but he now does at least two versions of his countdown every week. One is for AC stations and another one for CHR format stations, based on different format charts from Radio and Records magazine. The two shows are significantly different both in the records charted and in Casey's breaks. Sometimes only one of them will be heard in a market. AT40 was based on Billboard's Hot 100, of course...I don't know if Rick Dees' rival Weekly Top 40 show (which is what we get in the Rochester market) is using that chart now or something else. Anyway, to make my long story short, Shadoe Stevens is on TV, Casey is still doing his countdown shows, and Rick Dees is now his main CHR competition in the national countdown business. Now another question...is anyone else doing a national CHR countdown? I've heard some in country, alternative, urban contemporary and even classical formats. In CHR is it just Kasem vs. Dees these days?

> the non-commercial stations I might want to take listeners from.
> Nor does it suggest which non-listeners I might be able to attract.

Arbitron date is most useful to me as a measuring stick for what I've done
over the past several months. It can tell me - roughly - how well my
attempts at bringing in new non-listeners did, how well my attempt at
stealing listeners from competitors did, and vice-versa. Of course, it's
all after the fact - but it's helpful in determining the success of your
efforts.

Also, it gives you another view of things. I might not believe a
competitor's idea will work, but my point of view is not the only one.
Arbs are the easiest way of getting a 'big picture' view of something.

That said, I'm frustrated with Arbitron's ineffeciency. Sample size is
too small. Diary placement is questionable too often. And the
reliability of responses is hard to gauge (making it almost impossible to
know if it's your programming or advertising that's giving you the
ratings). But each programmer and manager will take all that into effect
in making their decisions. I don't think anybody really lives or dies by
Arbitron - if they do, they're going to be short lived - but it is a tool
at our disposal.

>and DO attract a cross-border audience. (The AM on 580 is
>big band; the FMs are, respectively, new rock and 70s classic
>rock.)
CKLW was switched with CKWW when CHUM purchased it - the "Canadian format"
station is just CKWW on a different frequency; CKLW at 580 is running the same
big band that 800 had on before the acquisition. The Canadian station was
there all along, it just moved up the dial (and up the transmitter power).

The classic rock FM is now a AAA, "The River", which is at last over a 1 in
Detroit.

And none of the other two music stations are over 2 in the U.S. market -
hardly the equal of the old CKLW.

A couple of postings here indicated that the FM 97.9 in New york at one time had the call letters WPOW. Although I'm not positive, I do not think this is so. In the late 40's I believe the 97.9 frequency was occupied by WGYN, which was owned by Muzak. This was before the days of SCAs and, if memory serves, Muzak used the station to transmit background music over the air. A second station in New York also transmitted background music: WGHF at 101.9. WGHF transmitted audible tones that were used to mute special receivers every 15 minutes so that the station could broadcast commercials to the listeners who weren't paying for the background music service.

In those days, there was no WPOW. AM 1330 was home to three stations that shared time: WEVD New York. owned by the Jewish Daily "Forward;" WBBR Brooklyn, owned by the Watchtower Bible and Tract Society (the Jehovah's Witnesses--this station is totally unrelated to the current WBBR on AM 1130); and WHAZ, Troy, 150 miles to the north, owned by Rensselaer Polytechnic Institute (RPI--my alma mater). Earlier on, I believe that WBBR had been a daytimer--but still part of the three-way time-sharing arrangement, which probably began with NARBA, the North American Regional Broadcast Agreement that switched the frequencies of most AMs in 1941.

WHAZ was licensed to operate from 6:00 PM Monday until 3:00 AM Tuesday, a grand total of nine hours per week. But the station operated only six hours a week, signing off at midnight on Mondays. WBBR operated Mondays

through Saturdays from 3:00 AM to 8:00 AM, Sundays from 3:00 AM to 11:00 AM, Tuesdays through Fridays from 5:00 PM to 8:00 PM, and Sundays from 3:00 PM to 8:00 PM. WEVD operated Mondays from 8:00 AM to 6:00 PM, Tuesdays through Fridays from 8:00 AM to 5:00 PM and 8:00 PM to 3:00 AM, Saturdays from 8:00 AM to 3:00 AM, and Sundays from 11:00 AM to 3:00 PM and 8:00 PM to 3:00 AM. I think if you construct a table you'll see that I haven't got two stations on the air at the same time.

WEVD and WBBR maintained separate transmitter sites. WEVD's was in Maspeth Queens; WBBR's was originally in Brooklyn in a large complex owned by Watchtower. The WBBR transmitter eventually was moved to Staten Island. When it operated from Maspeth, WEVD was a DA-2. I think WBBR was ND from Brooklyn and DA-1 from Staten Island.

At some point, WGYN (FM) went silent and WEVD applied for and was awarded the 97.9 frequency. WEVD-FM originally simulcast WEVD (AM) when the AM was operating and eventually began originating its own programming to fill the hours when WEVD was off the air so WBBR and WHAZ could operate.

At some point (again I don't know when but I believe it was after I graduated from RPI in 1956), Watchtower sold WBBR. The new owners changed the calls to WPOW. Subsequently WEVD gave up its separate transmitter site in Queens and began transmitting from WPOW's site in Staten Island. I think that took place around 1976 or 1977.

Prior to that, the owners of WPOW acquired WHAZ from RPI and removed it from the time-sharing arrrangement by converting it to a daytimer. I believe that after that, WPOW acquired WEVD (AM), making WPOW a full-time station. Forward continued to own WEVD-FM.

Again I'm not sure of the date but as part of a complex three-way swap, the owners of (then) WSKQ (AM 620 Newark, now WXLX) acquired the FM 97.9 frequency from Forward, which got cash and AM 1050, the current home of WEVD (AM). Immediately prior to that, 1050 had been occupied by Emmis Broadcasting's WFAN, which moved to AM 660, previously the home of WNBC (AM), which disappeared. Apparently there were problems with the AM 1050 directional array and those problems delayed the transfer of 1050 to Forward. Duopoplies were not permitted at that time and WSKQ's owners (Spanish Broadcasting?) received an STA to operate AM 620 and AM 1050 simultaneously. Forward hung onto 97.9 until the problems were resolved.

Thus, as far as I know, FM 97.9 in New York has had only three sets of calls, WGYN, WEVD-FM, and WSKQ-FM. Unless I am mistaken, the WPOW calls appeared in the New York area only on AM 1330, from the time Watchtower sold WBBR until WPOW was sold and the new owners changed the calls. The current calls of AM 1330 in New York are WWRV (I think) and the owner is Radio Christiana, but before Salem Communications acquired WMCA, Salem owned AM 1330, and the calls were WNYM.

Have I cleared anything up, or have I just confused everyone even more?

"Different strokes for different folks." Personally, I'm more of an Imus fan. Granted, he and Stern have had numerous exchanges, but at least, when confronted point blank on ABC's Primetime Live a few years ago about his prior promise to "eat a dog's dick" (_his_ words) if Stern ever beat him in the ratings, Imus was asked something to the effect of, "well, what about _that_?" To which Imus replied, "well, you know, it really didn't taste all that bad!" :-)

Best,

todd

I remember Ross coming to Philadelphia around Sept. 1985 to put together
his own morning show at WZGO-Z106. (Brittain for Breakfast!! I still have
the T-shirt) He lasted for a short period when the station changed to WTRK
(Electric 106) and Mike Joseph did something akin to 'HOT HITS'.After a
few months into the new format Brittain was out and returned to NYC.

Rob Landry <umar@cybercom.net> writes:

>Almost everyone who does FM music does it in stereo.

Following is a question regarding whether there are any FM music b'casters sending out a mono signal.

I have heard only two lately. One is WLNG in Sag Harbor, NY. They do an oldies format, lot o' jingles, and have some interesting personalities. Their signal is great in places along the Atlantic coast, and I've gotten them regularly in Danbury, CT. I have wondered if that kind of signal travel (it "skips" to Danbury) is in part due to the lack of the stereo subcarrier...?

The other one was a radio station in Vilnius, Lithuania that had some English language programming. Among the several stations I could get there, that was the only not in stereo. I remember wondering at the time whether they *had* a stereo transmitter, or whether it was a purposeful non-use of stereo.

Here in the Boston area, WBUR turns the stereo on for music, and switches it off for the talk...

Regards,
Alan

I guess just about every engineer above a certain age had the experience of hooking a 19k audio generator to the board, back in the days when stereo was just hitting the market, to turn on the stereo light.

I turned it on one boring night at a 5kw mono station. Started getting calls about how much better we sounded with our new transmitter!

I work p/t for an FM radio station. Several months ago, a piece of our processing gear started failing, and caused a severe level drop when we were in stereo. After a time, it was decided that we kill the stereo pilot and go mono.

FIrst of all, the overall sound level did NOT get louder. We were still at about average level that we normally were in stereo.

Secondly... the music sounded horrible.

If one wants to try boosting FM signal strength by going mono, in my opinion it's not worth it.

Also, I disagree strongly that car radio's that show the "stereo" light are really bringing in a mono sound. All the car FM radio's I have heard are indeed true stereo. (all being only three, however...) <smile>

There's another station in my area that kills the stereo carrier when they go into talk show format, but switch back to stereo when the music returns. Sure it was nice to have the noise go away when they went in mono for talking. But on occasion they forget to switch back to stereo when the music returns. It's not any better than the station I work for was when we were in mono.

Leave the stereo on when doing music... The music will typically mute out the noise in most cases.

>you go mono you can be 1 dB louder than everyone else in town.

>So has anybody out there ever tried mono? What results did you get?

Most of the low power college and community stations stuck with mono
for many years while everyone else was stereo. Some stations also followed
the FCC rule prohibiting a stereo pilot unless stereo information was being
transmitted more literally than others; KPFA would switch to mono for all
spoken word programs, with great benefits to people in the fringe
reception areas. The loudness penalty for stereo is rather more than 1 dB
... if you count the multipath sensitivity, and the stereo subcarrier
itself in addition to the pilot. Also, if you broadcast in mono you
needn't pass the audio through a brick wall filter above 15 kHz.

>not in stereo. What ever happened to FMX, anyway? Bill]

Uh, you can, and (looks at calendar, it's been 7 years) some of us did
that for quite a while -- just a little bit of 19 kHz will unmute the
stereo-only receivers and turn everybody's little light on...

Yes, it's a great idea to put together a tape. Before you do it ask
yourself these questions. Who am I aiming this tape to, what is, in my
estimation, the best work I've done, and how will I respond to what
returns from this endeavour?

>From what I can see your extremly skilled, more skilled than I, but if

I don't buy this at all. Newscasts aren't filled with crooks getting away, they're filled with crooks getting busted. We don't have a show called "Crooks," it's "Cops." We've never had a television series about cat burglers, serial murderers or even gang members. We've had more television series about law enforcement than nearly anything else! The incarceration vs slap-on-the-wrist arguement lies wholey in the American judicial system, and the media has repeatedly pointed that out.

Emulate? No. Respond to? Yes. Perhaps even incorporate some aspects
_they view as positive_ into their own character. We need responsible
parents, though, to help children define what is positive.

>And speaking of advertising, why do we, in the media, make such great
>claims as to the power of our media to motivate buyers to purchase
>products, most of which are non-essential, and then deny that we have
>an equally compelling effect with our programming? I realize that it
>is TV/video media that is the main player, and this is a radio group,
>but it always amazes me how hypocritical we are in this regard.

I think that's taking it out of perspective. Advertising and programming
are entirely different. Advertising aims to direct a purchase which will
be made, regardless. We want them to purchase a particular brand when
they make that purchase. We want them to visit a particular store when
they are ready to make that purchase. Advertising is meant to influence
an existing behaviour. (When was the last time you saw/heard an ad for a
truly _new_ product?)

Programming _should_ be about entertaining and informing. All we can do
is expose information and ideas. The viewers/listeners need to decide
whether it is positive or negative (certainly there are some things that
are obviously negative and obviously positive, but that's another
arguement) and that's where a responsible upbringing is needed: to make
that judgement call and incorporate that which we view as positive into
our own character. (Here's an example: I saw a movie where Paul Newman's
character was always chewing on a toothbrush. I don't recall why he did
that, but I thought it was cool. I walked around with a toothbrush
sticking out of my mouth for months. And look, ma...no cavities!)

Yeah, I know...it's a real grey area and many good arguements can and are
being made both ways. Yes, we can influence behaviour. Still, I do not
believe the media can be held as responsible for the deterioration of
American society as many want us to believe. Especially when we keep
hearing about how cynical society has become and how they don't believe

anything the see on TV anymore. (Who's being hippocritical?)

But at the risk of furthering a thread that seems to be more video/tv oriented than radio, what is the difference? Of course the viewer will see any behavior (s)he chooses to emulate/incorporate as positive. As kids, we all thought the Three Stooges were a riot. So we (and lots of other kids) did a lot of emulation of Moe, who was the dominant character, and we got hurt a lot :-).

} We need responsible
} parents, though, to help children define what is positive.

1000% agreement on the parenting issue, Bob.

} are entirely different.

Really? Tell that to the creators of Barney, Power Rangers et-al. There is an ever decreasing line between the ad and the programs and a lot of tie ins. Whether that furthers the argument of media's responsibility (etc) is another matter to debate, but to say that there is such a difference, at least in kids programming/ads, is a pretty specious argument, IMHO.

} Programming _should_ be about entertaining and informing.

No argument there. Radio or TV.

} (Here's an example: I saw a movie where Paul Newman's
} character was always chewing on a toothbrush. I don't recall why he did

} being made both ways. Yes, we can influence behaviour. Still, I do not
} believe the media can be held as responsible for the deterioration of
} American society as many want us to believe.

You are correct that it is a never ending cycle. And I agree 100%
that media cannot be held 'responsible', but to claim that it is not a
major (and ever increasing) factor in the overall demeanor of a society
that depends more and more on some form of electronic media for its
world/nation/community view, is naive at best and borderline deceptive
at worst.

Political advertising/media is a *prime* example. It has come to the
point where National elections are (all but) *totally* decided upon
who has the most manipulative commercials and sound bytes. Who is the
meanest and slings the most mud. We do not decide who our leaders are
going to be by what the person has to offer, but by our fear (100%
media induced) about who the lesser of the two (or more) evils are.
This is sad, and it is a testimony as to why less than 20% (I think it
was 18%) of the registered voters voted in the last election (you
know, the big Republican Revolution). But that is another thread
<grin>.

} hearing about how cynical society has become and how they don't believe
} anything the see on TV anymore. (Who's being hippocritical?)

But they still watch and are still influenced. Most Americans don't
even know their neighbors, let alone those a block away. Most
Americans are terrified of anyone they might meet.. This is one area
where the fear-inducing newscasts are a factor.. We are so convinced
that a rapist is behind every door that we stay in and (guess what)
consume more media.... As long as people are afraid of each other,
media (especially TV) thrives. After all, in the world of media, we
can always turn it off. In the real world (or the vision of the world
that we learn over the media) the streets are just filled with
muggers, dope addicts, rapists and robbers. I think *here* is where
the *real* responsibility lies. The media is not so much responsible
for crime growth as it is responsible for fear growth.

>
>
>>>>
In 1982 I think WJJZ was calling it WWSH-Wish 106 and had recently moved from BM to Soft AC.

Shortly afterwards , it changed to:

1983-WWSH-The Top FM 106 (The Bobby Rich era)-"The one at the top of the dial...FM106"
1984-WZGO- Z106 - All Hit Music
1985-WTRK- Electric 106 (Mike Joseph tried to make that Hot Hits lightning strik twice)
1986-WEGX- Eagle 106

Also in 1982 in Philadelphia
WUSL dropped Country and went Churban as "KISS 99FM", using the slogan " Philadelphia's KISS 99FM",
until a judge ordered WUSL to "Kiss Off" and stop calling itself KISS because of a complaint from
a station in Media (WKSZ) not yet on the air. After about ten days in the format, The station was using the handle
"99FM", and after about three months the name "Power 99FM" appeared.

And you can't talk about Philadelphia radio in '82 w/o a mention of WCAU-FM, using the slogans "Hot Hits", and "98 Now!".

And WIFI "WIFI-92". It was CHR until spring '82 when the format chande to New Rock"I-92-Rock of the 80's".
The station then changed the calls to WXTU and went Urban! "92-X...The Rhythm of Philadelphia".

There is no comparison between AM radio and realaudio. While RA may
claim it has similar frequency response, RA suffers from VERY serious
compression artifacts. The FM quality RA will probably be worse.

Until we see consistent internet throughput in the 64kbit range and
DSPs in our PC's audio card, it's unlikely there will be significant
improvements.

In my opinion RA has more in common with a string and two cans
underwater than any form of analog transmission. A dial telephone has
better fidelity than RA. None the less like Edison's wax drum, RA is a
beginning.

Not this string again!?!? Should we let him lie in total ignorance, or would someone like to fire up this debate again?

One has to wonder, with that last line, what this person is doing posting here? My theory is that it's someone posing as an interloper to get us all riled up and start some healthy debate on a subject that really will affect us, though I don't believe how or to the extent he does.

Anyone going to take up the gauntlet?

One last thought for Peter/Chester: Where do you think those landlocked satellite stations get their programming? Hmmm...a SATELLITE maybe?

>huge numbers success in the Alternative format. It comes from the
>looooong term success of stations like KUBE.

If your measure of "success" is ratings and profit, then you may be right. But the fact remains that radio in Seattle--and in almost every other US market--is not worth listening to. The radio stations in Seattle do a fine job of serving a mass audience, but they ignore people who want something else. It's as if the only newspapers available were USA Today and The National Enquirer, but the potential audience for the New York Times and Washington Post was ignored.

There is no station in this market that is willing to take risks in order to challenge (and possibly lose many of) their listeners rather than sticking to a safe, predictable (and profitable) format. And given the structure of the business, I can't blame them. The stations are all burdened with payrolls, debt service and other obligations that make it impossible to take risks for the sake of quality rather than numbers. But as a listener who can't tell the difference among five different rock stations, I can sympathize, but there's nothing I want to listen to.

For all practical purposes, there is little or nothing on radio in Seattle or most other cities in this country that is anywhere near the quality standard of the BBC or CBC, who exist to provide the best possible programs to their listeners rather than the most possible listeners to their advertisers. This includes NPR stations, who are as dependent upon audience size (in order to generate contributions) as their commercial brethren.

In other words, the American broadcasters are not to blame. Many of them do what they set out to do quite well. But the structure of broadcasting in this country is fundamentally flawed so badly that quality programming is all but impossible.

>Hey, no market is perfect forever, and radio today in Seattle may not be
>what it was. But to say radio in Seattle sucks, and always has, is simply
>uninformed and incorrect.

# 3754. Re: '70s stations

Regarding the comments about the '70s format being a "fad"...

We work with a number of stations in the '70s format around the country and firmly believe in its future. Everything in our reseach points to a sizeable appetite for the genres of music that make up the '70s format in most markets. There have been no indications that this appetite is declining.

There have been, however, a number of times when '70s stations have soared in Arbitron after their launch only to see their numbers die pretty quickly. My experience is that most of these stations fail due to poor execution rather than a lack of interest in the format in their markets.

How about sharing some of the more creative sweepers in your market , or at your station from the last few months.

Here are a few good one's I've heard:

-Young Country B94.5...There is no plan B!

-Your're not our only listener...there's also Jim, 32, in Pheonix...It's the Tom Leykis Show!

-93.7...More than just 3 numbers...It's 3 numbers and a dot!

-Kickin Country K106...One part music...One part fun...One part farm animals...Farm animals?!?!

-More Talk...and less music...640KFI

-Of all the radio stations in LA...we're one of them!! 640 KFI

-Chasing Canadians back across the Florida Border...620 WSUN! (RIP)

Got any to add?

They're on 1660 kHz, I'm listening to them now from central Ohio
with a SR-III with an air-coupled tuned loop antenna. (20:45 EST)

Occasional fades to brief nulls, but generally very listenable.

They're playing oldies.

# 3759. New free listing of ISDN/SW56 users

Newsgroup: rec.radio.broadcasting
Date: 1995-12-17 00:00:00 UTC
From: jcrose@dplay.com
Message-ID: <4b0m1c$ibh@vixen.cso.uiuc.edu>
Source record: 27859

The Zephyrlist is mutating to keep up with the times. As of January, we're removing "Zephyr" from the name and supporting all MPEG compression formats including Musicam.
The AUDIOBAHN will cover audio transfer equipment from Comrex, Telos, CCS and others.

This is a free, public access listing of broadcasters and recording studios who may be available for transfers to/from their cities. There's no obligation -- all bookings and fees are between the parties involved.

If you'd like to be on the list and receive updates automatically, send a note with:

State - City - Type of Codec - Company Name - Your Name - Voice Telephone - Email

to me at jcrose@dplay.com. US sites only. If you're already on the Zephyrlist, you don't need to re-register; all those entries will be transferred.

If you'd like to check out the current list, URL to www.tiac.net/users/jcrose/zeplist.html.

After January 10, look for www.tiac.net/users/jcrose/audiobahn.html.

In South Florida, there's WDHC Imaginary Radio...

WDHC is your south Florida station for jazz, opera, rock & roll oldies, comedy, and talk. Sound like a tall order?

Well, it is. But unlike your station, this station doesn't have to make any money:
it exists solely in my imagination. If I ever win the lottery, I may try to do something about it. But meanwhile, WDHC exists only in my mind and on this web page:

http://www.univox.com/radio/wdhc.html

And if you haven't already done so, check out the South Florida Radio Pages:

http://www.univox.com/radio/

this
>group to try to hurt an excellent operation, extremely profitable, that
has no
>intention of changing format. At some point, he might oughta be told to
stop it!
>
>
I fail to see how - if KPLX is doing so well - a rumour that is as far off
the mark as you say can be much worse than amusing to the powers that be
at KPLX. If they are denying it so adamantly - rather than just
dismissing it out of hand - perhaps there is something to protect
there...like a format change that's supposed to be kept quiet, maybe?

As for ending the rumor-mongoring, there's a fine line between starting a
rumor and leaking pertinent information. Unfortunately, we have no way of
discerning which is which until after the fact. We cannot, however,
afford to ban the practice; there's too much truth in many rumours.
Besides...it is a free country...

# 3766. New at KUZZ

Newsgroup: rec.radio.broadcasting
Date: 1995-12-17 00:00:00 UTC
From: kuzz1@aol.com
Message-ID: <4b0m0s$ias@vixen.cso.uiuc.edu>
Source record: 27866

Veteran radio news reporter Melece Casey has been named afternoon anchor/reporter at radio stations KUZZ-FM (107.9) and KCWR (AM 550). Ms. Casey will replace Brent Rush, who is leaving the station December 22 after more than five years, to join his father's construction business in Texas.

Ms. Casey was last heard on Bakersfield radio in 1989 and 1990, when she served as news director at KMYX-FM (103.9), which at the time was an adult-contemporary music station. Since then she has worked at radio stations in Yuba City and Lancaster, California.

Ms. Casey will be heard daily on the stations' noon hour and afternoon drive-time newscasts beginning December 26.

Mark Howell
News Director, KUZZ-FM/KCWR
Bakersfield, CA

(Mark Fratella) writes:

>I have started listening to Dr. Laura Schlessinger's show recently and I
>have noticed that she is a very arrogant, sarcastic, and conceded person.

Yeah? So? How does that make her so much different from most talk show
hosts?
Here, I think, is a much more important issue:

albertj@netcom.com (A.J. Janschewitz) writes:

>This is fine, except that by calling herself "Doctor" she implies that
>she has psychological training. She does have the Ph.D, but it is not in
>psychology, medicine, or any mental health field (I think it is in
>physiology; but I may be mistaken).
>
>This strikes me as an implicit misrepresentation. She has the right to
>hold forth on any issue she chooses, but by putting out the "doctor"
>shingle, even if she disclaims being a psychologist on the air, she is
>giving people the wrong impression.

How ethical is this? And is a disclaimer somewhere in the show enough?
For the most part, people are calling her with the belief that she is a
professional psychologist. The nature of her show furthers this belief.
If she put out this shingle off the air, she'd be shut down. Perhaps
there's a reason for that? Sure...buyer beware. But have we no
responsibility in this medium to present an honest impression of
ourselves?

# 3769. Nashville Radio Watch '95 In Review 12/16/95

Newsgroup: rec.radio.broadcasting
Date: 1995-12-17 00:00:00 UTC
From: mdonegan@edge.net
Message-ID: <4b0m0h$ia9@vixen.cso.uiuc.edu>
Source record: 27869

By 12+ rank

1) WSIX-FM (ctry) 97.9 100kw owned by SFX - The market's untouchable dominant country outlet was also dominant as a newsmaker in 1995. Veteran midday big-voice personality Hoss Burns retired after announcing he was suffering from aids. The station held an on-air fund raiser. Hoss continues his syndication and voiceover work. Morning show host Gerry House took his show off the satellite, but last week signed on to do another five years at SIX. Afternoon personality Carl P. Mayfield was courted by Dick Clark Productions as a possible replacement host for Crook & Chase's cable tv show, but didn't get the job after he failed to show up for an audition. Former program director Doug Baker went to work for Capitol Records.

2) WSM-FM (ctry) 95.5 100kw Gaylord - Moved into new studios inside the Opryland theme park to make way for its new addition...WWTN-FM, a news/talk station.

3) WQQK-FM (urban) 92.1 3kw Phoenix - An unusually quiet and stable year for 92Q. But the station got its first real competition from WJCE-FM, The Juice.

4) WKDF-FM (rock) 103.3 100kw Dick - Changed to the Cutting Edge of Rock. Longtime morning sidekick Dook became the morning show host with sidekicks Dave Chandler and Faye Wilson. Veteran traffic reporter Jim Fuqua died from ulcer complications.

5) WYHY-FM (chr) 107.5 58kw SFX - Y-107 moved into new studios in the same building with WSIX after its purchase by SFX. Danny and Brian Wright from Jacksonville, FL replaced Coyote McCloud's morning zoo. McCloud, fired for lackluster ratings, has yet to resurface on-the-air. In recent months Coyote suffered the deaths of two sons, one from aids, the other from auto accident injuries.

6) WGFX-FM (arrow) 104.5 49kw Dick - The satellite delivered John Boy & Billy Big Show replaced Mary Glen Lassiter in the mornings. Lassiter stayed on to do the news. J-J Duling from Louisville was named p-d.

7) WRMX-FM (oldies) 96.3 100kw South Central - Coyote McCloud's former sidekick at Y-107, Rhett Walker, was hired to do mornings at Oldies 96.

8) WJXA-FM (ac) 92.9 97kw South Central - Oldies 96's sister station showed solid dominance over long-time adult contemporary leader WLAC-FM.

9) WLAC-FM (ac) 105.9 100kw Keymarket - Star 106 continued to slip in the ratings. Morning show host Phil Valentine left for mornings at talker WWTN. Sidekick Terry Hopkins took Phil's place.

10) WLAC-AM (n/t) 1510 50kw Keymarket - Afternoon host Dave Macy moved to mornings. Program Director Kelly Carls replaced Les Jameson middays. Two weeks after being fired, Jameson underwent open heart surgery

Others

WSM-AM (ctry) 650 50kw Gaylord - Program director Kyle Cantrell also took on the programming duties at WWTN-FM, the news/talk station acquired by Gaylord. WWTN 99.7 100kw announced it would seek to broadcast Houston Oilers games after the NFL team moves to Nashville. WKDA-AM (cnn/talk) 1240 1kw was acquired by talk show hosts Teddy Bart and Karlen Evins.

## 3770. Airchecks

Newsgroup: rec.radio.broadcasting
Date: 1995-12-17 00:00:00 UTC
From: VUBS79A@prodigy.com
Message-ID: <4b0m0h$iab@vixen.cso.uiuc.edu>
Source record: 27870

Just thought I'd see if there's any interest...

If you're an aircheck collector like me, you know how difficult it is to get studio-quality airchecks of your favorite stations. I do swing-shift and lotsa fill-in for both WSOC FM-103 (Hot Country) and Star 104.7 (70's Oldies) here in Charlotte. I would be happy to roll tape at either station (or both) and send it your way. EZ Communications has spared no expense with our studio facilities; we have Nakamichi 3-head cassette decks for SKIMMERS in both studios, so you'll get some good-sounding tapes. Either send me your tapes, or I'll provide my own (TDK "D" or "SA" 90's) for a nominal fee of $3 per "D" or $4 per "SA", which barely covers my costs for cassettes, postage, envelopes, etc. As you can see, I'm not doing this to make a profit...but rather, to help the hobby of aircheck trading/collecting. If you have something to trade (your local market or classic stuff from "yesteryear", we can do that, too)

-Drew in Charlotte-

# 3771. Re: Arbitron Numbers... How to read?

Newsgroup: rec.radio.broadcasting
Date: 1995-12-17 00:00:00 UTC
From: heykurtz@aol.com
Message-ID: <4b0m0i$iac@vixen.cso.uiuc.edu>
Source record: 27871

Regarding...

"How do you read the numbers in the Arbs?

Does a station that get a "6" have twice as many listeners as a station
that has a "3"?

I've heard there are breakdowns by shift. Are the overall ratings
factored so that a station that might have a high morning drive
rating be offset by a station that has a high mid-day rating?"

---
---

It depends on which numbers you're looking at. The two primary numbers you will see throughout the report address rating and share. Ratings are reported as a percentage of the population for the demographic and market you are looking at, while shares are reported as a percentage of those members of the demographic in the market that are listening to the radio.

Since you virtually never see ratings as high as a "6," I assume you are talking about shares. The answer to your first question is "yes," it can generally be assumed that a station with a 6 share has twice as large of an audience as a station with a 3 share, as long as these numbers apply to the same market and demographic group.

You are also correct that there are breakdowns by shift. In fact, through computer applications, you can get breakouts for virtually any time period you can come up with (even down to 15 minute segments of time).

Prior to my current job, I spent a year and a half with AccuRatings and six years with Arbitron, so I would be happy to answer anyone's questions about ratings or other forms of radio research. Feel free to send me an EMail.

# 3772. Re: RICK DEES top 40

Newsgroup: rec.radio.broadcasting
Date: 1995-12-17 00:00:00 UTC
From: talk1370@aol.com
Message-ID: <4b0m17$iba@vixen.cso.uiuc.edu>
Source record: 27872

Unless something happened VERY recently, Dees' Weekly Top 40
is still on the air...heard it in my market not long ago, while I
am not sure we're getting Casey Kasem's show or (if we are)
where it's playing.
Biggest difference is, Dees' show is strictly for CHR format
stations, and if your favorite station went hot AC or to some
other variant it may not carry him for that reason. Casey, on
the other hand, does different countdown shows (off different
Radio and Records music charts) for CHR and hot AC stations,
with significantly different music and spoken content. So Casey
stayed on a lot of stations which have bailed out of hit music
formats for a softer mix (like Q-102 in Buffalo) because he
has a show now to cater to them.

## 3773. Help! I'm looking to make a career change.

Newsgroup: rec.radio.broadcasting
Date: 1995-12-18 00:00:00 UTC
From: richwood@commspec.com
Message-ID: <4b3dce$a66@vixen.cso.uiuc.edu>
Source record: 27750

GO>I'm hoping some of you out there can help me. I am looking to break into
GO>broadcasting after working a few years in an unrelated field and I don't
GO>know how I should go about this.

Mr. Stick,
What do you have to offer a station? Have you any talent that
would attract an audience on radio?

GO>Second, I could try a trade school. There is a school for radio and
GO>television near where I live called The Academy of Radio and Television
GO>that offers a course of study in radio announcing/production. The course
GO>is relatively short (less than a year), but costs nearly $8,000.

$8,000????!!!!! Don't waste your money. I can teach you to
operate the equipment in less than a week. Again, what talent can you
offer a station?

GO>Third, I could send resumes out to the radio stations in my area. I can
GO>visit the close stations and drop off a resume and cover letter, and mail
GO>these to stations out of town (for the right opportunity I can relocate).
GO>But I would like to know if stations actually hire people who walk in off
GO>the street. I've read that announcers should have a tape. I have never
GO>worked in radio before, so can I do without one?

Stations rarely hire air talent off the street, even though it
often sounds that way. Unless you have expert qualifications in a
particular area (recognized expert on travel, pets, home remodeling)
that would be interesting as a talk show, you'll have to enter at the
bottom. The mail room is the usual starting place.

Radio isn't much different than any other profession. Rarely does
a hospital hire brain surgeons without training and experience. You'd
have to empty bedpans before being allowed to wield a scalpel.

It's tough, except in very small markets where you can learn on
the job.

Rich

# 3774. Talk Show Host Opinions

Newsgroup: rec.radio.broadcasting
Date: 1995-12-18 00:00:00 UTC
From: richwood@commspec.com
Message-ID: <4b3dce$a67@vixen.cso.uiuc.edu>
Source record: 27751

CT>Dr. Laura's appeal is: She is a woman, a mom, she has very strong
CT>opinions, and she believes in what she is doing. Concete may play a
CT>role, but it's mionor. There is one thing you shold take notice of, the
CT>calleres. Most of these people want to hear a specicfic message, that
CT>what they are doing is okay. Dr. Laura tells them what they really need
CT>hear, the truth, that maybe some of their actions are not the best ones
CT>to take.

Cliff,
Dr. Laura (and all other Talk Show Hosts) deliver opinions. Those opinions have the same validity as any other human's opinions. The fact that they're on radio lends no more "truth" to those opinions than yours or mine. To my knowledge, Dr. Laura's degree is in anatomy, not psychology. Therefore, her pronouncements aren't demonstrable psychological "truth." They're one person's opinion. As far as radio is concerned, they should be given no more value than the entertainment quotient they contain. Being a "mom" isn't an automatic sainthood qualification. There are lots of un-momlike moms out there.

Rush Limbaugh is not a political scientist. He's a citizen with specific opinions and a radio show. They are not cosmic "truths" any more than Mario Cuomo's opinions are. He simply has an electronic pulpit the rest of us don't have. I'm sure some of Los Angeles' more intellectually challenged listeners feel Kato Kaelin's opinions are "the truth."

Anyone who takes Talk Show pronouncements as gospel is following a strangely false God. They're on the air for their entertainment value ONLY. They're commercial products intended to get listeners to spend money on advertiser's products. The minute a Talk Show acquires a mission, it's dead.

CT>You also should remember this, anytime you say something dumb on the
CT>radio, you, my friend will get it between the eyes. Talk show hosts are
CT>people with ideas, some we like others we don't. They are on the air to
CT>propogate their views, and the views of the audience they represent. If
CT>you walk into their wolrd get ready for an opposing opinion, believe me
CT>you'll get one.

Any time you say something dumb on the radio, you're likely competing with the host.

MLaurence wrote the quoted material below:

" This is a big loss for shortwave radio listeners, and everyone who likes
" creative radio programs. Since they gave Radio Canada International a 3
" month grace period, maybe the Canadian government will listen to
" supporters and keep RCI on the air.

A few CBC programs, "As It Happens", "Quirks and Quarks", and "Sunday Morning" are available via Public Radio International to stations in the USA. Check your local NPR/PRI station and see if they carry any of those programs. Maybe with enough interest CBC might distribute more programs outside Canada.

>ne classical music station that rarely if ever plays anything that might
>> force their suburban audience to pay attention rather than using it as
>> background wallpaper

>What would "force them to pay attention"? A little Schoenberg, or
>some Webern, perhaps?

Just a thought or two. What station on your dial does anything BUT provide background wallpaper? Your local 10-song-playlist A/C? Maybe your same-artist-every two hours Country.

We're all in the entertainment business, aren't we? And, when we play something the audience doesn't find entertaining (or in some cases, finds downright annoying), they're not our audience anymore. When would either of those formatted stations play something that doesn't appear on the pre-tested, audience approved, sounds-all-the-same-to-me list?

So, we'll play lots of Webern and Schoenberg when your local new-age jazz station adds Clark Terry and Miles Davis to their "A" rotation. Or, when your local country station starts playing Kitty Wells and Porter Waggoner alot. (Don't hold your breath for either of those either, though I suppose THEY would make their listeners "pay attention" for at least...oh, 10-15 seconds).

Jack Moore
WFLN
Philadelphia's Classical music station since 1949
(with both Schoenberg and Webern on our schedule this month)

A couple of thoughts about your wanting to change your career to radio. I have interviewed dozens of people in my several decades as a radio news director who have wanted to do that, and I can't think of any who have succeeded.

You don't give your age. EEO or no, it does make a difference. People are more inclined to take a chance on a younger person than an older one.

If you are serious about radio, you should consider going to school for a while, at least, to get a few basic courses and some experience on a college station. You needn't take a second degree. You could do it in a year at most, maybe a semester, if you found a school willing to help. Talk to the chairman of the department. (Ask where some of their graduated are working. You wouldn't be one, but if they can't name a list of stations, thank them politely and leave.)

There are good proprietary schools, but I don't know about the one you name.

Two more suggestions: get an information interview with a program or news director whose work or whose station you admire and sound him or her out. If you get somebody friendly, ask him or her to listen to you read and see if you have any air potential or not. If you get a negative the first time, try again and again. If you get three no's in a row---no to POTENTIAL, not not to job---reconsider.

Second, go to the smallest stations you can drive to in a couple of days and talk to jocks, news people or managers there. Again, not to apply, but to get a look at the place and to give them a look at you. At that smallest station, ask, if you can tactfully, about pay. You may be shocked at how little you will have to work for for the first few years you're in the business.

Everything I have said assumes that you want to work on the air. If you have experience selling intangibles, you will find the entry a lot easier, and sales people in general make a lot more money and work a lot better hours than air people. They are also the ones who get to be managers and give the orders to the air folks.

Remember that the law of supply and demand applies to talent positions. There aren't many of them, and a lot of people want them. You don't have to have a Ph. D. in economics to understand what that means.

Good luck.

>broadcasting after working a few years in an unrelated field and I don't
>know how I should go about this.
>
>

I think you should think long and hard about whether you really want to do this and why. I don't know what you're doing now, but almost any field has better prospects for future employment growth and salaries than broadcasting. This is a viciously competitive business in which only the very best and brightest talent can survive the 90's. Stations are cutting back, consolidating, buying syndicated programming, and automating because that's the only way they can survive, with so many signals dividing up the ad revenue into ever-smaller segments. That means even with more stations, there are fewer jobs all the time. And many of the remaining jobs do not pay nearly well enough to support a family or a middle-class lifestyle.

Despite all this, there is a shortage of truly talented people out there. There are plenty of incompetents and ego-trippers, but not many who are really outstanding. So if you have that kind of talent, you can make it.

If you really are committed to doing this, and don't care about living on less than $20,000 per year for a while, then go for it. Start in a very small station, babysitting automation, helping with promotions, whatever sort of scut work needs to be done. Then learn everything you can about every facet of the business, and keep trying to move up. Don't waste $8000 on broadcasting school.

You don't need another degree, either. Nobody in the commercial side of this business cares about degrees, although I for one do look for a well-rounded education and evidence that a person is well-read and informed. The only thing that really counts is what comes out of the speaker.

You have about as much chance of making it big in this business as the average varsity high school basketball player has of making it to the NBA. Keep that in mind before you commit to a career change.

Hmmm... Most interesting. Especially w/the "revival" of the old WIS call on AM (albeit on 1320 as opposed to their former 560). I'm not too thrilled w/APR all-news, but if it kicked WVOC, it says something for the changes. One thing that hasn't changed, is that the night signal of the "new" WIS is as pitiful as the "old"! I own a farm in Aiken County (about 25mi SSW) and both 560 and 1320 produced good signals last time I listened (around Labor Day (I live west of D.C. and am an absentee farmer)) during the day, but zilch at night!

BTW, where is the site for the new WIS? I bleieve the old one was in West Columbia...

# 3786. Don, Mike and Regis

HA>Well, it seems that Don and Mike, the nationally syndicated duo, are in
HA>trouble again. Seems that they listened to Regis' voice mail at his hotel
HA>after convicing the hotel (using Mike's impersonation) that he was Regis.
HA>Oh what a DJ wouldn't do........

HA>Hopefully, you'all will get a kick out of this story.

JR,
Gosh, it's ever so much fun hearing invasion of privacy on the
radio. While most of us in radio are trying to convince our detractors
that we take our responsibility to our listeners seriously, jerks like
this are using the medium to violate the very same standards we demand
for ourselves. Like not revealing news sources. Why should a court take
us seriously when our "entertainment" counterparts find violating
someone's rights so awesomely funny.

I wonder how long it would take for Don or Mike to sue someone
who did it to them.

Rich

DK>richwood@commspec.com wrote the quoted material below:

RW>" Sorry. No sale. The media is simply the most visible scapegoat.
RW>" While I agree that much of what the media does is irresponsible
RW>" "journalism," it's too simplistic to claim they're the root cause.

DK>Sorry, Rich, but facts do not bear this out. There was the case many
DK>years ago when a TV movie showed a girl being raped with a household
DK>plunger. The very next day, some kids in San Francisco raped a
DK>neighborhood girl with a household plunger. The court established that
DK>they *had* watched the movie the prvious evening. Naturally, the court
DK>absolved KRON of any liability in the matter.

David,
Still no sale. Today they're blaming the movie "Money Train" for
subway token booth torchings in New York, recently. They seem to ignore
the fact that we've had several similar occurances well before the
movie.

What makes you think that there wasn't someone, somewhere, thinking
of "plunger rape" before the movie was shown? Why don't we have copycat
everything, if people are so ready to imitate what they see?

Advertisers try desperately to get people to do things. It takes 11
exposures to a commercial to have any impact. I see no reason why
anything else on TV would be more persuasive.

Rich

## 3788. T. Bruce, Morse code, telegraph lines

Newsgroup: rec.radio.broadcasting
Date: 1995-12-18 00:00:00 UTC
From: croth@omnifest.uwm.edu
Message-ID: <4b3dc3$a5l@vixen.cso.uiuc.edu>
Source record: 27877

THANKS to all readers who responded to my call for information
on the LA radio program starring one Tammy Bruce. Please send
no more information.

---

I am in need of the Morse code translation list. Just the
list that pairs each letter of the alphabet with the corresponding
dot-dash pattern [are there patterns for numbers? Other
characters?]. If you have that short list stored electronically,
and can download it to e-mail, please send it to me via e-mail.

---
An historical question. I used to teach Introduction to Broadcasting
at University of WI-Milwaukee. When radio was new, in the 1920's,
two nationwide networks formed _very_ quickly. One was run by
RCA, and the interconnect was Western Union telegraph lines.
Never intended for voice-by-wire. The other network was run
by ATT, using their own phone lines [and they were guilty of
very anticompetitive actions against the RCA web].

Question. I have always wondered if somewhere in the USA there
are still standing some derelict telegraph lines. Used for
God-knows-what [hobbyists? Erotic coded messages between people
who're married--but not to each other?]. Write me if you know
of any still-operating telegraph lines. I don't care if they
were ever used as part of the RCA network.

--
Finally, an anecdote. We're all aware of the two-paper-cups-and-string
method of rigging up a nonelectronic telephone. I used to read
--in old science fiction novels--about the practice of two astronauts,
in spacesuits, in a vacuum, using a backup com system when their
radios failed. Put two helmets together and shout. Same principle
as the cup-telephone vibration thing.

I put this on sci.space.tech, and asked if the physics allows
or disallows it. A shuttle astronaut sent me an e-mail and said
"We tried it." Doesn't work. They tried it while in an airlock,
in vacuum.

Wish I understood the physics of the cup and string phone. And
why it doesn't apply to two space helmets touching in a vacuum.

For all I know, the cup and string thing is itself a hoax.

----

I would like to formally ask all radio professionals to file my address [below] and route me any local newspaper stories in which private citizens or groups [who are not gov't] or any elected officials call for censorship--in your locality. Censorship of radio, rock concerts, inflammatory political speeches, anything.

Either a demand for government censorship [which if implemented would violate the First Amendment] or private boycott efforts [which isn't violative of the First Amendment, but can have the same effect].

Stern does lots of verbal sparring on air. That's part of the "show."

I remind all that it was Mr. Mueller ("Mancow") who actually mailed a box of excrement to Stern's office, which was then opened by an intern who was extremely upset by the incident. That's not part of a show.

Draw your own conclusions.

-M!

[Moderator's Note: My conclusion is that the box in question sums up these guys pretty well. Can we grow up now? Bill]

From: st92j2gl@dunx1.ocs.drexel.edu
Message-ID: <4b3dc5$a5o@vixen.cso.uiuc.edu>
Source record: 27880

Here's how the year went in the nation's #5 market --

*No changes at ratings-healthy Country 92.5 WXTU.

*AOR 93.3 WMMR has gone lighter (to position itself away from Y100 and WYSP), and has seen continually-falling ratings.

*Already ratings-healthy 94.1 WYSP moves from classic rock to AOR on 10/27 ("#5 station starts chasing #10, #12, and #18 stations" ...Ooooo-kay).

*No changes at "Big Money Demo"-healthy Classical 95.7 WFLN.

*No changes at ratings-healthy Talk 96.5 WWDB (besides getting sold).

*No changes at ratings-healthy Oldies 98.1 WOGL.

*No changes at ratings-healthy Urban "Power 99" (98.9) WUSL.

*New Rock Y100 (100.3) WPLY made the commitment, in the Fall, to stick with rock - changing its status from CHR/Mod. to Modern Rock. Gets its first 4.0 12+ ratings, since "The Big Change" from AC to CHR in 3/93. Playing only the Modern Rock records that Philly listeners actually want to hear. A.I.R. Awards for Barsky Morning Show, Imaging Director Sean Caldwell, and night jock Josh Goodman.

*No changes at relatively ratings-healthy AC B-101.1 WBEB.

*After falling to an all-time low 3.4 12+ rating, Q102 (102.1) WIOQ moves from mainstream CHR back to dance/CHR.

*Magic 102.9 WMGK switched from AC to 70s in 7/94, saw its peak (3.8-ish) this year, and is now mixing in 60s and 80s rock, calling itself "Classic Hits" (after WYSP shed "Classic Rock").

*Modern rock 103.9 WIBF ("WDRE") scored an all-time high 3.0 in Fall '94, then the WDRE Network became the "Underground Network" in 1/95, WIBF drops 3.0-1.9 in Winter '95, Underground Network is disbanded in the Fall, WIBF now almost totally local, trends still show it holding in the high 1's. Trying to be more hip than Y100 by playing "non-testing" records in between the "hit records".

*"Rhythmic AC" Star 104.5 WYXR continues to hype its "Feel The Music"/"Rhythm Of The City" Motown/disco/80s-light/90s-rhythm format (which it moved to in 12/94), and sees no significant changes in ratings. Probably should've stuck with playing Springsteen and U2 five times an hour. No matter what they're doing, you know you'll always hear Whitney Houston's "The Greatest Love Of All" 8 or 9 times a week.

*No changes at ratings-healthy Urban AC 105.3 WDAS.

*NAC 106.1 WJJZ seems to be winning some following now (2 years after "The Big Change" there), now seeing 3.5-ish 12+ numbers.

Sorry, I don't cover non-commercial or AM stations.

# 3792. Philadelphia Radio: Then & Now

Newsgroup: rec.radio.broadcasting
Date: 1995-12-18 00:00:00 UTC
From: st92j2gl@dunx1.ocs.drexel.edu
Message-ID: <4b3dc6$a5p@vixen.cso.uiuc.edu>
Source record: 27881

I 'ripped off' this idea from Sal D'Amato, who posted "NY Radio: Then & Now" --

| Freq | Calls | Format | Since | Previously |
|---|---|---|---|---|
| 92.5 | WXTU | Country | 1981 | Top 40 WIFI |
| 93.3 | WMMR | AOR | 1967? | EZ |
| 94.1 | WYSP | AOR | 1995 | Classic rock |
| 95.7 | WFLN | Classical | 1955? | ? |
| 96.5 | WWDB | Talk | 1972? | Jazz? |
| 98.1 | WOGL | Oldies | 1988 | Top 40 WCAU |
| 98.9 | WUSL | Urban | 1982 | AC "Kiss 99"? |
| 100.3 | WPLY | Mod rock hits | 1993 | AC "Kiss 100" |
| 101.1 | WBEB | AC | 1993 | "EZ-101" WEAZ |
| 102.1 | WIOQ | CHR | 1988 | Rock Alternative |
| 102.9 | WMGK | 60/70/80s rock | 1994 | AC |
| 103.9 | WIBF | Mod rock | 1992 | Ethnic |
| 104.5 | WYXR | Hot AC | 1991 | AC "Sunny 104" WSNI |
| 105.3 | WDAS | Urban | AC | 1955? ? |
| 106.1 | WJJZ | NAC | 1993 | Top 40 WEGX "Eagle 106" |

The stations that are listed '1955?' are the ones that say "serving the community for over 40 years".. So, I guess they've been around *at least* since the FM band was moved to the 88-108 range in the 50's.

>From the rumor mill....

Bobby Rivers is out at WZOW/WKAM. Formerly the morning personality at U93 and Zip104 (now WRBR), rumor has it that Rivers wanted more control and sales responsibilities than management was willing to grant.

Janice Dowell out as of 1/1/96 as morning news at U93. Going into the baby-making business.

Bob and Tom (WFBQ) no longer syndicated morning show on WNDU-AM. Top University brass, it is rumored, couldn't handle Bob and Tom's vulgarity, and station personnel, who were really behind them, couldn't keep the floodwaters from overtaking them. WNDU-AM owned by University of Notre Dame.

Jack and Rob, #1 25-54 AMD on WNSN-FM, breaking up. Either Jack or Rob is going home to Maine, going back to school. This is the second or third time in recent memory that the duo has broken up or left. Last time was a very abbreviated stint in Dallas, where they couldn't break through at all. Jack was on WNSN-FM Sunday 4-6 pm.

More from the rumor mill when the waters once again run deep...

Bill Dixon

# 3795. Chicago Radio Watch: 12/18/95

Newsgroup: rec.radio.broadcasting
Date: 1995-12-18 00:00:00 UTC
From: JJB92@aol.com
Message-ID: <4b3dbh$a4o@vixen.cso.uiuc.edu>
Source record: 27884

End of an era.....

In late 1984, WMET-FM (95.5) shut off the lights on hard rock on Chicago. On air personality Scott Loftus dedicated himself to bringing Chicago a full time rock station. Scott, backed by Jam Productions, kept "real rock radio" on the air for almost 8 years. Buying time on a tiny, brokered station (WVVX-FM), Scott and Jam kept rock radio alive nightly from 7 till midnight with various expansions and retractions. The station was free wheeling-Metallica hung out with the "inmates" for an evening before most of the world had ever heard of them. The decline in popularity hard rock/metal concerts ultimately brought the program to the end of the road.

Scott landed at rocker WRCX-FM (103.5) as a night time deejay after spending a short amount of time at WYSY-FM which adopted metal in the evenings before going all 70's. After almost ten years in the market, Scott signed off on Tuesday night for the final time to pursue other interests.

Chris Payne, who had been handling weekends/fill in at the station takes over the night time slot at RCX. Chris had been at Milwaukee's WQFM prior to joining RCX.

Stations for sale?.....

The sale of Pyramid Broadcasting to Evergreen Media has received approval from the FCC. The sale gives Evergreen seven stations in the Chicago market. Since current FCC rules only allow a company to own 2 AM and 2 FM stations in a market, the FCC gave Evergreen until March of 1996 to comply with the rules. Barring a change in regulations or court actions, Evergreen will have to spin off three of the following stations: talker WLUP-FM, urban contemporary WVAZ-FM, hip hop WEJM-FM and WEJM-AM, rock WRCX-FM, smooth jazz WNUA-FM and sports talk WMVP-AM.

Boys will be boys.....

Noted Chicago Sun Times columnist Rick Telander cohosted the Peter Brown show each Monday afternoon from 4-7. Former coach Jerry Glanville was a guest last Monday. Rick's questioning turned aggressive which prompted Jerry to turn hostile and ultimately hang up. An arguement ensued between Peter and Rick which reportedly included shoving. The station has decided to split the boys up although each will continue to contribute at the station. Since Peter Brown is a regular contributor to ESPN radio, the two won't have to see each other over the holiday season as Pete will be filling in for the Fabulous Sports Babe for the next two weeks.
No word where Rick will fill in when Peter returns to his afternoon slot.

Personality shuffle.....

Ken Cocker, afternoons at soft rock WPNT-FM takes over the morning show from Steve Cochrane while a permanent replacement is sought. The rest of the morning crew remains in tact.

Andi Kuhn, who had been doing weekend/fill in work at WPNT returns to Shadow Broadcasting Services as a full time traffic reporter.

Station news.....

As noted in numerous posts to this newsgroup, WLS-FM will go young country shortly after Christmas. Ted Stecker was named PD. Ted previously worked at WBAP in Dallas nad WKHX in Atlanta.

# 3797. Re: Digital Sound Broadcasting

Newsgroup: rec.radio.broadcasting
Date: 1995-12-18 00:00:00 UTC
From: umar@cybercom.net
Message-ID: <4b3dbp$a56@vixen.cso.uiuc.edu>
Source record: 27886

Digital audio broadcasting (DAB) will happen in the United States, but there's currently no technical standard. The rest of the world seems to have settled on Eureka-147, but there's no spectrum available in the U.S. to implement Eureka for terrestrial DAB. There is an S-band allocation for _satellite_ DAB, though.

My questions are two: is in-band, on-channel (IBOC) DAB truly practical? And can a digital receiver for analog FM be developed that might make DAB superfluous?

I got to hear the AT&T in-band, adjacent-channel system at the Radio Show in New Orleans. It was impressive, but they told me it didn't really fit in 200 kHz. That means if all the FM stations in the country went to DAB they wouldn't all fit in the current FM band. We'd need some more spectrum. And (correct me if I'm wrong) I think the USA Digital IBOC system has the same problem.

When FM was introduced it took 20 years for enough new radios to be sold before FM broadcasting became generally profitable. Given that DAB would operate under a similar handicap, perhaps we should be looking at digital receivers for FM rather than digital audio broadcasting. The Harris "Digit" exciter directly synthesizes an FM signal using DSP technology; surely it must be possible to use DSP to recover audio from a received FM carrier. And if so, why can't an algorithm be developed to detect and cancel the effects of multipath distortion?

Can such a digital FM receiver be built? Can it be done cheaply enough? If so, we wouldn't need new technical standards, lengthy regulatory battles, or new spectrum space.

What does everyone think?

Rob Landry

Much like the set up in NYC with Group W's 1010 WINS running a shorter
headline style broadcast, and WCBS NewsRadio 88 with a longer form type of
news format??

It would be nice to hear something successful on 1210 AM, especially since
I have a hard time hearing 1060 AM in the NYC area, with WEVD putting out
50Kw at 1050.

Well, I can think of at least one that might qualify. WGTZ in the Dayton, Ohio market was licensed to Eaton, Ohio (and still is), and during the Eighties tried to turn this into a coherent sentence..."WGTZ, EATON' DAYTON ALIVE!"

Ugh. But, it provoked uncontrollable laughter every time I drove through there!

I've been reading a lot of posts here regarding Dr. Laura..pro and con. Being a programmer who is running her program five days a week, it has occured to me that most of the criticism is coming from people who, on the basis of listening to her for five minutes, have formed instant opinions on what she is all about. I've heard plenty of talk in my own market about her, mostly from people who think she is anti-family, anti-men, anti-this and that. Nothing could be further from the truth.

Give her entire three-hour program a listen and you'll think otherwise. And BTW, her program is one I'll put up against Rush in almost any market.

The RBDS standard has been established by the NAB and the EIA in the US. At present the EIA is sponsoring a $500K program to provide broadcaster with the required encoders to send RBDS subcarrier data over FM radio. Denon makes a home receiver that decods and decodes RBDS data streams, Advanced Digital Systems (ADS) in Cerritos, CA makes a plug-in card for the PC that also receives RBDS. Several other manufacturers make RBDS receivers including Delco and Alpine. There are also several specialty companies that make or sell RBDS receivers for use in the US including CUE paging in Irvine, CA who offer an FM radio based paging system for long-haul/interstate truckers and DCI who offer differential GPS correction data over RBDS. If you want more info e-mail me at apexmedia@aol.com or 75764.500@compuserve.com.

SD> From: San Diego Radio Watcher <sdradio@zNet.com>

SD> KCRW - 89.9 FM (Santa Monica) is a big little guy. Little by
SD> definition, only because it does not attain much more than a
SD> 1.5 share of the local radio audience. But KCRW is a powerhouse
SD> NPR, and PRI station. The original LA home of the AAA format,
SD> KCRW showcases what really good college radio should sound like.

One galling thing about this "KCRW - big little guy" is the
highhandedness of their "Big Little Gal" Ruth whatshername
(she changed it not too long ago). Ruth changes the schedule
arbitrarily and with ZERO advance notice. [Ask SPERDVAC's
Bobb Lynes, whose Sunday night OTR show was canceled by
Ruthless Ruth with no warning and with several choice serials
in mid-air.] When asked for a FAX number for listeners to
express their opinions, KCRW said
We don't give that out to THE PUBLIC.

So much for PUBLIC [sic!] radio.
(Not for nothin' is their home city known as
"The People's Republic of Santa Monica". {sigh})

Message-ID: <4b3dcb$a63@vixen.cso.uiuc.edu>
Source record: 27897

References: <4b0hei$dse@vixen.cso.uiuc.edu>

Here in Northeast NJ (Bergen County) there is WJUX (at 103.1 via translator)
that broadcasts in mono (at least none of my FM stereo sets detect stereo)
A reason for being mono: The music is virtually all mono to begin with
(big band and nostalgia), the translator power is weak, what 100W or less?,
and the stereo carrier would just make reception noisier for the fringe
listeners, especially as FM noise is stronger on the higher audio frequencies,
and the stereo signal is a supersonic high freq "audio" hannel above the
audiable highs. Ever try switching the "stereo/mono" switch on your tuner
when listening to a noisy station? Less noisy on mono, isn't it.

With a weak transmitter, most of your audience becomes "fringe", and if
all your program material is mono anyway, turn off the stereo exciter.
And sell it for some cash, which most stations need anyway.

|:

That's very frightening. If the music sounded horrible in mono, then your fringe listeners are hearing a horrible signal all the time. And local listeners with mono desktop or clock radios, shirt-pocket portables, and older cars are also getting a horrible signal.

Something is wrong in your processing or studio wiring if you're not mono-compatible. Help your bosses out: do an informal survey with a couple of portable radios. If the signal doesn't sound good in mono, suggest they fix the studios as a cheap way to gain more listeners in the coverage area.

Believe it or not, there are listeners who NOTICE and COMPLAIN about these things. I once had someone call me and ask why we were broadcasting in mono. Turns out someone had put one fader on the board in mono, therefore some songs were mono & this guy noticed it!

On oldies stations, it would be a relief...all those songs with vocal-on-the-left, chorus-and-instruments on the right can induce vertigo! Most contemporary music is mixed such that one would think very few listeners (exceptions noted above) would notice.

There is a station that I helped set up in Alberta (Drayton Valley)..its a small class A FM with music programming (mostly automated; with some live assist from students in training) and it was originally designed as a mono station. Built in 1993; I believe they are still mono. The owners reaction when I questioned him... what the hell do we need stereo for? There's no other station for a hundred km and it isnt necessary here!

# 3813. FM Mono? Better Alternative

Newsgroup: rec.radio.broadcasting
Date: 1995-12-20 00:00:00 UTC
From: BPM1992%rit.edu%mcglynnb@spectra.net
Message-ID: <4b8bu6$5co@vixen.cso.uiuc.edu>
Source record: 27702

There is a valid arguement to using FM mono, although AM stereo fills the gaps where FM falls short. With AM stereo, multi-path propagation problems disappear. There is a slight potential loss of signal fidelity with AM over FM, although the way that FM stations compress the life out of their audio, AM staions complying with the AMAX standard can sound *BETTER* than FM stations. An example is WICK AM 1400 in Scranton, PA. When driving through the city I've often forgot that I was listening to AM because of the high quality sound of their station.

In Binghamton, NY (my home town) I tried an experiment on some of my friends in the car. 2 stations simulcasted 100% with AM stereo on one outlet and FM stereo the other. People chose the AM stereo station as having "better fidelity" and were shocked to find out that they were listening to AM. AM stereo offers the advantage to a local market of no multi-path problems along with high fidelity when audio compression is used sparingly.

As you may know, WDRE is a modern rock format station in Long Island, New York. In the last few years, WDRE has also been broadcasting on different frequencies in Albany, NY and Philadelphia, PA. Same format, same logo and advertising. I always thought that these were simulcasts of the Long Island station, but, listening in Philadelphia this weekend I heard Philadelphia ads, Philadelphia oriented chatter from DJ's, even Philly weather. The DJ's name was not a recognizable Long Island name and even the music mix was a bit more adventurous than in NY.

So: it's the same call letters, the same ads, but different content! Is that legal? Are there really two (or three different WDRE's??

When did it turn into WXTU? I made a 45m aircheck of I-92 on 1 Jul 83
(with Lee Paris), and given what you say about spring 82 it sounds like
it had been modern rock for over a year by then. How much longer did it
stay modern rock?

> And you can't talk about Philadelphia radio in '82 w/o a mention of
> WCAU-FM, using the slogans "Hot Hits", and "98 Now!".

Not only using the slogan "Hot Hits" (KIIS Los Angeles, KTKS Denton TX
[Dallas/Ft Worth], and probably others) licensed the "Hot Hits" slogan
without using the Hot Hits _format_ (Mike Joseph's), which WCAU-FM did.
They started it in late 81, and ran it at least through early 84.

> 1985-WTRK- Electric 106 (Mike Joseph tried to make that Hot Hits
> lightning strike twice)

This I wasn't aware of (I'd left the east coast by then). What
happened exactly? Did WCAU-FM dump Hot Hits by then and it got plugged
in at another station in town?

The last Hot Hits aircheck I have is of it at WMAR-FM "106 Hits" Baltimore
in late 84. What was the lastest that Hot Hits ran at any station anywhere
(I know CBS's HitRadio clone of it ran at least partway into 86)?

Well for a while they were running 760 AM as a Satellite Talk station.
Since WOAI 1200 is a well known Talk Radio staiton in San Antonio
they were using WOAI as handle, like Magic, The Mix, Y-100, B-93
etc... WOAI means Talk Radio to people in San Antonio so they used
it. I aparentley did not work as they have long since changed 760 AM
to The Ticket Sports Talk 760 KTKR. This by the way is the third
format in 18 months, it's changing formats faster than we do.

#else.

Probably because broadcast radio is a *mass* medium! It, by nature, cannot
tailor itself to everyone's individual tastes all the time.

I mean, the local bus company here does a fine job of moving people
along the major streets. But if I want to travel along some quiet
residential area, I'll need to use personal transportation (walk, car,
bike or cab)

Or, the local library has a good selection of books of general interest.
But if I need more technical or esoteric information, it's off to the

University library I go. (Its collections are more tailored to the needs
of students and researchers, rather than those of the general public)

#It's as if the only newspapers available were USA Today and The National
#Enquirer, but the potential audience for the New York Times and Washington
#Post was ignored.

No, it's more like a newstand with all of the aforementioned papers, plus
more. But, Joe Blow's day planner and his daughter's secret diary are not
on the newstand, so it's "not worth patronizing".

#There is no station in this market that is willing to take risks in order to
#challenge (and possibly lose many of) their listeners rather than sticking
#to a safe, predictable (and profitable) format. And given the structure of the
#business, I can't blame them.

But is that different from any other business? I mean, the local grocery
store offers the same stuff every day. Beef, chicken, pork, fish, how safe
predictable and profitable. They should be willing to take risks in order
to challenge (and possibly lose many of) their customers by offering such
meats as alligator, opossum and rattlesnake . . .

#The stations are all burdened with payrolls,

Gee, when I do my 40-hour week, I like to be compensated for it.
Doesn't everybody?

#debt service and other obligations that make it impossible to take risks for
#the sake of quality rather than numbers.

# But as a listener who can't tell the
#difference among five different rock stations, I can sympathize, but there's
#nothing I want to listen to.

So what *do* you want to listen to?

(Aside: most people that go around saying "radio sucks" are usually, in
my experience 'alternative' rock fans. Since Seattle is probably rather
well covered in that aspect, I ask the question again).

#For all practical purposes, there is little or nothing on radio in Seattle or
#most other cities in this country that is anywhere near the quality standard
#of the BBC or CBC, who exist to provide the best possible programs to their
#listeners rather than the most possible listeners to their advertisers. This
#includes NPR stations, who are as dependent upon audience size (in order to
#generate contributions) as their commercial brethren.

A few points

1. The BBC and the CBC are still dependent on taxpayer support for their
operations (to a much greater degree than NPR) and can have their funding
reduced, if the taxpayers are either unsatisfied with these outlets, or
simply feel that there exist higher priorities for tax funding. I've heard
debates on the Canadian newsgroups and elsewhere as to whether the CBC

should still be funded (the current threat to close down RCI is merely the tip of the iceberg)

2. The big difference between US radio, and that in most other countries is that here in the US, governmental or quasi-governmental organizations (such as the BBC) never dominated the broadcasting "scene" to the same extent as in Britain, etc. So, instead of one major quasi-governmental voice and a few independents, we have many independents and a rather small quasi-governmental voice. (Canada is about midway between the US and European models)

3. Finally, (this is most important) you state that the BBC, etc. exist to provide the "best possible" programs. Not only is this a matter of strong opinion, but at least in the United States, this opens the door to all manner of trouble, namely, there are all sorts of pressure groups all over the political spectrum, who would like nothing more than to control the media and only put out what is "best" for us.

#In other words, the American broadcasters are not to blame. Many of them do #what they set out to do quite well. But the structure of broadcasting in this #country is fundamentally flawed so badly that quality programming is all but #impossible.

No, it's not flawed, just different than Europe. And that in and of itself is not bad. Programming will change here when people's needs and wants change; we're not really into governments and organizations setting cultural standards from on high, but rather the opportunity of a diversity of voices to be heard.And some voices will be louder or more accepted than others; that's part of our culture building method as well.

I don't know if it's *that* bad . . .I visited Seattle last July, and
heard some rather interesting music on an FM station. The announcer
said that it was from a CD called "Songs of Black Peru".

Now *that's* something you don't hear everyday :-)

(P.S. Did I like it? Well, I bought the CD the first chance I got!)

This thread seems to come up here at fairly regular intervals. There
seems to be a certain very vocal minority that feels that anything that
appeals to the Great Unwashed it is pure crap, and that Good Radio (tm)
must consist of obscure ("quality") programming that very few people want
to listen to. What's wrong with serving the largest possible audience
and (horrors!) earning a profit? If there was, indeed a demand for all
this so-called "quality" programming, it seems to me that there would be
a stampede to create it. A given format becomes popular because people
*like* it,,,,whether you agree or disagree is irrelevant.

If a city like Seattle with a reputation for a somewhat eclectic
population can't support a station with "quality" programming, what does
that tell you?

} must consist of obscure ("quality") programming that very few people want
} to listen to.

I must respectfully disagree, Steve, with your interpretation of the
poster's comments. While I will agree that there are many with your
stated opinion, that 'once an artist attains success (s)he is a
sellout', you are painting with as wide a brush here as you accuse the
poster of doing.

His point is that the structure of (commercial) broadcasting is flawed
in that the primary (and in many cases ONLY) reason for existance is
not to "serve the listening public" but to "sell listeners to
sponsors". As such the industry prefers to make the fastest, cheapest
buck it can. Now I realize that this, too, is a wide brush and that
it is not universally true, but more and more it is becoming the rule,
and I predict that with the new climate, will be all-but universally
true within the decade.

} What's wrong with serving the largest possible audience
} and (horrors!) earning a profit?

Nothing, absolutely nothing. Every business must make a profit to
stay afloat. But the problem seems to be (I am speaking not of
Seattle radio, but in general) that in a rush to 'serve' that 'largest
possible audience' there are great pockets of listeners who remain
unserved and there are great areas of broadcasting that remain
untapped. It is as if all restaraunts in the area, noticing the huge
market share of fast-food establishments suddenly started serving
nothing but Mc Donalds and Burger King food. Sure these are
monumentally successful operations, and they appeal to a wide variety
of people, but life would get awful dull if the only restaraunts in
town were fast-food joints.

Unlike a restaraunt, though, there are physical and regulatory limits
on how many radio stations can serve a community. I cannot, for

instance, just begin broadcasting on some unused (are there any of these any more) frequency because I perceive a niche I wish to fill. Therefore listeners in those areas are pretty much stuck with what the local communications conglomerates choose to air. It is here where the problem lies.

} If there was, indeed a demand for all
} this so-called "quality" programming, it seems to me that there would be
} a stampede to create it.

You would think so, but that is not the case. There are a couple of reasons for that. First, radio programmers are often unwilling to step outside the proven product. There are few programmers gutsy enough to risk their slice of the AC pie on something that might well appeal to a large niche of listeners. Second, radio is no longer run by broadcasters, it is run by accountants, consultants and ratings firms who pretty much dictate what is a viable format and what isn't. In other words, radio now is run by followers. Leaders are very rare in this day-and-age.

Look at NAC (New Age/Smooth Jazz). It wasn't even a format less than ten years ago. Then someone with guts and the capitol to back those guts up, created something called "The Wave", based in LA and syndicated by satellite to other markets. In a matter of a few years, NAC stations started popping up in many major markets and earning a surprising market share. All of a sudden you have NAC's multiplying like rabbits on steroids and grabbing market share right and left. Kansas City saw the transformation of an 'also-ran' Hot Country signal jump from near-dead-last to a major dominance in *one* book, after they adopted NAC.

Also, one can look at WLUP in Chicago. When this station started, everyone in the industry laughed at them for trying, what amounted to, morning shows all day. WLUP has been a dominant force in Chicago for over 15 years, even though many schedule shake-ups and even a switch from AM to FM.

How many 'NAC' or 'WLUP' success stories are out there? Plenty, I am sure. But as long as we have programming geniuses who think it better to be one of 5 stations splitting up the contemporary or country pie, rather than to be the *one* station providing something new, we are not going to see much of a change.

} A given format becomes popular because people
} *like* it,,,,whether you agree or disagree is irrelevant.

Actually a format can never be 'liked or disliked' until it is tried. It will never be tried until someone with vision and the cash to back it up, gives it a "real" shot. That is the crux of the 'flaw' that the previous poster is talking about. As long as radio continues to be run by followers, whose *only* concern is making a *killing*, rather than being content to make a *living*, as once was the case, it

will not improve.

} If a city like Seattle with a reputation for a somewhat eclectic
} population can't support a station with "quality" programming, what does
} that tell you?

Assuming that is true, it tells me that the audience is far more
eclectic than the programmers give them credit for, in that market.

Don't presume that because someone perceives a hole in the programming
market that this person is some stereotypical loser who wants to
hear wind chimes and whale farts or wall-to-wall Metalica. Many
times it is the consumer who is most suited to discovering where a new
product may fit in. If we ignore and write-off these observations as
the ravings of some musical space-case, we may be excluding the most
important link in the chain of broadcast success.

Just my $.02

As always, you can check out my Soccer on the Radio website at
http://sefl.satelnet.org/socrad/~philsoc/socrad/

I've added some more European and South American SW info, specifically additional airings of Spanish and Italian football. Unfortunately, it's in Spanish and Italian. Wonder why they don't speak English like us normal folks ;)

In addition, I've put some old NASL Strikers audio clips on the page with Mueller, Cubillas, Hudson, et al. I've also included new information on Argentine, Portuguese, and Ecuadorian first division broadcasts in recent days.

Any additional information you might have about am/fm broadcasts in your area, or sw broadcasts you're aware of, please let me know asap.

Thanks and Happy Holidays,
Phil

I can't think of any favorite sweepers _currently_ in my market, but my all time-favorite was at WZYQ-FM "Z104" Frederick MD in the early 80s, and went:

If God had intended for man to listen in mono, he would have given him only one ear. <stereo zapping sound effect> Stereo Rock, Z104!

I wish I had it on tape <g>...

# 3829. New station on new AM subband: WJDM on 1660 KHz, heard in north NJ

Newsgroup: rec.radio.broadcasting
Date: 1995-12-20 00:00:00 UTC
From: wa2ise@netcom.com
Message-ID: <4b8bum$5dg@vixen.cso.uiuc.edu>
Source record: 27761
Cross-posted to: rec.radio.broadcasting,rec.radio.shortwave,rec.antiques.radio+phono

Right now, as I type this (Tuesday night Dec 19, 9:18 PM EST) I am listening to a station at 1660 KHz, call "WDJM". It's local, Elizabeth, NJ.
So far, this station has only played oldies (for the last 50 or so minutes). At 9:22 PM EST, a jingle "the first station on the extended band".

Radio equipment: First tuned in this new station on an old "All American 5" vacuum tube radio, and then used a GPR-90 communications SW radio to get confirmation that it's really there and to hear it better.

to make an older radio tune the new subband (1600-1700) you need to identify the local oscillator coil and adjustment cap, and the antenna circuit coil and cap. Tune in a station at the top of the dial, a station you know the frequency of. By adjusting the local oscillator trim cap (that screw on the tuning cap, another screw on this cap is the antenna trimmer). "Walk" the station down the dial by small increments, and tune in the low end of the AM band 540 to verify you haven't lost it. Adjust the oscillator coil (if adjustable) to get the 540 end of the band back. Increment both adjustments several times, back and forth. Also when listening to a station on the top nd of the band, tweak the antenna trimmer to increase signal strength.
Don't do this unless you're familiar with aligning radios, practice on a radio you don't care that much about first.

## 3830. WCAU Philadelphia

Source record: 27763

The following is an EXCLUSIVE of the San Diego Radio Watcher. News media using this post, please credit Christopher Carmichael. (c)1995 Christopher Carmichael

KKBH's morning show personality Brian Whitman and executive producer Jack Silver were fired today by GM Susan Hoffman.

Whitman did his show; and was asked to see GM Hoffman after the end of the shift. Station personal of KSDO and KKBH heard a very "vocal and language intensive" argument in the halls of the Gannett station. Jack Silver came to his partner's defense and both were "immediately released."

This comes on the heels of "upheavel" at the Beach, with the expected format of 70s music to change. Since the Gannett station changed to the disco-pop music, the trends and overall numbers are down drastic. It was reported that the format and personel change could "happen at anytime," and most likely after Christmas.

The Gannett station did not return any phone calls from myself.

(c)1995 Christopher Carmichael, News media, please credit.

Bob Smith wrote:

> AT40 was based on Billboard's Hot 100.

Not quite in its last few years. Sometime in the early 90s they switched from using the Hot 100 to using the Hot 100 Airplay chart. That's when I lost interest in it (previously it had been the only countdown to reflect the combined-sales-and-airplay nature of the "main" chart in a publication like Billboard or Cash Box).

> I don't know if Rick Dees' rival Weekly Top 40 show [...] is using
> that chart now or something else.

I haven't checked _very_ recently, but as of a few months ago he certainly hadn't switched from using R&R's, which is what he's been using for a dozen years or more.

> is anyone else doing a national CHR countdown?

Last I checked, the Top 30 Hit List (until last year hosted by Adam Curry, don't remember who hosted it the last time I caught it) was still around.

Here in Los Angeles that's the only one that's run for the last couple years besides Dees. KIIS-FM is the only CHR in the area, and that's Dees' home base, so obviously they carry his show, 6..10 am on Sat and repeated 9am..1pm on Sun. Last time I tuned in that early they were still putting the three-hour Top 30 Hit List on Sun am _before_ Dees (tho for a long time starting at 5 or 5:30 am, then interrupting at 6 for a half hour or hour of public affairs programming before resuming the Hit List!).

I haven't heard AT40 in this market since top 40/rhythm Power 106 (KPWR) dropped it a few years ago (a while after it switched from the Hot 100 to the Hot 100 Airplay chart -- which, of note, made it reflect the rap and dance records that Power 106 plays _less_ after the change!).

And I've never heard Casey's CHR countdown in this market since he split from AT40. But, again, with only one CHR in town and that being Dees' home turf, what else should I expect? (I should be thankful for small miracles; there is _no_ mainstream CHR in NYC or DC right now from what I hear!)

There are quite few Canadian native stations operating in this manner.
The premise is that in areas which are not covered by treaties, Native
peoples are not covered by Canadian broadcast law.

In a couple of locations the CRTC has very politely asked station
owners if they would "accept" a licence, and some have.

CKON at Akwesasne (with studios right on the US/Canada border near
Cornwall) has been operating quite successfully (and profitably) for a
number of years, with no licence of any sort.

# 3835. Is radio willing to hire young talent?

Newsgroup: rec.radio.broadcasting
Date: 1995-12-20 00:00:00 UTC
From: Aaron_Schatz@brown.edu
Message-ID: <4b8btj$5bq@vixen.cso.uiuc.edu>
Source record: 27767

Note to William Pfeiffer: please post this to AIRWAVES/r.r.b., as well as Radio Pro.

Well, I haven't written or posted in a while, but a letter I received today made a posting a necessity. A few weeks ago on the RadioPro digest there was a discussion of whether radio was developing any young talent. In addition, on rec.radio.broadcasting, there was a post from a man who wanted to get into radio, and the fellow from Bakersfield (I don't remember your name, sorry...) responded to him not to try to get into radio. Therefore, I think it is important to tell my story and seek advice. This is long, I know, but I am hoping it will spark discussion on both RadioPro (which has been very quiet lately) and r.r.b., and I hope that I can get response from PDs, since this is a hiring issue.

I am a senior at Brown University and a morning show DJ at 95.5 WBRU Providence. Now, despite being a "college station," i.e. with a staff of unpaid college students, WBRU is a fully commercial, professional "Alternative" station. We have a professional sales staff and a professional PD. We face competition from a fully professional station 99.7 The Edge WDGE, which has all paid DJs and is consulted by Jacobs Media. We have a 3.4 rating in the #31 market in the country, higher than both WDGE and WRX (Classic Rock). In fact, for the summer books we were #2 in Providence for Adults 18-34, and we pull a pretty good 25-54 demo as well (four times higher than our Alternative competitior WDGE).

I have worked at WBRU for 3 1/2 years now. I have been a disc jockey for a 1 1/2 years, starting with overnights and eventually reaching my present status as daily morning show jock. This is not "college radio" where I ramble on for five minutes and then play some song no one has heard of - I deal with traffic, news, and snow closings, we have a tight playlist, and I do breaks about bands and Providence mayor Buddy Cianci, not what's being served at the cafeteria today. Before DJing I was a news anchor for 2 1/2 years (there was some overlap where I anchored and did overnights...). I interviewed senators and governors, I served as Sports Reporter (ESPN's Chris Berman also started his career as WBRU Sports Reporter), and I wrote and anchored daily newscasts.

I decided early on that this is what I wanted to do with my life, despite the fact that with an Ivy League Economics degree I could make a lot more money doing something else. Talk radio is my hopeful destination, and I spent a summer working for Dennis Prager (middays on KABC in Los Angeles). Sports is also an interest, and I'm a big fan of Jim Rome on XTRA in San Diego although nobody can copy his schtick. Of course, rock radio is an obvious interest as well, and the most likely starting point given my age and musical knowledge. But the best place to start, I figured, was with a

part-time job in my last semester. A couple of weeks ago, a job for Saturday morning news anchor in Worcester, Mass was posted on r.r.b., and I applied by sending a resume and tape. This was my response letter:

"Thanks for sending a tape and resume to WXLO. I listened to your tape, and have decided that while you have a good voice quality and presence, you don't have the writing or anchoring experience needed for the news shift on WXLO.

We really need someone who can handle storm coverage, breaking news, and jock cross-over talk. The position is for someone who is further along in their career.

I wish you the best of luck upon your graduation as you begin a job search in broadcasting."

Understanding that I should expect a number of rejections before I find a job, the text of this letter was quite depressing for a number of reasons.

First of all, I have no illusions about going from WBRU to a prime shift in Boston, let alone getting a job doing morning show in Sacramento or some other market which is of comparable size to Providence. I know that despite my extensive news and jock experience, I am going to have to start small. But a once-a-week Saturday 6am news slot on a music station in a small market like Worcester, Mass. is EXACTLY where I figured I would be starting. If I don't have enough experience to do this shift, what job do I have the experience for? And addressing the issue of young talent in the business, what about someone who hasn't worked at a top 10-rated station for 3 1/2 years? What kind of job can they get?

In addition, the letter says my voice timbre is not the problem, but it mentions specifics which are things I couldn't fit on a short aircheck tape. Obviously I have dealt with storm coverage in Providence, since we get the same weather as Worcester which is only 30 miles away, but I didn't think this was an important thing to take up aircheck time with. I have done breaking news as well, but that was not on my aircheck tape - since I haven't done news in a year, I read a sample newscast because my old news tapes had been stolen (Besides, honestly, there is not much breaking news on Saturday mornings - that's why it's a good starting point). As for jock cross-over talk, I've done it on both sides (as a DJ and newsguy) but I didn't bother to include any DJ patter on a sample news tape. Was I wrong in not including these things on a tape?

The purpose of this message is not to complain. Rather than stewing in my anger and confusion, I'd like to turn this experience into something than can help me get a job after graduation. But as radio staffs become smaller and older, where is the place for younger talent in this business? If working at a station with a 3.4 rating in a professional, directly competitive situation is not enough experience, where do I go for better "experience?" What about the guy who wants to come into the industry cold, with no experience? I constantly read RadioWatches in r.r.b. which announce that new talent has been hired, and almost always it is recycled air staff

from larger markets or even the same market. Where is the place to begin? Eventually, old staff will be too old to hit a target demo, and somebody has to be hiring the next generation. I think I am part of that generation, as are my BRU co-workers.

Questions of where to apply for jobs, what to put on an aircheck tapes - these are questions that I must deal with in the next few months. I know I have talent, and I have studied radio on-the-job for 3 1/2 years as well as working with established radio people like Dennis Prager in order to learn. But am I going to have to just give up and go to law school like everyone else?

Please respond, espscially PDs.

Chuck is definately in Palestine Texas. He bought two stations there. The
confusion of the original poster with Oregon likely refers to Eugene,
Oregon. Richard(Rick)Dames bought a station in Eugene. Chuck worked with
Rick at B-Rock in Bakersfield and WVOC-AM/WARQ-FM in Columbia,S.C. They
sold out to Benchmark in 1995.
As to my earlier post about Benchmark here...More News!!!
Reliable sources say WVOC's latest PD is out by the end of the year.
Dames and McKay bought WVOC in bankruptcy in 1990. It had poor ratings
at the time. They brought in David Adair as PD. By last Fall (1994) the
station had an 8 share 12+ and was #2 25-54.A remarkable turnaround.
Benchmark bought the station in early 1995. WARQ-FM was bought by
the urban station here WWDM. WARQ has done fine. However WVOC hasn't
fared well.
Benchmark replaced Adair with Randy Hamilton as PD. The Summer 95
book showed WVOC with a 3 something share. I hear Hamilton is now out
as of last week. I believe Adair is actually still there as Production
Director...I've heard his name also as one of the engineers of the
University of South Carolina football broadcasts.
Also Benchmark owns WCOS-FM and WHKZ FM in Columbia. Many of the WCOS
crowd are longtimers and quite respected. I believe the GM has been there
since the 60's. Adair worked for WCOS in the 80's when they dominated
the market.
WVOC boasts also a great sportscaster by the name of Jim Powell.
Powell filled in as color man on the Minnesota Twins broadcasts. He's
only like 30 years old. He's been at WVOC for years.

# 3837. Boston Radio Watch 12-09-95( Repost)

Newsgroup: rec.radio.broadcasting

[I am resubmitting the following article because I never saw
it get posted the first time...]

* Arbitrends for September-October-November :

The rolling averages show no significant changes since the
Summer book. WBZ AM 1030 is well in charge of 12+ group. Pyramid's(
soon-to-be Evergreen's) Churban WJMN 94.5FM is widening its lead over
sister-station CHR WXKS 107.9FM which keeps adding more+more Top40 AP
to its playlist.[A sign of things to come?...Hmmm]. Complete fall numbers
will be released in January.

Summer '95 Arbitrends(Fall '95) Format
1.WBZ AM 1030 7.3 8.0 News/Talk/Sports
2.WRKO AM 680 6.6 6.6 Talk/Rush/Celtics
3.WJMN 94.5FM 5.9 6.5 CHR/Urban
4.WBCN 104.1FM 5.7 5.5 AP/Patriots/Stern
5.WXKS 107.9FM 6.1 5.3 CHR
6.WMJX 106.7FM 4.5 4.7 AC
WODS 103.3FM 4.7 4.7 Oldies
8.WCRB 102.5FM 4.2 4.3 Classical
9.WZLX 100.7FM 4.3 4.2 Classic Rock
10.WBMX 98.5FM 3.8 4.1 "Hot" AC

* move 'Em Up, move 'em down :

As November was coming to a close, Boston-based American Radio
Systems shook things up a bit in its upper management hierarchy :

Much respected Co-Chief Operating Officer John Gehron,48,
who's been overseeing only ARS' Boston operations(WBMX-FM,WEGQ-FM,
WRKO-AM and WEEI-AM) since coming on board in May '94 was
assigned to oversee ARS's stations in Detroit, Dayton, Philadelphia,
Buffalo, Rochester and Austin. [Note : ARS' Motown and Philly classical
music stations are recent acquisitions from another Boston-area based
operator -- Marlin Broadcasting; their sales are awaiting FCC
approval]. ARS's other Co-COO David Pearlman who was heading
ARS' stations outside Boston, will now be responsible for all
four Hub stations plus ARS' properties in Baltimore, Hartford,
and West Palm Beach.

On Nov. 1,1993, Pearlman's Hartford-based company,
Multi-Market Communications merged with Steve Dodge's Manchester,
Mass-based Atlantic Radio Ventures and Stoner Broadcasting of
Annapolis,MD to form American Radio Systems. ARS is now the 10-th
largest radio operator in the country...

No programming changes at any of the Boston stations were announced
but sources say that some are planned in the future.

In another interesting move, ARS re-assigned WEEI AM 850's GM
Ross Elder to become a GM of its West Palm Beach operations. He'll
be reporting to Pearlman. Elder was first brought in by Peter Ottmar
to manage the old WEEI AM 590 in March '94. He was given part ownership
of 590. When Ottmar(Back Bay Broadcasting) sold off WEEI's programming
rights to ARS, Elder moved to 850 frequency as well. In addition,
Elder owns 3 New England radio stations(WTYD-AM, WNLC-FM in New London,
CT and WCLZ-AM in Portland,Maine)

* A feud is brewing...:

The Boston market story of the year has to be/is Infinity's WBCN 104.1FM,
hands down. The 27-year powerhouse has undergone one of the most
radical transitions in its long rock'n'roll history. Over the last
few months, the station has quietly dumped that familiar trademark
AOR sound for more hip, trendy modern rock. Goodbye Aerosmith!
Hello Alice in Chains! This has also changed WBCN's approach to
local music scene -- it has become a major player in promoting
local+national rock'n'roll groups in recent months. It's the same
area in which Phoenix Media's AP WFNX 101.7FM has done a very good
job over the past 12 years. However, WBCN with its deep pockets, and
more importantly its powerful signal, is now trying to push the
alternative Lynn rocker off the battle field. WFNX and its corporate
owners are now striking back at "The New Rock" in different ways
and refuse to go down without a fight.

The latest example was "Xmas Rave" event held on Tuesday, December7th-
WBCN-sponsored modern rock shows in various clubs/concert halls around
the city. To promote the event, WBCN wanted to place a one-page ad
in WFNX's corporate cousin -- weekly alternative publication The
Boston Phoenix. The ad wasnt accepted. WBCN and The Phoenix give
different versions as to why the ad got rejected, but the
bottom line is -- we have a good 2-station feud on our hands and
it's going to get even more interesting. Forget about the current
country music war between WKLB and WBCS; WBCN-WFNX battle is the
real thing and it's good for the market,too; Boston hasnt seen
anything this good since the 80s when Kiss108 was going up Zoo94.5
or Hit103 or WBCN-WZLX bitter AOR/Classic Rock war of the early '90s...

* Programiing Notes :

-Nancy Serena has resigned from her job as host of ``Sunday Morning
Jazz'' on Greater Media's AC WMJX-FM (106.7). Serena, who has done
the show for the past 2 years, previously worked at the old
"Smooth Jazz" WCDJ-96.9FM(now WBCS 96.9FM). The 8am-12p show is now
hosted by Jackie Brush. Brush also hosts ``Bedtime Magic'' on weekends
on WMJX.

- WBZ AM 1030 will not be able simulcast the annual tradition --
Children's Hospital Telethon -- with its WBZ-TV sister station next

weekend...
On that night(Sat. Dec 16.) WBZ-AM is contractually obligated
to carry Bruins' hockey. However, the Bruins showed once again
that they're a classy organization by letting WBZ-AM join the telethon
during both period intermissions...

- Best Wishes go out to Hot AC WBMX 98.5FM's long time morning good
guy Joe Martelle who recently underwent lung surgery. Martelle is
currently recovering at home. He expects to be back on the air
sometime in January. Mid-day man Joe Cortese is filling in with
Martelle's AM-drive sidekick, Jodi Winchester. Recently-hired
DJ/producer Neil White is covering for Cortese...

* Obligatory Mentions :

In my previous Boston Radio Watch(11/22/95) I failed to mention
the following recipients of Boston's first annual "Achievement in
Radio Awards" which took place last month[Thanks to Susan R. for
keeping me in line :-) :

- Classical WCRB 102.5 won Best News Feature for "WCRB CEO
SPOTLIGHT" - over such news giants as WRKO-AM and WBZ-AM.

- All-sports WBPS AM 890's production boss, Rob Schuller,
was given an award for ``Best Production,''.

- WEEI-AM 850's Celtics producer, Howie Sylvester, won for
``Best Sports Coverage''. Sylvester produced a tribute piece to
the Old Boston Garden. It aired this last April during
Celtics' last game at the Boston Garden which was a playoff
loss to Orlando Magic. [In addition to changing buildings
this November, the Celtics also moved to WEEI's sister-station
all-talk WRKO AM 680 -- apparently a few spring conflicts
with the Red Sox which would shift C's from 850 to 680 didnt sit
well with Celtics' brass; they used a contract stipulation which
allowed them to move *all* their games to WRKO this season]

* Boston's WISH is now OASIS :

Granum's WSSH 99.5FM switched formats on On Wed. Dec. 13th.
Gone is the Soft AC sound of 'Wish 99.5' which was associated
with that station since late 70s. In its place, a trendy
Smooth Jazz/New Adult Contemp. format was re-introduced to
Boston airwaves at noon on Wed. Dec. 13.

Also the old call letters WSSH-FM("Wish") were replaced by
WOAZ("The Oasis"). With WOAZ, Granum management is trying
to duplicate its success in the Dallas/Ft. Worth market where Smooth
Jazz/NAC KOAI 107.5FM(Oasis) has been very well with an older
25-54 crowd for the past 3 years.

WOAZ is going jockless for 1 week. Most of the old Wish on-air
staff is not expected to be back. Among those who were not
invited back : 13-year morning man Jordan Rich and
much-traveled evening personality Delilah Oretega who came
back to Boston last January after her evening show on Philly's
WMGK-FM was cancelled.

Earlier this summer, Plymouth's 50,000 watt WPLM-99.1FM dumped
its AC format for SW Network's 'Smooth FM'. Now, 99.5 has joined
the game. The last Boston station to have this format was the old
"Smooth CD" WCDJ-96.9FM(1989-93).

The immediate beneficiaries of this change would probable be
the two remaining AC stations in town : Greater Media's AC
king WMJX 106.7FM(Magic 106.7) and to some degree Hot AC
WBMX 98.5FM(Mix 98.5FM).

Here's the text of PD Bill George's taped announcement :

"Hi, this is WISH Program Director Bill George with
a very special, very exciting announcement about radio in
Boston...You know for the past couple of years there's
been a trend in the music industry that for the most
part has gone ignored by Boston radio stations...The
style of music is called "Smooth Jazz" and it's literally
the fast growing format in America...Now, there've been
stations in town who've dabbled in "Smooth Jazz"...You
know, couple hours a week or trying beaming it in by
satellite from the West Coast or something...But, so far
no one has embraced it, made it a focal point and really
brought "Smooth Jazz" to Boston...Well, As of today that's
all changed! You see, as of today Wish 99.5 will be a thing

of the past! We know you've enjoyed music on Wish, but
we think you're gonna love what takes its place...So, it's
my pleasure to introduce the newest, most exciting
radio station to Boston...ever! This is "Smooth Jazz 99.5.
The Oasis"!!!

The Oasis is unique. You can tell by its name - Oasis - that
means a haven, the place to go for a relief...The relief from
all the stations in Boston that seem to be playing the same songs
over and over. That's how Oasis will be different. It's a blend
of today's "Smooth Jazz" instrumental artists like Kenny G. and
David Sanborn and Jazz and R+B superstarts like Sade and
Luther Vandros and Anita Baker. Plus, you'll even hear
some of your favorite pop contemporary artists like Vanessa Williams,
Whitney Houston and Phil Collins. Here's what the Oasis
sounds like : Kenny G <music sample>, Luther Vandros<musical
sample>, David Sanborn<music sample>, Anita Baker<sample>,
Dave Cozz(sp?)<sample>, Al Jarreau<sample>....

"Smooth Jazz 99.5...The Oasis"! We invite you to spend
the next week deciding if you agree that the Oasis is
the most unique, the most exciting radio station
that you've ever heard...WOAZ, Lowell/Boston...
"Boston's Smooth Jazz 99.5....The New Oasis".....

-Mark

# 3839. D.C. Radio Watch / 20 Dec. 1995

Newsgroup: rec.radio.broadcasting
Date: 1995-12-20 00:00:00 UTC
From: Max Cacas <76476.2472@compuserve.com>
Message-ID: <4b8btc$5ap@vixen.cso.uiuc.edu>
Source record: 27771

Greetings from the cold, icy Nation's Capitol, where the streets are slick, 280,000 government workers are getting the shaft *again*, and 1995 is crawling to a merciful end...

Herewith, a sampling of the radio biz news:

Item First: Back in the Saddle Again -- A tip of the ol' dipole to Paul Harris, recently ousted as morning host at WWDC-FM (rocker DC101). His "non-compete" is finally up on the 3-year contract he had with the station, and on Tuesday morning, December 12th, he returned to the airwaves, filling in for Victoria Jackson on WWRC-AM (980, talk) in morning drive. This Friday, the 22nd, Paul and his DC101/WTEM sidekick "Dave the Predictor" will fill in on the morning show at
CBS O&O "Arrow 94.7" (70s classic rock). And, next week (12/26-12-29), Paul takes his act to Trenton's "New Jersey 101.5" (News/talk), simulcast on a recently acquired Atlantic City station in the south end of the state, handling the Noon-4pm slot on this fine radio station. Before DC101, Harris had been the morning man at
WCXR-FM (105.9) in its "Classic rock" format days.

Item Second -- "Knowing When to Leave..." The Washington Post's "On the Dial" (radio) column recently reported on traffic reporter Brook Stevens, who, until recently did live traffic reports from a plane for ABC O&O WMAL-AM (630, NewsTalk).
Stevens, who works for Metro Traffic Control, recently grounded herself, and now reports from WMAL's studios, after her traffic plane's engine sputtered and died shortly after takeoff. The pilot got the plane restarted, and they landed safely, but it was enough to convince Stevens it was time to move the act to the safety of the ground. The Post reports she will read information provided by Metro, with live reports from Metro's two other airplanes during rush hours.

Item Third -- Noted In Passing -- Robert Matthews III, a radio and tv news veteran of the D.C. and Baltimore area, died recently at the age of 75. Matthews started his career with the Baltimore Afro-American newspaper, and moved to WEBB radio in Baltimore in the 60s. He moved on to Hearst's WBAL-TV in 1966, and was promoted to News Director, the first black to hold such a position at a station in that city. Matthews later worked for NBC here in Washington, working as news director for WRC-AM/WKYS-FM (actually, I suspect that this was when WRC-FM was a beautiful music station, prior to the flip to WKYS). He returned to Baltimore in '78
to edit a supplement for his old newspaper, and was named executive editor in 1984.

Item Fourth -- A cover story on the Post's "Style" section for Saturday, December 16th, 1995 outlines the recent format "shift" of rocker DC101 (WWDC-FM) from hard rock to the now-in-vogue "alternative" sound. While the station says

it hasn't changed formats, a listen to the station shows their playlist now moving toward "modern rock/alternative" WHFS-FM (99.9), featuring more Cranberries, Blues Traveler, Hootie & the Blowfish, Natalie Merchant, and others. For that matter, a listen to WHFS reveals them edging further in the direction of the "Top40" flavor of the "alternative" format, with lots of the top tunes in hot rotation, and some formatics
(lots o' liners and jocks periodically talking up intros) that sound more reminiscent of some of the best Top40/CHR stations, in my opinion.

Item Fifth -- Silly ID department, DC Division -- Recalling the recent "Silly ID" here on "Airwaves"/rec.radio broadcasting, the Post's "On the Dial" column for December 19th notes the silly id/liners now running on WBIG-FM ("Oldies 100", 50s-60s oldies). Among them: "Of all the radio stations in Washington, we are one of them."; "Oldies 100 is more than just a radio station...no...actually...we *are* just a radio station."; and, my favorite (take this, research weasels!): "We asked people what they wanted in a radio station, and they said 'We're tired of people asking what we want in a radio station!'" <grin> PD Steve "Allan" Mazurowski, who was also responsible for the success of CBS' oldies outlet in Boston prior to "Oldies 100", says "We're trying to have fun". Good for you, Steve!

Item Sixth -- My Christmas Stocking -- In my final Radio Watch from D.C. for '95, I thought about a few things I'd like to see in the coming year (my opions, you don't have to agree, and I don't want to hear about it, ok?). 1) A mint-condition black-vinyl copy of 1976-77's TM "Tommorow Radio"/jingle sampler demo to replace the one that was stolen from me a few years ago. (I have a cassete copy that's showing the effects of time...) 2) Some really well-done, locally originated talk/newstalk/all-news stations here in the Washington area. Without being specific, the stations pretending to do these formats now are a disappointment in the extreme (too much satellite-delivered talk in this market. IMHO) , and represent a wide-open opportunity for someone who is creative, and able to effectively market and promote programming from these formats. (CBS/Westinghouse? WOR? Here's your wake-up call!) 3) Finally, that all my friends and colleagues here on "Airwaves"/rec.radio.broadcasting have a happy holiday season, and a bright and profitable 1996!

Because of work and family obligations, our next D.C. Radio Watch will be filed shortly after New Year's.

Cheers,
}+{ Max Cacas
}+{ Freelance Broadcast Journalist * Washington, D.C.

```

-WYLF(850,Penn Yan;MOR)and WHTK(1280,talk;Hot Talk 1280)did not show up on
the list.

*Accu-mess:Don Paul v. WBEN....

Don Paul,chief meterologist at WIVB(ch.4),was none too happy over his dismissal at WBEN(NewsTalk 930)'s top weathercaster,as Alan Pergament notes in his Buffalo News column Friday. Paul said he was told that his services weren't needed on Nov.30,10 minutes before he was to do an afternoon cast, adding that when he threatened to leave this summer over days off(which was resolved),managment asked him for a month's notice. He also said that he believed that the firing was money related('BEN paid him about $1,400/ month for supplying weather reports and jokes during AM & PM drive),and that River City('BEN's owners)can save some cash becasue Accu-Weather serves a number of its stations.
Greg Ried,WBEN's new GM,doesn't necessarily agree with Paul. Ried said that Paul was treated like any other employee leaving-he was given 2 weeks severance pay. As for the cost of changing to Accu-Weather,Ried said that the cost is mimimal(my guess is due to some new equipment-probably ISDN lines or via satellite;either way,it sounds better than when it came in over the phone-when either Paul or Jim Lanson couldn't do the cast in the station). He added that the station had its eye on Accu for a while,and when WWKB(1520)announced it was going to satellite country,'BEN got it. (Personal note:when a new cast came in to 'KB-back when I interned there in 1990,it had to be recorded on a tape deck in the main studio,to the right of & behind the control board.) The switch,Ried said,allows for live reports around the clock every day.

*Frank Lorenz,the president/owner of WBLK(93.7),will leave those positions on January 1. The 46-year-old Lorenz is the son of the late George "Hound Dog" Lorenz,one of the pioneering area DJ's who first started locally in 1949. George founded WBLK in 1964,which bills itself as the first U.S. FM station to feature a predominately black-geared format. Frank was only 22 when he inherited the station in 1972,after his father's death-few expected him to last more than 90 days. Lorenz recently sold 'BLK to American Radio Systems(which owns 2 other FMs as well as WECK/1230;if approved,it would give ARS an FM triopoly and an overall quadopoly),but not without emotion; Tony Violanti's piece in Friday's Gusto section said that when Frank told the staff he'd be leaving,"I practically broke down in tears. It's a very emotional time."
He got emotional again on Sunday,when the station threw a farewell party for him-noting that 'BLK's sale "marked the end of an era....the last of the locally owned independent stations."(Not as long as WNUC is owned by John Casciani.) PD Eric Faison said that Lorenz "epitoomized loyality,compassion and commitment." As for the future,Frank said he'll be taking some time off, but he added that "I'm an intense guy and I just can't sit back and do nothing."

*CKEY(FM 101 The Planet)'s revolving door that is its morning show welcomed another victim(er,DJ)to AM drive...Dave Justice started up in that spot last week. So far,the Planet has gone through 5 morning jocks in 1995- Jon Summers,Kerry Gray(now in Denver),Scruff Connors,and "Airborne Eddy" Dobosiewicz.

*Best laugh you'll get in a while:Terry Rodda,VP of River City's 4 stations,saying "we're going to have a unique format and I think it should do really well"-referring to WWKB's new satellite country format. Terry:would you mind telling me how a country format plucked down from 23,000 miles above Earth will be unique? In that you can hear it in stereo? In that it won't be local? How? >:>

*Former WUFX PD Bob Richards got himself in some hot water at his new gig-PDing Denver's KBPI. KNRX's PD,Bryan Schock,filed criminal trespass and harassment charges against Richards aftert the latter allegedly planted a turkey on Schock's front yard early Thanksgiving morning,with a large sign reading,"Bryan,unlike thius bird,your goose is cooked. This will be your last Thanksgiving in Colorado."(The station's van was also parked outside.) Richards also told Radio & Records' Street Talk column that he'd gotten a restraining order which prohibits him from going within 1,000 feet of Schock's residence,workplace or any other place Richards knows him to be.(from R & R's web site:www.rronline.com)

*In Utica,Shannon Steele steps in as the new PD of WKDY(102.5),replacing Sam Zema. The call also change to WSKS,but the Kiss 102 handle and the CHR format remain as is.
Also,Scott Stevens-night talent at WNKI in Elmira/Corning-now will be getting up earlier-he'll be doing wake-up duty at WWKZ in Tupelo,MS.
(both items above from Joel Denver's AllAccess-www.allaccess.com)

*To paraphrase the old Fram commercials:You can read it here now,or read it later somewhere else.
Tony Violanti's column in last Wednesday's News brought us the hot news that Jerry Reo is working the PM drive shift at Rochester's WVOR (100.5). Big deal-that made r.r.b./Airwaves in September. And,he forgot to mention one other WGR alum now working at Cleveland's WWWE(1100),besides Rich Michaels and news reporter Pat Brogan:Craig Edwards,3WE's ND(as he was at 'GR).

>>
>>
>
Hi,

We're in the same boat. I'm determined to break into radio also.
Here is what I'm doing:

1) I bought time on a brokered station. I did my first show last
week. Sent out the air check to program directors. My opinion:
take any money you would put into a school and put into buying
your own time.

2) My goal is to be a talk show host. If that's your goal do
three things: 1) Prepare!!! 2) Have something to say and make it
coherent. 3) Be a good listener.
Since I have a background in sales and business let me share this
simple piece of advice with you: the best salespeople are the
best listeners.

3) Don't listen to the "rules." For instance someone earlier said
that age is a factor and people are more comfortable taking a
chance with someone younger. Hey, I'm 50. He's wrong. People want
talent. They don't care if you're half dead, as long as you can
pull an audience.

4) Work hard. Talk to everyone and everyone you can. Take a grunt
job if you have to just to be near the action.

5) Listen to other talk show hosts. Listen for their mistakes.
Most of them are not good listeners! They compete with their
callers. Very dumb. Most of them do not thoroughly prepare for
their topic. You can tell because they keep on repeating the same
points over and over. For my first show I was prepared to talk an
hour straight with no calls if that's what it took. I got 8 calls
and people were thanking me for talking to them. I'm doing my

second show tonite and I expect it to go better than my first.
Prepare! Practice listening. Practice communicating.

The secrets of success in this field are the same as any other
field. Whether it's medicine, acting, accounting or whatever.
Work hard and work smart.

jz

>there's currently no technical standard. The rest of the world seems to
>have settled on Eureka-147, but there's no spectrum available in the
>U.S. to implement Eureka for terrestrial DAB. There is an S-band
>allocation for _satellite_ DAB, though.

Inside Radio reports this morning the National Telecommunications and Information Administration and the Aerospace & Flight Test Radio Coordinating Council have approved testing L-Band Eureka 147 in San Francisco beginning in February. Announcement was made by the EIA.

Even though there is widespread opposition to L-Band DAB by USA broadcasters and their mouthpiece, the NAB, the rest of the world has adopted L-Band Eureka 147.

Seems it will be difficult to force an In-Band-On-Channel DAB system as the NAB hopes and prays. In order to avoid disturbing the asset values in the radio industry, IBOC effectively attempts DAB as an add-on much as stereo was to both AM and FM.

The NAB is a superb lobbying organization. But despite all the clout and PAC contributions, the real problem attempting to ram IBOC through in the USA is the NAB's utter failure to get the laws of physics repealed.

Rich,

You hit the nail right on the head. These guys, who would probably scream to high heaven if the same thing were done to them, justify their shenanigans as "entertainment" and "just a joke". And people legitimize their nonsense by listening, and fattening the coffers of the radio stations/networks that distribute their shows.

Its all the same thing, really... Don and Mike (a couple of guys who used to be funny on WAVA-FM until they felt the need to stoop to Stern's level, a really and truly shame)...Stern who thinks his satellite show is an excuse for cheap shots and self-righteous attacks on people thinly disguised as "radio" ...and Mancow tieing up the Golden Gate Bridge in a ratings stunt marginally tied to some minor, now-forgotten Presidential thing...it seems that *anything* is justified by these performers in the interest of their shows.

I think fondly of the *really* funny radio shows of Hudson & Landry...Bob & Ray...
Harden & Weaver...the Joy Boys (Ed Walker & Willard Scott)...and think about how the Sterns & Mancows & Dons and Mikes couldn't carry their headphones into a studio, much less top them in creativity and humor. They relied on wit, and creativity, spontaniety, and even a little humility, which gave them the ability to allow the listener to laugh *with* them, and occasionally laugh *at* them. They took no cheap shots or prisoners...and lasted on the air a lot longer than I suspect today's
"funny" guys even hope to last.

From: wallyaudio@aol.com
Message-ID: <4b8bur$5dl@vixen.cso.uiuc.edu>
Source record: 27782

In response to the twin WOAI question it's very simple....Clear Channel which owns multiple radio outlets in SA took over the former KSJL-760. I would guess that in order to spread the word among listeners and more importantly advertisers they attemped to tie the identity of the original WOAI with the former KSJL. I don't know the current calls on 760 off hand but I believe it's neither WOAI or KSJL. KTSA-550, locally owned, is also news-talk in San Antonio.

Message-ID: <4b8bur$5dm@vixen.cso.uiuc.edu>
Source record: 27783

My understanding of why there are two WOAI'S is this....the original WOAI has been talk since 1975 at 1200 and either bought or has the local marketing
rights to a station that's 76 on the dial that has mostly syndicated programming.
The station apparently wanted to get the most of the WOAI brand name.

From: bobw@panix.com
Message-ID: <4b8bv3$5e0@vixen.cso.uiuc.edu>
Source record: 27787

Could someone possibly answer the following questions regarding WQEW (1560 NYC) and New Jersey Nets basketball::

1) Why did WQEW decide to carry Nets basketball broadcasts several years ago?

2) Why did WQEW stop carrying Nets basketball broadcasts a month ago?

3) Why did WQEW start carrying Nets basketball again?

IMHO, Nets basketball does not belong on WQEW. I have nothing against basketball, but I feel that sports broadcasts, in general, fit much better on sports or talk format stations, and not on a music station such as WQEW, particularly one which caters to a niche audience.

TA>Your organization (WOR) does very nicely programming a
TA>varied mix of talk...
TA>I look at you, and at stations like KABC or KGO, and wonder
TA>this...even independent of ratings, do broader-based, less
TA>politically typecast talkers do better FINANCIALLY and
TA>attract more advertiser support than the partisan ones? It
TA>kind of looks that way...

Bob,
Non-political talk attracts advertisers. There are two very different kinds of stations. One requires high ratings and sells its time based on what we call "tonnage." Lots of bodies. On the WOR Radio Network we program "Smart Money with The Dolans" as 100% counterprogramming against Limbaugh. The show is entertaining and goes after the approximately 96% of the population that isn't listening to Limbaugh. It's a very profitable show. No advertiser has ever said "don't put my spots in The Dolans." The show makes advertisers' phones ring and they sell products while entertaining audiences. We don't expect the show to beat Limbaugh. We expect it to counterprogram him and make money.

Stations tell me that, while they get good numbers with Limbaugh, it's very hard to sell to advertisers. For example, Limbaugh practically made Snapple a household word. The previous owners sold the company to Quaker and Quaker, foolishly, dropped the show because it's "controversial." More and more advertisers are asking networks to inform their affiliates NOT to place their spots in such shows (61 national advertisers, so far). Frankly, I think it's a stupid move, but it's their money.

Add the recent activity of Bill Bennett and his "Empower America" (squeeze advertisers until they do what we want) group against what they consider "improper moral values" and you have squeamish advertisers looking for safe havens.

Stations with broader based programming attract a broader base of advertisers. Current Talk Radio is losing credibility. We hear endless Clinton bashing. We hear virtually no in-depth discussion about Newt Gingrich's ethics problems. If we do, it's diatribe about how "liberals" are attacking poor Newt. We hear endless comments about how Clinton didn't serve in the Military. Most of it comes from Talk Show hosts who also never served in the Military, yet feel competent to analyze the President's reasons. One of them was excused from serving because of a pimple on his butt, or inside it.

This kind of dramatically one-sided programming, I believe, is beginning to burn. I see shows like Dr. Joy Browne, Laura Schlessinger and other more mainstream shows taking off and replacing strident political shows. I believe that 1996 will see fewer stations doing political talk. At the most recent NAB, many Program Directors asked me about non-political shows. They see their political stuff being extremely vulnerable to things like OJ coverage. The market is glutted with right-wing talk. Each host is saying the same thing the others are saying. No variety. The only thing that differentiates one from another is individual schtick, not substance. One plays parodies, another is black and wears a hat, another is a crooked superhero, another is a consultant and another is an ex-con.

I've had more station response over bringing Joey Reynolds to Talk Radio than any political host I've ever had. Don't forget that we're entering a period of intense political activity. Stations doing politics will be drowning in negative political spots, negative political talk shows, negative newspaper articles, negative political TV interviews, etc. Every waking hour will bombard us with negative politics. We'll all be calling Dr. Joy Browne for relief.

In a nutshell: WOR is very profitable doing broad-based talk without a hint of hate.

Rich

## 3860. Mancow and Stern

Newsgroup: rec.radio.broadcasting
Date: 1995-12-20 00:00:00 UTC
From: Dan Kelley <71224.753@compuserve.com>
Message-ID: <4b8bu0$5cg@vixen.cso.uiuc.edu>
Source record: 27792

In AIRWAVES #1693, Marv Kaminsky writes:

>>I remind all that it was Mr. Mueller ("Mancow") who actually mailed a box of excrement to Stern's office, which was then opened by an intern who was extremely upset by the incident. That's not part of a show.<<

I'm not a big fan of either Stern or Mueller, but I find it very difficult to believe that anyone working with Stern's program would be "extremely upset" by such an incident...if so, its strange said person isn't upset by Stern's program content and his verbal assaults on others...

richwood@commspec.com wrote the quoted material below:

" What makes you think that there wasn't someone, somewhere, thinking
" of "plunger rape" before the movie was shown? Why don't we have copycat
" everything, if people are so ready to imitate what they see?

There weren't any plunger rapes of little girls before the movie was shown on KRON-TV, and I haven't read of any since the month that happened. No, the kids were not plotting this beforehand. You know this as well as I do. And yes, it did come out in court that the kids *had* been watching KRON-TV and got their idea from seeing it on TV.

Are you going to tell your ADVERTISERS that radio and TV can't induce people to do things? This is the whole premise of commercial broadcasting. Run and ad and get people to do something they wouldn't normally do -- buy something. And the facts bear this out. People WILL do what broadcasters say.

Because they have such a tremendous influence over viewers/listeners, broadcasters have a responsibility not to portray situations which can influence people to do dangerous things to others.

ZO>I think that's taking it out of perspective. Advertising and programming
ZO>are entirely different. Advertising aims to direct a purchase which will
ZO>be made, regardless. We want them to purchase a particular brand when
ZO>they make that purchase.

Bob,
I'm afraid they're not entirely different. Kids TV is very often nothing more than animation of the toys they're pitching. Power Rangers, Transformers, etc. are/were program length commercials. Radio stations that broker time carry programming created by the advertiser to peddle their products. Radio Infomercials. TV Infomercials are now running virtually everywhere. One major market Talk station (WWDB, Philadelphia) offers advertisers commercial interviews on its morning show. I can only imagine how humiliating it is for a Talk Show Host to have to make some awesomely dull suit sound interesting while discussing toilet cleansers as a topic. The roar of dials being changed is deafening. The station will disappear as a factor in the morning drive ratings.

Rich

WOW! I didn't know Dan Ingram was still alive, much less still on the air! I've been away from New York for close to 14 years now, and i remember when Ingram did his afternoon show on WABC-AM way back in the '60s and '70s. As for NBC and General Electric, I'm surprised that you would fail to mention that NBC's original corporate parent, RCA, at one time also owned General Electric, only to later divest itself of it. And contrary to popular belief, GE purchased RCA, not NBC itself, and absorbed RCA into G

E, making GE NBC's corporate parent. Ironic, isn't it? Only in the business world can a parent give up its offspring and later the offspring swallows up its parent -- in the process turning its one-time sibling into an offspring!

Here in San Francisco, KALW-FM does precisely that. It's an NPR
station, but unless the program material (e.g., a music program) is
stereo, the chief engineer transmits in mono. Since the signal is only
1900 watts, that helps a lot. In fact, KALW has much better coverage
than it ought to, solely because of the quality of the signal. Credit

>
>Wasn't WBLS using the calls WLIB-FM in the early 70's?
>And wasn't WMXV using the calls WNSR before the current calls?

You are correct.

Inner City bought WLIB-FM in 1970 and took and option on WLIB(AM), which they later did purchase. The original WLIB-FM went on the air in 1963. It operated from 4PM until Midnight. Due to the different format, (AM was R&B, FM was stricly Jazz), WLIB(AM) technically simulcast the FM from 4PM until it's sundown signoff. Within a year WLIB-FM was operating 18 hrs a day, all jazz. WLIB continued to simulcast from 4PM until signoff but when they got the post sunset authorization in 1967 or 68, they went 100% split.

WRVR did not go full time Jazz until after WLIB-FM was sold and Sonderling bought WRVR. WRVR's early format was mostly Classical with 35% Jazz, 10% AOR and a few talk/religous shows, (the station was owned by the Riverside Church and was an NCE on a commercial frequency).

I am thinking of starting an FM radio station in Africa covering about 30-50km radius. The problem is I don't have a clue on what is involved in running a radio station. I have a limited budget and I want to keep the running costs low. If possible I would like to use auto programming.
Could you shed some light on the following topics:-
1) Hardware required and their specifications
2)How to get the software (Music)
3)Programming and advertising tips
4)Any other help and sources of information

Thanking you

Job

# 3870. Redundancy...The Root of Talk Radio's Problems

Newsgroup: rec.radio.broadcasting
Date: 1995-12-21 00:00:00 UTC
From: Joel_Runes@email.fpl.com
Message-ID: <4bb2i0$bsk@vixen.cso.uiuc.edu>
Source record: 27652

Recently I've had the chance to listen to a number of daytime talk shows while driving back and forth across much of Florida. Two of the shows have been the subject of much conversation here on AIRWAVES: Rush Limbaugh and Laura Schlesinger.

I hadn't heard Rush's show in several years, but I was struck that within the first 15 minutes I was hearing the same thing I heard the last time. Not EXACTLY the same thing, since Rush's selection of news items that support his 2.5 basic ideas were different this year from a few years back. But enough the same that I am AMAZED that anyone could put up with hearing fifteen hours a week of a message that could be boiled down to 20 minutes. Saying the same thing again and again doesn't make it any more compelling, only more repetitious.

It hadn't been as long since I last heard Dr. Laura, but it had been long enough that she should have had time to move on to her next idea. But she hadn't. The first time I heard her "me, I'm my kids' [or kid's] mom" it sounded cute. The second time, a mere 60 minutes later, it sounded like I had heard it before. Is it presumed that the listener has a worse memory than a pet goldfish? Obviously she doesn't have fifteen hours of fresh things to say, so it's as unfair to her as it is to any radio listener incapable of changing the station for her to be on past the point of having anything original to say.

There MIGHT be a way out of this intrinsic problem (how many people do you know who have that many hours of new ideas a week?). A call-in show provides the opportunity for the callers to inject their ideas into a discussion and allow the development and consideration of new ideas. But most of the current crop of talk shows use a heavy-handed call screener and producer to make sure that even that avenue of originality is also thwarted. If a show is only about the ideas of the host and/or producer than the charade of callers should be dispensed with.

Obviously economics is behind the expansion of these talk shows beyond their natural endurance limits. Rush Limbaugh for two hours a week might be a far better radio show, but it would be much less lucrative for the syndicator and the affiliate (being able to amortize promotional efforts over 15 hours/week is easier than amortizing them over 2 hours/week). The economics of radio these days seems to be a case of watering down the soup.

"Very profitable...without a hint of hate."
Suspicions confirmed. Of course, even if a station wants
to exploit the ongoing interest in politics that a lot of
people have, without turning off a lot of its listener and
advertiser base, it can do so by broadening its menu of hosts
and ideas the way SOME of the CapCities/ABC stations have
(and the way WABC will eventually have to do if it doesn't
want to sink under the combined pressure of WOR and the
CBS/Westinghouse duopoly). A station can be a meeting place
instead of a mouthpiece. When stations that go that route are
so uniformly successful as businesses (and last time I checked,
radio WAS a business) how come more stations don't use them
as a model?

richwood@commspec.com wrote the quoted material below:

" This kind of dramatically one-sided programming, I believe, is
" beginning to burn. I see shows like Dr. Joy Browne, Laura Schlessinger
" and other more mainstream shows taking off and replacing strident
" political shows. I believe that 1996 will see fewer stations doing
" political talk.

I can say that as a one-time talk host and long-time talkradio listener
that I burned out on contro-talk a long time ago. I don't think I've
listened to Limbaugh or Liddy more than once in the past year or two.
Today I listen more to NPR and PRI and other public radio programming.
I'm also in the 25-49 age group. Locally I notice that the non-commercial
stations such as KCSM (all jazz), KPFA (Pacifica), and others have made
substantial ratings gains these past couple years. Some of us are just
tired of the talk tirades.

The entry level jobs for announcer have been traditionally in the boondocks on bad shifts for near-minimum wage. Not exactly what you probably had in mind for all your cancelled tuition checks.
Unfortunately, the proliferation of satellite programming has eliminated a lot of those entry (and mid-level) positions. Not a wall, just a hurdle.
In this business (as in many others) there are plenty of people who are willing to tell you that you can't make it. As long as you don't buy into that concept, you'll be fine.
Persistance is your key.
Meantime, get as much legitimate education as you can. Radio is full of people with high school educations who find their options somewhat limited as they get older. That jock gig that sounds like Nirvana at age 22 can look a lot like a dead-end job at age 40.
If you're serious about becoming a talk show host, go ahead to Law School and get your JD. The training in critical thinking is excellent and it expands your options as you go through your career. Do it now while you're used to being tuition-poor and before life's responsibilities start to pile up on you. Education is like good grades: It is never going to hurt you, and it could help.
Don't lose sight of your dream.
Good Luck
Tom Parker

Don't know if this is kosher or not, but I'd like to offer a free,
:60 feature to all interested Texas stations. The Lone Star Consumer
Tip is updated weekly and includes information on food preparation
and nutritional information and yes, it's free.
These PSA-style features are highly produced and include tie-in music (ie:
blueberries-"Blueberry Hill," etc..) and interviews with health
authorities. They fit in with every demographic and format
....and did I mention that they're free?
If you're interested, privately e-mail me...

WJDM was loud and clear in Des Moines, Iowa tonight. My understanding is that these stations will be licensed for 10,000 watts daytime, 1,000 watts nightime. Was that monster signal I was hearing tonight only 1,000 watts? Of course, a clear channel really helps.

I thought the FCC had withdrawn their original allocation plan. Does this station have some kind of experimental license. I would certainly have thought that the early stations would have been on 1610 and 1620.

The show was ''The Hap Richards Show'' which ran 9-9:15am on WTIC/ch 3
television. He also had a seperate character ''Mr. Mayor''

The big thing on the show was to announce local kids birthdays. He'd introduce
a 'role' of birthdays which would scroll up the sceen with a hearty ''Haaap-pyyy
Berthhh-day'' <Note the hick accent>

Ah.... Childhood memories. Nostalgic at best.

# 3879. Radio Aircheck

Newsgroup: rec.radio.broadcasting
Date: 1995-12-21 00:00:00 UTC
From: deejay@musenet.org
Message-ID: <4bb2h9$brl@vixen.cso.uiuc.edu>
Source record: 27718
Cross-posted to: alt.radio.college,alt.radio.digital,alt.radio.pirate,rec.radio.broadcasting,bit.listserv.radio-l,alt.music.makers.dj

Hi,

I recently made an 8-minute "aircheck" tape consisting of various segments which I have recorded throughout the fall. I am currently looking for an on-air job or internship at a radio station. If you could listen to my tape and give me feedback or if you could give me any assistance, please e-mail me.

At age 10, my interest in radio began when I became a regular caller on Cathy O'Connell's show, Kids Corner, on WXPN. I proceeded to take a course directed by Cathy O'Connell at the University of Pennsylvania, learning the basics of radio and producing a program with her. I started building my own radio station in my attic, which eventually included a Peavey Production Mixer 902, 3 cd players, a DCC digital recorder, two reel-to-reels and a cart machine. I broadcast my "radio station," Q105, with a legal Ramsey transmitter down the street! Online the Prodigy Radio Bulletin Board, I started Teen Voice USA, a monthly teen show which included interviews and music targeted at teens. We discussed the show online, and I compiled members' tapes into the edited one-hour show aired on Q105.

Currently, at age 16, I am an intern at Y100 in Philadelphia. Most of my experience at Y100 is in the Promotions Department with Lynne Jeanrenaud and Dave Burgess; however, Y100 has also exposed me to hands-on production and engineering work.

If you would like a copy of my aircheck tape, please send your name, station, and address to deejay@musenet.org. Thanks!

Hello all AIRWAVES and rrb readers.

As of 12/22/95 and until at least 12/27/95 the moderator of AIRWAVES/Rec.Radio.Broadcasting is taking a vacation from the net to be with family and friends for the holidays.

Please do not submit any articles after the 22nd (tomorrow). If you do they will just pile up here on the spool until I return to see to them, and if there is an overwhelming number in the spool I may be forced to arbitrarily dump some of them which I *never* do otherwise.

So hold your posts to this group until at least the 27th, or until you hear from me that I am back on duty.

In case any of you wonder, I moderate this group on a daily basis with no financial compensation what-so-ever. I am a total volunteer. All of my net expenses are paid out of my pocket. I have been doing this constantly since 1991. Christmas is one of the only times that I take a vacation from this task, so I hope you understand my need to be away.

Have a wonderful and joyous Holiday, whatever Holiday you celebrate. And be sure to spread your spirit around. Do something nice for someone else, try to savor the warmth and beauty that this Holiday is supposed to represent, rather than the commercial fiasco it has become.

God bless all of you, it continues to be a blessing for me to be here.

William Pfeiffer
Moderator: rec.radio.broadcasting/AIRWAVES RADIO JOURNAL
wdp@airwaves.com * wdp@wwa.com * airwaves@woodtech.com
Web: http://radio.aiss.uiuc.edu/~rrb/

P.S. If anyone is interested in help designing their web pages, I am now seeking full time, part time, or freelance work in that area. Please contact me with your needs and we'll talk after the New Year.

Finally the day has come : the new Website of Radio Vlaanderen Internationaal, BRTN's world service, is on line since December 1. The old Website was refurnished and contains a wealth of information on RVI, its 50th anniversary, programmes, reception, International Listener's Club and much more. RVI also puts you on the way to a series of interesting Websites.
Information on our Website is available in six languages : Dutch, French, German, Enlish, Spanish and Arabic.

Shortly you will be able to read the RVI news on our Website, or listen to it via Real Audio.

It is worth your while to call on
http://www.brtn.be/rvi/

Actually, the CRTC has opted for the idea that as long as they don't interfere
with other "legal" operating stations, they dont seem to mind so much (what
kind of enforcement could they send in anyway? Remember Oka?).

Random Suggestions:

Take a day job and try to get a part time position at
one of the larger radio stations in your area (they usually
have the largest staffs). You can usually find a job for
office help, promotions help, etc. Then go from there.

Alternatively, you could try applying for a job as an
account executive (salesperson) at a local station (you might want to try
small stations for this as well, though). Be forwarned that
this is a very, very tough job.

Good luck,
Andrew

How much of the vicious competition is due to FCC deregulation and general downsizing of business? It's always been difficult to make a career of broadcasting, but are current economic and political conditions making it especially tough?

Also, I'm interested in how you would answer this question if the person was not primarily interested in being on the air, but was interested in some of the other radio jobs, such as program or music director, and the person had a number of different skills, such as electronics, computers, Internet, writing, etc.

If you're looking for broadcast training, I would just
go to a good college with a good radio station. The fact of
the matter is 1) radio is not brain surgery and you learn best
by doing and 2) you're going to want a degree in something else
to fall back on (ie, get a real major). It's my impression
that the broadcasting industry isn't what it used to be
opportunity wise.

<Shameless plug> WUVA, located at the University of
Virginia, is a student owned, student run commercial radio
station that survives entirely off of commercial advertising
(ie, no funding). We are in a small market that has more than
it's fair share of radio stations, and we must maintain a high
quality to compete. I cannot think of any better environment
to learn about radio, or business in general. </Shameless plug>

UM>When FM was introduced it took 20 years for enough new radios to be sold
UM>before FM broadcasting became generally profitable. Given that DAB
UM>would operate under a similar handicap, perhaps we should be looking at
UM>digital receivers for FM rather than digital audio broadcasting.

Rob,
The conditions are vastly different. When FM was introduced it was
a completely different band at a time when AM radio was still roaring,
full steam, as a novelty. Programming on FM was almost exclusively
Classical. People weren't as used to dramatic changes in technology as
they are today and radios cost a fortune. I love Classical music (just
ask Mario Mazza) and early FM was without commercials and was terribly,
terribly stuffed with "kulcha." When Bach wrote his cantatas, he did it
for cash. To make a living. Early FM made it seem like there was some
divinity surrounding Classical and you'd go to hell if you played an
isolated movement or mispronounced a name. It was, in a nutshell,
boring, stuffy and elitist. AM radio was exciting. It was showbiz.

Today, there isn't much difference between the bands, except that
AM is heavily Talk. Both bands reek of showbiz, often at the expense of
substance. The DAB issue will be, almost exclusively, a technology
issue. Whoever has the bucks to market it will win.

# 3896. College Station looking to change program format

Newsgroup: rec.radio.broadcasting
Date: 1995-12-21 00:00:00 UTC
From: j_fitzge@oz.plymouth.edu
Message-ID: <4bb2hd$brp@vixen.cso.uiuc.edu>
Source record: 27735

We up here in Plymouth are thinking about changing our
programming format. Right now it goes something like this:

:00 Legal ID
:15 News/Weather
:30 PSA's, Show Promo's, and Legal ID
:45 Campus Events or Community Events
:50 Request Filler

Several members of the Executive Board are wondering whether or
not we need to do news every hour. Three or four Dj's just plain refused
to do news sighting "You never hear a commercial radio station do news
every hour." Also, all the Dj's are complaining about the frequency of
PSA's. Whether carted up or read aloud the majority of Dj's are sick of
them and don't want to have to do one an hour (translate into 2-4 a show).
If anyone (HEY PROGRAM DIRECTORS) could suggest a few formats it would be
greatly appreciated.

There is something really sad going on in our industry. I know many talented people who've worked for some pretty legendary sets of call letters, are now out of work and can't get the time of day, much less a call back from certain programmers. Are you guys really that intimidated? Do you really get that much of a rush from snubbing some guy who's gone a little further than you in the industry, just so you can brag to your cronies about it? What kind of chickens**t attitude is this?

Let me dispel some common misconceptions about the people you're giving the cold shoulder to. If you've ever made any of the following statements, or even thought them, it is you I'm talking to.

1. " I don't need some egomaniac primadonna coming in here and giving me an attitude."
2. "Why should I hire this guy? So he can tell me how to run my radio station?"
3. " I ain't bringing this guy in so he can use his resume to impress my GM and make a run at my gig."
4. "Who does this guy think he is calling me? Does he think just because he worked at (insert call letters here) I'm supposed to jump and return his call?"
5. "What's the use. I could never afford him anyway."
6. "It would just be too embarrasing to offer him this kind of money. I'd feel like an idiot."
7. "I wouldn't want to insult him by offering a non-drive time position."
8. "First time he's offered a major market gig he's outta here."
9. "All my deejays will be too intimidated and their performance will suffer as a result."
10. "This guy won't take direction or criticism."
11. "People at his level of the business are just too dificult and temperamental."

Sound familiar?

These are people just like you. They have families to support. They put on their pants one leg at a time. This kind of paranoia is rooted in you own insecurites and will keep you from rising above where you are now, so GET OVER IT!

Take the time to see for yourself that what I say is true. You might be surprised. You just might get some very talented people who'll work hard for you and help raise the bar a bit at your station.

Source record: 27740

References: <4b8bu3$5cl@vixen.cso.uiuc.edu>

Yes, I sure do remember the switching delays. It didn't happen with every remote such as remotes from NYC locations or other instances where there was a simple telco line from NBC to the remote site wherever it might have been. The switching delays occurred in cases where the program origination was switched from New York to Los Angeles (or Chicago). In those cases, what we might call the main spine of the network was reversed on a "hot" basis. It took more than five seconds for all the relays in all the telco switching centers to get the job done. Normally, such switches were made between programs during the station break periods when there was no programming on the net thus no delays were obvious to listeners.

Rick Seifert's remembrances of listening to "Monitor" while on weekend car trips brought back the same sort of memories from my teenage years--let's say the mid-1950's. Here in the midwest it was hard to escape the "Monitor Beacon." The program started on Friday evenings and was available to stations continuously until late Sunday night. It was great to be on the road at, say, midnight listening to the program when it got a bit looser that it was during the day. You couldn't outdrive it--if we couldn't hear WHO, we tuned to WMAQ or KOA or WOAI or WLW. There was a lot of clear-channel wattage behind "Monitor."

For me, the best of it was late on Saturday nights when big chuncks of time were devoted to great jazz from various venues around the country. The "Monitor" host late on Saturday's was a guy named Al "Jazzbo" Collins, and he knew his stuff. The NBC newscaster on that shift was Leon Pearson, the brother of the much more famous commentator, Drew Pearson. Leon was an erudite guy, very cultured, and his interaction with Al Collins made for some great moments. Is Al Collins still alive and on the air somewhere? I hope so. Later in the program's history, one of my favorite "Monitor" hosts was Ted Brown, who was, I think, also on WNEW for many years. There were probably at least 100 "Monitor" hosts over the years. It's funny that I can't remember more names, but then the end of "Monitor was when? More than quarter of a century ago? The program was the progenitor of all radio magazine programs--especially "All Things Considered" and "Morning Edition" on NPR and the various VOA magazine show.

It was good listening and now, good memories.

Cheers.

Don

Pete Walton wrote the quoted material below:

" Rick's note abount NBC Radio's Monitor reminded me of the fact
" that when they would switch to a remote site, they would warn
" listeners to wait six seconds! Does anyone else remember this?

The only time I noticed this was when they were reversing the network to take a program or report from KNBR, then the NBC key here on the West Coast. Then they'd wait another 6 or 7 seconds at the end of the feed to reverse the network once again. They even did this during newscasts.

" Frank Blair, Dave Garroway, Joe Garagiola all had Monitor
" duties. Who else?

Gene Rayburn (mostly known for NBC TV's "Match Game" show), Don Imus, and going back a bit Al Jazzbeaux Collins (now at KCSM-FM in San Mateo). I think I also remember Bill Cullen ("The Price Is Right"). I know I'm forgetting a few but it seems as if anybody on NBC TV with a game show eventually got a crack at Monitor.

# 3906. FM music radio in mono.....

Newsgroup: rec.radio.broadcasting
Date: 1995-12-21 00:00:00 UTC
From: "PETER Q. GEORGE, N1GGP" <PGEORGE@WELLESLEY.EDU>
Message-ID: <4bb2hn$bs9@vixen.cso.uiuc.edu>
Source record: 27745

In a word, don't do it ! There are some instances where FM stereo
and with its' "side effects" of increased multipath can destroy an FM
signal. For example, WLPW-FM in Lake Placid, NY experimented with stereo
five years ago during a studio rebuild in 1988. While the local Lake
Placid area got fine stereo reception, the outlining areas such as
Wilmington, Saranac Lake and any areas within the shadow of Whiteface
Mountain were treated with multipath in stereo. When one telephone line
failed between the studio and transmitter, they switched to mono and have
been there ever since. Its' a shame but in a depressed economy, you need
all the coverage you can muster. The Adironacks of Upstate New York are
notorious for cancellation and multipath. But, these areas are the
exception.
For the most part, FM music in mono does not have the "life" or
brilliance of stereo. I have heard little 10 watt FM stereo stations
do fine with their limited coverage. There is an unwritten rule in
terms of the listener......if a station were not in stereo...chances are
you will avoid it. With out that stereo light, you alienate a good
portion of your audience. With the exception of WLNG-FM in Sag Harbor
New York (one of my favorite oldies stations in the world), I will not
listen to a music station in FM mono. My ears probably are the exception
being a broadcast engineer, but mono to me is "boring" to my ears.
And, you might as well keep the stereo signal on the air because most
radios nowadays have that pain in the "arse" "Blend circuit" which many
times goes to mono ..well before you get out of the usuable stereo coverage
area. I wish a could by-pass that damn circuit :-) !

Well, time for me to get of my soapbox...for now !

AND BTW: The views and opinions expressed here are mine and do NOT
necessarily reflect the views and opinions of anyone but me.....SO THERE !
BURRRRRRRR!

From: "BECK, JOHN" <jbeck@mhs.hcjb.com.ec>
Message-ID: <4bb2ho$bsa@vixen.cso.uiuc.edu>
Source record: 27746

A previous respondent wrote:

>>Here in San Francisco, KALW-FM does precisely that. It's an NPR station, but unless the program material (e.g., a music program) is stereo, the chief engineer transmits in mono. Since the signal is only 1900 watts, that helps a lot. In fact, KALW has much better coverage than it ought to, solely because of the quality of the signal. Credit to Dave Evans, Ch Engr. <<

Any theories or empirical evidence regarding the loss of listeners with radios that scan only stereo signals while transmitting in mono? Or perhaps those receivers were a fad and just a thing of the past?

>> I used to enjoy listening to a fellow named Friedman (?) known as
>> "Mr. Movie" on Saturday night / Sunday morning on the now defunct
>> WCAU am in Philadelphia. Does anyone know the whereabouts of
>> Friedman?

He still does some work for WCAU-TV and he has had his radio show on WTTM in Trenton, NJ and a few other stations over the years. He once did a fill-in job at WOR, and I really hopped it would turn into a regular shift, but nothing ever came of it. If Rich Wood was there at the time, maybe he can offer some more insight into this.

If Joe Franklin ever retires from WOR, I'd love to see Steve get the slot.

>> I always thought his show should have been syndicated.

I agree.

WGHF became WBFM which was owned by Muzak. They in turn sold it to The
Daily News in the early 60's and it became WPIX-FM. Tribune Broadcasting
was formed in a restructure in the 1980's and the station was transfered to
the new company prior to the sale of the Daily News by the Tribune Co.
Muzak still maintains two SCA's over the channel which is now WQCD, still
owned by Tribune.

>WEVD and WBBR maintained separate

The Staten Island site was on a Farm/Commune that the Watchtower ran. WPOW was originally owned by the same group that owned WPOP in Hartford.

>At some point, WGYN (FM) went silent

It should also be noted that in the 70's WEVD got more and more time on the AM facility and actually did spilt programming during the mid morning hours. Art Raymond played Jewish music on AM on the Morning Symca and Danny Styles was on our dials with big band on FM.

>At some point (again I don't know when

>site in Staten Island. I think that
>took place around 1976 or 1977.

The reason for this was more economic than technical. The Smyna Ave. transmiter site on SI was just a transmitter site. WBBR still used studios in one of the Watchtower buildings along the Brooklyn waterfront. WPOW built studios in the Rockefeller Center area in an older building. I believe they were on 45th St, but I may be wrong on that. WEVD was also in the same area, but on 48th St.

In the late 60's Rockefeller Center began to expand. The old buildings were being torn down to make way for new skyscrapers on the west side of 6th Ave. WPOW decided to move it's studios to the transmitter site. The Varrizano Bridge had opened and so had the Staten Is. Expressway. In addition route 440 and Drumgoul Rd. had been, or were in the process of being widened at the time making access to that area of Richmond County more feasable.

WEVD moved to 1700 Broadway, (they are now downtown at 770 Brodaway). At the same time, the Maspeth site was in need of a major overhaul. Ground conductivity was poor to begin with and the ground system was rusted out.

>converting it to a daytimer. I believe
>that after that, WPOW acquired WEVD
>(AM), making WPOW a full-time station.
>Forward continued to own WEVD-FM.

That is wrong. A Jewish group bought the station and it became WNYM. They attempted to do similar style programming to WEVD. Eventually they went broker time and began broadcasting Christian Evangelists as well.

They originated from the WPOW studios so you really had one physical station with two licenses. As you mention later, it was Salem that bought up both stations and made it WNYM 24 hours a day. With the then availability of getting control of WMCA and that land developers wanted the property, Salem sold off the station to WWRV. This spanish language religous station operates from studios in Patterson, NJ. I heard it piggy backs off the WWDJ, (now also owned by Salem), tower in Hackensack, NJ. This doesn't seem to make sense to me since their studios are practically next door to WPAT. Maybe they were going to, or really are piggy backing from that site. Gone are the three WBBR built towers with the WPOW added extention poles on them.

>Again I'm not sure of the date but as

>at that time and WSKQ's owners
>(Spanish Broadcasting?) received an
>STA to operate AM 620 and AM 1050
>simultaneously. Forward hung onto 97.9
>until the problems were resolved.

Not true again. The problems at the 1050 site, (it was WUKQ during the change over), were due to the WUKQ gutting out the engineering room and dumping all the test equipment, tech records and transmitter data the went back to when Lowes had built the place as the 2nd site of the original WHN. Spanish Broadcasting was in a rush to build a temporary studio there.

Considering that they were also building a new complex for the FM they were taking over as well in Manhattan, it was a stupid move. Prior to the WEVD change they were operating WUKQ from the soon to be WSKQ-FM studios.

The chief engineer, who had been with WFAN and was technically laid off the instant WFAN switched to 660 had nothing to work with once the ripping out was started. WUKQ had never agreed to hire him, until they got there, (5 hours late because they got lost), and realized they were in trouble. There was no way their engineer was going to get from the WSKQ site in Livingston to the East Rutherford WUKQ site in less than an hour and a half.

WEVD also kept the ex-WFAN C.E. on. Had he simply pulled the plug on 1050 when the time came, and no one was there, I'd bet the 1050 spot would have

remained dark until the WEVD change.

WDRE used to pipe the same signal into their Long Island and their
Philly outlets. The Philly outlet has it's own REAL callsign (WBFY?)
(that's wrong, can't remember it). Listen at the top of the hour for
an obscure legal ID. Guess as long as the "WDRE" mention on the Philly
station never occurs in a precise legal ID format, the FCC considers it
a "nickname" and ignores it, just like "Z100" "K-rock" etc.

>So: it's the same call letters, the same ads, but different content! Is
>that legal? Are there really two (or three different WDRE's??

103.9 FM's call letters (as identified at the top of the hour) are WIBF in
Philadelphia. "WDRE Philly" never simulcast Long Island 92.7 ads... only
programming... Now from 6am - 7pm "WDRE Philly" has been breaking off the WDRE
network in order to provide expanded local programming...

WDRE _was_ indeed simulcast in Philly, but I think that frequency went local within the last few weeks. Thus I presume you assumed it was still WDRE because of _slogan's_, but I bet their top of the hour ID would have clarified that they're not _really_ WDRE any more. (You didn't catch a WDRE legal ID among all that Philly-specifc stuff, did you?)

Any station can use whatever slogans it wants the rest of the hour as long as it gives a legal ID with its true call letters and city of license once an hour (near the top of the hour). I haven't heard WDRE in a decade, so I can't give specifics, but in theory every other staiton in the country could call themselves W-Dare and it still wouldn't be a conflict (because the FCC doesn't care about station slogans/nicknames).

they broke up the "underground network" flipped albany's signal to
oldies (eqx in albany is still the bestby the way)and philly and long
island are largely separate entities. the guy running philly puts
together good radio ...keep listening

Well -- FCC-wise, they DON'T use the same call letters. The station in Philly is called WIBF, licensed to lovely Jenkintown, PA. WDRE, Long Island and WDRE Network owner Jarad Broadcasting is using "WDRE" as a brand name across multiple markets, much lik
e syndicators on the order of ABC or Westwood. The difference is that THEIR brand name happens to be call letters. Jarad's moved in the last couple of weeks to make the Philly station much more its own entity -- and a more potent competitor with stations
like Y100. Tom Taylor/Inside Radio

It's now "V-98.7", playing "soft jazz". The GM sent out a memo talking about how this is a much-needed format (?) in the market, and that they hope to equal the success of their sister station, WNUA-Chicago.

They're planning to be heavy on vocals, and he listed Luther Vandross first on their list of core artists. Go figure.

It was about time the "Detroit's Wheels" took the gas-pipe, though.

Paul S.

MMDS> 10 am this morning wllz fm flipped to nac.......
WLLZ-FM 98.7 "Detroit's Wheels" has developed a flat tire. Their format change from Modern Rock to Jazz was quite a surprise. I remember the drastic change made in September 1980 from religious (WBFG-We Broadcast For God) format to AOR (WLLZ-We Love Led Zeppelin) format. Drew & Mike, the morning team at their long-time competitor, WRIF-FM 101.1 described 'Wheels' as a pesky bee flying around inside their car for the past fifteen years. "The bee was finally let out the car and got splattered on someone's windshield...We would do something unique, and they would copy it, and call it their own stuff."
WLLZ-FM, now "V-98.7--Light Smooth Jazz" competes against Detroit's WJZZ-FM 105.9 for market share. WJZZ-FM was the only jazz station in town for more than twenty years.
What a surprise to find this happen before the holidays! I wish them the best of luck. Regards, Jeff

Getting it into order, Anita?? I think not. Mix 105 is pulling a 'PIX and doing its
version of "Format of the Month", something that WPIX-FM was known for in the 70's and 80's.

Andrea in NYC

Q23. Is there a group for modern radio drama ("new-time radio")?
Q24. I have only email access to the Net. Can I still get the files at your FTP site?
Q25. Your Digest and WWW pages only deal with Old Time Radio. Where can I get similar information about early TV?
Q26. I have never heard "Old Time Radio". Can I get an audio sample via Internet?
Q27. I have lots of loose OTR cassettes filling my drawers. Is there a better way to store these things?
Q28. All this new software is a bit difficult for me to use, as I am blind. Can you give me any assistance on how to access your page?

---

Q1. What is "OTR"?

A1. OTR is an acronym for "Old Time Radio", a term loosely applied to radio programs broadcast from the dawn of broadcasting to the early 1960's. Alternate names are "radio nostalgia", "golden age radio", etc. Usually this applies to radio drama, mystery stories, comedy and adventures.

Q2. You haven't mentioned OTR music, why not?

A2. There was a good deal of "big band" and other music broadcast during this era. For some reason, there seems to be more current interest in the dramas rather than in the music. You will find much more discussion about this topic in alt.music.big-band. There is also an Old Time Music on the Radio WWW page (apparently for Bluegrass music).

Q3. Where can I buy recordings of old radio shows?

A3. There are several individuals and companies willing to sell tapes of OTR programs. A partial list can be obtained from my OTR WWW site or FTP address listed later.

Q4. Which vendors have (lower prices) (higher quality) (faster response)?

A4. Prices, quality and service differ somewhat among all vendors. Check with other subscribers to the OTR Digest to learn of their experiences, then check with potential vendors.

A comparitive price chart, listing many vendors, is available at my WWW site.

Audio quality is an important consideration when purchasing recorded tapes. As yet, there is no "standardized" description of sound quality. Jim Widner and other OTR collectors have suggested

various metrics to describe the quality of OTR recordings. Discussion of these standardized descriptors is summarized at the archive site, and my FTP / WWW sites.

Q5. Are OTR shows rebroadcast? If so, where and when?

A5. Yes, several AM and FM radio stations, satellite feeds and a shortwave station rebroadcast OTR. Check my OTR WWW page for current info, or download STATIONS.OTR from my FTP site. If you learn of other sources, leave a note!

Julian A. Smith (jsmith@blues.epas.utoronto.ca), Frank Passage (passage@pluto.dss.com) and Bill Pfeiffer left the following information:

For AM listening, try the new National Radio Club's _AM Radio Log, 15th Edition: Complete Listing of U.S. and Canada AM Radio Stations_ (Mannsville, N.Y.: NRC, 1994). All AM stations carrying things like "Old Time Radio" are listed with the format code NOS (Nostalgia), and there are lots of other codes. [Order from NRC Publications, Box 164, Mannsville NY 13661-0164 USA. Price range: $20.00]

For FM listening, I'd suggest Bruce F. Elving's _FM Atlas_ (Esko, MN: FM Atlas Pub., 1993). Alongside lists, this has _maps_ of your area and its stations as well. [Order from Bruce Elving, PO Box 336, Esko MN 55733-0336. Price Range: $11.00 + approx $1.00 s/h]

The M Street Radio Directory, M Street at 800-248-4242 or +1 212 473 4668 voice, or +1 212 473 4626 fax. The address is M Street Corp., 304 Park Ave S Floor 7, New York, NY 10010 USA. costs $29.95 + p/h,

Q6. I remember a great show called (x). When was it aired?

A6. Check with subscribers to OTR Digest, or look through the program databases (WWW or FTP). Also see answer A14 below. Please do NOT send requests to -me- to name or find specific programs for you.

Q7. Are there any books about OTR?

A7. Yes, there are many books related to OTR. See my WWW page or FTP site for a list of some of them.

Jim Widner and Everett L. Slosman left this address for a bookstore specializing in OTR books:

Rainy Day Books
P.O. Box 775, Rt 119

Fitzwilliam, NH 03447
(603)585-3448

Bob Crump reminded us that most good used book stores will do a nationwide search for a title, if given enough time. Henry Brugsch <henry@g0gku.demon.co.uk> related a good experience with the following on-line bookstore:

Acorn Books acornbks@netcom.com

Q8. Does anybody trade tapes of OTR shows?

A8. Yes. Check with subscribers to the OTR Digest. My WWW page has a database of private traders as well. Leave a note in the OTR Digest if you want to trade, or send email to me if you want your library to be listed in the on-line database.

Q9. What's this stuff about Copyright?

A9. The copyrights on most OTR shows have expired. Several copyrights have been renewed. Examples of the latter include The Shadow (Conde Nast) and some of Arch Oboler's productions. See my WWW site for the latest "common sense" and legal citations.

Q10. How can I get my local radio station to broadcast OTR programming?

A10. Call the station and tell them of the many people who like to listen to OTR. Suggest this programming will increase listenership and help buy things from their advertisers.

Shawn Fulper-Smith (shawnf@cc1.uca.edu), a managing director of a non-commercial station, tells us: "The days of radio being ruled by the artisians is over, and for some time now it has been in the hands of people who only look at the bottom line, so to reach them you must talk through public radio pledges, or through sponsors on commercial stations."

Local stations may be able to redistribute OTR available via satellite downlink. Ask the station managers to check with either:

Collectors Radio Network (The Radio Vault)
1-800-739-7900

Yesterday USA (YUSA)
(214) 690-3636
YUSAOTR@aol.com

Q11. I have some old transcriptions and tapes, how can I make them sound better?

A11. You might try using a good equalizer and/or digital signal processing (DSP) unit between the playback and recording devices.

Some people have mentioned that the Radio Shack DSP unit does a fair job. There are also other, more expensive DSP units available from Ham radio stores and audio stores. Some subscribers have attested to the efficacy of the Timewave brand of DSP units.

Randy Riddle (Rriddle@aol.com) left this information:

There's a firm that sells archival quality turntables and sound processing units that can dramatically improve old recordings. Their sound processing unit runs around $300.

Audio 78 Archival Supplies
PO Box 187
San Anselmo, CA 94979
415-457-7878

Henry Brugsch <henry@g0gku.demon.co.uk> left this information about Digital Audio Format (DAT):

The dat-heads mailing list maintain an archive of all their material at the following site: ftp.atd.ucar.edu. Log on with the usual anonymous then, your routine password. head on over to /pub/dat-heads/ You will find a wealth of info up there. All the digests to the current day, and mike faqs, as well as market postings on equipment. Highly recommendable for anyone to get their feet wet in this media. Happy taping.

Q12. Are there any OTR clubs near me?

A12. Check the club listings in my WWW page, and leave a note in the OTR Digest asking about local clubs for your area. Send me email if you want your club listed.

Q13. I have some OTR tapes of the same program, but their dates are different. Why?

A13. Sometimes broadcasts are dated according to their original broadcast date, and sometimes according to a date on which they have been rebroadcast. For instance, the Armed Forces Radio Service rebroadcast many Mutual Radio transcriptions at a later date. Your tape may be of one of these later dates. Alternately, somebody might have made a mis-typopgoof.

Finally, some shows -were- broadcast more than once, and sometimes on different programs! For instance, a few Suspense shows were re-scripted / re-cast for Escape. You might also find similarities between certain SF shows as done on X Minus 1 and Dimension X.

Q14. Is there any place where I can get a complete listing of all the episodes in a particular program serial?

A14. Some of the OTR Digest subscribers have contributed Program Logs for several well-known series. The logs are available at my FTP & WWW sites. While you are there, check the online libraries; some collectors have very complete collections of various serials, and they are listed by name or date in their listings. I am currently compiling a database of contributed catalogs and libraries, which will eventually contain most of the readily-available programs for popular OTR series. At present, the dbf file exceeds 70,000 records, and is searchable with your WWW browser.

The "logs and publications" entry in my WWW page gives names and addresses of several vendors of these items. It can be FTP'd as sou_pub.otr. (Thanks to RadioJoe5@aol.com (Joe Coleman)). There is also a Netscape table of logs and log sources at my WWW site.

Jay Hickerson maintains several logs and lists, as well as -Hello Again-, an OTR newsletter. Jay is the author of -The Ultimate History of Network Radio Programming and Guide to All Circulating Shows- (last supplemented in Oct 95). Jay's address is:

Jay Hickerson JayHick@aol.com
Box 4321
Hamden, CT 06514
(203) 248-2887 FAX (203) 281-1322

Q15. Is there any place where I can get a written synopsis of the themes of OTR programs?

A15. Again, some vendors include this information with their catalogs. If you would like to contribute your interpretations of the themes, send them to the OTR Digest for inclusion in one of our databases.

Jim Widner and others have contributed some synopses / introductions to various programs. They are on file at his and my WWW/FTP sites.

Many of the local and national OTR clubs maintain informational libraries with this material.

Q16. Is there a World Wide Web page (URL) or FTP address that I can access for more information?

A16. Yes, there is a growing number of WWW sites, as well as FTP sites and a Gopher. Each site contains different information, so you might want to visit them all. The sites listed below are good places to start, since the major OTR WWW pages have links or pointers to each other. If you learn of any others, I'd appreciate your informing me via email!

(1) My site:

World Wide Web URL:
http://www.old-time.com

FTP:
(under development)

(2) AIRWAVES E-Publishing's Site (courtesy of Bill Pfeiffer):

FTP:
Anonymous FTP to radio.aiss.uiuc.edu,
directory: pub/AIRWAVES/OTR
GOPHER:
gopher radio.aiss.uiuc.edu 7070
(select "OTR")

World Wide Web URL:
http://radio.aiss.uiuc.edu/~rrb

Q17. Is there an email newsletter on OTR? How do I subscribe to it?

A17. Yes. The Internet OTR Digest is a freely available electronic newsletter, mailed every night to subscribers. Traffic has increased considerably, and the digest is usually mailed more than once a day!

To subscribe, send email
To: old.time.radio-request@airwaves.com
Subject: SUBSCRIBE

To unsubscribe, send email
To: old.time.radio-request@airwaves.com
Subject: UNSUBSCRIBE

(The body of the message is ignored in both cases)

NOTE: Do NOT use this address to send articles to the Digest! Use old.time.radio@airwaves.com instead.

Q18. Can I get archived copies of old issues of the OTR Digest?

A18. Yes. The OTR Digests and Index are updated three times a week, and are accessible through the first two WWW pages mentioned above, from the AIRWAVES anonymous FTP site mentioned above, or from the Gopher mentioned above.

Readers with a WWW browser can access a "smart" archive program. This program can sort and display old OTR articles by author, subject, thread or date submitted. Just the thing to use when you want to catch up on a discussion thread, without plowing through a lot of extraneous material. To access this service, point your browser at: http://radio.aiss.uiuc.edu/~rrb/online.html

Q19. What is the best way to archive OTR programs?

A19. The most popular way seemed to be reel-reel tapes, using each of the four tracks to record monophonically. Modern reel machines are in the > $2000 range, and used open reel machines are becoming harder to find.

Cassettes are generally fine for portability / ease of use / exchange, but they suffer from several problems when used as a long-term storage medium. These problems include "overwinding" and splitting of the tape at the leader. Because of their thinner track width and slower speed (1 7/8 IPS), the density of the information is greater than with wider and faster (3 3/4 IPS) reel tapes. This may lead to a greater loss of signal (particularly high-frequencies) over time.

The Hi-Fi VHS tape is gaining in popularity because of its six-hour storage capability and relatively robust mechanical construction. "Hi-Fi" decks need no video signal to synch the systems, and can thus record audio without an accompanying video signal. One T-120 Stereo Hi-Fi VHS cassette can easily hold 12 hours of OTR audio (recorded monophonically on the right and left channels independently). If the linear track can be accessed independently, this will add six more hours of recording time.

Some subscribers have mentioned Talking Book tape recorders as a possible archival method. These recorders operate at 15/16 ips (half the speed of a standard cassette recorder), and can operate in 4-track mode, thus giving up to 6 hours of play time on a standard 90 minute cassette. As yet, we have no info on long-term longevity of these recordings.

Don Coco (djc@crl.com) left the following information about sources for Talking Book type equipment:

The American Printing House For The Blind 1839 Frankfort Ave. Louisville, Kentucky 40206 Tel. (502) 895-2405 Sells Braille and recorded books, 4 track recorders which record at 15/16 IPS, and other products of interested to Visually Impaired persons. Price of 4 track recorder around $175

I.R.T.I.
1411 West El Camino Real
Mountainview, Ca. 94040
Tel. (415) 961-3161 or (800) 322-4784
Sells all including Radio's, TV's with SAP, Reading Machines, Computers ETC.

Conrad Trautmann (CONRADTRAUT@delphi.com) left this note in response to a query about finding used reel-reel machines:

You can also call Harris/Allied used equipment division at 1-800-622-0022 or call Radio World magazine at 703-998-7600 for subscription information. Radio World is an industry trade and has used equipment listings in the classifieds once a month.

(Jim Blackie [jblackie@aol.com] indicates that the Harris/Allied number has changed to: 1-800-300-0733.)

Richard Novak (rnovak@ix.netcom.com) wrote this informative note on using Hi-Fi VHS as an archival medium:

To clear up any misunderstandings concerning VHS HiFi machines and their ability to record audio, I offer the following..

It should be understood that what distinguishes a HiFi machine from a linear machine is that the audio track is recorded helically (diagonally) on the tape along with the video track. On linear machines the audio is recorded at the upper edge of the tape (and a control track at the lower edge, if anyone wonders what the extra head is for.)

On a HiFi VHS the audio is not recorded as an analog signal as would be the case with linear recording. Instead the analog audio signal frequency-modulates a carrier which is then recorded between the video tracks. A duplicate signal is also recorded linearly to maintain compatibilty with linear VCRs. The FM signal recorded on the HiFi track should not be confused with FM radio broadcasts. One of my customers thought the FM switch on his HiFi was for recording FM from the radio. Today's machines no longer use the label "FM", instead use "HiFi". Less confusing.

The sound recorded from FM radio broadcasts (or any other source) onto HiFi VCRs is virtually indistinguishable from the source. The material can be dubbed to cassette with no generation loss.

There is no difference in audio quality using either six hour or two hour mode.

It is true that at slower speeds the diagonal tracks are closer together. This does degrade the video signal as anyone knows who has compared six hour video with two hour video. But does not degrade the FM carrier with the audio track.

The tape writing speed of the audio track in HiFi mode is the same regardless of linear speed. This is because the head speed remains constant and is independent of the linear tape speed.

Worked it out once and it is around seven meters per second. Whatever it is, it's a whole bunch faster than 7 1/2 inches per second. If anyone really wants to know the writing speed, it is the circumference of the upper cylinder (or video head) multiplied by the rotational speed which is 30 revolutions per second, or 1800 revolutions per minute. (Two heads 180 degrees apart at thirty rps results in 60 frames per second.)

Who cares how it works.. The point is that VHS HiFi is the best and cheapest medium around for recording masters. But

not for archiving. Most experts still agree that reel to
reel is the best and most reliable method of archiving.
(Sticky shed syndrome from the 70s notwithstanding.)

Q20. My old reels squeak. Why does this happen, and can I fix it?

A20. There are at least two causes for "squeaky reels" on a reel-reel
tape recorder. (1) The tape edge may be rubbing against the
rim of a distorted take-up reel, or (2) the oxide may be
sticking to your erase (or other) heads. If the former, the
least frustrating alternative is probably a new take-up reel.
If the latter, Fred Korb left this note:

If you have any squeaky reels that you would like to
recover, I will be glad to send you more information
on how to do it. Just send me a stamped self addressed
# 10 envelope and I will respond. Send your request
to: Fred Korb, c/o Oldtime Radio Collectors and
Traders Society, 725 Cardigan Court, Naperville,
Illinois 60565-1202. I am willing to help you preserve
the sounds of radio days gone by.

[Editor's note: Fred's method consists of a kit by which a
lubricating film can be automatically applied to the tape as it
is played. I tried it. Although temporary, it does indeed work!
I'd recommend it for those squeaky tapes that you wish to
re-record onto newer reels.]

Richard Fish <lodeston@bluemarble.net> also left this helpful info
about an alternative method:

HYRDROLYZATION is the culprit. The tape material -- the
backing, or the binder compound used to stick the magnetic
particles to the plastic backing -- has absorbed water
from the air. The water molecules actually make the tape
expand a bit, so it doesn't fit the machined tape-guides
properly anymore; and they can interfere with the
lubrication impregnated into the tape; and it is theorized
they can even interfere with the polished smoothness of
the tape surface.

WHY SOME TAPES AND NOT OTHERS? It depends on the
formulation of the plastic backing and binder. In the
mid-70's, both 3M (Scotch) and Ampex, the two major tape
manufacturers, started experimenting with their formulas.
They thought they were introducing major improvements,
but instead created a tape much more prone to
hydrolization than anything had ever been. The problem
did not show up for years, and the formulas did not get
corrected until sometime in the mid-80's. Theoretically
any tape could get hydrolyzed over a long period of time,
especially if stored in a high-humidity situation, but in

practice most squeaky tapes were made (roughly speaking)
between 1975 and 1985.

WHAT'S THE FIX? Tom Lopez at ZBS (the most prolific and
entreprenurially successful producer of radio drama in
the US today) gave me his formula and I've done it many
times now and it works:

Bake the tapes in a convection oven for 8 hours at 130
degrees Fahrenheit. It is entirely possible to bake a
tape twice if the first time doesn't do the trick. You
get about a three-week "window", sez Tom, before the tape
starts to re-absorb water. So the best deal is to bake
the tape and immediately make a copy. But if you forget
to do it and it re-hydrolyzes, you can bake it again.

Q21. Where can I find more information about antique radios?

A21. An excellent place for discussions about antique radios,
phonographs and accessories is the rec.antiques.radio+phono
newsgroup, created by Bill Robie. A pointer to his FAQ may also be
found at my WWW site. Basically, r.a.r+p

- Is a *discussion* group, rather than a sales group (see r.a.m)
- Focusses on radios, phonos, and related materials made
before the 60s
- Avoids "ham" radio gear (the Boat Anchors group
covers that)
- Has a -very- comprehensive FAQ that new folks should read

Several museum sites are available at my WWW page. The WWW
site, "The Bellingham Antique Radio Museum" is also available
directly via URL http://www.pacificrim.net:80/~radio/ This site
contains info and GIFs on old radio hardware, as well as
soundclips of OTR show intros.

The University of Maryland also has a WWW site entitled "Broadcast
Pioneers' Library". This is an excellent resource for the serious
/ professional researcher. It can be accessed through my WWW
site, or directly via the URL:
http://www.itd.umd.edu/UMCP_Libraries/BPL/bpintro.html

Additional sites with pictures of old radios or other hardware
resources may also be found at my WWW site.

Q22. What is the best radio / antenna to get distant OTR stations?

A22. Several readers have been acclaiming the GE SuperRadio III as an
excellent choice for picking up distant AM stations that carry OTR
programming. Although the tuning dial has notoriously poor
calibration, the sensitivity and selectivity seem superior to other
radios. A SuperRadio FAQ is available via my WWW site.

-Some- readers have had good success with the Select-A-Tenna antenna advertised in several magazines, and the Grove Catalog. The S-A-T seems to be rather directional, and may eliminate off-axis interference.

Ham Radio magazines sometimes carry information about small loop antennas for AM DX-ing. Dan Hughes <dhughes@prairienet.org> left this note:

Several years ago one of the electronic magazines ran plans with dimensions and number of turns, etc to build one of these antennas. I have built several and I'm no mechanic. If you (or anyone else reading this) would like a copy of the article and plans, drop me a stamped, self-addressed envelope: Dan Hughes, P.O. Box 933, Urbana IL 61801.

If you are interested in AM Broadcast Band reception, and technical artlcles related thereto, send a SASE to the following address for their product catalog:

National Radio Club
Publications Center
PO Box 164
Mannsville, NY 13667-0164

Q23. Is there a group for modern radio drama ("new-time radio")?

A23. There are several USENET groups whose charters include modern drama. Check the lists on your local Internet provider to see which are available to you. Here is a list of some of the WWW pages for radio drama (more may be found at my WWW site):

Atlanta Radio Theatre Company: http://www.webamerica.com/artc
ZBS Media? http://www.zbs.org/zbs.html
LodesTone Productions?
http://www.bluemarble.net/~lodeston/lode.html
Midwest Radio Theatre Workshop?
http://www.thoughtport.com/tpa/non/mrtw

There is also a mailing list for folks interested in current radio drama:

Send email to: majordomo@world.std.com
Subject:[blank]
text: subscribe radiodrama

Q24. I have only email access to the Net. Can I still get the files at your FTP site?

A24. Maybe. There are several FTP-by-email servers. Contact one of them for instructions.

ftpmail@decwrl.dec.com
with no subject line,

and two-line body with line one help and line 2 quit

ftpmail@grasp.insa-lyon.fr
(body: help) Please, European users only.

bitftp@pucc.princeton.edu
(body: help or ftplist for a list of anonymous ftp sites)

BITFTP@DEARN or BITFTP@vm.gmd.de
(body: help or ftplist for a list of anonymous ftp sites)
(Europe only)

Since the OTR FAQ is an "official" FAQ, a copy of it is stored at
MIT, and is available from the MIT mailserver. For more info on
how to get files by email from MIT, send a message
TO: mail-server@rtfm.mit.edu
SUBJECT: [blank]
BODY:
help
end

WWW pages can also be retrieved by email. Contact
agora@www.undp.org for more information

Q25. Your Digest and WWW pages only deal with Old Time Radio. Where
can I get similar information about early TV?

A25. The OTR Digest and OTR WWW Pages are purposely self-constrained
to OTR topics. Folks interested in early TV shows might be
interested in this note from Kathy O'Connell
(oconnell@pobox.upenn.edu):

Let me announce a brand new TV list!!! A woman
named Linda has just started a list devoted to
50's-60's Television. You can contact her at
LEEKNIGHTS@delphi.com I signed on immediately, and
it's a wonderful place to meet other people
interested in this subject. Very much like the OTR
list, but for television!!!

Q26. I have never heard "Old Time Radio". Can I get an audio sample
via Internet?

A26. Yes, if you have a suitable WWW browser and sound card. Connect
to any of the WWW sites mentioned above, and follow the pointers
to their audio clips and / or soundbytes. Most of the soundbytes
can be downloaded, and played on your computer's sound card.

Q27. I have lots of loose OTR cassettes filling my drawers. Is there
a better way to store these things?

A27. Collectors with lots of cassettes seem to use just about
everything from "underbed cardboard storage boxes" to old soft
drink cases. If you want your collection to have a more

"professional" look, here is a note from Ron_B._Hare@livewire.com
(Ron B. Hare)

You almost need to buy cassette albums from
specialty suppliers. Radio Shack used to carry a
small line of these and charged too much. We are in
the recording studio business, and receive catalogs
from several sources. The one one I like best has
some of the lowest prices and unhesitatingly deals
with individuals and will take your credit card
number over the phone for instant shipment (in
contrast to some who require account setup, purchase
orders, prepayment, cash and other nuisances).

Polyline Corporation
1233 Rand Road
Des Plaines IL 60016
(708) 390-7744
FAX (708) 390-9886

or, their West Coast branch (where I got mine)
PolyWest Corporation
16018 Adelante Street, Unit C
Irwindale CA 91702
(818) 969-8555
FAX (818) 969-2267

They have two catalogs: one for audio and one for
video. Cassette albums are available in a large
number of different styles, sizes and capacities.
The 8-cassette albums I use are CPCN.4+4M/WHT in
white and CPCN.4+4M/RBLU in royal blue. Outside
dimensions are 9 7/8 x 7 x 1 1/4 wide, so they fit
well on a bookshelf. This model also seems to cost
less per cassette than any of the other models,
though logic might lead you to the conclusion that
the larger capacity ones would cost less.

I paid $2.11 each plus tax and shipping for my
latest batch (November 1995). The minimum economical
order is 40 albums. You can order smaller
quantities, but the price is $4.68 EACH. Check with
Polyline before ordering. The prices change
frequently.

Q28. All this new software is a bit difficult for me to use, as I am
blind. Can you give me any assistance on how to read your page?

A28. Yes. Although my WWW page is best viewed with Netscape, I also
have a text-only menu that might be easier on your reader. There are
many blind OTR collectors who might be able to help you as well. Two
experts in OTR as a hobby and Internet / computers are:

Henry Brugsch <henry@g0gku.demon.co.uk> and
Ronald Staley <rstaley@netcom.com>. One or the other would be able
to help you use your computer and reader to access my pages or
maintain your OTR collection.

# 3922. Re: Comment on Seattle Radio

Newsgroup: rec.radio.broadcasting
Date: 1995-12-22 00:00:00 UTC
From: johnross@halcyon.com
Message-ID: <4bebm2$ko0@vixen.cso.uiuc.edu>
Source record: 27662

References: <4b8bue$5d4@vixen.cso.uiuc.edu>

My earlier comments about the fundamental flaws in American broadcasting were based on a couple of basic premises:

1) The broadcast spectrum is a public resource.

2) Radio stations do not have a "natural" right to conduct business; they have a license which obligates them to operate in the public interest. If they can make money at the same time, good for them. But if they fail to provide service, the public (in the form of government regulation) should lift their licenses.

3) As Lewis Hill said almost fifty years ago, if you ask broadcasters why they don't offer "better" programs, they'll tell you they're giving their listeners what the listeners want; if you ask listeners what they want, they'll choose among the things that they know about--the currently avaialble programs.

This is known as a vicious circle. Someplace on the radio dial there should be at least one broadcaster who creates programs for their own sake, with the freedom to experiment with musical styles, literature and, yes, wind chimes and whale farts. Many of these experiments will fail, but a few will succeed in expanding the tastes and interests of some listeners. And of that successful few, there may even be the makings of a new commercial format.

As for the argument that the CBC and BBC are publicly funded and therefore subject to pressures that commercial stations do not have, it may be true (so far as it goes), but it's irrelevant. At both the CBC (directly funded by the Canadian government) and the BBC (funded by an annual license fee on TV receivers), the program makers are insulated from the need to produce the highest possible audience numbers at all times. Therefore, those program makers are able to do things that may not always interest a mass audience. Neither BBC nor CBC Radio is perfect, and both are facing serious financial problems right now, but they treat their listeners with more respect than most broadcaster in this country, where many broadcasters would sell their souls for a half-point increase in audience share.

But as I said earlier, between debt service, payrolls and overhead, that half-point is probably essential to most American broadcasters's survival. And since the first instinct of any organism is to survive, they have no choice but to continue fine tuning a limited number of formats to deliver as many listners as possible to potential advertisers.

# 3923. Re: DAB in the USA

Newsgroup: rec.radio.broadcasting
Date: 1995-12-22 00:00:00 UTC
From: umar@cybercom.net
Message-ID: <4bebm3$ko2@vixen.cso.uiuc.edu>
Source record: 27663

References: <4b8bto$5c3@vixen.cso.uiuc.edu>

In article <4b8bto$5c3@vixen.cso.uiuc.edu>, "Julian H. Breen"
<breen@ix.netcom.com> wrote:

> The NAB is a superb lobbying organization. But despite all the clout
> and PAC contributions, the real problem attempting to ram IBOC
> through in the USA is the NAB's utter failure to get the laws of
> physics repealed.

Originally the NAB _endorsed_ Eureka 147. Then the Bush administration,
at the request of the Defense Department, declined to release any L-band
spectrum for DAB.

The opposition of many NAB members to Eureka 147 was largely irrelevant.

Question: what is to stop the Canadians, who presumably are going to use
L-band to transmit Eureka-147 by satellite, from broadcasting to listeners
in the United States? The Canadian satellites are, after all, in
geosynchronous orbit over the equator.

Rob Landry
umar@cybercom.net

## 3924. (UK) DJ fined for missing show

Newsgroup: rec.radio.broadcasting
Date: 1995-12-22 00:00:00 UTC
From: John Charles <JayCee@midmarsh.demon.co.uk>
Message-ID: <4bebm4$ko4@vixen.cso.uiuc.edu>
Source record: 27664

It has been reported here that Chris Evans, DJ of the BBC Radio 1 breakfast show has been fined a days pay for failing to turn up for the show yesterday (Thursday).

The 1m UKP a year presenter is believed to have been fined 7,000 UKP by the controller of Radio 1.

It is reported that 29yr old Chris Evans spent almost half an hour in the controller's office and left Broadcasting House in his new Bentley saying nothing.

# 3925. Re: College Station looking to change program format

Newsgroup: rec.radio.broadcasting
Date: 1995-12-22 00:00:00 UTC
From: dk@crl.com
Message-ID: <4bebm4$ko5@vixen.cso.uiuc.edu>
Source record: 27665

References: <4bb2hd$brp@vixen.cso.uiuc.edu>

Jesse L. Fitzgerald wrote the quoted material below:

" Several members of the Executive Board are wondering whether or
" not we need to do news every hour. Three or four Dj's just plain refused
" to do news sighting "You never hear a commercial radio station do news
" every hour."

So what? Station formats depend on what flies in the local community.
How many stations are there? What formats do they have? In a small town
where yours is the only station, it might do well to have news often. In
larger communities it isn't as important. As to whether the DJs object,
who's running the station after all? In the *real* world they cite, DJs
do as they're told; the decision is made by the program director and the
DJs fly with it. If they *really* want to do it the real-world way they'd
be quiet about it and go with the decision whatever it is.

" Also, all the Dj's are complaining about the frequency of
" PSA's. Whether carted up or read aloud the majority of Dj's are sick of
" them and don't want to have to do one an hour (translate into 2-4 a show).

Tough. If the PSAs are important to the community, go with them. A
listener does not hear the PSAs as often as the DJ does. Again, in the
real world this decision is not left to the DJs.

HCJB FESTIVAL OF CHRISTMAS PROGRAMMING

HCJB, The Voice of the Andes is proud to offer the following
special Christmas programs for your enjoyment.

Friday, December 22,
"Music at the Ranch, an hour of country Christmas music will be
featured on "Morning in the Mountains.
12:30-13:30 UTC to the Americas.

Friday, December 22,
"Holiday Call in" Join HCJB's program staff for an hour and a
half of telephone chat and a look at Christmas customs around the
world.
7:00 UTC to Europe and the South Pacific, 1:00 UTC Saturday
(Friday local time) to the Americas.

Saturday, December 23
Music special "Music at the Ranch", a hand-clapping hour with
Christmas music, Country and Western style featuring the Flying W
Wranglers and special guest Paul Overstreet.
7:30 and 17:00 UTC to Europe, 9:00 to the South Pacific, 1:00 and
5:00 UTC Sunday (Saturday night local time) to the Americas.

Saturday, December 23
On a special edition of Solstice this week some celebrities drop
by to wish us a merry Christmas, courtesy of impressionist Ben Price.
You'll be greeted by people like Prince Charles, Arnold Swarzenegger
and Forrest Gump in our youth program by Hayley Coates and Ashley
Field. From our Australian studios.
10:00 UTC to the South Pacific, 18:00 UTC to Europe, 2:30 and 6:00
UTC Sunday (Saturday night local time) to the Americas.

Sunday, December 24
Drama "The Christmas Carol," the traditional 1939 version of
Charles Dickens' famous classic. Brief commentary following the program
by Rob Quiring and Brian MacHarg
7:30 and 17:00 UTC to Europe, 9:00 to the South Pacific, 1:00 and
5:00 UTC Monday, (Sunday night local time) to the Americas.

Sunday-Monday, December 24-25
"Back Home Hour", musical originally performed live on HCJB in the
mid-1950's.
2:30 UTC to North America, 7:00 UTC to Europe, 8:30 UTC to the
South Pacific, (all times UTC Monday).

December 25
Drama "Christmas comes To Pleasant Hill". Set at the turn of the century, "Christmas Comes to Pleasant Hill" traces the consternation of a quaint town with its most unlovable citizen, Bertha Wiley. After living a life of bitterness and misery, Bertha is forced to take in a young girl orphaned by the death of her father. She comes to terms with someone whose love and concern overshadows her bitterness.
7:00 and 17:00 UTC to Europe, 9:00 UTC to the South Pacific, 1:00 and 5:00 UTC Tuesday (Monday evening local time) to the Americas.

Monday, December 25
The Messiah. George Fredrick Handel's classic composition featured in this traditional Christmas Day broadcast on HCJB.
12:00-14:30 UTC

Wednesday, December 27
"The Story of the Founding of HCJB" John Beck hosts the annual broadcast of the founding of the pioneer missionary broadcaster, HCJB, with historic audio clips of Dr. Clarence Jones and others.
8:00 and 17:30 UTC to Europe, 9:30 UTC to the South Pacific, 1:30 and 5:30 UTC Thursday (Wednesday local time) to the Americas.

Saturday, December 30
DX Party Line, Interval Signal Special--a look at the interval signals of Christian shortwave radio stations, their background and why they were chosen.
7:30 and 17:00 UTC to Europe, 9:00 UTC to the South Pacific, 1:00 and 5:00 UTC Sunday (Saturday local time) to the Americas.

# 3928. Mid-America Radio Watch (21-Dec-1995)

Newsgroup: rec.radio.broadcasting
Date: 1995-12-22 00:00:00 UTC
From: "Mark S. Roberts" <transvox@crl.com>
Message-ID: <4beblq$knj@vixen.cso.uiuc.edu>
Source record: 27668

Slipping this in under the wire....
****
Chalk up half a victory for local radio after all. Curtis Bohl at the University of Missouri-Columbia reports that Montgomery City's KMCR(FM) no longer simulcasts Moberly station KZZT(FM) in its entirety.
Previously, KMCR just rebroadcast KZZT which itself gets most of its programming by satellite.
Now, KMCR has installed its own satellite dish and is providing some local sports programming, with Columbia sportscaster "Tex" Little doing the play-by-play.
According to Curtis, KMCR and KZZT decided on the split because potential listeners in Montgomery County (about halfway between Columbia and St. Louis) were avoiding the station because they perceived it as a Moberly operation. Moberly is, in fact, some 50 miles from Montgomery City.
****
Meantime, "Tex" Little, who was sports director at KTGR(AM) and KCMQ(FM) before their assimilation into the Zimmer Broadcasting chain, is now doing some play-by-play for Columbia College sports on KTGR. KTGR normally just simulcasts KCMQ, although it did provide live coverage of the O.J. Simpson trial from Court TV.
Columbia College is one of Columbia's two small private colleges (in addition to the big public educational institution in town, the University of Missouri), and one with an increasingly active sports program.
****
A 20-year tradition continues Christmas Day on WDAF(AM). "61 Country" program director Ted Cramer will host a morning show of Christmas music from 6 to 10 am, including, according to a promo, [silly] songs other stations won't dare to play.
****
There's now a second applicant for a new FM "educational" station in St. Joseph at 91.1 MHz. Before the FCC was shut down in the latest round of Potomac puerility, it accepted an application from Donald Wildmon's American Family Association for the slot. The competing application was filed a couple of weeks after the Baptist Temple School of St. Joe filed its application.
****
Season's Greetings and...next week...put on your polka shoes for the year in review.

# 3929. ST LOUIS YEAR IN REVIEW - PART ONE

Newsgroup: rec.radio.broadcasting
Date: 1995-12-22 00:00:00 UTC
From: ssimon9@ix.netcom.com
Message-ID: <4beblq$knk@vixen.cso.uiuc.edu>
Source record: 27669

Here is the year-in-review for AM stations in St. Louis, the 16th largest radio market in the country. Only stations with significant activity are noted. Due to the length of the AM review, the FM station year-in-review will be published after Dec. 27.

KSD-AM 550: The market's oldest station (73 years) started the year fully automated airing STARDUST, but made big news in May when it acquired the broadcast rights to St. Louis Rams football, five years for a little over $3 million dollars, outbidding sports legend KMOX (who countered with $2.4 million), KEZK/KFNS, and WRTH/WIL. Games and related talk shows also aired on sister station KSD-FM. John Carney, son of legendary St. Louis radio great Jack Carney, moved over from WEW; first did mornings, then moved to midday late in the year. Coming into his own as an outstanding story teller. Late in the year, the station decided to ditch STARDUST and go all talk, with Rams broadcasts as a solid cornerstone. Steve Moore checked in as PD in Dec., from KFRU in Columbia MO. Frank O. Pinion was moved over from KSD-FM to do mornings, Kevin Slaten, ankled at all-sports KFNS, moved over to do afternoons. Station regained Roger Fredenberg and Art Bell shows for late night, losing them a year ago to KRAM when KSD went all music. This month, the syndie Don and Mike show from D.C. was added to the early evening lineup. Station is searching for an early afternoon host, and part-timers for the weekends, to start after the first of the year.

KFNS-AM 590: Jon Sloane, who had anchored the morning show for this all sports station, was bounced in March for local comedian Craig Hawksley; the show bombed after a month, and Sloane was returned. But that lasted only a couple of months. He decided to leave to concentrate on his law practice (later moving to head Aaron Cushman Public Relations), ending a continuous on air stint in St. Louis dating back to 1978 when he came from Miami to anchor at Channel 11. Howard Balzer returned to St. Louis after a year and a half with the Sports Fans Radio Network, his first regular sports show in St. Louis since his days with KXOK in the late 80's. St. Louis Post-Dispatch columnist Bernie Miklasz added to lineup as a weekday 9-11 host, the most visible person on the station. Kevin Slaten was bounced in the summer after a dispute with GM Bob Burch at a St. Louis Rams function, was replaced by Bob Ramsey and Mike Claiborne, who had been hosts in other time slots at the station. Former St. Louis Blues hockey player Bernie Federko added to station for regular sports coverage, afternoons from 2-4. Station bonus was its play by play coverage of St. Louis Ambush indoor soccer; they won the NPSL 1995 Championship.

WGNU-AM 920: A very unsettling year after years of stability. In April, ten-year morning host Onion Horton, the big ratings puller for the station, was suspended; sources say station management accused Horton of

improperly handling money from accounts Horton sold for his show, the biggest revenue maker for the station. He never returned and moved to KATZ-AM. Shortly after, evening host Mark Kasen also ankled the station, fed up with management's treatment of him and Horton, and he too went to KATZ. Then in October, an unprecedented event in U.S. broadcast history; operations manager John Minicke sent a memo to staff that the station would no longer pay them $15 an hour, instead, invited them to stay and host shows, and sell their own advertising time. Those hosts only were on the air one day a week, for 2 hours at a time, all of them on the air mostly for fun and entertainment, working full time jobs outside of broadcasting. But about eight of them were offended at the station's misery attitude, and quickly left. Some other hosts were added, other slots were filled by syndicated talk shows. One disgruntled host sent a copy of the memo to Post-Dispatch gossip columnist Jerry Berger, who printed it word for word.

KMOX-AM 1120: On Dec. 24th, the 50,000 watt "Voice of St. Louis" will celebrate it's 70th anniversary. Baseball broadcast icon Jack Buck and Jim White will host a special that night from 7-8 CST. Buck has been on KMOX since 1954, White since 1969, the two longest current KMOX on air staffers. But it was an unsettling year for people at the station. First, management had to stop bidding for radio rights to St. Louis Rams football at $2.4 million, more than double the last football rights it paid for the former St. Louis Cardinals in 1987, before that team moved to Phoenix. 21 year News Director John Angelides retired in July, replaced by John Butler from Syracuse, N.Y. Angelides headed a staff that won hundreds of awards. 11-year news anchor and production talent Charlie Brown left in August to work at a mission in Guam; dating back to his days at Top 40 KXOK-AM 630, Brown had been in St. Louis for 22 years. Replacing him was Bill Rieker who rejoins KMOX after working there in the mid-80's, Rieker most recently was the News Director at WIBV-AM (see below). Also leaving the Mighty Mox was news anchor Kathe Hartley, after 16 years with the station, and news reporter Margie Manning left after 14 years to work at the St. Louis Business Journal. Barbara Whitesides, hired two years ago to replace the legendary Anne Keefe, was fired over the summer. Carol Daniel hired to replace her, from KZIM, Cape Girardeau MO. Charles Jaco, the long time CNN reporter, was hired in the spring to host a 2-4 weekday talk show. St. Louis Cardinals games during the season, his son Joe, often seen on FOX TV's NFL coverage, was the primary announcer on the road contests. Finally, Group W took over CBS, the owner of KMOX, no word yet if any changes are forthcoming at this station that still delivers a 14 share of the 12+ audience.

WIBV-AM 1260: At this all-talker billing itself as "Hot Talk", Mike Wall dumped as morning host after more than two years, replaced by Don Imus. Bill Rieker left as News Director to rejoin KMOX (see above). Operations Manager Tom Calhoun does mornings live from 5:30 to 7 before Imus, and reads news during cutaways. Station lost its simulcast of KTVI-TV Channel 2 News at 5 when the TV station switched its affiliation from ABC to FOX.

KRAM-AM 1380: Now airing talk half the time, and simulcasting its sister station, WKBQ-FM the other half. Had Fredenburg and Bell talk shows, lost them to KSD-AM (see above). Airs "The Fabulous Sports Babe" middays and other talk shows in the afternoon, other times filled with its sister station Contemporary Hit format.

WRTH-AM 1430: Still airs nostalgic music, but in the summer, added long time and legendary jock Johnny Rabbitt to its morning show, it's only live show (except for a couple of specialty shows on the weekend). Rabbitt moved over from WRTH's sister station, country giant WIL. Rabbitt has been on the air in St. Louis since the early 1960's, most notably at then Top 40 giant KXOK.

KATZ-AM 1600: Dropped urban music and switched to an all-talk format, billing itself as "Black Information Radio". Bernie Hayes, dumped by station in 1994 then returned later in the year after a major public protest, was dumped again in '95, replaced by Onion Horton, moving over from WGNU (see above). Ironically, it was the second time Horton replaced Hayes at a station; Horton replaced Hayes at WGNU in 1985. Hank Thompson and Sharon McGhee added to host late mornings, and in the summer, Mark Kasen joined as PM drive time host, also moving from WGNU. Airs local specialty shows in other time slots.

1995 Obituaries:

Harry Fender, 99: Former "Saturday night at the Chase" host on KMOX in the 50's, 60's and 70's, the last great raconteur of St. Louis. Former Ziegfield follies performer in the 1920's, quit to be a St. Louis cop, asked by the late Robert Hyland to host a show using his connections to stage and screeen. Appeared on station in his 90's during Christmas season as Santa Claus.

John McCormick, 80: The man who "Walked and Talked at Midnight" for 32 years at KMOX. Noted for his colorful usage of the language, i.e. "Tonight, on the hardwood of the NBA", "50,000 red hot watts", and "Now, as the night meets the dawn, our National Anthem." Still drove his motorcycle until his death.

Bob Burnes, 80: The first sports talk show host at KMOX, beginning in 1953, retiring in 1992. Also was the Sports Editor at the now-defunct St. Louis Globe Democrat from 1935-1992. One of the most powerful media figures in St. Louis newspaper and broadcast history.

Doug Newman, age unknown: Former top news anchor at KMOX Radio in the 1960's and 70's, was forced from station in 1975 after a nasty AFTRA negotiation, representing the rank and file.

More obituaries for 1995 will be published in Part 2.

Two former St. Louis broadcasters died this week.

Dave Allen, better known as "Cookie" in the KMOX-TV show "Cookie and the Captain", died Saturday, Dec. 16 after a lengthy illness.

The 70 year old Allen was a radio personality in the early 1950's, but was heard in recent years as the voice of "Detroit" for Carlson Olds, a local car dealership.

His partner in the TV show, Jim Bolen, who was heard on WSIE-FM on Saturdays hosting a Jazz Show, died a year ago.

# # #

John Lawrence, a long time editorial writer for the Pulitzer-owned St. Louis Post-Dispatch, died earlier this week, he was 77.

Lawrence started at the paper in 1938, but was moved by the company to be the news director for KSD-AM 550 in the 1940's, then owned by Pulitzer. He returned to the paper in 1950 where he remained until his retirement in 1977.

# 3931. Toledo Radio Update 9-21-95

Newsgroup: rec.radio.broadcasting
Date: 1995-12-22 00:00:00 UTC
From: Craig Warner <cwarner@wcnet.org>
Message-ID: <4beblt$knq@vixen.cso.uiuc.edu>
Source record: 27671

Well, this is some minor/old news but here we go anyways.

WVKS, 92.5, KISS-FM, moved their studios from West Bancroft to Downton Toledo where they will broadcast from the same building as their sister station, WRVR (101.5), and WSPD (1370). WVKS is owned by Noble Broadcasting Group and Noble purchased WLQR and WSPD last May. WLQR (101.5) has changed their call letters to WRVR (I think) and has named the station "The River", which is a soft-rock station. WSPD (1370) has remained news-talk and added Jerry Anderson as morning-drive host. With the move of WVKS to Downtown all three stations will go digital.

Some old news that I forgot in my last report!

Diane Scribner has returned to Toledo. Scribner, who was last heard in Toledo at 93Q (WRQN) left Toledo after 93Q swithced formats to "Oldies 93.5". Diane returned as the fill-in news girl on Denny Schaffer's "Breakfast Club" and said she would like to work at WSPD. Since then I have heard that Diane will go back to school and become a nurse (she's leaving the radio biz) and in the meantime will be doing part-time at WRVR (101.5) "The River".

Keep your demo tight & bright, lead with your favorite bit (if a PD listens past the first fifteen seconds, you've got a shot) and only include one full spot--make the rest snippets. Don't exceed four minutes.

References: <4bb2h7$brj@vixen.cso.uiuc.edu>

In article <4bb2h7$brj@vixen.cso.uiuc.edu>, gds@best.com (Greg Skinner) writes:

>How much of the vicious competition is due to FCC deregulation and
>general downsizing of business?

I'd say the big problem is not so much deregulation per se, as the ridiculous number of stations the FCC has allowed to be on the air, combined with the explosion of other competitors for ad dollars...everything from 75-channel cable TV systems to bus benches. Deregulation mainly hurt newspeople, because stations that didn't want to do news didn't have to any more. But the growth of syndicated programming and automation is the result not of deregulation, but of a regulatory scheme that has allowed the revenue to be carved up so many ways that fewer and fewer stations can afford their payrolls.

It makes no economic sense whatsoever for my market to have 30 radio signals, or San Francisco to have 75....or you name any market and number any more. It doesn't even make any technical sense. Interference problems are getting worse every day. After ruining the AM band with too many stations, Washington is hell-bent to ruin FM now. And God help us all when DAB becomes reality.

>
>Also, I'm interested in how you would answer this question if the
>person was not primarily interested in being on the air, but was
>interested in some of the other radio jobs, such as program or music
>director, and the person had a number of different skills, such as
>electronics, computers, Internet, writing, etc.

There are even fewer program and music director jobs than there are air talent jobs. And being on the air is, more often than not, the route into those jobs. In smaller markets, most PD's and MD's must also pull airshifts, because splitting up the jobs is too costly. Having multiple skills does help, especially computer skills.

>market like Worcester, Mass. is EXACTLY where I figured I would be
starting.
>If I don't have enough experience to do this shift, what job do I have
the
>experience for?

Welcome to the 90's, Aaron. I'm in Bakersfield, market #88, and I've turned down people with a lot more experience than you have. Your experience is not "extensive" by my standards. At our station, the average level of experience of the air staff is about 18 years, and nobody has been in the business less than 5 years.

You're upset over one rejection? I'm sorry, but I can't work up a lot of sympathy for you. Most people get lots of rejections before they finally land a job. Hiring decisions in a creative career field are necessarily subjective. Periods of unemployment are not uncommon for broadcasters.

> I have done breaking news as well, but that was not on my aircheck tape
- since I
>haven't done news in a year, I read a sample newscast because my old news
tapes had been stolen

I'm sorry you got ripped off, but a news director can't tell how you're going to do news if you don't submit a real news aircheck. A phonied-up tape can be spotted immediately. A news department's whole reputation rides on how it handles breaking news, which, by the way, can happen any time...even Saturday morning! Screw up just once, and your station's image is ruined! What keeps you from going back into the newsroom at your highly professional college station, if news is what you want to do?

> But as radio staffs become smaller
>and older, where is the place for younger talent in this business?

--snip--
> I constantly read RadioWatches in r.r.b. which announce
>that new talent has been hired, and almost always it is recycled air
staff
>from larger markets or even the same market. Where is the place to
begin?

This really is a major problem, and it's the precise reason for the advice I gave the previous poster. In my recent search for a new employee, I had applications from some very well-seasoned people. A couple backed off when they found out they couldn't make L.A. money in Bakersfield, but the person I hired has definitely been around the block more than once. Down

And of course they argue, 'you never hear a commercial radio station run spots'?

Real radio includes news and spots and doing what the PD says. Either they
want to do it right, or they're just there to play. There's nothing wrong
with playing -- other than at the media schools, most college radio* is
just that -- but ask them to be clear about their goals.

The recent post from Jesse Fitzgerald (in AIRWAVES #1700)
was genuinely disheartening.

> Three or four Dj's just plain refused to do news sighting [sic]
> "You never hear a commercial radio station do news every hour."

Oh yeah? Most full-service radio stations have hourly
newscasts. Through the networks they are affiliated with or
locally from the wire services it is common, and probably the
highest-rated part of the hour's programming. I wonder where
these radio-oriented student Dj's have been. Of course, if
Plymouth, New Hampshire has no other stations with news service
that would be all the MORE reason for the school's station to
enhance and publicize their news operation with an opportunity
to gain market-share in the community.

Beyond the yes/no matter of whether news is a valid part of
a programming format, the insubordination of those Dj's refusing
to do what the station advertises is EXTREMELY UNPROFESSIONAL,
and would not be tolerated by any station management I've ever
dealt with. I hope those Dj's don't go out and boast about their
insubordination when seeking employment in the radio business
(or, then again, maybe they SHOULD boast about it so that their
would-be employers will no better than to hire them).

The gripes about doing PSA's I find equally appalling. For
a commercial station, PSAs are a major mechanism for acquiring
goodwill within the local community. For a non-commercial radio
station the PSAs are directly related to the reason for the station's
existence. If the effort required to play a cart or read copy is
too much of a burden, these Dj's are definitely in the wrong place.

Given the predicates implied in Jesse Fitzgerald's post, I
think the best format might be OFF-THE-AIR. Rather than changing
formats, they should consider finding some student's with a more
professional attitude towards radio.

## 3937. Hank Brown Show?

Newsgroup: rec.radio.broadcasting
Date: 1995-12-22 00:00:00 UTC
From: richrw@pipeline.com
Message-ID: <4bebm7$ko7@vixen.cso.uiuc.edu>
Source record: 27677

I found for the first time the Hank Brown Show this morning at 6:15 am on my GE Superadio but for 15 minutes he didn't announce call letters, his frequency, or his location. It was somewhere around 1150 khz, but I'd like to know where he is, station name, and exact frequency. The station seemed far from me here in NYC. Unfortunately I lost the station as the sun came up but hopefully someone out there can help. He was playing old Sinatra and Bing Crosby music and the show sounded great. Thanks

## 3938. Jean Shep

Source record: 27679

70>The station here in Wheeling with the format can't give the
70>airtime away. They went from big band (bury your listners) to
70>Kids. Now, all they need is Soupy Sales, and they might generate
70>some revenue.

Adolph,
Don't you dare take Soupy Sales and give him to the kids! Soupy is
often a guest on several of our shows. He's for grownups.

70>BTW..... my kids love it! But I would not put it in the diary,
70>if I had one.

I ask the same question as our Moderator: "Why not?"

I think kids radio is a great use of the medium. Who makes better
use of "theatre of the mind" than kids. Very young kids aren't asking
if it's AM or FM. They're asking if it's funny. If you can get the kids
to listen, a parent with a credit card can't be far away. Personally, I
hope one of the kids' networks, at least, makes it work.

From: dcdoc@aol.com
Message-ID: <4bebm9$koa@vixen.cso.uiuc.edu>
Source record: 27680

WFLA was advertising that Bob Lassiter will be doing a christmas show this SAT from 9--4pm. Will this be all previous Xmas shows and does this mean the start of something new? He belongs back on WFLA.

# 3941. Lasiter Christmas Show, Saturday on WFLA

Newsgroup: rec.radio.broadcasting
Date: 1995-12-22 00:00:00 UTC
From: Vogel <vogel@innet.com>
Message-ID: <4bebma$kob@vixen.cso.uiuc.edu>
Source record: 27681

Apparently WFLA says they are the only ones with the guts to bring back Lasiter for his Christmas show this Saturday. I was initially very happy about this but when listening to WFLA today a caller asked host Mark Vero if the show would be live or taped...In usual WFLA style, they pretended the question didn't happen and simply said the Lasiter Christmas Show would be "Aired" on the Saturday Turnstile. I want to hear Lasiter again, but not a 4 year old tape from WFLA. I want the real Bob Lasiter, and WFLA doesn't seem to have the guts to tell us what we are going to get on Saturday.

G. Vogel
Spring Hill, FL

## 3942. Lassiter on WFLA.....sort of

> I'd like to myself, but being on the younger side of life, I
> can't honestly remember them all (but I did do some research). :>

I'm not _exactly_ from the MD area, but near it (Northern Virginia
suburbs of DC), and did listen to a number of MD stations in the 70s
and early 80s (I moved away in late 84), and have several airchecks
from then in case you want to refresh your memory <g>:

04 Oct 75, WLPL-FM Baltimore MD, top 40, Lee Stuart, 10:56 pm [45m].
05 Oct 75, WLPL-FM Baltimore MD, top 40, Jay Cleaver, 12:35 am [45m].
Jingleless top 40 with long stopsets and unobtrusive presentation. First
segue each hour after the legal ID they tell you how many "minutes of
rock and roll" they'll be playing that hour.

10 Nov 79, WXYV-FM "V-103" Baltimore MD, automated urban, 11:59 pm [30m].
Their urban format was slightly disco-leaning at the time.

19 Jul 84, WWIN-FM Glen Burnie MD (Baltimore), urban/AC, unidentfied
male DJ, 1:26 am [45m].
Overnight show "The Express" on "The Adult FM".

20 Nov 84, WMAR-FM "106 Hits" Baltimore MD, Hot Hits top 40, Jim Payne
10:59 am [30m].
Baltimore's version of Hot Hits, still using the original weather musi,
not WCAU-FM's newer music.

20 Nov 84, WGRX(FM) Westminster MD (Baltimore), quality rock, Bob
Brooks, 2:40 pm [45m].
Focusing on artists and songs compatible with both AC and album rock,
rather than mixing ones from one format and the other. Fewer
format-exclusive artists than today's AAA format.

Btw, WLPL was at 92.3, WXYV at 102.7, WWIN-FM at 95.9, WMAR-FM at 106.5,
and WGRX at 100.7.

That's actually just the unscoped Baltimore area ones I have. I also have
a WZYQ Frederick and several WHFS (first Bethesda then Annapolis) from the
early 80s (as well as DC area Maryland stations like WPGC Morningside
going back to the mid 60s).

Please email me at 75300.3331@compuserve.com if you're interested in these
or any other aircheck trading. (I'll be away for the next week so I'm
not sure that I won't miss some rec.radio.broadcasting posts, tho otherwise
a reply here would be fine too.)

# 3944. Honesty in Media

RR>Rush will tell you that he is an entertainer, but the content of his
RR>show tells people that he is a source of reliable political and news
RR>information. I don't just mean to pick on Rush, either. He is just
RR>the most visible target.

Bill,
Actually, the content and accuracy of the show tells me he's an entertainer. :) When he gets into areas like the environment and argues that there's no hole in the ozone layer while scientists are actually measuring it, I don't see accuracy. I see an entertainer. Not much different than Jane Fonda shilling for the whales. Neither one has any expertise in those areas.

When I hear that all Democrats are bad and all Republicans are good, I look at Newt Gingrich's sense of ethics and I see Rush as an entertainer. A partisan one, for sure, but just an entertainer. To me, reliability requires some sense of objectivity. When every opinion is colored by partisanship, it's hard to find reliability in anything more than the assurance that Republicans will never do anything bad. Or, more realistically, that Rush will ever talk about it when they invariably do.

In my area of the world, Sen. Alphonse D'Amato is a joke whenever ethics is discussed. We just don't see the two as compatible. To see him dog Clinton for the same kinds of things he, himself, has been investigated for is a very strange sight. Elmer Gantry and Jimmy Swaggart would be proud.

RR>I believe we _should_ have a responsibility to be honest and
RR>straightforward, but we all know that matters not.

It appears this is a matter of errors by omission. Laura doesn't claim a degree in psychology any more than Rush claims to be a political scientist. They're entertainers. Until either one attempts to perform brain surgery, we're probably all relatively safe. Though many have suggested listeners have been Limbaughtomized.

Interested in a bridge? I've got one for sale. Cheap.

I remember the first time I heard "Monitor". It was on a Saturday night in the summer of 1955, and I was 10. My younger brother had just been born and my mother was home from the hospital and in bed listening to a radio next to her. She would have been listening to either WNBC or the the NBC station in Philadelphia. (Westinghouse had just sold KYW in Philly to RCA which renamed it WRCV.) I don't remember which one she was listening to. Anyway, I think it was the second or third weekend the program had been on. That spacy signature they used sounded pretty far out in '55.

What I do remember is Marlene Dietrich reading temperatures, breathlessly. That was all she did. "In Chicago, it's 4 below zero (inhale), in Los Angeles (exhale) 72..." Didn't they call her Miss Monitor, or was that somebody else?

Henry Morgan was on "Monitor" and all the personalities on the "Today Show" were on. Everybody that had ever been on NBC Radio or TV was on. Fibber McGee and Molly and Bergen and McCarthy were all on, weren't they?

Al "Jazzbo" Collins is alive and kicking, I believe. He does big band musical intermissions --- "soundies" --- on the AMC channel on cable. Years ago he was at KFI and then KGO and when I lived in the East again, I remember he was in and out of WNEW. He doesn't do any 250-watters!

BECK, JOHN wrote the quoted material below:

" Any theories or empirical evidence regarding the loss of listeners with
" radios that scan only stereo signals while transmitting in mono? Or
" perhaps those receivers were a fad and just a thing of the past?

Occasionally a listener calls into KALW asking why a music program isn't in stereo (because it's not produced in stereo). But rarely. I think stereo-only radios may be a thing of the past. Certainly I haven't seen them in years. Most of KALW's schedule is in mono, except typically 3 hours of local music a night. During fundraising time I haven't heard of anyone saying that the station suddenly popped up one evening; they have heard it during mono times as well.

> yes WPLJ went top 40 before Z100 came on the air.

"Come On Eileen" (Dexy's), "Don't Stop Believin'" (Journey), "Our House" (Madness), "Hot Girls In Love" (Loverboy), "I Melt With You" (Modern English), "We Got The Beat" (Go-Go's) -- that's pretty early in such an evolution, isn't it? :-) Especially considering the ABC FM AOR format (whether at WPLJ New York, WDAI Chicago, or pre-top 40 WRQX Washington) was always pretty mass-appearl oriented and thus more hit-oriented than other AOR stations in those cities. Anyway, the above songs are the first half of a 45m aircheck I have of WPLJ from Sat 2 Jul 83 at 6:17 pm.

> 95.5 was WABC-FM's old frequency. I'll have to check Rick
> Sklar's book for the exact date of the call letter change and flip

>From aircheck lists I see that WABC-FM was, at least in some dayparts, running an automated album rock format with Bob Lewis by Jun 67. They were still WABC-FM at least as of early 70. Dunno if the change to the WPLJ calls might have coincided with going _live_, but it certainly postdated the album rock format (same thing happened with KABC-FM in Los Angeles going album rock before renaming themselves KLOS).

You don't need DSPs on the audio cards to get good fidelity. Amazingly,
the Pentium has enough power to do a respectable job at decoding MPEG
sources. We have a system going in the lab which uses about 35% of a
Pentium 90 to decode MPEG LIII in real-time.

You are right about the Net throughput, though. There is nothing on the
horizon that would make anything over a 28.8 modem sound like FM.

# 3952. Winter '96 Radio Resistor's Bulletin available now.

Newsgroup: rec.radio.broadcasting
Date: 1995-12-22 00:00:00 UTC
From: haulgren@well.sf.ca.us
Message-ID: <4bebmk$koq@vixen.cso.uiuc.edu>
Source record: 27692

Issue #13, Winter, 1996, of the RADIO RESISTOR'S BULLETIN is now
available by e-mail, regular post, or from our Web site.

Issue #13 contains a piece by David Ciaffardini about the astonishing
success and local support for Excellent Radio, a micro radio station
operating without license in California. ("... a forthright, above-board,
non-confrontational, positive, broadcasting approach... demonstrates
community enhancing benefits.")

John Whiting muses about whether hard-core community radio activists want
station democracy or the "anarchistic order" of personal responsibility.

>From "In These Times", a reprint of Robert McChesney's article "TELECON!".
McChesney discusses the history of U.S. telecommunications law and its
likely impact on the very near future. ("Through their immense power in
Washington, D.C., the commercial broadcasters were able to dominate the
Federal Radio Commission so that the scarce number of channels were turned
over to them with no public and little Congressional deliberation.")

Craig Kois provides an overview of the recently concluded 25th
Anniversary Loyola Radio Conference in Chicago. Geert Lovink's "Listen
or Die! A history of Radio Dood (Death)" is excerpted providing a
fascinating glimpse into the Amsterdam punk/pirate seen of the 80's.

And of course there are letters, publication notes, the INFOBOX and
an extra long Radio Briefs section including information on the CBC's
decision to kill its shortwave service come March of next year.

The RADIO RESISTOR's BULLETIN is intended to serve as a conduit for
information, ideas, and the concerns of those who care passionately about
non-commercial radio in all of its forms.

Joel_Runes@email.fpl.com wrote the quoted material below:

" I hadn't heard Rush's show in several years, but I was struck
" that within the first 15 minutes I was hearing the same thing I
" heard the last time. Not EXACTLY the same thing
[....]
" "me, I'm my kids' [or kid's] mom" it sounded cute. The second
" time, a mere 60 minutes later, it sounded like I had heard it

I know a talk host who has told the same stories for 20 years. Why do people listen? Probably for the same reasons they listen to the same top 20 or 30 hits. Familiarity. People like the familiar. In the case of Rush, preaching to the choir also helps his longevity. People continually need to be reassured that someone else believes the way they do.

Personally, I tire of it, but then I have to remind myself that I'm not like a lot of listeners.

Message-ID: <4bebml$kot@vixen.cso.uiuc.edu>
Source record: 27695

71>opinions on what she is all about. I've heard plenty of talk in my own
71>market about her, mostly from people who think she is anti-family, anti-
71>men, anti-this and that. Nothing could be further from the truth.

Dan,
What the "truth" is is irrelevant. What's important is what the
perception is. If your listeners believe she's anti something or other,
then that's what their reality is. If they listen and come away with
that impression, then tune away, you've got a problem.

71>Give her entire three-hour program a listen and you'll think otherwise.

Many stations don't carry the full three hours, so they can't.

When the average time spent listening is 22 minutes, you can't
expect anyone to force themselves to listen to something, just to get
the "proper" impression. Whatever impression they have comes from
whatever time they've spared to listen. No listener owes any
personality anything. Either that personality entertains within that
window or they're irrelevant to listeners. Telling listeners that their
reality is wrong isn't a smart bonding move. Anyone asking me to listen
to three hours of Phyllis Schlaffly just so I'd find her warm and fuzzy
and mom-like isn't going to be taken seriously. In Phyllis' case, a
shrew for five minutes is a shrew for three hours. It's that old "first
impression" stuff.

71>And BTW, her program is one I'll put up against Rush in almost any market.

That's fine. However, if Rush isn't in the market, I'll go after
him. I disagree with almost everything Rush has to say, yet I still
want the competitive advantage. It may be hard to sell, but I can use
the show to boost my overall numbers and make money from that. Or, if
he is in the market, I'd take a niche program with a sales angle and
make money. I'm kind of partial to "The Dolans" for a great sales hit
against Rush.

Also, I thought she was on KFI, live after Rush. In order to
compete with Rush a station would have to delay the show by a day. I
don't have a problem, necessarily, with a taped show, but a full day's
delay isn't high on my list of competitive strategies.

Source record: 27696

References: <4bb2h8$brk@vixen.cso.uiuc.edu>

I programmed several top 40 stations in the 70's and the Brown Institute types weren't what I looked for, unless it was just to fill an all night shift. For the most part, they were just trained in the mechanics and most sounded alike, very stereotyped--like "Ronald Radio." We used to call it the "Puke Delivery." I also didn't like jocks trying to emulate someone else. Unlike what seems to be the status quo in radio today, I was looking for real talent. Anybody can learn the mechanics in a matter of a few hours. I'm not specifically picking on Brown, but it seems that a lot of people, that probably shouldn't have come into the business in the first place came by way of the trade schools. Of course, some of the Brown graduates did have some natural talent.

What I looked for was someone who wasn't even in radio that was doing work in a local drama group, the life of the office, etc. Not necessarily a stand-up comedian, but someone with a little personality. One of my jocks went directly from Davenport Iowa to Los Angeles.

Ray Dennis

## 3957. FM broadcast station uplink freqs

Newsgroup: rec.radio.broadcasting
Date: 1995-12-22 00:00:00 UTC
From: Justin Bousquet <justinb@psg.com>
Message-ID: <4bebmn$kp0@vixen.cso.uiuc.edu>
Source record: 27697
Cross-posted to: rec.radio.broadcasting,rec.radio.scanner

I was curious about what frequencies are being used as uplinks to the transmitters.

I live in Portland, Oregon and I am most interested in the following stations...

92.3 KGON
94.7 KNRK <- This one mostly
100.3 KKRZ
101.1 KUFO

You see I would like to monitor the public FM stations out here without a walkman or just my scanner. Actually my amateur radio rig.

Any help would be much appreciated...Thx a million

I'm looking for a station voice. I want the big as a house, deeper than Death Valley, shake down the echos from the sky voice. But if you've got a different one and think it's great, send it too. My address is:

WAWC-FM
10129 N. 800 E.
Syracuse, IN 46567

Attn: Station Voice

# 3959. More on 1660 Khz activity

Newsgroup: rec.radio.broadcasting

Today, I spoke with John L. Sullivan, an official with WJDM in Elizabeth, NJ and had a very interesting conversation.

He said that they had gotten FCC approval just before they withdrew the allocation plan. They put 1660 on the air a couple weeks ago.

It seems their situation is as follows: WJDM is a daytimer on 1530 Khz with no chance for any kind of nightime operation. To complicate the problem, they are located in a swampy area of New Jersey where several New York City stations have located their transmitters. Two of the stations create an intermod or diplexing situation where their signals combine and create interference on 1530 (such as 720 plus 810). WJDM is the only broadcast outlet in a market of 100,000 people. The FCC considered it a hardship case.

In order to stay on the air WJDM had left their previous format and sold the whole day to an Hispanic Gospel outfit. They simulcast this on 1660 in the daytime. In order to meet minimum FCC operating hours for a full-time station, 1660 must stay on the air until 10:00pm local time. They are running oldies from sundown until 10:00pm. They have received reports from as far away as Oregon. I have been receiving their 1,000 watt nightime signal in Des Moines Iowa loud and clear.

Happenings in the #40 market(and just under the wire,too!):

*Fans of the AHL's Rochester Americans who,since the beginning of the season could hear the Amerks only on WCMF-AM(990,sports;SportsRadio 990) now have another outlet to turn to,according to Kevin Oklobzija's hockey column in last Sunday's Rochester Democrat & Chronicle. WBER(90.5, alternative/various)has re-signed a deal with the team to broadcast the team's games on the Amerks Broadcast Network,after nearly 3 months of negotiations. As Oklobzija notes,"that means listeners who have difficulty picking up the weak nighttime signal of WCMF(990)can hear Don Stevens' call on the FM dial up."(Actually,it isn't that weak(only 2.5 kW),but neither station is easy to pick up in the Rochester War Memorial during a game... trust me.)
Team president Steve Donner said that one of his goals for the near future "is to build our radio network so we can reach our dedicated fans in all areas of Western New York."
But why did it take so long? Well,even though the Amerks are now locally owned,WBER refused to enter another deal until the Buffalo Sabres (Rochester's parent club)paid last season's bill.
(WBER on the Web at...http://www.monroe.edu/ed_comm/WBER/index.html)

*Still in the area:Avon-based classic rocker WHRR(93.3,The River)has dropped syndicated AM driver Don Imus,with Bob Savage(who owns WHRR and sister station WYSL(1030,news/talk))handling those duties. It's now a more music intensive show,with a minimum of talk. (BTW,the I-Man can still be heard on WHTK(Hot Talk 1280)-if,that is,you can get it that early.)
(Thanks to Scott Fybush for noting the change.)

*A pair of Toronto stations have jumped on the information highway. CJCL(The Fan 590)can be reached at:thefan@telemedia.org ,while CHOG (Talk640)'s news department is based at:talk640news@talk640.wic.ca .

*In his year in music piece in today's Gusto,Tony Violanti gives WEDG (103.3 the Edge)best local music station honors,saying "the Edge is the first alternative commerical station localted in the city,and Rich Wall as music director has made it a vibrant music force." Not from where I type... CKEY(FM 101 The Planet)is better as modern rock;as far as the Edge goes, it's not much more than modern AOR. Ironic that the same station last year got awarded the most tasteless station.

*Business First's Dec.25 issue has a couple of media-related predictions for 1996:
-#23:The FCC finally loosens radio ownership regulations,allowing for groups to own more than 2 AMs & 2 FMs.(This will allow Rich Communications Corp. to officially sell WGR-AM and WWWS-AM to Keymarket Communications.
(Hey,guys...don't you mean _River City_ Communications? They own Keymarket,

you know.))
-#27:On the air.(WWKB will sign on Don Imus to replace Howard Stern.
(Just imagine:the I-Man and country.))

*While I'm on 1996:Metro Weekend's year-end issue had predictions from
a number of media people:
-WBEN(NewsTalk930)mid-morning talker Gary McNamara resolved to "stay
employed"(he's said it for many years)and that "Jimmy Griffin(former Buffalo
mayor)will not be elected President."(Really going out on a limb,aren't you,
Gary? ;) )
-WKSE(Kiss 98.5)'s whole morning team offered their hopes. Janet Snyder
said she'd "be kind and loving to my husband...NOT!" and "that O.J. will be
found not guilty."(By who-the court of public opinion? :>) Sidekick
Nicholas Picholas promised to "move out of Janet's basement and walk on
water",as well a successful Presidental by Griffin.(Yeah,sure.) Producer
Wease said he wanted to convince his wife "to get two jobs,get pregnant" and
he will stay at home. He also thinks that "Barbie will crossdress as a
Power Ranger."(Can't wait. :>)
-103.3 the Edge's Ted Shred & Tom Ragan also weighed in:Ragan promised
to "stop blowing so much money on crack",and a successful bid for the White
House by Griffin. As for Shred,he hoped to remain employed "and not be found
dead in Lake Erie",but had no predictions,saying that Nostradamus had
"taken all the good ones."
-Cheryl Hagen,who does double duty(traffic duty at Metro Networks for
a number of stations during the week,and reporting on the weekends for WGRZ
(ch.2),wanted to be a "better & happier person" in '96,and that President
Clinton "will do the macarena dance on New Year's Eve."

*More about 'KB...
---
>From:bfowoz@ubvms.cc.buffalo.edu(Mark Wozniak,WBFO-FM)

> *Say the magic letters(KB in this case)and look what you get:

"Jackson Armstrong, WKBW Radio MUUUUUUUUUUUUUUUUUUUUUUU-SIC!!!"

I will NEVER forget the golden rock and roll days of KB radio, "one of
America's two great radio stations!" Or, as I like to refer to it,
"Kaye-B", since during its late 60s/early 70s peak Jefferson Kaye (now the
voice of NFL Films) was the PD. The jingles that didn't sound like
jingles, the Capsule Countdowns, Pulse Beat News, the music specials (Is
Paul McCartney Dead?), the War of the Worlds and other Halloween night
specials, fun and creative contests, "Pop Tops", the KB Yo-Yos, great
music, and of course, the great personalities...Jackson Armstrong, Dan
Neaverth, Joey Reynolds, Rod Roddy (I know, I'm showing my age!), the late
Bud Ballou, Don Berns, Sandy Beach, Bob McRae, the late Jerry Farrell on
weekends, Casey Piotrowski, hell, even Shane!

Going back even further, I currently work with Stan Jasinski on his weekly
polka shows on WHTT-AM (at one time WWOL). Stan has been a Buffalo radio
(and TV) pioneer since the 1940s, and is still active at age 80. In the
early to mid 50s, Stan did a late night polka show weeknights on KB. 50

thousand watts, up and down the Eastern Seaboard. Stan has some great stories to tell about that time, including one about the musician who recorded the song Stan used as his signoff theme. Whenever the musician had a weeknight gig, he would take a break at five minutes to one AM to hear his record played. The musician was in Connecticut!

IMHO, KB's demise began the first week of December 1973, when they changed to "KB 15...the Great American Music Machine" after releasing Jeff Kaye. It wasn't long before it became the "Late American Music Machine".

With the 1970s divestment of print and broadcast properties, Buffalo's radio/TV co-owned stations were sold, and two of the TV stations changed calls (WBEN Channel 4 to WIVB, WGR Channel 2 to WGRZ). But when Capital Cities sold the KB stations, the *radio* calls were changed, not the TV! A mortal sin!

"Somebody call up those other guys and tell them to turn it off...they're running up their electric bill" (from a Jackson Armstrong aircheck, early 1972). Ironic that this quote should now apply to that 50kW signal near the top of the dial.

"This is WKBW, 1520 on your Buffalo dial."

*Here's some radio bits from the e-zine wny mEdia(contact me for sub info):
---
.From: Wnymedia@aol.com

THE FOOTBALL FAN'S NEW CLOTHES...

In the fourth quarter of the Buffalo Bills - New England Patriots game, radio play-by-play announcer Van Miller became quite excited when he reported that a streaker had run onto the field and was being pursued by stadium security personnel - "He's at the 10, the 15, he's brought down at the 20-yard line!!!"
Hoping to find out more about the streaker, (the game wasn't that interesting), I looked to the next day's sport pages in THE BUFFALO NEWS. The only reference I could find was in the Monday Billboard feature which called him "...a man who had run onto the field."
So my question is, was it really a streaker, or were Van's binoculars fogged up again?

MEAN MR. MUSTARD...

Not everyone is happy with the Beatles' new record.
In the December issue of SMASH, Tom Ragan bemoans the song, "Free As A Bird," which was recorded by the three surviving band members and an old John Lennon tape which Yoko Ono dug out of her attic.

Ragan admits to not liking band reunions in general, and has an idea on how to end this one.
"Give Mark David Chapman a furlough and three more bullets and stop this whole mess before it evolves into a farewell tour."
Yikes!
Tom, don't hold back! Tell us how you really feel!
(He's half of WEDG's(103.3 the Edge)morning team.)

BEEF ON WECK...

Listening to WECK (1230 AM) the other day, I heard the announcer talking about the upcoming divorce of singer Natalie Cole and her husband.
Towards the end of the piece, the announcer went on to wish Cole good luck.
What about her husband? Doesn't he deserve good luck too? This being the 90s and all, he may be the one needing alimony.

YOU'RE ON THE AIR...

I'm not one for listening to daytime, call-in radio shows, but the other day I found myself tuned in to Ron Dobson on WGR (550 AM).
He seemed to be talking a lot and not taking many calls, and I started wondering if indeed anyone was listening.
So I dialed the number a few times and got right through to the producer.
Either they have a lot of phone lines, or not a lot of callers.
No, I never went on the air. Coward that I am, I kept telling the producer that I'd dialed the wrong number.

WHERE WERE YOU?

This issue's walk down memory lane come to you courtesy of Mark Scott, news director of WBFO (88.7 FM):
I've been following Buffalo radio for nearly 30 years and have many opinions, which I will share with you from time to time. My favorite times were the early '70s when KB owned the Top 40 airwaves with Danny Neaverth, Fred Klestine, Don Berns, Sandy Beach, Jack Armstrong and Bob McCrae.
Armstrong was phenomenal - the energy and enthusiasm he brought to his show amazed me. "Your le-e-e-e-e-e-ader, Jackson Armstrong, WKBW RadioMu-u-u-usic!" Wow! In these days of tightly formatted, boring commercial radio music formats, we'll never see his likes again.

My apologies for the length of this piece! Have a happy & safe holiday season,no matter how you celebrate it. Last _regular_ watch of the year for me...the year in review will be up next.

# 3961. Looking for Airchecks 70's 80's NYC, Phila

Newsgroup: rec.radio.broadcasting
Date: 1995-12-24 00:00:00 UTC
From: steve c walko ee stnt <scw1118@hertz.njit.edu>
Message-ID: <4bi6al$oq8@vixen.cso.uiuc.edu>
Source record: 27611

Hello all. With all the talk lately about the history of FM radio in NYC and Philadelphia, I was wondering if anyone had some old airchecks they would be willing to dub for me. My first real exposure to FM radio listening was around 1982. I would be especially interested in the early days of Z-100 and WPLJ (1983-5) along with WRFM, WKHK, 92 KTU, old MOR WYNY, and the early days of WNSR Soft Rock 105.

I would love anything in Philadephia from the late 70's to late 80's including 98 CAU, Electric 106, Z-106, and the early days of Dance Q-102 and Top 40 Eagle 106.

If anyone can help out, I would be more than happy to compensate for tape and postage costs. I could even send the tapes and return packing with postage to you.

I am collecting a little aircheck library for myself and would love some older ones.

Thanks

Steve W

# 3962. High end of AM band, other Q

Newsgroup: rec.radio.broadcasting
Date: 1995-12-24 00:00:00 UTC
From: croth@omnifest.uwm.edu
Message-ID: <4bi6al$oq9@vixen.cso.uiuc.edu>
Source record: 27612

1. A few years ago, the top end of the AM band was expanded.
I stopped subscribing to Broadcasting/Cable. What's happened lately?
Who is using it?

2. Here in SE WI, one can hear WJJD-AM from Chicago. Then I noticed
what appears to be a _local_ Milwaukee station with the same
call letters. Has the FCC actually deregulated call letters
to the extent that they're no longer exclusive? There were
rumblings about this near the end of the Fowler era at the FCC.

3. On Tuesday, I attended the monthly meeting of the Society
of Broadcast Engineers. We met at the WTMJ-TV-AM /WKTI FM
complex. Evening event. It was a demonstration of Web sites.
Yes, there is a radio station signal on the Web. It sounds
lousy, but you can hear it and distinguish words. I can't
tell you the address nor station.

I wonder if this triggers any ASCAP or BMI payments--putting
a signal on the Internet.

Newcomers should know that a station pays into the copyright
pool, and so does a big department store if they carry the
very same station throughout the store speakers.

4. Can anyone in LA tell me if Ron Goldman has a regular program
on KFI-AM? I'm tracking the still-unfolding Simpson tragedy,
and would appreciate information. Is he a regular guest?
When he's on, who else is on at the same time?

# 3963. Ampex/3M Announce Discontinuation of Tape

Newsgroup: rec.radio.broadcasting
Date: 1995-12-24 00:00:00 UTC
From: robert573@dallas.email.net
Message-ID: <4bi6am$oqa@vixen.cso.uiuc.edu>
Source record: 27613

Two of the largest audio tape manufacturers have announced they
will discontinue all lines of analog tape manufacturing, and only
one will remain in digital tape manufacturing.
3M has announced they will cease manufacturing of ALL formats
of tape, both audio and video, within a one year period. Chairman and
CEO of 3M, L. D. DeSimone cites intense price competiton and poor
returns on investments as the reasons for the discontinuation of all
of 3M's tape manufacturing. Gone would be all lines of video and audio
tape, including 3M's most recent introduction of 996 open reel mastering
tape, which is still being used in the broadcast and recording industry.
Ampex has also announced that they will discontinue all
analog tape manufacturing, but will continue to make digital
audio tapes for some of it's digital products. Ampex has
however, sold magnetic tape subsidiary Ampex Media Corp
to Quantegy Acquisition Corporation, a company of AMC's
existing lendors.
Ampex has said that since May of 1993, manufacturing of
tapes for equipment Ampex has made but discontinued or not made
by Ampex, has been officially "dead" in sales. Ampex will
continue to produce recording tape for use for all of it's
current line of digital data storage, video, and instrumentation
drives and robotic libraries.
Ampex had discontinued their 672 cassette tapes several years
ago, and now it appears that they will be discontinuing analog
open reel tapes such as their recent 499 Gold series and their most
popular selling 456 series tapes.
Both 3M and Ampex are tape recording pioneers with roots as far
back as the earliest days of magnetic recording in the United States,
which basically began after World War II.

Can anyone tell of personal experiences with the border blaster stations of the 30s; stations like XER/XERA "The Sunshine Station Between the Nations" where Dr. John Brinkley pitched his restorative goat gland operations and prostate and colon clinics?

Or Norman Baker who cured cancer without operations, radium or x-ray, and called the faithful over XENT?

Can anyone tell of the changes that took place in Del Rio, Eagle Pass and Laredo, as antenna arrays appeared in the distance emitting signals so powerful their coronas could be seen.

Is there anyone familiar with the early days of Continental Electronics in Dallas, where the early engineers that built the border

blasters went to build great transmitters?

After the recent post bemoaning the end of Canadian shortwave broadcasts, I called Public Radio International, which is headquartered here in the Twin Cities.
Brian Newhouse, in charge of CBC distribution, told me
A) they (P.R.I.) are the only U.S. distributor of Canadian/CBC programming,
B) there's no 800- number, so if you want to talk to him about CBC programs they carry you'll have to call (612) 338-5000,
C) You shouldn't; call your local public radio station instead and ask which Canadian programs, if any, they carry, and
D) soon you won't have to call; a Web page is slated to be up and running shortly after the first of the year. I will harass this nice man and get the specs out of him as soon as possible for posting here.

>You don't need another degree, either. Nobody in the commercial side of
>this business cares about degrees,

This is not entirely true. I do know of positions where you would not even be considered without a BA in a broadcasting field. The thinking is that there are so many people in the 'talent pool' that employers can afford to be choosier about who they hire.

>although I for one do look for a
>well-rounded education and evidence that a person is well-read and
>informed.

The easiest way for many people to do just that is look at their degree status. And many do. Still, it can be done and need not always be a broadcasting degree.

> The only thing that really counts is what comes out of the
>speaker.

Ideally, this is true. But you've got to get the position first! Experience vs degree is a very old dilemma, and I believe it must be handled on a case-by-case basis. There are a whole lot of degreed people out there with no business in radio, and a whole lot of people with no degree who would do great in radio.

Getting back to the original post...my advice is to get friendly with the people at a local station. Ingratiate yourself with some who will take you under their wing and let you use the studio to put together a tape. (I always let people applying for their first p/t gig to use a studio for a quick tape. They get a copy and I get a copy.) Then work that puppy, and don't underestimate the powers of persuasion and persevierance. All you've got to go on is potential - having no track record - and that is really hard to measure. You've really got to sell yourself! Good luck!

J_> Several members of the Executive Board are wondering whether or
J_>not we need to do news every hour. Three or four Dj's just plain
refused
J_>to do news sighting "You never hear a commercial radio station do
news
J_>every hour." Also, all the Dj's are complaining about the frequency
of
J_>PSA's. Whether carted up or read aloud the majority of Dj's are
sick of
J_>them and don't want to have to do one an hour (translate into 2-4 a
show).
J_>If anyone (HEY PROGRAM DIRECTORS) could suggest a few formats it
would be
J_>greatly appreciated.

Jesse,
Let me offer a suggestion: has the Executive Board ever considered acting like "real" management? "Three or four Dj's just plain refused to do news" would inspire me to "just plain refuse to hire them." If the Executive Board determines they should do news, they'll do it or find someplace else to play. I assume this operation is intended to train future power broadcasters. In the world of commercial broadcasting PSAs are a fact of life and one of the few required "givebacks" to the folks who own the spectrum your DJs use. You've painted a picture of a staff I would never tolerate as a General Manager or Program Director. It sounds like the inmates are running the asylum.

With an attitude like this, I hope the station's staff has no plans to enter commercial broadcasting. We don't need them.

Rich

## 3968. Starting Commercial FM Station in La.

> Originally the NAB _endorsed_ Eureka 147. Then the Bush administration,
> at the request of the Defense Department, declined to release any L-band
> spectrum for DAB.
>
> The opposition of many NAB members to Eureka 147 was largely irrelevant.

My recollection of the sequence of events is that the NAB not only endorsed L-band Eureka 147, but planned to license the technology from the European Union for use by its members and others in the USA. After the big announcement, a number of influential NAB members wanted to know why the NAB was hell bent on destroying the asset values in the radio industry. After hearing from its membership, the NAB reneged and endorsed an attempt at IBOC DAB.

The assertion the Defense Department couldn't do without 100% of its L-band allocation came after, probably at the instigation of the NAB which is after all an excellent lobbying organization which does not leave many shovelfuls unturned.

<76476.2472@compuserve.com> writes:

>I think fondly of the *really* funny radio shows

I think the focus of high-profile morning shows has shifted. Funny used to be enough. Now we need attention, too. Even if Don & Mike told a GREAT joke, we wouldn't be talking about it here, would we? But now we're talking about D&M _and_ Regis. And as Hollywood loves to point out, any news is good news.

It's all about grabbing headlines now. Ten years ago, the only people who knew about big talent were radio people, for the most part. Today, big talent transcends the radio because they've pushed themselves off the radio and into the headlines. That's great exposure and heaps huge rewards in terms of ratings and $$$. Problem is, to get those headlines, you need to be more outrageous than you were last time, and more outrageous than the competition.

It's not about entertaining people so much anymore, it's about getting their attention.

>I live in Portland, Oregon and I am most interested in the following
>stations...
I'm not sure about the US but in Canada the common bands for broadcast
STL (Studio Transmitter Links) and RPU (Remote Pickup Units or remote
broadcast transmitters) is 450-451 Mhz and 455-456 Mhz. But for Stereo
FM broadcast stations is in the 900 Mhz range (928 rings a bell) and its
a Composite signal if its stereo. I'm not sure if your radio will go that high...
I have an Icom 24at dual band HT that covers the 800 band but I cannot receive
the composite stl's. I have no problem monitoring the 450/455 mono links for
the AM stations but the audio is a bit rough (probably since it a wider bandwidth
than the average 5khz two-way radio your scanner/ham radio is designed for)

There's the problem with KidRadio...kids don't get diaries. At least, not
yet. Get a few advertisers clamoring for -12 numbers and watch how soon
Jr gets a book!

BTW - why would you not put it in the diary? Especially if you were
listening with them? That's what the diary is for. You're not part of
the sample that screws up the ratings by reporting non-existant listening
to your "favorite" stations instead of actual listening, are you?

References: <4b8bu0$5ci@vixen.cso.uiuc.edu>

There seems to be a secondary debate: did it start with programming or society? Is life imitating art or art imitating life? The plunger rape. Kids reciting "Singing In the Rain" while raping a woman after Stanley Kubrick's "Clockwork Orange" in - what? 196something? Only the screenwriters have any inkling whether the story idea was theirs or something they read/heard about in the news or in another show. You can't convince me that much of anything we see is an original thought.

But also, if the media is going to get the blame for everything wrong in society, we had better start demanding that we get the credit for everything good in society also. It is a double edged sword. Crime is down. Thank you, media. Volunteerism is up. Thank you, media. The economy is still doing pretty well. Thank you, media. There may be peace in Isreal (as there was in a book written well over a decade ago, the title of which escapes me). Thank you, media.

Sound too simplistic? That's the sword's other edge. Am I crediting the media _too_ much? Are you blaming the media _too_ much? It is one small facet of a large problem which seems to be getting more than it's share of blame. I call it escapism. Society is escaping responsibility by pointing a collective finger at the nasty old media.

Who says quality and numbers are not synonimous? If you don't have
quality, you don't have numbers in my market. Simple as that. Quality in
your eyes may be a different thing. That makes you a majority, obviously,
and I can't win by catering to minorities.

>#there is little or nothing on radio in Seattle or
>#most other cities in this country that is anywhere near the quality
standard
>#of the BBC or CBC, who exist to provide the best possible programs to
their
>#listeners rather than the most possible listeners to their advertisers.

Ironically, friends from Europe seem to enjoy American radio. Their only
complaint is the music. It's different, to be sure. But as far as
content goes, they seem to believe American radio has fewer restrictions
because it actually has to appeal to a broad base. It has to cater to
them as compared to relaxing on the comfort of government funding,
appeasing the beaurocrats instead of the listeners. I'm sure this view is
not universal, but it is one I've heard from several English and Irish
friends.

JR> As Lewis Hill said almost fifty years ago, if you ask broadcasters why they
JR>don't offer "better" programs, they'll tell you they're giving their
listeners
JR>what the listeners want; if you ask listeners what they want, they'll choose
JR>among the things that they know about--the currently avaialble programs.

JR>This is known as a vicious circle. Someplace on the radio dial there should
JR>at least one broadcaster who creates programs for their own sake, with the
JR>freedom to experiment with musical styles, literature and, yes, wind chimes
JR>and whale farts. Many of these experiments will fail, but a few will succeed
JR>in expanding the tastes and interests of some listeners. And of that
JR>successful few, there may even be the makings of a new commercial format.

John,
We have several stations in New York that do exactly that. They're constantly under attack from people threatening to put them out of business. There are many experimental music shows. Many of the same people who complain about the meekness of the media with its lack of experiemental fervor hate these stations. They're NPR and APR stations. They're going to lose funding. When that happens, they'll be in the same boat as commercial stations. Go where it's safe because it costs money to fail.

Who's is going to decide which station in each city will do the experimental format. I want to decide for New York. Naturally, I'll probably choose a competitor. I think WABC would sound very cool doing wind chimes. Maybe Bob Grant can recite new age poetry and Rush Limbaugh could lend his dulcet tones to save the whale essays with the whale-passing-gas sound effects. Wow, I think it could work! I'm going to give Jim Arcara at ABC Corporate a call first thing Tuesday and suggest it. ABC has big bucks. They can afford to do something without expecting a profit. I think he'll like the idea.

Of course, wind chimes are satanic, so we'll have to figure out how to deal with Ayatollah Ralph Reed and his bunch if we don't want them pushing legislation to ban the new format. I already get daily faxes >from Ayatollah Gary Bauer telling me how horribly un-Christian almost everything is. They're already fired up to lobby to kill NPR. The "Reverend" Donald "Wildman" Wildmon won't like our format very much, either. You see, canned religion isn't very experimental or cutting edge. If the literature isn't creationist in nature, he'll object. I'd suggest a station on the Internet, but they're already well on their way to banning anything interesting there. You know, gotta protect the kids.

It's getting very, very difficult to do anything cutting edge. Once the religious right is part of the White House (they're very good buddies with Bob Dole and Phil Graham) our options for anything but proper religious right wing conservative thought will be very limited.

You see, experimentation comes from free thinkers. The media isn't exactly overrun by such folks. Experimentation tends to come from "liberal" thinkers (whatever that means). The trend in America today is to legislate against things. We punish the likes of Howard Stern while letting Televangelists rip off old ladies without a second thought. Social Conservatives aren't exactly wild and crazy guys. They want you to stop doing things rather than try to push the envelope.

Experimentation is dead. It's too dangerous.

Rich

JO>As for the argument that the CBC and BBC are publicly funded and therefore
JO>subject to pressures that commercial stations do not have, it may be true (s
JO>far as it goes), but it's irrelevant. At both the CBC (directly funded by th
JO>Canadian government) and the BBC (funded by an annual license fee on TV
JO>receivers), the program makers are insulated from the need to produce the
JO>highest possible audience numbers at all times. Therefore, those program
JO>makers are able to do things that may not always interest a mass audience.
JO>Neither BBC nor CBC Radio is perfect, and both are facing serious financial
JO>problems right now, but they treat their listeners with more respect than mo

JO>broadcaster in this country, where many broadcasters would sell their souls
JO>for a half-point increase in audience share.

JO>But as I said earlier, between debt service, payrolls and overhead, that
JO>half-point is probably essential to most American broadcasters's survival. A

JO>since the first instinct of any organism is to survive, they have no choice
JO>but to continue fine tuning a limited number of formats to deliver as many
JO>listners as possible to potential advertisers.

>

I think you're preaching to the choir here. WE know that, but to most listeners, being on the radio as a host puts someone in a position of authority. From the listeners' point of view, if the host is not qualified to present their opinions as fact, then why are they there? Why would a radio station allow someone unqualified to field questions in such a sensitive area? Is it too much to expect qualified hosts? I don't think so.

Also, WE know the programs are simple vehicles to "get listeners to spend money on advertiser's products," but the listeners do not tune in for the commercials...they're there for the content.

From: howardsnj@aol.com
Message-ID: <4bi6be$ork@vixen.cso.uiuc.edu>
Source record: 27639

I hope that WJDM makes a go of it on 1660 khz. Two Sundays ago I was down in Cape May, NJ, about 200 miles from WJDM xmitter site, and heard their signal on 1660 coming in loud and clear at 3 pm!

I live only 10 miles or so from their xmitter, and get their low power 1530 khz signal during the day. Their programming is pathetic, and they know it. WJDM tried for years to make a go of it as a local station, playing soft rock, oldies, country, with local new and fairly complete local political coverage (all in English, of course). That died. Their primary coverage area is economically and socially depressed, and getting worse (Newark, Elizabeth, etc.).

If they are going to make a go of it on the higher band, with expanded coverage and power, they're going to have to look to becoming some kind of AM "superstation", like TV stations WOR and WGN. Otherwise, its just a nice try.

>this station has only played oldies (for the last 50 or so minutes). At
>9:22 PM EST, a jingle "the first station on the extended band".

FWIW, a *lot* of old radios -- specifically those from 1938-1942, with quite a few before and a few after -- happen to cover the extended AM band as though they were made for it. Since major police departments used 1712 kHz for dispatching back then, when the broadcast band was extended from 1500 to 1600 kHz in 1938 (to take effect in 1941) many manufacturers went up to 1720 instead of 1610. (Portable and car radios were an exception because of laws in some cities and states regarding reception of police calls in vehicles.) This feature disappeared shortly after World War II, as police forces moved to VHF two-way radio systems.

There's a difference between WDRE and the WDRE Network, which is what you hear in Philly and elsewhere. I believe they started incorporating more local stuff and different music in Philly to bring up ratings, and I seem to remember it working. Being several hundred miles away, I'm just going on what I remember reading about the situation.

My question is, if it's so different, why carry the WDRE Network instead of "doing your own thing"?

>Questions of where to apply for jobs, what to put on an aircheck tapes -
>these are questions that I must deal with in the next few months.

Obviously, the PD was looking for more than he was advertising for. In this particular instance, I would send him another tape with the other things he mentions highlighted. Another tactic for future mailings would be to place news and school closings on one side of your tape and a scoped show and production on the other. (Make sure it's a short tape so there's not heavy rewinding involved, and label it clearly!) Even if he doesn't take the time to listen to it all, at least he knows it is there and you can do it.

The hardest part of a job search - especially the first one - is keeping up your determination. Patience and persevierance will pay huge dividends. DON'T get that law degree! (Although, that would be a good background for talk radio!)

Good luck with the job search. You will find a place. It just takes a little (a lot?) of patience and some good timing.

SM>Does anyone out there who regularly listens to the Art Bell show "Coast to
SM>Coast AM" know how I can contact Art Bell via e-mail?

Skeeter,
Maybe you could use UFOMail. I'm sure there'll be a passing
spaceship sometime soon. Hand it to the aliens and they'll deliver it.
:)

Understand that your demo itself is a sample of your ability to produce compelling audio. The way you stage, pace and edit the tape is almost as important as what samples you include.

A very common mistake is to leave too much of any one sample spot. You don't measure it just by the clock; you measure it by when the listener has gotten the gist of what the spot is and what approach & techniques you applied to it. As soon as that has been accomplished, move on to the next sample.

If you are interested in talk radio, get an entry level job as a Producer. As a show Producer you will learn how to put together a show from the bottom up! It will greatly benefit you when an all important Host job opens up! I have hired 3 college grads this year. The jobs don't pay well, but the expirience is invaluable!

>Providence. Now, despite being a "college station," i.e. with a staff of
>unpaid college students, WBRU is a fully commercial, professional
>"Alternative" station.

--- excess snipped ---

Aaron...

You pose the eternal dilemna, of course...landing that first "pro" gig.

A lot of us on this list faced this at some time: getting a good start at a better than average college station often raises one's expectations about what kind of job you'll land. I faced the same "problem", having had a chance to work at a great college station in the early 70s that nearly qualified as "semi-pro" for the quality of the programming, and the quality of the people who were either working concurrently with "pro" stations in D.C., or had moved on to bigger and better things.

Back to your problem: what to do. First, someone with your talent should *not* be discouraged by *one* rejection. One of the true marks of a real "pro" is persistence.
You got one rejection...fine for the station that turned you down. That means an opportunity for the *next* station you pitch to take advantage of your talents and work ethic. Second: Be more judicious tailoring your aircheck tape. If its a news job you're going for, be sure to LEAD with your newswork (even if its reading the news in the context of your morning music show, or PSAs or even those snow closings).
If its a DJ/announcer job, lead with your best break, demonstrating your vocal skills, and your best "read". Make sure that break SPARKLES and shows you at your absolute best WITHIN THE FIRST FIFTEEN-TWENTY SECONDS OF THAT TAPE. If you don't catch the PD's or News Director's attention in the first 15-20 seconds, your tape is off to the recycle bin, and your resume into the "slush" file.
Third, tailor your letter similarly, selling your particular skills appropriate to the job you want.

One other thing: one of the other marks of a "pro" is that you KNOW that you won't always get the "gig". No one does. Remember that a PD or News Director is looking at a bunch of tapes, and there will be people better than you and worse than you. You're gonna be in the middle of that group, and any decision the PD or ND makes is NOT PERSONAL. He/she is gonna make the best call they can make based on their needs, and, to be honest, even non-subjective qualifications like, "Hey, I know the PD this guy worked for", or "I know this station, its pretty cool", etc.

So its just as important to have good references in your tape/resume package. People who can vouch for the quality of your work. Ask your PD or Station Manager at your college station for some letters of reference, maybe a professor who can candidly provide some analysis of your growth in the field. Guard these letters, and your reputation as a budding "pro" carefully, because they could mean the difference between getting your next job, and the job after that, and the job after that.

Anyway, Aaron, hang in there, keep plugging away, and best of luck to you!

Cheers,
Max

A little bitter, are we? Just for the record, I've never NOT returned a call. But your post irritates me, nonetheless. You're assuming that the people who haven't returned your call are snubbing you - let alone know who you are. Chances are, IF they're snubbing you because of your association with larger markets, it's because the sad fact is that these people have generalized "big market talent" by their experience with people of that calibre, and those experiences were negative.

For example, I actually had someone raise their voice at me for offering only a midday gig at a rate of pay apparently substantially below their expectations. "I'm doing you a favor by offering to work there" was his attitude. He was, eventually, introduced to my friend, the dial tone. That attitude is too common, which is why it is easy to make generalizations.

# 4004. Jacksonville Tower Crisis, part two

Newsgroup: rec.radio.broadcasting
Date: 1995-12-31 00:00:00 UTC
From: Buzz Jackson WROO <76427.3606@compuserve.com>
Message-ID: <4c72c1$7j7@vixen.cso.uiuc.edu>
Source record: 27507

At about 2:30 this afternoon tower crews apparently stabilized the wobbling mast on top of the WJKS-17 (ABC station for Jacksonville) tower. According to the six pm news, bolts around the base of the antenna at the top of the tower had loosened, causing the wobble. The tower crew said the bolts were not loose enough to be unscrewed by hand but the area was evacuated anyway, for safety reasons.

Two radio stations across the street had to be evacuated, too, and broadcast for much of the morning from a parking lot.

> content goes, they seem to believe American radio has fewer restrictions
> because it actually has to appeal to a broad base.

Well as a Brit let me put in my 2 pennyworth...

The thing I really do admire about US radio compared to the scene here in the UK is the sheer professionalism of presenters over there. A typical US presenter will put in much more time, effort and ingenuity on show-prep than his/her equivalent here (with some honourable exceptions of course) and will always be "on the case" making the show work for the listener. Here in the UK many presenters (and I'm mostly talking about the commercial sector, the BBC is a little different) have little or no ongoing training and so become complacent and horribly self-indulgent; this shows up clearly on air of course.

The typical standard of presentation here in commercial radio would cause many US broadcasters a serious hernia from laughing were you to hear it.

Also the US has a much better attitude to female presenters. You can't imagine the number of PDs here that think a female voice is an automatic listener turn-off.

Having said all that, I really dislike the fast rotation playlisting of many US stations that I've heard, I personally prefer to have a larger selection of music to listen to. That's one downside of having so many stations in one market I suppose.

Just my personal opinions of course.

yes, philly and NY dre have separated by the NY station sounds much better than the Philly counterpart. Philly is starting to sound more and more like a CHR station while NY is trying to maintain/gain back the image it once had, and in doing so is much more enjoyable.

Another really bad mistake on Philly's part was removing Couzin Ed from the lineup and placing in a local jock. Ed was the new anchor that the station had and without him, philly is as good as gone.

## 4010. WLUX Long Island NY

Source record: 27514

Well, maybe not the WORST station ID...

In the CHR heyday of the early to mid 80s, many stations wanted to soundjust like Z-100 in New York. They bought JAM's "Warp Factor" jingle package, Xeroxed Z-100 playlist out of R&R and used it as their own, and buried their legal ID between spots in the :52 stopset. I worked for such a station in 1988. Just like the listener didn't quite hear "WHTZ/Newark-New York City" at :54 past the hour in NYC, a listener wouldn;t quite hear "WKYN/St. Marys" at :54 past the hour in northern Pennsylvania.

BTW, 97KYN has since changed ownership, calls (to WKVE) and format (AOR), but they still do the ID between spots in the :53 stopset. (mumbled....WKVE/St. Marys, WXVE/Spangler). Nice to know some things NEVER change- the GM still thinks his city of license sounds too wimpy to mention!

Awful station IDs? I still think one of the strangest ones (and
intended that way) was used at a college (carrier-current) station:
"WIUK, Kokomo...James Dean *died* when he was 24."
...Happened to be an extension campus; median age of the student body
was--you guessed it!--24. (We were a sick lot in those long-ago days).

OTOH, it's hard to beat "WLW, the Nation's Station...Crosley Radios
and Shelvador refrigerators---Cincinnati" for sheer clumsiness, and they
used it for *years.* Swapped it around a bit for legality at the top of
the hour after they got caught at it, 'tis said.

# 4014. Mid-America Radio Watch (1995 Timeline)

Newsgroup: rec.radio.broadcasting
Date: 1995-12-31 00:00:00 UTC
From: "Mark S. Roberts" <transvox@crl.com>
Message-ID: <4c72a9$7fs@vixen.cso.uiuc.edu>
Source record: 27550

Here is a timeline of events in the Kansas City and Mid-Missouri
markets in 1995. See accompanying article for more background.

Note:
* indicates date given was the date the event or phenomenon
was reported in AIRWAVES. Other dates are actual dates of
the event.

January 6
EZ Communications buys KBEQ-AM/FM for $7.65 million from Noble Broadcasting;
pays $28 million for one-year option to buy KFKF(FM) from Sconnix Broadcasting,
thereby forming a duopoly of country stations in Kansas City. Purchase also
requires spinoff of country station KKCJ(FM), owned by Ardman but operated
by Sconnix under a three-year-old LMA. Sconnix is to handle the KKCJ sale,
requiring that KKCJ's new owner agree NOT to program a country format.

January 7
KISF(FM) shifts from contemporary-hit radio to "new rock" (i.e., modern rock,
but it can't use that slogan because KLZR(FM) in Lawrence uses it).

January 9
KMXV(FM) unveils new morning show with previous AM driver Karen Barber
and Danny Douglas from KJYO(FM) Oklahoma City. Previous AM drive co-host
Denis Prior moves to afternoon drive.

January 21
KISF(FM) replaces Saturday night dance remotes with "Planet Kiss" progressive
dance show, lasts only a month; transition to "new rock" otherwise complete.

January 24
KISF(FM) drops "Boomer and the Dave" morning show, evening host Mark
Daniels fills in while replacements sought.

January 26
Mutual talk show host Jim Bohannon, a Springfield native, broadcasts
his nightly show live from KFRU(AM) in Columbia to celebrate KFRU's 70th
anniversary on the air (counting its original nine months in Oklahoma).

February 1
KISF(FM) announces KLZR(FM) morning-drive personality Jay Charles will be a
member of its new morning team, starting March 1.

February 2*
KFRU(AM) and KPLA(FM) in Columbia apply for FCC permission to purchase
album-alternative KBXR(FM) from founders Dave Taylor and Pat Watkins.

February 17
_Kansas City Business Journal_ speculates Heritage Media is the leading candidate to buy KKCJ(FM), with a reported offer of more than $4 million for the soon-to-be LMA orphan.

February 20
Kansas City mayor Emanuel Cleaver becomes angry at WDAF(AM) reporters Frank Haynes and Dave Morton during a mayoral candidates' debate at WDAF; upon leaving the station after finishing taping the debate, the mayor reportedly refuses to shake the WDAF reporters' hands.

February 23
KKCJ(FM) purchased by Heritage, present owner of KCFX(FM); other than a switch from a country format, no programming plans are announced.

March 1
KISF(FM) begins "Music First" morning show with Jay Charles from KLZR(FM) and Ed Parreira from Las Vegas. The show flops and is replaced in September.

March 10
KKCJ(FM) PM driver Roger Carson says good-bye at 6 pm; over the weekend, the station at 106.5 MHz simulcasts KFKF(FM) or KBEQ-FM, the country stations whose duopoly arrangement required a sale of KKCJ.

March 14
Rumors are planted in the Kansas City _Star_'s gossip column about silent KZTO(FM), with a pending "sale" to the owner of Springfield's KTOZ-FM, Frank Copsidas; in reality, Copsidas already has bought the station.

March 14
KKCJ(FM) begins mind-numbing alternation of 15-minute promos for KFKF(FM) and KBEQ-FM. Reportedly, Sconnix, temporarily operating KFKF, KBEQ-FM, and KKCJ, was asked by prospective KKCJ owner Heritage to rework copy in the promos, which could have been misinterpreted as suggesting KKCJ was going off the air permanently.

March 17
Local radio "icon" Mike Murphy, midday host at KCMO(AM), delays his return from a two-week vacation after he slips and falls, breaking one arm in three places.

March 17
Heritage announces interim polka format for KKCJ, also offers four-hour air shifts to members of the public in return for a $1,000 donation to a local children's hospital. No one takes up KKCJ on the offer.

March 17
In Columbia, KBXR(FM) shifts its playlist away from obscure blues to modern rock and "unplugged" folk-oriented selections.

March 20*
In Topeka, Midland Broadcasters forms a duopoly with KMAJ-AM/FM and newly purchased KTOP(AM) and KDVV(FM), in the process changing KDVV's format from

album rock to classic rock.
Frank Copsidas announces plans to move KZTO(FM) transmitter site closer to Kansas City, from west of Lawrence to a site in Leavenworth County, Kansas.
Children's radio station KBEA(AM) changes calls to KCAZ(AM). KBEA has been a "Radio Aahs" relay since November 1994.

March 20
At 6:02 am, Heritage takes over KKCJ(FM) and begins an all-polka format which becomes a featured item on local TV newscasts.

March 24
KKCJ(FM) suspends the polkafest for a 2-1/2 hour parody of new-rock KISF(FM) from 4 to 6:30 pm.

March 30
KKCJ(FM) unwraps new "smooth jazz" format at 7:15 am.

April 17*
KCTE(AM) quits "The Team" and picks up another syndicated sports-talk service, "One on One Sports," and adds a locally produced afternoon-drive sports talk show.
Columbia oldies station KOQL(FM) enters into a joint sales agreement with KFRU(AM)/KPLA(FM)/KBXR(FM). In fact, KOQL was put on the air the previous November using KPLA's former antenna, site, and transmitter.
California station KREL(AM), formerly KZMO, returns to the air after its purchase by local investors. The station had been silent since July 1994, though KZMO-FM continued on the air until its purchase by KLIK(AM) and KTXY(FM) in Jefferson City.

May 1*
St. Joseph adult-contemporary station KKJO(FM), descendent of longtime Top-40 station KKJO(AM) (now KSFT), begins "Super Seventies Saturday Night," the region's only hardcore 70s-oldies programming. (By "hardcore", I mean disco is enthusiastically included.)

May 8
Modern-rock rimshot KLZR(FM) in Lawrence, Kansas is hit by lightning. Returns to the air a day later at greatly reduced power.

May 13*
Winter 1995 Arbitron survey shows country/full-service low-frequency blowtorch WDAF(AM) in first place 12+, with urban-contemporary KPRS(FM) in second place and #1 25-54 *and* 18-34.

May 17*
Heritage album-rock station KYYS(FM) repositions to a classic-rock/AOR hybrid to fill the niche left by KCFX's transition to 70s rock from classic rock. In reality, the difference is not that noticeable.

June 12*
WHB(AM), normally a farm and country station, begins six-hour Saturday-evening block of Spanish-language programming.

June 12*
In Mid-Missouri: KZMO-FM and KLIK(AM) in the Jefferson City market begin separate country formats (they had been simulcasting) as KZMO continues to build its 50,000-watt facility. Soft-rock rimshot KTLH(FM), licensed to Boonville but trying to be a Columbia station with just 6,000 watts, asks the FCC to change the 93.9 MHz allocation from Boonville to Fayette with an accompanying power increase. The FCC approves the proposal in September.

June 14
Sale of Stauffer Communications of Topeka to Morris Communications is completed. Morris announces plans to sell all the Stauffer broadcast properties, including WIBW-AM/FM/TV in Topeka and KMIZ-TV in Columbia. TV properties are tentatively sold to Benedek Broadcasting of Rockford, Illinois on November 29.

June 17*
Locally owned KPRT(AM)/KPRS(FM) is named a Kansas City Chamber of Commerce Top 10 Small Business of 1995.

June 19
KCMO(AM) moves from Manor Square in Westport, across the state line to KMBZ(AM)'s studios and offices in Westwood, Kansas. This move represents the completion of plans to consolidate all the stations in the Bonneville duopoly at the Westwood location, including KCMO-FM and KLTH(FM). Also moving in 1994: KBEQ-AM/FM moved from the west side of the Country Club Plaza in with KFKF(FM) on the east side of the Plaza. KCFX(FM) and KCIY(FM) moved into KBEQ's old digs from its suburban Kansas location. WDAF(AM) and KYYS(FM) moved into the old KCMO Manor Square location, making room for expansion at WDAF-TV.

June 25
KLZR(FM) in Lawrence, Kansas repairs transmitter and improves antenna, returning to full power with a slightly better signal in Kansas City than before the May 8 lightning strike that crippled the station for several weeks.

June 29
The Kansas City _Star_ gossip column reports that Copsidas is offering still-silent KZTO(FM) for sale for $6 million cash.

June 30*
Regent Communications pays $50 million for Apollo Radio, naming Apollo president Bill Stakelin chief operating officer. In Kansas City, Apollo owns KMXV(FM), its first acquisition, and KUDL(FM).

July 3
K280EJ, to rebroadcast KLTE(FM) Kirksville, reported on the air testing. However, the Columbia translator's owner, the _Good News Journal_, postpones actual operation of the facility until it completes a fundraising drive. K280EJ begins normal operations in October.

July 4*
In mid-Missouri and the St. Charles suburban market: KFAV(FM) switches from

"classic hits" to adult-alternative in June; KFAL(AM) transitions back to a traditional country format; KFRU(AM) drops mid-afternoon local talk for Dr. Laura Schlesinger, and KTGR(AM) carries the Court TV audio feed of the O.J. Simpson trial.

July 4
Tornado hits downtown Moberly, Missouri, ripping off the roof of the KWIX/KRES building. KWIX(AM) and KRES(FM) stay on the air, relaying emergency information that evening and the following day.

July 21
KQRC(FM) promotes a $5,000 cash giveaway in downtown Kansas City, Missouri, attracting large, somewhat ill-behaved crowds. One woman suffered a broken leg and another woman's car ended up with a smashed windshield because of the event.

July 22*
KCMO(AM)/KMBZ(AM) program director Mike Elder leaves for WCCO(AM) Minneapolis.
Dormant Channel 32 construction permit sold to Quincy Jones Entertainment. Subsequent reports say the station will be built next year and operated by KMBC-TV (ABC) under a TV equivalent of an LMA as a Warner Brothers affiliate.

August 2
Satellite-fed suburban oldies station KCXL(AM) begins low-power nighttime operation at less than 47 watts, its pre-sunrise power. Also begins some local programs on Saturdays.

August 4*
Kansas City _Star_ reports departure of KYYS(FM) program director Scott Souhrada.
Spring 1995 Arbitrons bring bad news for WDAF(AM): "61 Country" slips to number 3 12+ and number 10 in 25-54. "Smooth jazz" KCIY(FM) can really blow its horn: up to a 4.3 in its first book, the highest share for a Kansas City station at 106.5 MHz since 1989. Country KFKF(FM) dominates, with number-one rankings 12+ *and* 25-54.

August 15
KZTO(FM) misses original target date for getting back on the air; in September, owner Frank Copsidas says station still needs Federal Aviation Administration approval for new tower site. The station at 95.7 MHz still is not on the air by the last week of 1995.

August 25
38-year veteran Ron Lutz retires from KFAL(AM) in Fulton during an emotional final show at mid-Missouri's first and most traditional country and bluegrass station.

August 31
The last day for WDAF(AM) and KYYS(FM) on Signal Hill, where they've been since the early 1950s after WDAF-TV was built. The radio stations move into Manor Square in Westport the next day, occupying space vacated by

KCMO-AM/FM when they moved in with KMBZ(AM)/KLTH(FM).

September 5*
EZ Communications exercises its option to buy KFKF(FM). KISF(FM) begins 80s music show on Sunday morning after several successful "80s weekends".

September 8
KSLQ(AM) in Washington, Missouri back on the air at reduced power. KSLQ's transmitter site next to the Missouri River was flooded out in May. KSLQ returns to its full 500-watt power in October.

September 11
KISF(FM) morning-show volatility continues: Ed Parreira and Jay Charles move to other shifts at the station, with Booker Madison taking over a more entertainment-oriented morning show with less music. This version of KISF morning drive lasts just under three months.

September 18*
Locally-based gospel chain Bott Broadcasting applies to the FCC for a translator of KCCV-FM at 97.3 MHz, based near 43rd and Broadway in midtown Kansas City, Missouri. Bott already has KCCV-FM at 92.3 MHz and KAYX(FM) in Richmond, Missouri at 92.5 MHz, broadcasting what it calls "Life FM."

September 29*
KCTV is the first Kansas City television station to open up a World Wide Web site (http://www.kctv.com).

October 2
Independent DJ Ray Velazquez collapses at KLZR(FM) after finishing his weekly techno-ambient "Nocturnal Transmission" show. Velazquez undergoes emergency surgery in Kansas City to repair a brain aneurysm and is back on the air December 10.

October 4
KATI(FM), formerly KZMO-FM, completes upgrade to 50,000 watts and debuts its new "Kat Country" format targeted to the Jefferson City market at 3 pm. Station is part of the capital city's first duopoly, also involving KLIK(AM) and KTXY(FM).

October 10
FCC releases order telling Contemporary Media owner Michael S. Rice to show cause why licenses for his stations should not be revoked for unauthorized transfer of control after his 1994 felony sexual-assault convictions. The order would affect KFMZ(FM) Columbia, KBMX(FM) Eldon, KAAM-FM (construction permit) Huntsville, and applications in two other towns.

October 11
Forty-year-old KCTV transmitting antenna replaced at mid-morning with new circularly-polarized model; 31st Street blocked off between Main and Gillham Road while helicopter pulls out old antenna and lowers new one into place on the landmark 1,042-foot self-supporting tower at Union Hill.

October 20
Kansas City Police Department's Office of Citizen Complaints clears an officer of accusations by WDAF(AM) reporter Frank Haynes. Haynes accused the officer of shoving him while the officer was guarding Mayor Emanuel Cleaver, with whom Haynes has had a contentious relationship.

October 21*
New KYYS(FM) program director John Duncan drops watered-down weekly modern-rock show "Radio Free Westport," saying it doesn't fit into the station's schedule. Hosts of "Radio Free Westport" resurface the next week on KISF(FM) with a new show called "The Living Room," featuring new alternative music.

October 22*
Kansas City Association of Black Journalists gives KBEQ(AM) its "Thumbs Down" award for programming from Chuck Harder's "People's Radio Network" that the association considers inflammatory. Harder writes letters of protest to the association and the Kansas City _Star_.

October 30*
"Smooth jazz" KCIY(FM) climbs to fifth place in summer Arbitrons. Top four stations retain their positions from spring book: KFKF(FM), KPRS(FM), WDAF(AM), KCFX(FM). KCIY also climbs to second 25-54, just behind KFKF.

November 2*
(Not reported in Airwaves due to problems with moderator's host system.) Mayor Emanuel Cleaver criticizes KCCV(AM) after KCCV talk-show hosts attack Cleaver as "un-Christian" for his role in facilitating the move of X-rated businesses into downtown away from a midtown area slated for redevelopment. Cleaver points out that he is an ordained, active United Methodist minister; he also notes that U.S. Supreme Court rulings require new locations to be found for the displaced businesses.

November 13*
Controversial preacher and homeless-shelter operator Larry Rice applies for small FM station at the site of his KNLJ-TV near Jefferson City. Rice also owns KNLC-TV St. Louis, and several low-power television stations in the Ozarks.

November 18*
Historic WHB(AM), stagnating in a simulcast with rural KMZU(FM) since August 1993, begins separately-originated AM and PM drive shows, retaining country-music format but with Kansas City news and traffic reports.

November 25*
Arbitrends show KFKF continuing in the number-one spot, WDAF(AM) recovering to number two, and, a big surprise, young-country KBEQ-FM snagging the number-one ranking for listeners 18-34.

December 1*
Program director Chuck Geiger leaves KISF(FM), format remains unchanged.
Morning driver Booker Madison leaves for Pittsburgh.
Onward Christian applications: the Baptist Temple School applies

for 91.1 MHz in St. Joseph, while KJAB(FM) in Mexico, Missouri asks the FCC to move from 90.1 MHz to 88.3 MHz with a power hike from 380 to 6,000 watts, which would cause interference with student broadcaster KCOU(FM) at 88.1 MHz in Columbia.

December 8*
Topeka station WREN(AM) applies to migrate across the state line 65 miles to Kansas City, increase daytime power to 15,000 watts, decrease nighttime power to 3,500 watts, staying on 1250 KHz, using a site near the Worlds of Fun amusement park.
In Mid-Missouri, KCMQ(FM) gets its allocation upgraded from C3 to C1, paving the way for an eventual power increase to 100,000 watts.
In TV, the 1994 Fox-NBC affiliation swap claims its first executive-level casualties as news director Mark Olinger, his executive producer, and promotions director all leave KSHB-TV, struggling in the ratings despite its new NBC affiliation.

December 12
Hot-talker hot-shot Rick Roberts is shown the door at KCMO(AM) after previous afternoon's show during which, according to listener reports published in the Kansas City _Star_, he taunted beloved midday KCMO host Mike Murphy, made fun of the Salvation Army, and hung up on callers.

December 15
KSMO-TV, Channel 62, sold to Sinclair Broadcasting, exercising option to buy the rapidly growing UPN affiliate for $18 million. Outgoing GM Jim McDonald, architect of the station's successful focus on movies, Kansas City Royals baseball, and collegiate sports, estimates station's market value at nearly $60 million.

December 21*
Donald Wildmon's American Family Association also applies for a St. Joseph station at 91.1 MHz.

December 23 (new item)
K247AB at 97.3 MHz in Blue Springs observed off the air. On December 25, parent station KCVO(FM) in Camdenton no longer includes it in its list of translator IDs, indicating that the low-power relay in the eastern suburbs of Kansas City has been dropped. Is it possible there is a tie between the removal of K247AB and the application for a KCCV-FM translator in midtown Kansas City?

# 4015. ST. LOUIS YEAR IN REVIEW - PART TWO ON FM STATIONS

Newsgroup: rec.radio.broadcasting
Date: 1995-12-31 00:00:00 UTC
From: ssimon9@ix.netcom.com
Message-ID: <4c72aa$7fu@vixen.cso.uiuc.edu>
Source record: 27551

This is part two of the St. Louis Radio Year-in-Review, this week reporting on St. Louis FM stations. For those of you who are searching for the extensive review of St. Louis AM stations, it was posted last week on AIRWAVES. Only stations that had significant activity are reported.

KWMU-FM 90.7 - This public radio station owned and operated by the University of Missouri-St. Louis is coming into its own as a solid news operation, under the direction of ND Lester Graham. It captured several honors for news and sports reporting in both Missouri and Illinois; not even KMOX, who self-proclaims itself as the area's news leader, can say it won top journalism awards in Illinois.

WIL-FM 92.3 - Still St. Louis' top country station, but during the summer, afternoon jock Johnny Rabbitt was transferred to host the morning show on its sister station WRTH-AM. Staffer Bo Matthews tabbed to replace "The Rabbitt". Ratings will very high, pushing KMOX-AM for number one, 25-54. Station made a strong bid to acquire rights for St. Louis Rams football broadcasts, but bowed out when the bidding got up to $2 million.

KSD-FM 93.7 - A tumultous year for St. Louis' Classic Rock station. It seems like every personality at the beginning of the year ended up across town at WVRV (The River), and their personalities moved to KSD.

People like Chuck Jefferies and Mark Klose moved to the River, while Debbie Alexander, J.C. Corcoran, and former River PD Catfish Crouch moved to KSD. Larry Hoffman, the Radio Editor for the St. Louis Journalism Review, said that the two stations reminded him of the way baseball teams trade players. The re-arrival of Corcoran was one of the two big moves by the station during the year. After being ankled by The River in June, Corcoran returned to KSD in early December after nearly a five-year absence. It raised eyebrows because Corcoran is working for GM Karen Carroll, who J.C. made comments about on the air in his previous KSD tenure that were unflattering. But the wounds healed and the show is a solid anchor for their revival. Steve Brill became the new PD in the fall, ousting Rick Balis after just a year in the job. The other big news was that the station won the rights to broadcast St. Louis Rams football and related talk shows for five years, at a cost of a little more than $3 million per year. The games also were simulcast on sister station KSD-AM.

KSHE-FM 94.7 - The news here won't be made until January 2, 1996, when the station will air the syndicated Bob and Tom show from Indianapolis, the first time a St. Louis FM station has aired an out-of-town syndicated show. It's a real gamble for the legendary

St. Louis rocker because according to Jerry Berger of the St. Louis Post-Dispatch, no station outside of Indiana that airs the show has ever gotten a high rating. John Ulett remains to do cut ins. Rick Balis rejoins the station as PD, after being ankled at KSD. He was the PD at KSHE during their salad years in the 1980's and early 90's.

KIHT-FM (96.3) - Ratings in 1995 never approached the phenomenal '94 surveys for this all-70's station, dropping 50 percent for many dayparts and demographics. Former long-time KLOU jock Kevin McCarthy joined the station during the summer for evenings, later promoted to PM drive.

KYKY-FM (98.1) - St. Louis' solid AC station made just one significant move, moving Julie Buck off the morning show and added her to John Larrabee's afternoon slot

KATZ-FM (100.3) - The only format change in the market on the FM side. Started the year doing smooth jazz, dumped it on Labor Day for Urban, and fired all the entire on-air staff, including Mark Klose, who'd been there just a month after being ankled at The River.

WVRV-FM (101.1) - Billing itself as St. Louis' alternative rocker, it made many changes, mostly with KSD-FM (see above). First, J.C. Corcoran's contract wasn't renewed by the station in the summer. A month later, PD Catfish Crouch was ankled. A couple of weeks later, afternoon jock Mark Klose was canned. Midday host Debbie Alexander, who joined the station early in the year from The Blaze in Chicago, was sacked when the station brought Chuck Jefferies from KSD-FM. Vic Porcelli, production director for The River, replaced Corcoran, and has done a good job playing the music instead of a variety-entertainment type program Corcoran was noted to produce. Tom Brown, who had been teamed with Corcoran, remained on the Porcelli show, but even he was scratch in October. Scott Strong, who had been marketing The River and sister station The Point, replaced Crouch as PD. Several night and weekend jocks were canned, too many to mention in this column.

KLOU-FM (103.3) - Still the only oldies station in St. Louis, and ratings remain flat. In February, fired long-time jocks Kevin McCarthy and Mike McCann, after 15 and 7 years, respectively. Dropped Mike Harvey's Super Gold Saturday night show in the spring and programmed it locally, which has been handled by three different people in the past eight months.

KPNT-FM (105.7) - 1996 will be a critical year for this fast up-and-coming new age rocker. Jim McGuinn, responsible for their solid foundation, left in October to program two FM stations in Philadelphia and Long Island. Shortly after, morning co-host Mary Ellen Owens left to go to The Edge in Dallas, then in early December, the other co-host, Sarah Clarke, left to join McGuinn in Philly. The pair was the only all-female morning show in St. Louis history, and their departure hurts the station. Jeff Burton, production director,

replaced them, although it's not known if it is temporary or permanent. Alex Luke, the talented music director, was immediately named PD to replace McGuinn, and he should do a good job, very well respected among station staffers and music leaders in St. Louis.

WKKX-FM (106.5) - A change in the morning show at this country station which still has never put a serious dent in WIL-FM's huge audience. Asher Benrubi, "Smash", was sacked by the station, and replaced by a brand-new duo, Bob and Sue, as in Sue Thomas, who did traffic reporting for several area stations. Smash ended up at the Emmis station in Indianapolis. It came as a surprise to many; critics said this former morning rock jock (KSHE) couldn't cut it with the country crew, but his down home folksy style was well accepted. His salary level wasn't accepted by the owners, Zimmer Broadcasting. The new duo has a decent show, but not up to par with their chief competitor, David and Debbie at WIL-FM, which has been dominant in St. Louis since 1988.

RADIO WITH PICTURES

I'm taking the cue from my Kansas City compatriot, Mark Roberts, about the TV affiliation switch in St. Louis. Long-time ABC affiliate KTVI Channel 2 was bought by New World, so it picked up FOX on August 7th, and ABC moved over to KDNL-TV Channel 30.

That decision was actually made in August of 1994, but the switch had to wait until the Channel 2 sale was complete.

So Channel 30 debuted a newscast on Jan. 1 at 9 p.m., and for the first three months, averaged an excellent 6 rating going head to head with independent (actually WB affiliate) KPLR-TV Channel 11. It was not a "Fox-i-fied" type newscast, rather, very straight forward.

But when Channel 30 got ABC, it didn't help a bit, in fact, it hurt their news ratings. It lost anywhere from 25 to 60% of their lead-ins from ABC. A good example was the debut of NYPD Blue on Nov. 7, a 12 rating as a lead in, while the newscast earned only a 5.

St. Louisans saw a lot of out-of-towners who don't know the town, and usually saw a serious error in each newscast, and basically, eroded any chance of credibility in the near future.

News Director Gary Whitaker quit in Dec., to run a TV station in his hometown of Springfield MO.

As for Channel 2, the change didn't help them at all. At 10 p.m. in Nov. 1994, it had a 20 share. In November of '95, it had a 10 share, losing half its audience from the year before.

Their problem? From 9-10, Channel 2 runs "Tales of the Highway Patrol" and "Cops" - both fine shows, but hardly ratings busters as a news lead. Rumor is they'll do local news from 9-10:30 p.m. sometime in '96.

WHAT TO POSSIBLY LOOK FOR IN ST. LOUIS RADIO IN 1996 (or WISHFUL THINKING):

1. Possible sweeping changes in management and personalities at KMOX-AM, now that Group W owns CBS. KMOX and sister station KLOU-FM also could be sold by Group W, St. Louis is the smallest market in their group.

2. WIL-FM replacing KMOX as the most listened to station in St. Louis, 12+ audience. (Critics, notice the headline says "possible"). Reason? KSD-AM now all-talk, most of it live, and could cut into KMOX's ancient (demographic) audience by stealing whatever lower demos the Mighty 'MOX has.

3. KSHE dumps the syndie "Bob and Tom" show in AM drive, and replaces it with a live show. Pewhaps a return a "Radio Rich" Dalton.

4. KSD-FM surging ahead of WVRV "The River" in the ratings with new life and personality.

5. All-talk WGNU-AM going all syndicated talk, dumping all their on air staff, except for Liz Brown in morning and sports talk shows in evening.

6. All-sports KFNS-AM could dump some personalities or have some of them leave, now that Compass has sold to Par Broadcasting of San Diego, plus a new PD, Ted Habeck, on board, yes, the same guy who was PD at several FM rockers in St. Louis.

7. This is a long-shot prediction, but look for KATZ-FM to simulcast it's all-talk sister, Black Information Radio KATZ-AM. The reason? The AM ratings aren't bad and a solid target format, while the Satellite-programmed Urban on the FM is a bust compared to ratings at sister FM KMJM Majic 108. The AM's signal coverage is limited, a simulcast on the FM would solve that dilemna.

8. Look for the Frischlings to sell KXOK-FM, now an Urban format, and move back to Pittsburgh.

9. Somehow, the kid's crystal ball sees cuts at EZ Communications' KSD AM/FM and KYKY-FM. They got the Rams football broadcast rights for some $3.5 million dollars a year, and I "guest-i-mate" that they lost $1.5 million in the first year. Luckily, KYKY is a very solid and strong station; if the Rams can make the playoffs next year, and if KSD-AM/FM can grow with live all-talk and personality hosted Classic Rock formats, cuts might be avoided.

10. WIBV-AM drops "Imus in the Morning" and goes for a live morning show. Owner Emert Wyss could entertain offers to sell the station, after the death of his partner a couple of years ago.

11. Look for KIHT-FM to tinker with it's all 70's format as ratings continue to slide.

12. KLOU-FM finally dumps oldies and goes to a rock intensive format.

13. Metro Traffic, which bought out locally-owned and operated Computraffic from Hildebrand Communication in 1994, realizes it isn't cutting the mustard in St. Louis, and bails out after two years. They still operate out of the Hildebrand building (hmmmm, wonder what Brad Hildebrand had up his sleeve?)

"Have a Happy Holiday season, and may God bless you, and your other vital organs"

# 4016. San Diego 1995 Radio In Review

Newsgroup: rec.radio.broadcasting
Date: 1995-12-31 00:00:00 UTC
From: davidtan@mci.newscorp.com
Message-ID: <4c72ab$7fv@vixen.cso.uiuc.edu>
Source record: 27552

Hi there:

I have a variety of thoughts about the San Diego/TJ radio market in the past year of 1995. What's right about it. What's wrong. What's missing. What's unneeded. Also included are selected major LA stations.

AM

540 - XHTIM Tijuana - News originating from Orange County. Good idea to simulcast the same programming on BOTH the Tijuana station and the Hesperia transmitter on 540, plus the 1260 frequency in San Fernando valley. BUT: 540 in TJ does dark at night and I cannot get either the 540 or the 1260 frequencies from up North at any time. Instead, I get a strong 540 from somewhere deep south in Mexico. Couldn't we have this station on 24 hours a day down in San Diego/TJ?

600 - KOGO San Diego - Talk - I like the concept of talk radio, but most of the talkers that are not working could be replaced with newscasts, other talkers, or more sports programming.

640 - KFI Los Angeles - Talk - still a winning lineup making a dent locally in ratings

670 - KWNK Simi Valley - Sports - now on its own and no longer an XTRA relay, KWNK intends to become the second all-sports station (the second since the demise of KMPC) originating from LA. The more, the merrier.

690 - XTRA "From Baja To The Canadian Rockies" as they call it though I doubt it you can get any trace of it in Canada in midday. Their sports talk shows are entertaining and its sportscasts and literally jam packed. They should look into broadcasting some of the overflow games on another AM outlet so its fans can be able to follow them.

710 - KMPC Los Angeles - Talk - good signal. entertaining lineup. where's the ratings?

760 - KFMB San Diego - Talk/News - full of personalities to entertain you. It could use more sportscasts though, especially from XTRA's overflow farm.

790 - KABC Los Angeles - Talk - the owners of 710/790 should look into strengthening the lineup on 710 with some of 790's programs. Fix the problem of interrupting Tom Leykis's afternoon program with baseball bumping it off the air and put the rest of it on 790, for example.

910 - KECR - El Cajon, 1210 - KPRZ - San Marcos/San Diego, 740 - KBRT - Los Angeles, and 107.9 - KWVE - San Clemente - religion. Need more?

950 - XEK Tijuana - Mexican - Noble Broadcasting should look into getting this strong signal for broadcasting its overflow sports programming there. All the second choices and a few first choice events could go there.

1000 - KCEO - Vista - Business news and talk - strong enough during the day, but disappears in the night. I can get a Seattle station there instead of KCEO at night.

1070 - KNX Los Angeles - News - though it's aimed at LA and no all-news San Diego station exists, this will do for national, LA, and sports.

1130 - KSDO San Diego - Talk - could use more newscasts in the afternoon and evening. We should have at least one station doing all-news from 3-7pm, NOON-1 and 6-9am during drivetime and lunchtime somewhere here aimed at San Diego. Rush rules in the 9am-NOON and Roger Hedgecock in the early PM.

1170 - KCBQ San Diego - oldies - in 1996, it will become a simulcast of Jef and Jer on the other "Q" station (Q106). In my opinion, it should look into an original program lineup after Jef and Jer ends at 10am. They could do news on the hour with talk or adult pop/rock music of the 70s-90s and sports programming at night not heard on 600, 690, or 760.

1240 - KSDO San Diego - country - this 1000-watter has been that way since I first got a radio back in the late 60s. I don't know why it doesn't do an different country angle than on its sister simulcast on 97.3, but if it ain't broke...

1320 - KKLQ - Oceanside - currently a Q106 simulcast - its very weak signal and close proximity with TJ's 1310 is keeping it from success. If Palomar College can't use it, what would it become?

1360 - K-POP San Diego and 1450 KSPA Escondido - nostalgic pop - do we really need TWO of these here?

FM

88.3 KSDS San Diego - Traditional Jazz - since XETV channel 6 nearby (at 87.75 audio) is keeping this station from boosting its power citing interference reasons, I'd like to see 88.3 swap channels with Mexico's 88.7 so it would be able to boost its power for better coverage. The 88.3 could go to Ensenada or Mexicali.

89.5 KPBS San Diego - Public radio - if they don't do it, who will?

90.3 Jammin' Z-90 - TJ/SD - R&B/Dance/Rap - very successful format, but we could use an alternative when they play sleepy slow jams or monotonous rap stories.

91.1 91X - TJ/SD - modern rock on the hard side - the plus side: they got Howard Stern and Loveline. the minus side - it erased the likes of Erasure and other modern dance-rock off its playlist and leaving the playlist soulding like Nirvana and Sound Garden and Nine Inch Nails. Haven't tuned in for longer than 3 seconds at a time per day just scanning past it.

92.1 KOWF - Escondido - country - there's room in San Diego for two country music stations and I'd like to see someone program one that reaches the southern part of San Diego county.

92.3 KKBT The Beat - Los Angeles - R&B/Rap/Slow jam music since 1989 (it was classical until then) and has established itself as the Beat of LA challenging Power 106 (see below). In San Diego, this and the above and below stations often interfere with each other, especially in the North County where it's more on an even field signal wise.

92.5 XHRM The Flash - TJ/SD - modern rock - this used to be a long-time R&B music station until 1993 when it switched over to modern rock. As a regular listener, the playlist is more in line with what I like with a mix of today's modern rock without the Nirvana soundalikes mixed in with the 70s-80s-90s new wave/modern rock songs of the past. Check out the Flash Zone Saturdays at 10pm-2am for a flavor of dance modern rock that used to be a staple of 91X in the 80s. Bryan Jones plays his rarities Sundays at 8pm and Dr. Demento moved his offices to a stronger signal Sundays at 11pm.

93.1 Arrow 93 - Los Angeles - All Rock and Roll Oldies - now the only one of its kind since KLSX 97.1 switched to Real Radio with talk following Howard Stern with lame talkers like Kato Kaelin and other forgettable talkers other than Susan Olsen.

93.3 the station formerly known as KECR - it's now simulcasting an easy listening station from Florida and intends to format a top 40 station. IMHO: they should consider country instead aimed at southern San Diego county. We really don't need another top 40 station here with Q106 and Star 100.7 fighting each other off.

94.1 KFSD - San Diego - classical - I don't see this station changing formats or owners anytime before the end of the century.

94.9 K-Best 95 - San Diego and 101.1 K-Earth 101 - Los Angeles - oldies - The only ones locally airing hits from the 50s-early 70s.

95.5 KLOS - Los Angeles - rock and roll - it has Mark and Brian, today's rock and roll, and that's all I know. I never tune in nowadays.

95.7 KUPR - San Diego - adult progressive rock - FINALLY! somebody has programmed a classic rock station that plays NEW classic rock mixed in with the past and present modern rock hits. Classic rock is a genre, not a period piece (see below for more)

96.5 KYXY - San Diego - adult contemporary - currently, the top station locally. It could use some competition. The new owners of 102.1 should look into programming adult comtemporary of the 70s-80s-90s-today and aim it in the North County area, not try to aim it for all of San Diego county as its transmitter is too weak to cover points south of Miramar.

97.3 KSON - San Diego - country - still ropin' in the listeners here unchallenged.

98.1 KiFM - San Diego - modern jazz - a unique mix not heard anywhere else. 94.7 KTWV The Wave - Los Angeles offers a similar new age/jazz mix.

98.9 XHMORE - TJ or Rosarita? - modern rock with Spanish DJs and ads - it has a unique mix of music not programmed here. On weekends, check out the Rewired With Dano for R&B/pop/modern rock dance mixes reminiscent of the way the old Power 106 used to do it.

99.3 XHKY - X99 - Tijuana and 97.9 KLAX - Los Angeles - Ranchero Music.

100.1 KBNN? - Christian pop music - The other adult pop format they tried until September didn't segueue together at all. Couldn't KSDS simulcast their jazz here instead?

100.7 KFMB Star 100.7 - San Diego - top 40/modern rock mix. It is making a prescence known here. It has Dave Smiley in the AM and the Love Doctor at night. The modern rock mix now sounds like The Flash and over 75% of the song playlists seem to overlap.

101.5 KGB, 103.7 KMKX, and 105.3 KCBQ - San Diego - rock and roll oldies of varying degress. Do we really need THREE, count'em, THREE classic oldies rock stations in one market? Rememer that the former KCLX 102.9 aborted its classic rock format for 70s last year (see below) and 103.7 wasted a golden opportunity to program a classic rock station with NEW classic rock and instead sounds like the old KCLX. 103.7's format is due for either a modification to include NEW rock and roll, or a format switch overall, and 105.3 WILL be the new home for Rock 102.1 once the FCC approves of the Par/Compass swap. Where will Shotgun Tom go? How about The Flash Zone (B-b-b-b-b-yahhh! Shotgun Tom on 92.5 The Flash!) KGB can own the rock and roll oldies by itself as does 93.1 in LA (see above)

102.1 KIOZ Oceanside - Rock and Roll - This is the successful format that 103.7 and 102.9 SHOULD have tried programming so that hard rockers south of Miramar can then be able to enjoy an alternative to the oldies-only zone KGB is trapped in, but instead, KIOZ will own all the San Diego hard rock audience once they move and become Rock 105.3. As for the call-letters? KIOZ? What does it mean? The "IOZ" looks like "102" but that's all I can think of. How about resurrecting the old KPRI calls on 105.3? Dave, Shelly, and Chainsaw are popular there in the mornings despite the weak signal.

102.7 KIIS - Los Angeles - top 40 - Rick Dees, Ellen, and a hip mix of today's pop keeps it alive.

102.9 KKBH - The Beach - 70s music - let's face it, this uneven mix of bubblegum pop, soft pop, disco, mellow rock, and hard rock just doesn't work here all in one station. Each of these genres are better suited on other stations such as KYXY or KUPR. They should do an experiment that 100.7 conducted last May 1994 and ask the listeners to vote and comment on formats they try out. I'd like to see them try a format similar to The Flash Zone, Rewire, Jammin' Z-90, and Power 106 without the sleepy slow stuff or bad gang rap on one station. It'd be an interesting mix of remixes of r&b, soul, disco, modern rock, pop, disco, old-school, and reggae music. Nothing like it since Power 106 cut out the pop/rock remixes

in their playlist 4 years ago.

104.3 KBIG - Los Angeles - adult contemporary - someone could program a station like this down here.

105.9 KPWR - Power 106 - Los Angeles - a mix of R&B, rap, and slow jams mixed with old school and dance mixes. Check out the Powertools house music late Saturday nights at around MID.

106.5 KKLQ Q106 - San Diego - Top 40 - they cut the rap out of their playlist even going as far as cutting up some songs and performing a rapectomy on them so they can be played there. Jef and Jer still rule the mornings despite Howard Stern's strong prescence here.

what will it look like next year? stay tuned

happy new year

The best reference availible on border blasters is "Border Radio" by Gene Fowler and Bill Crawford, published by Texas Monthly Press in 1987. It's all there, well researched and forwarded by the late Wolfman Jack. The book does mention the late James Weldon, the former head of Continental Electronics who nursed many of the superpower transmitters in their heyday. Continental's plant is still here in Dallas on Buckner Blvd. Does anyone remember the small ads they ran in the trades (you'll find em in late 60's and early 70's Broadcasting Yearbooks) the simply said "Quality Talks" and listed the call letters of their client stations?

I am also an afficinado of the Border Blasters from the 1930's to the
1980's. Somewhere in my collection is a "classic" ID" <<Esta es XEPRS,
Rosarito, Baja California Norte.>>"XPRS! LOS ANGELES!" They'd run it at
local sunset back in the late 70's/early 80's as they changes from
Spanish to English (with an oldies format). It was also the strangest
ID I'd ever heard!

A few years ago I was in Southern California and my wife and I spent
the better part of a day driving from San Diego to Ensenada (We took
our Toyota (whose radio went from 530-1700Khz) and left the Lincoln in
San Diego), and we drove past the transmitter sites of both XETRA and
XEPRS (formerly XERB). From the outside at least, they were among the
best maintained transmitter sites I've ever seen... On a par with the
former ORF site in Bisamberg in terms of quality maintenance.
The "old" XERB transmitter site is now the site of an oldies rock club,
dedicated be the Wolfman himself only weeks before his death.

If you don't have it already, a copy of "Border Radio" by Gene Fowlre &
Bill Crawford is a must!

Another alternative is to work (volunteer) at a community radio station, if your town has one. I did this as an intern in college. I was exposed to more phases of radio work than I could have at any commercial station. I've done both commercial and public radio, and I think I had a broader exposure working on the public side. I did everything from announcing to filing, and met some great people doing it. It also shows a potential employer that you have the experience and are willing to do whatever's necessary.

I wish you well.

Beth, New Orleans.

# 4022. What happened to Tom Clay?

Newsgroup: rec.radio.broadcasting
Date: 1995-12-31 00:00:00 UTC
From: prattrg@aol.com
Message-ID: <4c72ai$7gn@vixen.cso.uiuc.edu>
Source record: 27558

As a life-long resident of Southeast Michigan, I fondly remember disk jockey Tom Clay as "Jack the Bellboy" playing top 40 on Detroit's WJBK radio in the late '50's. After leaving that station amid an alleged payola scandal, Clay returned to the local airwaves several times in the '60's on such diverse stations as WQTE (middle of the road), CKLW (top 40) and for a brief time WHFI-FM (middle of the road). In all cases, his production style was unique and never duplicated, at least not in this part of the country.

It has now come to my attention that Tom recently died. Those of us who remember him and respected his talent wonder what became of him over the years and what the circumstances surrounding his death were. Do you know? Please reply to this message or drop e-mail to me at aj014@detroit.freenet.org.

To jog your memory, here is a portion of a recent Internet announcement about Tom:

>From: tpryan@m-net.arbornet.org (Tim P. Ryan)
>Newsgroups: rec.music.dementia

Other Detroit area broadcasters will also be missed.

Tom Clay - One of the trademarked 'Jack The Bellboy's from 1950's Top 40 radio. He became one of Detoit's well known voices. He got caught up in the late 50's "payolla" scandels, and did not work much until a mid-60's stint on Detroit/Windsor's CKLW - The Big 8. Moved to California and had some success their. His biggest national claim to fame was his Spoken word record "What the world needs now is love / Abraham, Martin and John". Using those songs as a background he wove a narrative/interview/news-soundbites/ piece that was downright powerful. You may have heard it in July of 1971 as it reached #8 on the Billboard charts.
"Q: What is prejudice" (asked by Tom Clay)
"A: I think it's when somebody is sick" (response from a young girl).

## 4023. oldtime radio comic

UM>Question: what is to stop the Canadians, who presumably are going to use
UM>L-band to transmit Eureka-147 by satellite, from broadcasting to listeners
UM>in the United States? The Canadian satellites are, after all, in
UM>geosynchronous orbit over the equator.

Rob,
Assuming the satellite's footprint covers the United States,
absolutely nothing will prevent them from targeting US listeners.
However, not only will their listeners not hear local news, sports and
weather, but I suspect they'll have to endure Canadian content rules.
That would place their programming well out of the US market in terms
of appeal. This looks like a foolish economic move if there's any hope
of including the US in their marketing plans.

It's hard to imagine two adjacent, friendly, english-speaking
countries using incompatible systems. The NAB originally supported the
system, only to be roundly criticized by terrestrial broadcasters (whom
they allegedly represent) who saw the NAB supporting a completely new
form of competition. Eddie Fritz's head probably still hurts from that
one. The NAB reinforced radio's belief that the NAB ignores radio and
represents TV's best interests.

Rich

# 4026. Re: Dan Ingram announces what "W" in "WCBS-FM

In your recent post you said that "... I'm surprised that you would fail to mention that NBC's original parent, RCA, at one time also owned General Electric, only to later divest itseft of it." I believe you have this somewhat backwards. RCA was created by General Electric and AT&T. It became an independant company in the late 20's or early 30's.

So, what has happened is that the old parent company has reclaimed its child.

Bill Redmond

Yeah, can you believe it?? Joey Reynolds, the "mouth of Buffalo" (g) doin an overniter at a talk station?? Well, I'll tell you something: if anybody can kick some life into WOR's ratings these days, it is DEFINITELY Joey Reynolds. My only prayer is that he NEVER ever does another gig on WCBS-FM. What he said this past summer during this show was, to say the least, quite embarrassing and a total discredit to the broadcasting profession.

Andrea in NYC

# 4028. Receiving FM broadcast on multimedia speakers

Newsgroup: rec.radio.broadcasting
Date: 1995-12-31 00:00:00 UTC
From: brat@interlog.com
Message-ID: <4c72am$7h5@vixen.cso.uiuc.edu>
Source record: 27564

This is bound to sound somewhat bogus...

Today I bought a pair of multimedia speakers (Yamaha YST-M5); they worked fine playing Bach as I read my newsgroups, but after the Bach finished I noticed there seemed to be some funny hissing sound coming from somewhere... and it turned out to be the speakers, which were very quietly reproducing a local FM station, CJRT/91.1.

Anyone out there have any idea as to the mechanism by which the speaker/monitor/computer/soundcard complex demodulates FM radio?

# 4029. Digital Recording Possibilities (need advice)

Newsgroup: rec.radio.broadcasting
Date: 1995-12-31 00:00:00 UTC
From: mrfranks@scs.unr.edu
Message-ID: <4c72an$7h6@vixen.cso.uiuc.edu>
Source record: 27565

i'm attempting to put together a small home digital recording studio (put together bits and commercials, etc.) and am considering a few possibilities for storage/transport of the final products. my current station does *not* have digital facilities (save for an audisk in the corner that automates overnites), so i'm inclined to purchase a portable minidisc player/recorder. the sound is good (once you pipe the audio through a typical broadcast chain you can never tell it was compressed :-) and since it's portable i can toss it in the ol' briefcase and carry it back 'n forth with me.

....however, these devices seem to have not caught on....one high-end audio store had a non-portable deck for $600! when md's first came out 3 years or so ago you could get a portable for $700! i was hoping prices would have finally come down a bit, but apparently not. :-( has anyone seen less expensive portable units anywhere?

other possibilities... i found a digital cassette recorder at radio shack for $200 (i forget which of the two competing formats it was...) but it wasn't portable...still a $400 trade-off isn't bad. hopefully blank cassettes won't dry up...

perhaps a portable DAT recorder...but if memory serves they were a little more expensive than MD recorders...anyone have any recent price quotes?

if i ever work at a station with digital audio (.wav compatible) one of those ZIP drives looks real nice...nicely portable and under $200, with 100 meg capacity (and probably even higher capacities available.)

oh yeah! i've also thought about a cd-recordable drive! for about $999 i could write the information directly to disc, and wouldn't have to worry about any file compatibility problems, or carting a drive or MD player around...

or i could pick up a 2-track reel-to-reel for $25... :-)

thanks for any thoughts on the subject!

# 4031. DX Audio Service

Newsgroup: rec.radio.broadcasting
Date: 1995-12-31 00:00:00 UTC
From: gnbc@alpha.wcoil.com
Message-ID: <4c72ap$7h9@vixen.cso.uiuc.edu>
Source record: 27567

DX AUDIO SERVICE JANUARY 1995

Informational Press Release

It's soon going to be 1996, and what a banner year we have had at the DX Audio Service. Membership has increased, and number of people that have been checking out the DXAS with a sample copy, have joined. This really points out to us that the DX Audio Service is a valuable part of radio listeners life.

CPC Tests has been move to out Voice Mail system. Since this changes so quickly, we put it on voice mail so members could check on tests which will be made. To access the voice mail system, dial 419-228-4199. When you get the opening message, press "1" to let the system know you have a touch tone phone. Then press "4" for the CPC Tests. Speaking of CPC, Wayne Heinen is still interested in getting lists from NRC members of stations they feel would be good DX catches. Send your list to Wayne DXAS Hq or E-Mail via... Nrclog@filebank.com

For people desiring information about the DXAS, follow the instructions above, but press "2" instead of "4" to get instructions on how to subscribe to the DX Audio Service.

The DX Audio Service WEB Page now contains a monthly update of the International DX digest. We decided to put this on the web page as people who were not familiar the National Radio Club found it very interesting that someone in the United States could actually hear AM Radio outside the United States. If you get the DX Audio Service, you actually hear some of these catchs courtesy of Bruce Conti. To locate our Web Page, use this address.... http://wcoil.com/~gnbc/

Speaking of our Web page, Barry Mishkind's page is linked off ours. Barry has been doing extensive research on the history of AM radio, and is looking for assistance in getting details on the history of stations in the United States. His "Old Radio" project is a very interesting project. If you have any information, old licenses, newspaper clipping, or any other historical articles, Barry would like to hear from you.

Here is a rundown of what is on the JANUARY 1996 DX AUDIO SERVICE.

00:00 Introduction of the magazine by Fred Vobbe @ Address information.
01:01 AM Switch with Jerry Starr.
09:30 The Travellog with John Bowker. 1310 Kilohertz is started with station ID's. There are 64 stations in the list.
23:42 The Bandscan with Jim Snowbarger. Central North Carolina scan by guest Ron Clark of Walkertown. Part 2, Starting at 810 kHz.
34:38 International DX Digest with Bruce Conti. Samples of DX outside

the United States, and commentary from noted DX'ers.
45:02 Close of side one by Fred Vobbe, with article about "Computer Date Bug".
46:18 End

00:00 Open of Side Two.
00:10 Open with Fred Vobbe
00:11 Marketscope with Phil Wayne. Radio in Clarksburg, West Virginia
11:08 Historical Moments in Radio. "King Of New York Radio." The story of John B. Gambling on WOR-710 (New York).
15:50 News about the 690 HCJB DX Test (Letter from Rich @ HCJB)
18:23 Musings from the Members
21:47 The DX Time Machine with Fred Vobbe, What happened in the National Radio Club 50, 25, and 10 years ago.
23:53 Sports Networks Report with Ken Onyschuk. Ken gives us a sample of a special on WGN-720 from the Broadcaster's Hall of Fame with some of Chicago's sports leaders.
39:28 Trivia and Assignment Aircheck.
42:05 Interference on the AM Radio Band
43:40 Business information on DX Audio Service.
44:20 The DXChange (Buy Sell & Trade)
46:17 Close of January 1996 DXAS - Happy New Year!!

NOTE TO MEDIA: Audio tapes are available from the National Radio Club. Contact the editor below for more details. Scripts in ASCII format are on the Web Page.

DK>I can say that as a one-time talk host and long-time talkradio listener
DK>that I burned out on contro-talk a long time ago. I don't think I've
DK>listened to Limbaugh or Liddy more than once in the past year or two.

David,
Perspective is what's missing. I hear the constant roar of
"Republican Revolution." I see fewer than 18% of registered voters
actually voting (a tiny subset of the total population). 96% of radio
listeners don't listen to Limbaugh. Even fewer listen to Liddy. We're
simply too close to the issue. An average listener couldn't care less.
They're off doing their daily routine. The political Talk Shows are
like soap operas. You can miss a month of the show and still come back
just where you left off. The issues are the same. The opinions are the
same. That's what will cause them to burn.

DK>Today I listen more to NPR and PRI and other public radio programming.
DK>I'm also in the 25-49 age group. Locally I notice that the non-commercial
DK>stations such as KCSM (all jazz), KPFA (Pacifica), and others have made
DK>substantial ratings gains these past couple years. Some of us are just
DK>tired of the talk tirades.

Boston is a good example. Folks there tell me that WBUR (Boston
University's NPR affiliate) beats most of the commercial stations in
the book. Non-comms aren't listed, but the numbers are available.

Get ready for yet another right-wing political show just as the
market is sliding down. CBS begins Mary Matalin in January. The glut
gets more glutted.

Rich

Quoting David A. Kaye's post of 21 Dec 1995 07:32:18 GMT:

~I can say that as a one-time talk host and long-time talkradio listener
~that I burned out on contro-talk a long time ago. I don't think I've
~listened to Limbaugh or Liddy more than once in the past year or two.
~Today I listen more to NPR and PRI and other public radio programming.

Amen. I am a former talker with the same attitude. Surveying the radio dial, to quote Dorothy Parker, "There is no `there' there."

I drove cross-country, and may do so again. I could take the same, lame hate radio from San Francisco to Hartford with a scan over the AM band. I was approached by a local station here about doing talk ... they were just redoing their format, and had hired some regional (right-wing) political hotheads. They were going "hot talk" to save themselves.

I declined, because in real terms I would not have lasted two weeks there; I prefer informational talk to standing in the bully pulpit of radio screeching screeds to anyone within the "A" contour.

Just as well, as I write this, only three months later, their ratings under their "saviour" format have them on the block. Cheap.

Available for your station:

Harris MS-15 FM exciter. Currently tuned to 92.7 MHz. This exciter is
easily retuned to your frequency using jumpers and a quick FMO adjustment.
This exciter will easily output 15 watts (a bit more if needed).
Available with manuals and with power cord for 115 volt operation.
Exciter is in excellent working condition and is available within the next
week for shipment.

$2,450 tuned to your frequency.

$2,250 on 92.7 MHz.

Please reply by e-mail to KHarnack@aol.com.

Source record: 27572

944-952 MHz is the aural STL band, but highly directional antennas are required, meaning that unless your receiving antenna is within the beam, you won't hear anything at all. It will do you no good to be south of the transmitting antenna when it is pointing north, for example. There are a few stations using, I believe, 18 GHz STL's, employing digital transmission. Digital adapters are available for the 944-952 MHz STL's as well, and they are starting to catch on.

>these signals.)
> /* barry /&
>

Why is this? It was my understanding that the ECPA only prohibited
listening to personal, one-to-one communications not intended for
"general reception". (Interpret that however you want :)

It seems it would be a better idea to listen to the
STL frequencies especially for AM stations (where noise can be a big
problem.)

Justin,
Generally speaking, the STLs (Studio to Transmitter Links) you're
referring to are in the microwave region, either 2 gHz or 6.5 - 7 gHz,
and the links use parabolic dishes to send the information. These
issues make it difficult to listen in on the STL. Not all stations use
microwave, but almost all do.
Good luck!

Several members of the Executive Board are wondering whether or
not we need to do news every hour. Three or four Dj's just plain
refused to do news sighting "You never hear a commercial radio station do
news every hour." Also, all the Dj's are complaining about the frequency
of PSA's. Whether carted up or read aloud the majority of Dj's are
sick of them and don't want to have to do one an hour (translate into 2-4 a
show). If anyone (HEY PROGRAM DIRECTORS) could suggest a few formats it
would be greatly appreciated.

Whoa....

I'd like to help, but first a few questions...

1. What's your current format?
2. Are you commercial or non-commercial?
3. How involved are students in the management process?
4. Where are you?

I'm Ops Director/PD of WHJT-FM/WSLI-AM, a college-owned, campus-based,
student-staffed, commercial combo (Contemporary Christian on the FM,
Sports/Talk on the AM). We're fairly successful and can offer
suggestions. Reply here or at my e-mail address: vance@mc.edu. Check out

Before I start, yeah. The inmates aint supposed to run the asylum.

Anyway. News on a comemrcial FM music format is generally done a couple of times an hour on morning drive only. I've heard it done other times, but listeners tend to change stations if they hear too much news, unless of course they tune in for news. PSA's are good to read into stop sets and should be done. Helpful and not overbearing. People tend to tune in to college station knowing they aren't gonna get top flite talent and great radio. If the DJ's refuse to do news or PSA's, they in turn are refusing to learn. crack down. have fun.

I, too, grew up listening to KB radio on many nights. I was a card carrying member of "The Loyal Order of the Night People."

How about the audition the station had to fill the 7-Mid slot?

My greatest memory - I was in the Military Police in Viet Nam during 1971-72. One night, after returning from my shift on the streets, I was returning my weapons to the weapons room and the guy in there was having a big time. The music was blasting and this guy was raving about picking up a station in the States...It was the Big 1520 with Jackson Armstrong! I was half a world away, but for that brief moment, I was home.

Source record: 27582

Rich Wood sez:

>>What the "truth" is is irrelevant. What's important is what the perception is.<<

Rich, I understand that perception is reality. But I have confidence that this perception is from a small minority of listeners. I think Rush used to and still does to a lesser extent have a problem with being labeled certain things.

I feel that if you believe in a program...and I do with Dr. Laura...that you've got to hang with it and let it grow and not give up on it because of a few who probably don't listen anyway. I just know the phone calls we had received when we were getting some interference on our SEDAT feed.

>>Either that personality entertains within that window or they're irrelevant to listeners. Telling listeners that their reality is wrong isn't a smart bonding move.<<

Rich, would never do this on the air...but I've politely suggested it to callers and did so on this forum...

>>And BTW, her program is one I'll put up against Rush in almost any market. That's fine. However, if Rush isn't in the market, I'll go after him. I disagree with almost everything Rush has to say, yet I still want the competitive advantage. It may be hard to sell, but I can use the show to boost my overall numbers and make money from that.<<

Rush is in my market, on two area stations with most of his program going up against Dr. L...

>>I'm kind of partial to "The Dolans" for a great sales hit against Rush.<<

Rich...you better be!

>>a full day's delay isn't high on my list of competitive strategies.<<

Agreed. I'm really not into "tape delay" for any listener-participation type-program. I realize that most just listen, but why give anyone the impression that you'll take their phone calls when you can't. I do delay one-hour (the first becomes the third) of Dr. Laura, but I hope to change that at some point in the future...

Rich, I really do appreciate your thoughts.

# 4049. Re: NBC's Monitor Radio

Newsgroup: rec.radio.broadcasting
Date: 1995-12-31 00:00:00 UTC
From: richwood@commspec.com
Message-ID: <4c72bc$7ib@vixen.cso.uiuc.edu>
Source record: 27585

FO>Rick Seifert's remembrances of listening to "Monitor" while on weekend car
FO>trips brought back the same sort of memories from my teenage years--let's
FO>say the mid-1950's. Here in the midwest it was hard to escape the
FO>"Monitor Beacon." The program started on Friday evenings and was
FO>available to stations continuously until late Sunday night. It was great
FO>to be on the road at, say, midnight listening to the program when it got
FO>a bit looser that it was during the day. You couldn't outdrive it--if we
FO>couldn't hear WHO, we tuned to WMAQ or KOA or WOAI or WLW. There was a
FO>lot of clear-channel wattage behind "Monitor."

Don,
Monitor was one of the greatest radio services I've ever heard.
Many times I've had the urge to recreate it on the WOR Radio Network
for the weekends. It's simply too expensive, nowadays. It's a shame,
too, because we now have the technology to do much more than the
original Monitor could have hoped for. I actually experimented with a
budget and got a nosebleed at that altitude. The talent, alone, at
today's salaries would run in the millions. There'd be no way a network
could break even.

The market is probably ripe for such a thing. Non-political
programming that actually dealt with interesting people and issues
would tear me away from my CD player in a heartbeat. Monitor showed
America that we have things to be proud of and that we're not all
political perverts or wackos of whatever stripe. Radio and TV today
parades human flotsam as entertainment. Monitor paraded talent and
superb news coverage. Count me in as a listener if it ever happens.

# 4050. Re: Mono vs. stereo

Newsgroup: rec.radio.broadcasting
Date: 1995-12-31 00:00:00 UTC
From: billh@radix.net
Message-ID: <4c72bc$7ic@vixen.cso.uiuc.edu>
Source record: 27586

References: <4bebmh$kon@vixen.cso.uiuc.edu>

>Occasionally a listener calls into KALW asking why a music program isn't
>in stereo (because it's not produced in stereo). But rarely. I think
>stereo-only radios may be a thing of the past. Certainly I haven't seen
>them in years. Most of KALW's schedule is in mono, except typically 3
>hours of local music a night. During fundraising time I haven't heard of
>anyone saying that the station suddenly popped up one evening; they have
>heard it during mono times as well.

One of our BM (gone for a few years) stations here used "live
turntables" back in the late 60's and through the 70's. Since every
other word that came from the station ID contained the word STEREO,
and the listenership was familiar with the repetoire to a good degree,
the records being available in stores, it was jarring to hear a weekly
event where every other selection would be in MONO. The engineer,
during his Sunday night routines, somehow kept flipping one table to
mono somewhere on the Gates board. Mono it would stay, sometimes
until several hours into Monday morning when someone would call,
sometimes me if I heard it in the car, the announcer would say "oops"
- flip the switch and that would be that.

Now we have a jazz station that seems to have a night person who
doesn't like stereo (?) and one of their two CD's online goes over the
air in mono but they tell me in the studio they can't tell - yet they
do correct it.

For music it's a bit like 3D or color for movies. Once you hear it,
then to hear the same track again played, in error, in mono, isn't
much fun. Of course I've noticed CD machines have more problems than
getting switched at some point to mono - lots o' skips and failures on
the air (as the Lp was buried I was told the CD was perfecto...)

Before '67 WABC-FM was mostly classical with a rotation of the network staff announcers ( Fred Foy, Charles Woods, Dirk Fredericks etc.) as the air staff. They also used some of the network MOR shows and the network Saturday night Big Band remotes with Bill Owen, Bill Rice etc. that the net (pre 4-networks) was doing up till 65-66. Live shows (announcer, engineer, two 16" turntables, three old Collins carts) came from studio 2B at 39 west 66th Street. I wonder if the old echo chamber that went under 66th St. is still down there?

I may have been a little off on the date for the start of Modern Rock I-92
and Urban WXTU. I think it changed to Modern Rock (with Mel Toxic, Hugh
Window, Moe Hawk, Roy Lawrence, along with Lee) summer 92. The format
changed to Urban under the WIFI calls, with the name "New 92", Summer 93.
The calls changed to WXTU Sept 12, 1983 at 8 am (yes I found the
aircheck!) when PD Doug Weldon played all of the jingles in the new
package on the air. The station stuck with the Urban format under the name
"92-X" until late in the year when the format was changed to country.

>> 1985-WTRK- Electric 106 (Mike Joseph tried to make that Hot Hits
>> lightning strike twice)
>
>This I wasn't aware of (I'd left the east coast by then). What
>happened exactly? Did WCAU-FM dump Hot Hits by then and it got plugged
>in at another station in town?
>

WCAU-FM was still Hot Hits, a watered down version by that point.

Message-ID: <4c72bh$7ih@vixen.cso.uiuc.edu>
Source record: 27591

UN>There is something really sad going on in our industry. I know many
UN>talented people who've worked for some pretty legendary sets of call
UN>letters, are now out of work and can't get the time of day, much less a
UN>call back from certain programmers. Are you guys really that intimidated?
UN>Do you really get that much of a rush from snubbing some guy who's gone a
UN>little further than you in the industry, just so you can brag to your
UN>cronies about it? What kind of chickens**t attitude is this?

I think you need to put this into perspective. In New York, for
instance, some of the legendary personalities are still doing quite
well. They're doing well because they sound great on the radio.

One of the biggest problems I've had with such people is their
unwillingness to adapt to a format. In many cases, they do what they do
and that's it. If you need them to do something else, they either can't
or won't. I was PD at WPIX-FM (now WQCD) and had many legendary folks
on my staff. Dick Summer, Jack Spector and Alison Steele were just a
few. Jack Spector was a guy I'd hire anywhere. Jack would adapt to
anything you threw at him and sound comfortable doing it. Others
wouldn't adapt because it "wasn't what they did." Jack died doing what
he loved most. He had a heart attack on the air.

UN>Let me dispel some common misconceptions about the people you're giving
UN>the cold shoulder to. If you've ever made any of the following statements,
UN>or even thought them, it is you I'm talking to.

UN>1. " I don't need some egomaniac primadonna coming in here and giving me
UN>an attitude."

Actually, that's a pretty good reason not to hire someone.

UN>4. "Who does this guy think he is calling me? Does he think just because
UN>he worked at (insert call letters here) I'm supposed to jump and return
UN>his call?"

I get calls from these guys every day. Common courtesy says you return
the call. When I get a call from Joey Reynolds, I take it. It's
probably the most fun I'll have that day.

UN>10. "This guy won't take direction or criticism."

Often it's very true.

UN>11. "People at his level of the business are just too dificult and
UN>temperamental."

I have a staff of temperamental personalities at WOR. Every one has an
ego big as a house. Every one of them gets paid more than a house. I

don't believe one can be a great performer without an ego. That's one of the first signs I look for in a potential air talent. Of course, an ego without the talent is boring as hell. I just happen to love working with people who believe their work is worth something.

UN>Take the time to see for yourself that what I say is true. You might be
UN>surprised. You just might get some very talented people who'll work hard
UN>for you and help raise the bar a bit at your station.

The bar at my station is already very, very high.

Rich

References: <4bb2hd$brp@vixen.cso.uiuc.edu>

In article <4bb2hd$brp@vixen.cso.uiuc.edu>, j_fitzge@oz.plymouth.edu
(Jesse L. Fitzgerald) writes:

>Three or four Dj's just plain refused
>to do news sighting "You never hear a commercial radio station do news
>every hour."

Actually, many commercial stations do news every hour. Many do nothing
but news! But all the posts thus far have hit the nail right on the head:
Commercial DJs do exactly what their PD/GM/OM/God tells them they will do.
Period. The alternative is the unemployement line. (Although, they
never do news there!)

>Also, all the Dj's are complaining about the frequency of
>PSA's. Whether carted up or read aloud the majority of Dj's are sick of
>them and don't want to have to do one an hour (translate into 2-4 a
show).

Hello? I do at least two live PSAs every shift! Even though it may seem
otherwise, most of us still believe in serving our community of license.
The question is, are the PSAs relevant? Are you giving information about
the dance at the senior center to an AOR audience? When they are
relevant, they are important to your audience and your service to that
audience.

PSAs are also a great way for the air staff to develop the skill of
salesmanship. Challenge them not to just read the PSAs, but really sell
them - just as they would when their favorite song comes up. If the jocks
do not sound enthused about _everything_ on the air, they shouldn't be
there. Everything you do has to come across as though you believe it's
the coolest thing in the world. Otherwise, why should the audience bother
paying attention, if even you think it's lame?

>If anyone (HEY PROGRAM DIRECTORS) could suggest a few formats it would be

>greatly appreciated.

I realize that most of the posts haven't answered your real question.
Personally, I see nothing wrong with your clock. If the Exec. Board
really wants to change it, they should start by finding out what your
target audience wants and expects from you. Most commercial radio
stations found that their audience really doesn't want newscasts outside
of morning drive - unless it's really big news. Most audience members
don't have the time or attention span for a newscast outside of morning
drive.

As for PSAs, perhaps they could consider incorporating them into the DJs patter, rather than hitting them at a specific time each hour.

Whatever you come up with, it's is secondary to the jocks ability to sell the clock. It doesn't matter what they think of it - that's not a jock's job. Their job is making it work.

>If anyone (HEY PROGRAM DIRECTORS) could suggest a few formats it would be
>greatly appreciated.

Jesse,

Several comments:

1) *Any* radio station, but especially a college radio station, that lets the
DJs
begin dictating programming, is doomed from the get-go. College DJs don't always
care about how to serve the audience...they don't have the experience, or
maturity, or perspecive to make those kinds of decisions subjectively. That is
what a program director, and the management of the radio station in general, is
there to do. *Not* the DJs.

2) You don't say what the music format of your station is, but the format
you've outlined seems to be more than flexible enough to accomodate the playing
of music. Whiny DJs will always complain about anything that interrupts them
from playing a tune or two...they did at my college station, and they'll do it
at yours.

3) If you and your exec. board have any commonsense, you will tell the DJs to
just shut up and do as they're told. In commercial radio (which they seem to
like quoting), they'll be locked into meaningless "positioning statements"
written by people who seem like they don't listen to the radio, boring
repetitive playlists ground out by an unfeeling computer programmed by some
faceless consultant, and they'll generally get paid poorly for the privilege of
working for some station, assuming they can even get a job at all.

Your format is there to make sure the station serves the *overall* needs of your listeners, and to make it more distinctive from the "me-also" stations in your market. That's what you need to tell the DJs before you tell them to go back to the studios and do their shows...and kwitchebeefin!

Cheers,
Max

# 4058. Jean Shepherd FAQ

Newsgroup: rec.radio.broadcasting
Date: 1995-12-31 00:00:00 UTC
From: radow@netcom.com
Message-ID: <4c72bk$7il@vixen.cso.uiuc.edu>
Source record: 27594

**Jean Shepherd- FAQ**

Here is a modest beginning to a Jean Shepherd FAQ.
Please feel free to contact me with any additions
or corrections.

1) Where can I obtain recordings of Shepherd?
2) What books has he written?
3) Where is he now?

1) Where can I obtain recording of Shepherd?

Audio cassettes of Shep reading some of his stories are available
from Barnes and Noble (1-800-242-6657). This set has a catalog number
of 1838614 and sells for $50. Individual tapes are $7.95.

Shepherd's Pie (seven cassettes in all)

Slice One
Red Ryder Nails The Cleveland Street Kid

Slice Two
Wanda Hickey's Night Of Golden Memories
And Other Disasters

Slice Three
Ludlow Kissel And The Dago Bomb That Struck Back
and Little Orphan Annie Or The Counterfeit Secret Circle Member

Slice Four
Leopold Doppler And The Great Orpheum Gravy Boat Riot

Slice Five
Ollie Hopnoodle's Haven Of Bliss

Slice Six
County Fair

Slice Seven
Scut Farkas And The Murderous Mariah

2) What books has he written?

His books include: In God We Trust, All Others Pay Cash;
Wanda Hickey's Night of Golden Memories And Other Disasters;
The Phantom Of The Open Hearth; A Fistful of Fig Newtons; and
A Ferarri In The Bedroom.

There is also "The America of George Ade" edited and introduced
by Jean Shepherd. Printed in hard cover by G.P. Putnam's Sons,
1961. It's mostly a collection of humorous fables- sort of what
you might expect if Aesop had Shep as a ghost writer. :-)

Shep also made at least five LP recordings that I know of:

Jean Shepherd And Other Foibles, Electra 172 (1959)
Will Failure Spoil Jean Shepherd, Electra 195 (1960)
The Declassified Jean Shepherd, Mercury SRM 1615 ( )
Jean Shepherd "Live" At The Limelight, Quote Q-4 (1964)
Jean Shepherd Reads Poems Of Robert Service, Folkways FL 9754 (1975)

3) Where is he now?

Here, once again, is the info listed in the online Ham Radio Callbook for
Jean Shepard (and it IS the same Jean Shepard who worked at WOR):

Call-Sign: K2ORS Class: ADVANCED
Real Name: JEAN P SHEPHERD Birthday: JUL 26, 1921
Mailing Address: POB 1186, SANIBEL, FL 33957
Valid From: DEC 28, 1984 To: DEC 28, 1994

Hope he remembered to renew his license!

Bruce Schiller at WCBS-TV.... and ham radio operator WA2ZST

## 4059. South Bend's Buddy King Where are you

Message-ID: <4c72bn$7io@vixen.cso.uiuc.edu>
Source record: 27596

I consult WZOW-FM in the South Bend market. We have a rather new web site at http://www.SKYENET.NET/~mitchvis/wzow.htm We will confirm all rumors and be giving information out at this site well before it is on the air. Some Facts 1.Bobby Rivers gone from WZOW. It was purely a question of where we (they) are going and who is going to get us (them) there. 2.Rob is the one who is gone from WNSN. 3.Yes Bob and Tom syndicated from Indy are gone from WNDU AM--- but it was not a radio decision---the University of Notre Dame made the decision and the radio folks seem more than a bit dis-spirited. The University seems willing to hold their contract to keep them out of the market for as long as possible. All considered, one half of the South Bend metro cume in some major demos will be an available audience based on the changes (yes Janice Dowell is gone from WNDU-FM, but she was not in news since she came to NDU-- she shared the morning duties)that will come about in the first months of '96. Also on the horizon is an expanded Metro to include Elkhart county. That will shake things up even more if it happens by the fall book. I'm not sure if this will be posted on the Airwaves Online where is saw your remarks.

>> So much for PUBLIC [sic!] radio.

It was Ruth Hirschman, now Ruth Seymour. She also canceled
Larry Josephson's wonderful "Modern Times" program. The
station is great, but I don't understand their claim
to be the "flagship station" of NPR; I've never heard
any other public radio station that emulates their mix of
spoken word and eclectic musical programming.

>> (Not for nothin' is their home city known as
>> "The People's Republic of Santa Monica". {sigh})

This slogan is actually more fond memory than contemporary reality.

# 4062. Boston Radio station bullied by authorities.

Newsgroup: rec.radio.broadcasting
Date: 1995-12-31 00:00:00 UTC
From: bc616@scn.org
Message-ID: <4c72bo$7ir@vixen.cso.uiuc.edu>
Source record: 27598

Governor William Weld's email address is wweld@state.ma.us. His fax number is 617/727-9725. Georgette Watson's fax number is 617/727-6137.

To Whom It May Concern:

On Friday, December 1, at 12:15 p.m., approximately fifteen people arrived in state cars at 1265 Boylston Street, Boston and formed a picket line in front of the building, which houses WBCN, a radio station that in September had lent significant support to a rally for the legalization of marijuana. The protest lasted about an hour, during which Georgette Watson, Executive Director of the Governor's Alliance Against Drugs, entered the station in the company of a DEA agent wearing a SWAT cap and a badge, and demanded that the station cease its promotion and airplay of a CD entitled _Hempilation_. The recently-released album, whose proceeds benefit NORML, the National Organization for the Reform of Marijuana Laws, includes pro-marijuana tracks by Cypress Hill, Blues Traveler, the Black Crowes, and other bands.

This incident was first brought to the attention of the Boston Coalition for Freedom of Expressionon December 3 by members of Mass. CANN, the local affiliateof NORML. At that time, we were unsure of the extent to which the Governor's Alliance Against Drugs was involved in this incident, and the extent to which the First Amendment rights of WBCN were threatened. Private citizens do, after all, have a right to protest. We were nevertheless concerned about the use of state cars to transport picketers to the site of the demonstration. Even more troubling was the overt involvement of Ms. Watson and an individual identified as the DEA's liaison to the Governor's Alliance. When government agents use the power of their agencies to try bullying a radio station into suppressing a record because of content, that is an extremely serious matter.

Unfortunately, as we learn more about this event, it seems that the matter is much more serious than originally supposed. The demonstration was indeed largely the work of the gubernatorially appointed Alliance Against Drugs. There is considerable evidence that the Governor's Alliance worked (without success) to provoke counter-demonstrations from groups like Mass. CANN by tipping them off a day in advance.

Earlier, according to attorney John Holmes of ACLUM, a flyer was faxed to police stations and law enforcement agencies all over Massachusetts. Police officials were encouraged to appear representing their agencies AND TO BRING THEIR SQUAD CARS.

This astonishing example of the power of the state riding roughshod over the Bill of Rights has gone almost unacknowledged in the press. The news blackout on this matter, which should at the very least result in the resignation of Ms. Watson and the disciplining of the DEA agent who accompanied her into WBCN, is almost as scandalous as the incident itself.

Sincerely,

James D'Entremont
Director, Boston Coalition for Freedom of Expression

Hello all:

I am back from my trip to Chicago for Christmas.

But before you start sending in all those articles you have been hanging on to, realize that despite my post to hold articles I still have almost 200 to go through, so give me a chance to get them out over the weekend first..

Also, if you sent me private mail this week, it has been lost in a system upgrade :-(. It may be restored, but for now assume that it is gone and re-send.

!!! NO NEED TO RE-SEND STUFF SENT TO THE NEWSGROUP. !!!

I will have a more in-depth article on my trip and the radio I encountered, after I clear the backlog.
I hope all of you have had a great Christmas and a new year that is better than the last one.

Seeya

Two minor items of note:

* The Edge has come up with a morning show, appropiatly called "The Edge Morning Show". No Jocks, No Funny Jokes, just music, straight through the morning.

* Paul Phillips, local talk show host on WGL will now be on WOWO from 12p-3p on Sunday's.

Also!!! I've completed the revision of the WKQM/WEJE transformation from the elevator music station to the alternative music station. I advertised this before, and received some response. Unfortunately, I've lost the list of addresses due to an e-mail crash here. If you want a copy of the switch (it's roughly a half-hour, and very good quality), e-mail me here and I'll put a copy in the mail immediately.

That's all for now....

# 4066. Mid-America Radio Watch (1995 in Review)

Newsgroup: rec.radio.broadcasting
Date: 1995-12-31 00:00:00 UTC
From: "Mark S. Roberts" <transvox@crl.com>
Message-ID: <4c72a8$7fp@vixen.cso.uiuc.edu>
Source record: 27649

In Kansas City and mid-Missouri, 1995 was the year duopolies reshaped markets.

While there had been duopolies, for the most part, there was relatively little impact on station programming or formats until this year.

However, the $34-million-plus deal combining country stations KFKF(FM) and KBEQ-FM along with niche talker KBEQ(AM) under the ownership of EZ Communications was only the first of several shake-ups in the normally staid and quiet Kansas City market.

The duopoly forced the spinoff of laggard country station KKCJ(FM), snapped up by Heritage Media to form a duopoly with successful KCFX(FM).

After a March full of programming stunts, including ten days of polkas, KKCJ brought a new format to the market: smooth jazz. Under new calls, KCIY--"The City"--zoomed upward in the ratings.

By the summer Arbitrons, KCIY placed fifth, its highest showing since it was KXXR in 1989. Even better, KCIY was number two in listeners 25-54.

While the KFKF-KBEQ deal was being made, rimshot contemporary-hit station KISF(FM) brought another new format to the market, "new rock", trying to serve an audience straining to hear a weak signal from KLZR(FM) in Lawrence, Kansas.

However, "Kiss FM" did not find immediate success with its initial CHR-style presentation and moved over the summer to a more typical modern-rock format. KISF also had a great deal of difficulty settling on a morning show, a typical problem with modern rockers. It's presently on its fifth version of a morning show this year.

Bonneville continued consolidating the duopoly it had formed late in 1993 with KMBZ(AM), KCMO-AM/FM, and KLTH(FM). KMBZ became a top-notch information station, with the market's strongest morning team of veteran Noel Heckerson and newcomer Ellen Schenck, from KFRU in Columbia, and the best afternoon talk show, with Don Fortune able to make sports interesting even to people like me who detest sports.

However, 50,000-watt KCMO(AM) paid the price. Bonneville tagged KCMO as a "hot talk" station, but some of the crude stuff that "hot talk" entails runs counter to Bonneville's highly respectable and responsible corporate culture. The most recent victim of this form of cognitive dissonance was Rick Roberts, who left the station earlier this month after making fun of KCMO fixture Mike Murphy.

Over in mid-Missouri, news/talker KFRU(AM) and adult-contemporary KPLA(FM) followed through on plans to acquire album-alternative KBXR(FM), shifting 'BXR to a modern-rock-flavored format. The duopoly also added a third FM station, newcomer KOQL(FM), in a joint sales agreement. KOQL studios remain separate from the other three stations, but the sales staff works out of the KFRU complex.

Just down the road in the state capital of Jefferson City, country KLIK(AM) and hot-AC KTXY(FM) picked up a second FM station, KZMO-FM from California.

Owner Brill Media increased the new station's power to 50,000 watts and christened it KATI(FM), "Kat Country", in October.
Still more changes are likely in Mid-Missouri: the FCC ordered KFMZ(FM) and KBMX(FM) owner Michael S. Rice to show cause why his licenses should not be revoked. A competitor alleged that Rice engaged in unauthorized transfer of control in an effort to keep his stations after his 1994 conviction on multiple counts of deviate sexual assault, felonies in Missouri.
In Topeka, a drug conviction forced the sale of KDVV(FM) and KTOP(AM), leading to the formation of the first four-station duopoly in the Kansas state capital with Midland Broadcasters' KMAJ-AM/FM. Midland changed KDVV's format from album rock to classic rock to complement KMAJ-FM's successful hot-AC programming.
Topeka may lose one of its historic stations sometime in the next few years, if WREN(AM) gets approval to move 65 miles to Kansas City, Missouri. The move would also result in a daytime power increase for the station.
It's ironic to note that WREN itself ended up in Topeka after an earlier move in 1947 from Lawrence, Kansas. Still, expect *this* hearing to put some lawyers' kids through Ivy League colleges.
In Kansas City, the market is shifting in subtle ways. WDAF(AM), "61 Country", no longer is number-one, and has been hit especially hard in the key 25-54 demographic. KISF(FM) continues to struggle, even as KLZR(FM) finally makes an appearance in the Kansas City survey despite a signal difficult to receive.
Gospel station KCCV-FM is attacking its signal problems by proposing a translator in midtown Kansas City. KCCV-FM also relays its signal to the northeast part of the metro area through KAYX(FM) in Richmond.
KCCV(AM) attacked a Kansas City mayor this fall, accusing Emanuel Cleaver of being un-Christian for his role in facilitating the move of X-rated businesses away from a blighted area of midtown slated for redevelopment. Cleaver took offense; understandably so, as he is a United Methodist minister.
---
A timeline of Kansas City and Mid-Missouri radio in 1995, including these and many other events, will be in a separate article.
****
Focusing on selected individual stations (which now seems to have become the tradition around here):

AM STATIONS:
WIBW (580, Topeka): Still up for sale, along with WIBW-FM. The share-time arrangement still in effect with KKSU(AM) for five hours each weekday may be an obstacle to a sale of WIBW, despite its solid 5,000-watt low-frequency coverage.
WDAF (610, KC): The full-service country format is beginning to show its age, despite the considerable talents of morning driver David Lawrence and Phil Young in PM drive.
KFEQ (680, St. Joseph): Should get the "Meat and Potatoes Award" for 1995; it's dependably there, day in and day out, nothing flashy, just solid news, weather, and farm information.
WHB (710, KC): Finally taking a few steps on its own, with AM and PM drive shows separate from rural farm broadcaster KMZU(FM) in Carrollton.

Still, this station is largely going to waste.
KCCV (760, KC): "How Much Is That Dogma in the Window?" Needs a refresher course in what Christianity is all about. A truly indecent station if you define decency to include tolerance and civility.
KCMO (810, KC): Bonneville needs to figure out what to do with the 50,000-watt regional-coverage signal, and do it without hurting the solid effort now on KMBZ. Bonneville deserves credit for trying and for not just giving up and plugging into a satellite (as happened with KSD in St. Louis under Gannett mismanagement).
KFAL (900, Fulton [Columbia]): Even though veteran announcer Ron Lutz retired after 38 years, KFAL is actually going back to its roots, turning in a stunning effort at a traditional country format. Imagine "Americana" in a rural Missouri county seat, and you've got a winner.
KMBZ (980, KC): WDAF has been the market's news leader; KMBZ could take the lead from WDAF for radio news in 1995. With two big IFs: IF KMBZ drops the silly "Cruiser 980" tag on live reports during morning drive (only a program director could come up with something *that* *stupid*), and IF it can demonstrate a commitment to breaking news coverage, including elections. It can't do what it did in 1994: it dumped out of November Election Day coverage at 9 pm before all the results were in, to keep from interfering with a syndicated sports talk show.
KBEQ (1030, KC): Expect Chuck Harder to hold onto this station as an affiliate, even if he has to buy it, which is not so far-fetched as it may sound.
KCXL (1140, KC): Got full-time operation this year and seems to be doing a decent job in making very limited resources stretch far. Should install stereo; it's a natural for the oldies format.
KFEZ (1190, KC): Says it's "easy listening" but it's really an old-style MOR station. And, when listening to it, you realize how good some of those artists were, and you begin wondering whether this won't be a hot format on FM in the next year or two.
KWIX (1230, Moberly; KRES, 104.7, Moberly): A tornado ripped off their roof on Independence Day. Did that stop KWIX and KRES? Of course not! They kept right on broadcasting emergency information that night and into the next day.
KFRU (1400, Columbia): Celebrated its 70th anniversary this year. It's still launching careers: Ellen Schenck, now at KMBZ, and Steve Moore, new PD at KSD(AM) in St. Louis.
KPRT (1590) and KPRS (103.3, both KC): Locally-owned and committed to community service, and, especially in the case of "Hot 103 Jamz", making it pay off in ever-stronger audience shares and revenues.

FM STATIONS:
KCUR (89.3, KC): Doing many of the things KKFI ought to be doing. Veteran Walt Bodine still holds forth for an hour each day with one of the most civil talk shows around. Weekend programming on KCUR is especially diverse and mind-expanding.
KOPN (89.5, Columbia): Its non-commercial-style AAA format is bringing record pledges and contributions to the station. Hourly news from Monitor

Radio is especially enjoyable.
KKFI (90.1, KC): Will the last hippie to leave the studios please turn out the lights? Of no relevance to anyone except maybe 12 people in the entire metro area. At least it's not gospel.
KBIA (91.3, Columbia): This is a National Public Radio outlet that staffs a "sales department." Very aggressive and even obnoxious about underwriting.
KCCV-FM (92.3) and KAYX (92.5): How will "Life 92" identify itself if it gets a translator in midtown Kansas City at 97.3 MHz? And will it be any better in terms of signal quality than what KCCV-FM provides? This whole deal is just weird.
KMXV (93.3, KC): It's turned into the station KBEQ-FM couldn't or wouldn't become before Q-104 gave up and went to "young country" three years ago. A solid contemporary-hit station.
KTLH (93.9, Columbia): Wants to be a Columbia station, but stuck its transmitter on the wrong side of a hill from Columbia. Now hoping a licensing move to Fayette and the resulting power increase will compensate. Hey, it's still like real-estate: location, location, location.
KFKF (94.1, KC): It's *always* been a country station, and patience keeps on paying off big. (I've traced the beginnings of the format on KFKF's predecessor, KCKN-AM/FM, to February 10, 1957.)
KZTO (95.7, ??): Kansas City wanna-be modern-rock station still can't get its new stick up. And when it does, it will find the modern-rock audience split up among KLZR, KISF, KQRC, and maybe even KYYS.
KXTR (96.5, KC): Still classical and appears to be making money. Still, how long can it last?
KFMZ (98.3, Columbia): This heritage rocker will probably be in a holding pattern while it awaits the outcome of FCC proceedings against its owner.
KQRC (98.9, KC): Needs to be careful about its contests (see the timeline), but counterprogramming well against potential modern-rock competitors while holding on to its hard-rock core.
KCFX (101.1, KC): This is one 70s station that will survive. One word: Chiefs. The football broadcasts will keep "The Fox" in the top five or six stations in the fall 1995 survey..
KPLA (101.5, Columbia): Its adult-contemporary format is awful, but it pays the bills for KFRU and KBXR to do real radio.
KYYS (102.1, KC): Another year, another program director. This one seems to realize the playlist will have to change and some modern-rock crossovers have begun to show up. A Beatles special this Christmas was especially well-executed, too. There may be hope for KY-102 yet.
KOQL (102.3, Columbia): Mid-Missouri gets another oldies station. Yawn. As though KJMO (100.1) in Jefferson City and KKCA (100.5) in Fulton didn't get in well enough already.
KQTP (102.9, Topeka): Some of the personalities from the last days of WHB(AM) as an oldies station have wound up here.
KKJO (105.1, St. Joseph): Has successfully carved out a niche as a hot-AC station, despite heavy competition from KC, and even does something no one else dares: a real 70s-oldies show, warts, disco, and all, every Saturday night.

KLZR (105.9, Lawrence): Needs to ask Santa for a transmitter site closer to Kansas City. Maybe the KZTO site near Linwood, Kansas will become available. "The Lazer" is an exceptionally listenable station and deserves a better KC metro-area signal.
KBXR (106.1, Columbia): The blues were dragging it down. New ownership refocused the station while keeping an unusually diverse playlist. Commercial success, though, has still been tough to get, even in a college town such as Columbia.
KCIY (106.5, Kansas City): On the upslope of a roller-coaster ride with its new "smooth jazz" format, but the history of 106.5 in Kansas City looks like a sine wave. Can "The City" beat this track record?
KTXY (106.9, Jefferson City): The closest thing to a contemporary-hit station for Mid-Missouri, fairly well-executed but still not quite the real thing.
KISF (107.3, Kansas City): Needs some stability. Gets credit for bringing a new format to the market; alas, KLZR does it better. Would a two-station modern-rock simulcast be too far-fetched?

RADIO WITH PICTURES:
The 1994 Fox-NBC affiliation swap changed the local TV news scene from a competitive three-station race to a four-horse race with the top two neck-and-neck in the lead.
The thoroughbreds remain KMBC-TV (9, ABC) and KCTV (5, CBS). Channel 9 generally wins most of its local-news time periods with 5 coming in a strong second.
Channel 5 should get the "Rip Van Winkle" award this year: it woke up, cleaned out the management ranks, added some new weather and sports talent, and turned its fine reporting staff loose. The best local story of the year came out of Channel 5: Stan Cramer followed school superintendent Walter Marks, on medical leave because of a bad back that forced him to use a cane, down to Florida. Cramer and his crew came back with video showing Marks hauling around lumber and walking around just fine at the site of a vacation home he was building. Even for the Kansas City school board, this was too much, and Dr. Marks was history.
Far behind on the track are Fox WDAF-TV "NewsChannel 4" and "NBC 41" KSHB-TV. KSHB-TV's management can't seem to figure out what to do, other than fire people. News director Mark Olinger was hired to provide a hip, Foxy newscast but wound up having to put together traditional newscasts. Olinger finally departed the station this month. Still, the visual style Olinger brought to the market has influenced all the other stations, whose 'casts aren't nearly as staid as they used to be.
There may be hope for WDAF-TV. It's sticking to basic news coverage with relatively little hype. It still has a popular personality in meteorologist Mike Thompson. And, with an election year coming up, it's well positioned with the market's best political reporter, Dave Helling. WDAF-TV has a good shot at making it back in the race again in 1996.
****
And that's it for 1995. More than forty people have written me during 1995 about the Mid-America Radio Watch and associated Web pages. That's too

many to thank individually, so here's a collective thank-you to all of you
for tips, encouragement, and feedback this year. A special thanks to
contributors from the Mid-Missouri and St. Louis areas in 1995; hey,
Kansas City, how about giving 'em some competition in '96?
